MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1. INDUSTRY STRUCTURE AND DEVELOPMENT

The global seed industry forms an integral part of the agricultural value chain and plays a critical role in supporting food security, agricultural productivity and sustainable farming. The industry continues to evolve on account of advancements in plant breeding, biotechnology, hybridisation, seed treatment technologies, climate-resilient varieties, precision agriculture and digital farming solutions.

The long-term demand for quality seeds remains supported by population growth, increasing food consumption, limited availability of arable land, changing climatic conditions and the need to improve agricultural productivity. The increasing adoption of hybrid and improved varieties is also contributing to the development of the organised seed industry.

India continues to be one of the important agricultural markets globally, with the seed industry benefiting from increasing awareness among farmers regarding the advantages of quality seeds, improvement in seed replacement rates, expansion of irrigation facilities, increasing mechanisation and adoption of scientific farming practices.

The Indian agricultural sector remained resilient during FY 2025-26. As per the First Advance Estimates released by the Ministry of Agriculture & Farmers Welfare, Kharif foodgrain production for 2025-26 was estimated at approximately 1,733.30 lakh metric tonnes, higher than the corresponding estimate for the previous year. Rice and maize also recorded encouraging production estimates, reflecting the resilience of Indian agriculture.

The Government continues to support the agricultural sector through various initiatives relating to agricultural modernisation, irrigation, crop insurance, digital agriculture, farmer welfare, rural infrastructure and productivity enhancement. Such initiatives, together with increasing private-sector participation in research and development, are expected to support the long-term development of the Indian seed industry.

The Company's principal business is seasonal agricultural seeds and the Company caters to the requirements of farmers across various crop segments and geographical markets. Demand for the Company's products is influenced by agricultural acreage, monsoon and weather conditions, irrigation availability, cropping patterns, commodity prices and farmer purchasing behaviour.

The Company continues to focus on quality improvement, strengthening its distribution network, increasing farmer outreach, expanding its geographical presence and developing products suited to diverse agro-climatic conditions. The Company believes that the long-term prospects of the seed industry remain positive, supported by the growing need for higher agricultural productivity and efficient utilisation of available agricultural resources.

2. OPPORTUNITIES AND OUTLOOK

The Indian agricultural sector continues to present substantial opportunities for growth, creating a favorable environment for the seed industry. Rising population levels, increasing food consumption, shrinking cultivable land availability, and growing pressure on agricultural productivity are expected to drive long-term demand for quality seeds.

By 2050, the world will have 10 billion people, with Indian accounting for 1.73 billion (Source: United Nations). To feed India's growing population, the yield per hectare needs to increase

significantly, especially keeping in mind the declining arable land in India. Further, India's agricultural yield is far lower as compared to global averages. Extreme weather coupled with low penetration of high-yielding hybrid seeds, lack of awareness of modern agricultural technologies and inefficient use of agrochemicals are some of the factors behind the low yield. This presents a significant opportunity for the Company's Crop Protection and Hybrid Seeds business along with opportunities for expanding crop advisory and digital offerings.

Innovations in seeds, crop protection and digital farming solutions can go long way in addressing the productivity problems affecting Indian agriculture. It will also help farmers get good commodity prices, encouraging them to spend on qualitative inputs for achieving higher yields.

Seed is the first and best hope a farmer has and forms the foundation of "Socio-Economic Empowerment and Development." Over the last decade, the Indian seed industry has grown significantly, driven by both private and public sector participation. Valued at \$6.3 billion in 2022, the market is projected to reach \$16.5 billion by 2030, expanding at a compound annual growth rate (CAGR) of approximately 12.4%.

During the year The Company has started **In-House Research and Development** of new Researched variety that is Better in production Quantity, and saving farmers various fertilizer Expenses.

Further, during the year The Company has awarded as "**Madhya Pradesh Brand Leadership Award 2025**" as "**The Oswal seeds is a best agriculture seeds Product Manufacturer**" Brand in Seeds Category That shows Board and Management Efforts for Company As well as Farmers Growth.

Together, these accomplishments highlight Shreeoswal's **commitment to innovation, farmer empowerment, and long-term growth** in India's agricultural sector.

The seed companies cannot rely only on in-house, R&D for the most promising innovations, especially in the areas outside their traditional purview. Instead, they need to enrich their innovation pipelines by collaborating with digital startups and other specialized companies in biotech and Agri Tech space on the lines of pharmaceutical industry. This will not only help in sharing the costs, and risks of innovation allowing them to leverage the expertise and innovation capabilities that they lack. These collaborative models can be co-development partnerships with equals, deals to help smaller companies fund their research in specific fields, and collaborations with universities, government institutions and NGOs Digitization is the now the reality for the agriculture industry. If the seed companies need to meet the changing demands of farmers, regulators and consumers, they need to focus on developing cross-functional capabilities in data, analytics, and digital technologies.

