Message from the Chairman...

"Threads of Trust, Fabric of Success"

Dear Shareholders,

It is with immense pride and heartfelt gratitude that I reflect on our shared journey over the past year. UPGL continues to stand firm on the foundational pillars of quality, vertical integration, and operational excellence—embodied in our seamless, end-to-end textile capabilities, from spinning through weaving, dyeing, and fabric manufacturing.

Our guiding philosophy— "Produce the best, offer the right-quality material to the customer at the right price"—continues to drive every decision, fortified by our robust production capacity and unwavering commitment to our core values: transparency, competency, teamwork, commitment, and

superior service.

This year, we aim to further solidify our unification across the value chain, upraise product quality, and innovate through strategic investments in technology and market expansion.

India's Textile Economy: A Growth Engine Fuelling Our Potential

UPGL's aspirations are harmoniously aligned with the rising trajectory of India's textile sector:

- The textile industry contributes roughly 2.3% of India's GDP, accounts for around 13% of industrial production, and represents about 12% of the country's exports, while directly and indirectly employing over 35 million people.
- The sector's growth outlook is robust: projections indicate a **CAGR of approximately 10%**, with expectations for the industry's share of GDP to double to **5% by 2030**.
- Notably, the **technical textiles segment**—a key focus area for us—is expected to expand at an impressive **~15% CAGR**, presenting a significant growth opportunity
- Complementing this growth are substantial government interventions:

PM-MITRA Parks

- Under the Mega Integrated Textile Region and Apparel (PM-MITRA) scheme, seven mega-parks
 are being developed across India—Turquoise states including Tamil Nadu, Telangana, Gujarat,
 Karnataka, Madhya Pradesh, Uttar Pradesh, and Maharashtra
- These parks are expected to catalyse ₹70,000 crore in investment and generate 20 lakh (2 million) direct and indirect jobs over the coming years
- In fact, some states—such as Madhya Pradesh—have already secured investment commitments
 exceeding ₹16,000 crore, ahead of formal groundbreakings

Production-Linked Incentive (PLI) Scheme

- The PLI scheme for textiles, introduced in 2021, continues to drive capital influx—so far channelling ₹7,343 crore in investments, generating a turnover of ₹4,648 crore, and contributing ₹538 crore in exports
- The scheme has already approved **64 proposals**, with expectations to attract up to **₹25,000 crore** in additional investments and create **~250,000 jobs** within the next few years.
- Collectively, the PLI and PM-MITRA initiatives aim to steer ₹95,000 crore in textile sector investments and generate 2.25 million new jobs nationwide

As India advances toward its goal of becoming a global textile manufacturing hub—supported by favorable policies, rising domestic demand, and burgeoning export prospects—UPGL is ideally positioned to ride this wave of opportunity.

UPGL: Positioned to Lead and Thrive

With the vast industry tailwinds and policy momentum in place, UPGL is uniquely poised to seize emerging opportunities:

- **Production Prowess**: Our vertically integrated and technology-enabled setup positions us to scale rapidly and deliver premium fabrics with agility and precision.
- **Technical Textile Focus**: Given the soaring demand in specialized textile segments—driven by both domestic and global markets—our capabilities in innovation, quality, and responsiveness are key differentiators.
- **Policy Alignment**: Through PM-MITRA, PLI, and complementary schemes such as SAMARTH (skill building) and the National Technical Textiles Mission (NTTM), we benefit from a conducive ecosystem promoting modernization, exports, and skill enhancement

Strategic Focus for the Year Ahead

Building on this solid foundation, we are stepping into the new year with renewed ambition:

- Value-Chain Unification: We are intensifying efforts to further integrate and streamline our operations across the textile value chain, aiming to eliminate inefficiencies and foster synergies.
- **Elevated Product Excellence**: We remain steadfast in enhancing our product offerings—especially in the technical textiles domain—through rigorous quality assurance, research-driven refinement, and production precision.
- **Technology-Led Innovation**: Strategic investments in cutting-edge technologies—encompassing automation, analytics, and sustainable manufacturing practices—will fortify our agility, productivity, and competitiveness across markets.