The Company's growth opportunities are supported by several structural factors, including:

Increasing Adoption of Quality Seeds

Farmers are increasingly recognizing the economic benefits of certified and improved seed varieties. Higher germination rates, better crop stand establishment, disease resistance,

improved yield potential, and enhanced profitability continue to encourage seed replacement and adoption of quality seeds.

Expansion of Irrigation Infrastructure

Government investment in irrigation projects, micro-irrigation systems, watershed development programs, and rural infrastructure is expected to reduce dependence on monsoon rainfall and improve agricultural productivity. Enhanced irrigation coverage creates greater demand for quality seed varieties capable of maximizing crop output.

Government Support for Agriculture

The Government of India continues to prioritize agricultural development through various initiatives aimed at increasing farm income, improving productivity, promoting sustainable agriculture, and strengthening food security. Programs relating to crop insurance, agricultural credit, digital agriculture, farmer welfare, and rural development are expected to support long-term growth in seed demand.

Technological Advancements

Advancements in plant breeding, seed treatment technologies, biotechnology, digital farming Solutions, weather forecasting tools, and precision agriculture are creating opportunities for Seed companies to develop superior products that meet evolving farmer requirements.

Growing Demand for Climate-Resilient Varieties

Changing climatic conditions have increased demand for drought-tolerant, disease-resistant, heat-tolerant, and stress-resistant crop varieties. Companies capable of developing such varieties are expected to benefit from increasing market acceptance.

Distribution Network Expansion

The Company continues to strengthen its dealer network, distributor relationships, and farmer outreach programs. Expansion into new geographical markets provides opportunities for increasing market penetration and enhancing brand recognition.

Research and Product Development

The Company remains focused on introducing improved seed varieties tailored to regional agricultural requirements. Continuous investment in product development and quality enhancement is expected to strengthen competitive positioning and support sustainable growth.

Considering these favorable industry dynamics, the long-term outlook for the Company's seed business remains positive. The Company is well-positioned to benefit from increasing demand for quality seeds and evolving agricultural practices across India.

3. THREATS

Despite favorable long-term prospects, the seed industry remains exposed to various external and internal risks that may influence business performance.

Climatic and Weather Risks

Since agricultural production is heavily dependent upon climatic conditions, adverse weather events such as delayed monsoons, deficient rainfall, droughts, floods, hailstorms, cyclones, heat waves, and unseasonal rainfall can significantly affect sowing activities and seed demand.

Agricultural Commodity Price Volatility

Farmers' purchasing decisions are directly influenced by prevailing crop prices. Significant fluctuations in commodity prices may alter cropping patterns and reduce investment in quality seeds.

Competitive Intensity

The seed industry is highly competitive with participation from multinational corporations, established domestic companies, regional players, and unorganized sector participants. Intense competition may result in pricing pressures and margin challenges.

Regulatory Changes

The industry is subject to various regulations governing seed certification, quality standards, labeling requirements, intellectual property rights, environmental regulations, and agricultural policies. Changes in regulatory frameworks may affect business operations and compliance costs.

Pest and Disease Outbreaks

Large-scale pest infestations, crop diseases, and biological threats can adversely impact crop cultivation and influence demand patterns for specific seed varieties.

Input Cost Inflation

Increases in procurement, processing, packaging, logistics, labour, energy and other operating costs may affect margins if such increases cannot be adequately absorbed or passed on to customers.

Supply Chain Disruptions

Any disruption in procurement, transportation, storage, processing, or distribution activities may impact operational efficiency and customer service levels.

The Company continuously monitors these risks and undertakes proactive measures through geographical diversification, inventory planning, quality management systems, product portfolio expansion, and strong farmer engagement programs.

The presence of multiple business segments enables the Company to diversify its revenue base and reduce dependence on a single product category.

Pursuant to applicable provisions of the Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, the Company provides details of significant changes in key financial ratios along with explanations thereof in the Annual Report.

	F.Y. 2025-26	F.Y. 2024-25	Change In Ratio	Variance
Debtors Turnover	19.11	16.07	3.04	18.93%
Inventory Turnover	3.33	4.51	-1.18	-26.16%
Interest Coverage Ratio	3.91	5.11	-1.20	-23.48%
Current Ratio	1.64	1.50	0.14	9.33%
Debt Equity Ratio	0.0112	0.0042	0.0070	166.67%
Operating Profit Margin (%)	3.82%	3.04%	0.78	25.66%
Net Profit Margin (%)	3.65%	4.10%	-0.45	-10.98%

Reason for changes more than 25% in financial ratio

Inventory Turnover: The Inventory Turnover Ratio decreased from **4.51 times in FY 2024-25** to **3.33 times in FY 2025-26**, representing a decrease of approximately **26.16%**.

The decrease was primarily attributable to a higher level of inventory maintained during the year in anticipation of seasonal demand and to ensure adequate availability of seed products. The increase in inventory levels, relative to the corresponding movement in cost of goods sold, resulted in a lower inventory turnover ratio during the year.

Debt-Equity Ratio: The Debt-Equity Ratio increased from 0.0042 in FY 2024-25 to 0.0112 in FY 2025-26. The increase was primarily due to an increase in borrowings during the year in comparison with the previous year, while the Company's equity base remained relatively stable. Notwithstanding the increase in the ratio, the overall level of financial leverage of the Company remained low.

Operating Profit Margin: The Operating Profit Margin increased from **3.04% in FY 2024-25 to 3.82% in FY 2025-26**, representing an improvement of approximately **25.66%**. The improvement was primarily attributable to better operating efficiency, improved cost management and optimisation of operating expenses during the year. The Company continued to focus on operational efficiencies and effective management of its procurement, processing and other operating costs, which contributed to the improvement in operating margins.

The remaining ratios did not undergo variations exceeding the prescribed threshold requiring specific explanation, except where otherwise disclosed in the Financial Statements.

The Company continuously monitors key financial and operational indicators to ensure effective utilisation of resources and sustainable financial performance.

11. RETURN ON NET WORTH

Return on Net Worth ("RONW") is an important measure of the Company's ability to generate earnings from shareholders' funds.

The RONW of the Company for FY 2025-26 was **6.42%**, as compared with **6.64%** during FY 2024-25.

The marginal reduction in RONW reflects the movement in profitability and shareholders' funds during the year. The Company continues to focus on improving operational performance, efficient capital utilisation and sustainable value creation for its shareholders.

Detailed financial information and relevant calculations are provided in the Financial Statements and Notes forming part of this Annual Report.

ANNEXURE B

To the Independent Auditors' Report on
Standalone Financial Statements of **SHREEOSWAL SEEDS AND CHEMICALS LIMITED**
(Referred to our report of even date) Report on the Internal Financial Controls under Clause
(i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of SHREEOSWAL SEEDS AND CHEMICALS LIMITED ("the Company") as of March 31, 2026 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

MEANING OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting

principles. A company's internal financial control over financial reporting includes those policies and procedures that

- 1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- 2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- 3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2026, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

1.2 BASIS OF PREPARATION

COMPLIANCE WITH IND-AS

CURRENT / NON-CURRENT CLASSIFICATION

All assets and liabilities have been classified and disclosed as current or non-current as per the Company's normal operating cycle and other criteria set out in division II of Schedule III of the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as up to twelve months for the purpose of current or non-current classification of assets and liabilities.

BASIS OF MEASUREMENT

The Company's financial statements have been prepared on a historical cost basis, except for the assets and liabilities that require measurement at fair value in accordance with Ind AS. The financial statements are presented in Indian Rupees and all values are rounded to the nearest lakhs (INR 00,000), except otherwise indicated.

1.3 SUMMARY OF MATERIAL ACCOUNTING POLICIES

a. Key accounting estimates and judgments

The preparation and presentation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities on the date of the financial statements and reported amounts of revenues and expenses during the period.

Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods. Accounting estimates could change from period to period. Any revision to accounting estimates is recognized prospectively in the current and future periods, and if material, their effects are disclosed in the financial statements. Actual results could differ from the estimates. Any difference between the actual results and estimates are recognized in the period in which the results are known/materialize.

Information about critical judgments in applying accounting policies, as well as estimates and assumptions that have the most significant effect to the carrying amounts of assets and liabilities within the next financial year, are included in the following notes:

- I. Measurement of defined benefit obligations
- II. Measurement and likelihood of occurrence of contingencies
- III. Recognition of deferred tax assets

b. Inventories

Inventories are valued at lower of cost and net realizable value (except as otherwise stated) on an item-by-item basis, as under:

Raw materials, packing materials, stores and spares: Cost of inventory comprises all costs of purchase, duties and taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventories to their present location and condition. Raw materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on a first-in first-out formula.