Charting Our Path Forward

With India's textile industry steering toward a future defined by scale, innovation, and sustainability, UPGL is ready to align and lead:

- We remain focused on expanding production capabilities, enhancing our product offerings both domestically and abroad.
- Our investments in modern technology and agile operations strengthen our ability to deliver premium fabrics at competitive value.
- As the industry evolves—with increasing emphasis on technical textiles, improved infrastructure, and export diversification—it is our vision to grow in lockstep with broader national progress.

To our valued shareholders, partners, and team—your trust and belief fuel our ambition. Together, we will elevate UPGL—not only in terms of shareholder value but also as a defining force in India's textile renaissance.

In unity and action, we stride forward—poised to enhance UPGL's legacy and India's rise as a global textile powerhouse.

Warm regards,

Gagan Mittal

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The Management Discussion and Analysis report presents a comprehensive review of United Polyfab Gujarat Limited's financial performance for the fiscal year ended March 31, 2025, alongside an informed overview of the spinning industry. It highlights key trends shaping the sector, including Gujarat's newly launched Textile Policy 2024, which introduces attractive incentives—such as capital subsidies (10−35% of eligible fixed capital investment), interest subsidies (5−7% over 5−8 years), power subsidies (₹1 per unit), and payroll assistance—aimed at encouraging modernization, sustainability, and value-chain integration.

A notable advancement under this policy is the inclusion of spinning units—previously excluded—bringing UPGL and similar manufacturers into the ambit of these benefits. Simultaneously, industry stakeholders face pressures such as rising raw material costs driven by increased cotton MSP, coupled with global headwinds like steep U.S. tariffs targeting textile exports.

Against this backdrop, UPGL's strategy emphasizes leveraging new state and central government incentives, enhancing operational efficiencies, and exploring non-U.S. markets to mitigate adverse macroeconomic effects. This section spotlights how the Company is responding to these developments, articulating its financial outcomes, strategic adaptations, and resilience amid evolving industry dynamics.

INDIAN ECONOMIC OVERVIEW:

India's economy remained remarkably resilient in the face of global disruptions. Strong domestic consumption, higher government spending on infrastructure and an accommodative monetary policy powered this growth. Retail inflation eased to 4.6% in FY 2024-25, the lowest since FY 2018-19. This led the Reserve Bank of India (RBI) to implement its first rate cut in five years to 6%, thereby supporting continued growth.10 The financial services sector remained stable, supported by well-capitalised banks and a solid regulatory framework. Government initiatives, such as 'Make in India' spurred domestic manufacturing growth, while long-term prospects in manufacturing and technology attracted strong foreign investment. The expansion of India's digital economy, including e-commerce and digital payments, further boosted economic activity. Imported commodity prices in India eased in FY 2024-25, with the World Bank's Commodity Markets Outlook projecting a 5.1% decline in 2025 driven largely by falling crude oil and metals prices, which kept domestic inflationary pressures anchored. Cotton prices in India averaged around INR 7,800 per quintal in FY 2024-25, supported by lower production and an INR 589 MSP increase in May 2025

that set prices at INR 7,710–8,110 per quintal.11 India's manufacturing sector grew at 4.8% in FY 2024-25, up from 4.7% in FY 2023-24. This contributed to 7.4% GDP growth in the fourth quarter of FY 2024-25.12 The government increased budget allocations to support manufacturing, with FDI in the sector reaching USD 184 Billion—a 90.5% rise over the past decade—fueled by production-linked incentive schemes.13 Over the past six financial years, total FDI inflows amounted to USD 464.54 Billion.14 With robust physical and digital infrastructure, India is now well-positioned to expand the share of the manufacturing sector in the economy and strengthen its role in global supply chains.

INDIAN TEXTILE MARKET:

The textile and apparel (T&A) market in India has been on an upward trajectory, growing from USD 106 Billion in FY 2019-20 to USD 147 Billion in FY 2024-25, at a CAGR of 7%. With a contribution of approximately 2.3% to the national GDP in FY 2024-25 and accounting for 3.91% of global textile and apparel trade, India remains one of the world's largest textile markets. Textile and apparel exports surged by 6%, reaching USD 36.6 billion in FY 2024-25, despite soft festive demand and competitive imports from Bangladesh. During the same period, exports of cotton-based products (yarn, fabrics, made-ups and handloom) grew by 3.19% to USD 12.056 Billion. Gujarat, Maharashtra, Tamil Nadu, Punjab, Uttar Pradesh and West Bengal continue to dominate India's textile production. However, fluctuating cotton prices averaging INR 7,800 per quintal in FY 2024-25 added cost pressures, especially for spinners and weavers. Nevertheless, India's abundant rawmaterial base with a cotton output of 301.75 lakh bales in FY 2024-25 provided a firm foundation for competitive manufacturing.2 To meet the Ministry of Textiles' target of reaching USD 250 Billion by FY 2030-31, the market will need to grow at a CAGR of 9% onwards.

Threats:

- Global Market Volatility: Economic slowdowns, geopolitical tensions, and trade barriers can impact exports and input costs
- Intense Industry Competition: Price and quality pressures from global players, especially in textiles and paper
- Raw Material Price Fluctuations: Cotton, pulp, and chemicals are subject to price volatility, affecting margins
- Regulatory and Environmental Compliance Risks: Stricter norms, particularly in water-intensive sectors, can lead to cost and operational pressures
- Currency Fluctuations: Affects export competitiveness and profitability

RISKS AND CONCERNS:

United Polyfab Gujarat Limited operates in a dynamic and competitive textile landscape marked by several notable risks that could affect operational and financial stability

- Raw material related Risk: Raw material being a major cost of production, Company's operations and profitability are significantly dependent on price and timely availability of raw materials used in production process. The primary raw materials for our textile operations are raw cotton and spandex yarn.
 - Cotton: Being an agricultural commodity, prices of cotton are affected by a range of factors like changes in weather conditions affecting sowing, government policies and regulations. Governing taxes, tariffs, duties, subsidies, import and export restrictions on agricultural commodities, overall supply situation in the world, etc. all these influence pricing and demand supply situation in this industry. The planting of certain crops versus other uses of agricultural resources, the location and size of crop production, volume and types of imports and exports, etc. determine availability of cotton.

The Company has an experienced team for procurement of raw cotton with a deep understanding of this natural fibre. As a Company, we have adopted various processes whereby we are expanding our sources across different supply chain intermediaries and other stake holders. Cotton being an international commodity, our focus remains optimizing domestic and international opportunities to create a competitive edge of sourcing based on landed cost.

• Market related Risk: The Company's performance is dependent upon the demand situation in individual business segments. A slowdown in demand may lead to decline in production/ sales and thus impact profitability. The market demand is also dependent on global economic and international trade dynamics. The USA reciprocal tariff being negotiated can have a major impact international trade directions and demand. This is likely to impact textile trade in a major way.

In the domestic market as well, the Company faces competition from organized big players and the unorganized small and fragmented players. The Company has developed a good reputation amongst the domestic traders, garment manufacturers and brands due to quality, design capabilities and cost. Further, the Company has started building relationships with large retailers (physical and online) to supply fabrics and garments. The Company's operations are now getting scaled up and it is fully prepared to meet larger

volumes. The Company is confident that it would regain a preferred supplier status for big brands and retailers given the quality, design capability and the capacity to provide large volumes on a consistent basis

- **Financial Risk:** United Polyfab Gujarat Limited maintains structured banking facilities comprising a term loan from banks and working capital limits to support its operations. As part of its financial discipline, UPGL is required to periodically meet interest obligations on both the term loan and working capital facilities, while also adhering to the repayment schedule for the term loan as per the terms agreed with its lenders.
- Information Technology Risk: Information and Technology being the major backbone of Company's overall operation and data storage/ analysis, is another key risk area identified by the Company and several measures are being taken to strengthen the same and mitigate the risk associated with this.