Work-in-progress and finished goods: Cost includes direct materials and costs of conversion in the form of labour and a systematic allocation of fixed and variable production overheads. It also includes other costs which are incurred in bringing the inventories to their present location and condition. The allocation of fixed production overheads is based on normal capacity of production. Cost is determined on first-in first-out formula. The expected scrap value is deducted from the cost to arrive at the net cost of inventories. However, cost of inventories neither includes abnormal amounts of wasted material nor any scrap realizations there from.

By products and scrap are recognized at their net realizable value.

Stock-in-trade: Cost includes cost of purchases, duties and taxes (other than those subsequently recoverable from authorities) and other costs which are incurred in bringing the inventories to their present location and condition. Cost is determined on a first-in first-out formula.

Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Cost of agricultural produce is deemed to be the fair value on the date of rise.

Cost of finished goods and work-in-progress include cost of conversion and other costs incurred in bringing the inventories to their present location and condition.

c. Taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Current income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

The tax expenses for the period comprise of current tax and deferred tax. The Company exercises judgment in computation of current tax considering the relevant rulings and reassesses the carrying amount of deferred tax assets at the end of each reporting period

d. Property, plant and equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses, if any. Cost comprises of purchase price net of trade discounts and rebates, non-refundable duties

and taxes, any directly attributable cost of bringing the asset to its working condition for its intended use. Cost also includes borrowing cost directly attributable to acquisition / construction of a qualifying asset up to the date the asset is ready for its intended use. Subsequent expenditure on fixed assets is capitalized only if such expenditure results into an increase in the future benefits from such asset beyond its previously assessed standard of performance.

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognized.

Capital work-in-progress comprises the cost of property, plant and equipment that are yet not ready for their intended use at the balance sheet date. The depreciable amount of a depreciable fixed asset is allocated on a systematic basis to each accounting period over the useful life of the asset. Management's estimate of useful life, which is duly supported by technical evidence, is as stipulated in Schedule II to the Companies Act, 2013. The useful life is for the whole of the asset, except where cost of a part of the asset is significant to total cost of the asset and useful life of that part is different from the useful life of the remaining asset, useful life of that significant part ("component") is determined separately and the depreciable amount of the said component is allocated on a systematic basis to each accounting period during the useful life of the asset.

In arriving at the depreciable amount, residual value in case of certain assets are considered to be more than 5% of the original cost, this estimate of residual value is duly supported by technical advice. Depreciation on assets acquired during the year is calculated on a pro-rata basis from the date of addition. Similarly, depreciation on assets sold, discarded, demolished or destroyed during the year is also calculated on a pro rata basis up to the date on which such asset has been sold, discarded, demolished or destroyed. Depreciable assets costing up to Rupees 1,000/- are depreciated fully in the year of acquisition. The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

e. Leases

IND-AS 116 "Leases" is mandatory for the accounting period commencing on and from 1st April 2019, and has replaced the existing IND-AS 17 relating to leases. We have applied the modified retrospective approach, for which no significant adjustments were required to be made to the retained earnings as at 1st April 2019. However, no material lease has been recognized for the year ending March 31, 2026.

f. Employee benefits

Short term employee benefits

All employee benefits which fall due wholly within twelve months after the end of the period in which employee renders the related service are classified as short-term employee benefits. Undiscounted value of short term benefits such as salaries, wages, bonus and ex-gratia are recognized in the period in which the employee renders the related service.

Defined Contribution Plans:

The Company's Employee's Provident Fund scheme, Employee's State Insurance Scheme and Employee's Superannuation Scheme are defined contribution plans. The Company's contribution payable under the schemes is recognized as an expense in the statement of profit and loss during the period in which the employee renders the related service.

Defined benefit plan Gratuity

The Company operates a defined benefit gratuity plan, which requires contributions to be made to a separately administered fund. The defined benefit plan surplus or deficit on the balance sheet comprises the total for each of the fair value of plan assets less the present value of the defined liabilities. The cost of

providing benefits under the defined benefit plan is determined based on independent actuarial valuation using the projected unit credit method. The gratuity liability is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plan, is based on the market yield on government securities as at the balance sheet date.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognized in profit or loss on the earlier of:

The date of the plan amendment or curtailment, and

The date that the Group recognizes related restructuring cost

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset.