Some of the improvements done during the financial year are:

- Old and obsolete IT systems are replaced with new systems. (Ongoing process)
- Network infrastructure is being hardened to mitigate security threats (ongoing process).
- Multi-factor Authentication and MAC address binding are enforced, as applicable.
- Implemented stronger password management system across applications and devices.
- Network bandwidth is continuously optimized to ensure seamless access to applications/database from all locations.
- Government Policies: The company's business also has a threat of sudden change in government policies like policies relating to export and import of certain products, change in customs duty structure, change in export incentives, change in GST rates, etc. Similarly other government policies such as policies relating to labour etc. also have their impact in overall competitiveness of the Company as compared to the competing countries in the international markets. The Company monitors the changes in government policies on day-to-day basis and forms appropriate strategies to mitigate the impact on the Company while ensuring adequate compliances.

INTERNAL CONTROL AND ADEQUACY

The Company has in place a well-established framework of internal control systems which are commensurate with the size and complexity of its business. These controls and protocols are designed to safeguard assets, enhance operational efficiency and ensure accuracy in both operational processes and financial disclosures. The Company has an independent internal audit in coordination with the Audit Committee, continuously monitors business activities and promptly notifies the Management Board of any discrepancies. Insights from these reviews inform the Company's risk-assessment strategies, which identify, evaluate and mitigate potential threats. These internal controls support regulatory compliance, deter fraud and maintain transparency factors that help attract investment, bolster stakeholder confidence and drive sustainable growth function covering major areas of operations and the same is carried out by an external Chartered Accountant firm engaged for this purpose.

In this Management Discussion and Analysis, statements that reflect the Company's objectives, projections, estimates, and expectations are "forward-looking statements" under applicable laws and regulations. Such statements are based on management's current beliefs and projections and are typically identified by terms such as **anticipate**, **expect**, **estimate**, **intend**, **plan**, **believe**, **project**, or similar expressions. n. Financial Instruments

i. Financial Assets

A. Initial Recognition and Measurement

All Financial Assets are initially recognised at fair value. Transaction costs that are directly attributable to the acquisition or issue of Financial Assets, which are not at Fair Value Through Profit or Loss, are adjusted to the fair value on initial recognition. Purchase and sale of Financial Assets are recognised using trade date accounting. However, trade receivables that do not contain a significant financing component are measured at transaction price.

Subsequent Measurement

a) Financial Assets measured at Amortised Cost (AC)

A Financial Asset is measured at Amortised Cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the Financial Asset give rise to cash flows on specified dates that represent solely payments of principal and interest on the principal amount outstanding.

b) Financial Assets measured at Fair Value Through Other Comprehensive Income (FVTOCI)

A Financial Asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling Financial Assets and the contractual terms of the Financial Asset give rise on specified dates to cash flows that represents solely payments of principal and interest on the principal amount outstanding.

c) Financial Assets measured at Fair Value Through Profit or Loss (FVTPL)

A Financial Asset which is not classified in any of the above categories are measured at FVTPL. Financial assets are reclassified subsequent to their recognition, if the Company changes its business model for managing those financial assets. However, dividend on such equity investments are recognised in Statement of Profit and loss when the Company's right to receive payment is established.

. Impairment of Financial Assets

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of Financial Assets other than those measured at Fair Value Through Profit and Loss (FVTPL), limited to measurement trade receivables. Expected Credit Losses are measured through a loss allowance at an amount:

- equal to 20 % of those receivables who are outstanding beyond 180 days (limited to within 365 days) of the bill date;
- equal to 50 % of those receivables who are outstanding beyond 365 days (limited to within 720 days) of the bill date;
- equal to 100% of those receivables who are outstanding beyond 720 days (expected credit losses that result from all possible default events over the life of the financial instrument).

For Trade Receivables the Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical default rates to determine

impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward-looking estimates are analyzed.

ii. Financial Liabilities

A. Initial Recognition and Measurement

All Financial Liabilities are recognized at fair value and in case of borrowings, net of directly attributable cost. Fees of recurring nature are directly recognized in the Statement of Profit and Loss as finance cost.

B. Subsequent Measurement

Financial Liabilities are carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

iii. Derecognition of Financial Instruments

The Company derecognizes a Financial Asset when the contractual rights to the cash flows from the Financial Asset expire or it transfers the Financial Asset and the transfer qualifies for derecognition under Ind AS 109. A Financial liability (or a part of a Financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

Offsetting

Financial Assets and Financial Liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Company has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

o. Non Current Asset Held for Sale

Non current asset or disposal groups comprising of asset and liabilities are classified as 'held for sale' when all the following criteria are met:

- i) decision has been made to sell,
- ii) the asset are available for immediate sale in its present condition,
- iii) the asset are being actively marketed and
- iv) sale has been agreed or is expected to be concluded with in 12 months of the balance sheet.

Subsequently, such non current assets and disposal groups classified as 'held for sale' are measured at the lower of its carrying value and fair value less costs to sell. Non Current assets held for sale are not depreciated or amortised.

We have audited the internal financial controls over financial reporting of UNITED POLYFAB GUJARAT LIMITED as of March 31, 2025 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based the internal control over financial reporting criteria established by the Company.

Considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Control over Financial Reporting issued by the "Institute of Chartered Accountants of India". These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and

dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2025, based internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

(n) Financial Instruments

i. Financial Assets

A. Initial Recognition and Measurement

All Financial Assets are initially recognised at fair value. Transaction costs that are directly attributable to the acquisition or issue of Financial Assets, which are not at Fair Value Through Profit or Loss, are adjusted to the fair value on initial recognition. Purchase and sale of Financial Assets are recognised using trade date accounting. However, trade receivables that do not contain a significant financing component are measured at transaction price.

B. Subsequent Measurement

a) Financial Assets measured at Amortised Cost (AC)

A Financial Asset is measured at Amortised Cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the Financial Asset give rise to cash flows on specified dates that represent solely payments of principal and interest

on the principal amount outstanding.

b) Financial Assets measured at Fair Value Through Other Comprehensive Income (FVTOCI)

A Financial Asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling Financial Assets and the contractual terms of the Financial Asset give rise on specified dates to cash flows that represents solely payments of principal and interest on the principal amount outstanding.

c) Financial Assets measured at Fair Value Through Profit or Loss (FVTPL)

A Financial Asset which is not classified in any of the above categories are measured at FVTPL. Financial assets are reclassified subsequent to their recognition, if the Company changes its business model for managing those financial assets. Changes in business model are made and applied prospectively from the reclassification date following the changes in business model in accordance with principles laid down under Ind AS 109 – Financial Instruments.

Other Equity Investments

All other equity investments are measured at fair value, with value changes recognised in Statement of Profit and Loss, except for those equity investments for which the Company has elected to present the value changes in 'Other Comprehensive Income'. However, dividend on such equity investments are recognised in Statement of Profit and loss when the Company's right to receive payment is established.

D. Impairment of Financial Assets

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of Financial Assets other than those measured at Fair Value Through Profit and Loss (FVTPL). Expected Credit Losses are measured through a loss allowance at an amount:

- equal to 20 % of those receivables who are outstanding beyond 180 days (limited to within 365 days) of the bill date;
- equal to 50 % of those receivables who are outstanding beyond 365 days (limited to within 720 days) of the bill date:
- equal to 100% of those receivables who are outstanding beyond 720 days (expected credit losses that result from all possible default events over the life of the financial instrument).

For Trade Receivables the Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

ii. Financial Liabilities

A. Initial Recognition and Measurement

All Financial Liabilities are recognised at fair value and in case of borrowings, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

B. Subsequent Measurement

Financial Liabilities are carried at amortised cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

iii. Derecognition of Financial Instruments

The Company derecognizes a Financial Asset when the contractual rights to the cash flows from the Financial Asset expire or it transfers the Financial Asset and the transfer qualifies for derecognition under Ind AS 109. A Financial liability (or a part of a Financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

iv. Offsetting

Financial Assets and Financial Liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Company has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realize the asset and settle the liability simultaneously.