The Company recognizes the following changes in the net defined benefit obligation as an expense in the statement of profit and loss: Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and Net interest expense or income

As per Actuarial Valuations as on 31st March, 2026 and recognised in the financial statements in respect of Employee Benefit Schemes: The liabilities arising in the Defined Benefit Schemes are determined in accordance with the advice of independent, professionally qualified actuaries, using the projected unit credit method as at year end.

g. Earnings Per Share

Earnings per share (EPS) is calculated by dividing the net profit for the year attributable to the equity shareholders by weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and weighted average number of shares outstanding during the period is adjusted for the effects of all diluted potential equity shares.

h. Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators. No such asset was impaired during the reporting period..

i. Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the

Company expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

j. Revenue recognition

Revenue is measured at the fair value of consideration received or receivable. Amounts disclosed as revenue are inclusive of excise duty and net of returns, trade discount or rebates. The Company recognizes revenue when the amount of revenue can be reliably measured and it is probable that future economic benefits will flow to the Company.

Revenue from Sale of goods

Revenues from sales of goods are recognized upon transfer of control of promised goods to customer, which are generally on dispatch of goods and the customer has accepted the products in accordance with the agreed terms. There is no continuing managerial involvement with the goods and the Company retains no effective control of goods transferred to a decree usually associated with ownership. Revenue from sales of goods is based on the price quoted in the market or price specified in the sales contracts.

k. Other Income

Other Income is comprised primarily of interest income, discounts and lease rent. Interest income is recognized on accrual basis.

l. Financial Assets

Purchase and sale of Financial Assets are recognised using trade date accounting. Trade receivables that do not contain a significant financing component are measured at transaction price.

The Company has elected to account for its investments in subsidiaries, associates and joint venture at cost less impairment loss (if any). All other equity investments are measured at fair value, with value changes recognised in Statement of Profit and Loss.

For financial guarantee contracts at initial recognition, financial guarantee contracts are measured at fair value, which, in the absence of an active market, is determined based on the present value of future commission income using the Company's incremental borrowing rate. Subsequently, financial guarantee liabilities are measured at the higher of (i) the amount of the loss allowance determined in accordance with the expected credit loss model and (ii) the amount initially recognized less cumulative income recognized under Ind AS 115 – Revenue from Contracts with Customers. The related income is deferred and recognized in the statement of profit and loss over the term of the guarantee using the effective interest method. Financial guarantee receivables are classified and measured at **amortised cost**, as they are held within a business model to collect contractual cash flows that are solely payments of principal and interest.

Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortized cost

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit and loss or other comprehensive income.

Derecognition of financial assets

A financial asset is derecognized only when

- The Company has transferred the rights to receive cash flows from the financial asset or

- Retains the contractual rights to receive the cash flows of the financial asset but assumes a contractual obligation to pay cash flows to one or more recipients.

Where the Company has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognized. Where the Company has not transferred substantially all risks and rewards of ownership of financial asset, the financial asset is not derecognized.

Where the Company has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognized if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognized to the extent of continuing involvement in the financial asset.

m. Borrowings

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as the effective interest rate amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortization is included as finance cost in the statement of profit and loss.

n. Cash and Cash Equivalents

Cash and cash equivalents comprise of cash on hand, cash at banks, short-term deposits and short-term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

o. Litigations

The nature of business of the company is agro based commodities and legal pending cases against the company at district court are due to Non-Germination of Agro Seeds or failure of Seeds Sample and which may be happened by any of the one condition i.e. Climate changes, Soil Issue, excess or less water used while irrigation of crop, Non-Germination and farmer negligence which is not the fault of the company. Further quantum of the amount is not ascertainable and nature of the cases are in criminal hence there was no impact on financial of the Company.

p. Financial Liabilities

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts are determined to approximate fair value due to the short maturity of these instruments.

q. Offsetting

Financial Assets and Financial Liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Company has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

r. Contingent Liabilities

Disclosure of contingent liability is made when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources embodying economic benefits will be required to settle or a reliable estimate of amount cannot be made.

s. Provisions

The timing of recognition and quantification of the liability (including litigations) requires the application of judgement to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

Notes to Standalone Financial Statements

Note No:40 Financial Risk Management

(i) Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Credit risk primarily relates to trade and other receivables, long-term loans, cash and cash equivalents.

The Company's exposure to credit risk with regards to trade and other receivables is influenced mainly by the individual characteristics of each customer and there is no significant concentration of risk related to industry segments. The granting of credit is controlled by well-established criteria that are reviewed on a regular basis. The maximum exposure to credit risk at the reporting date is the carrying amount of each trade receivable.

The credit policy requires each new customer to be analyzed individually for credit worthiness before delivery and payment terms are offered.

Other receivables consist primarily of security deposits, loans to employees and other receivables. The risk of default is assessed as low.

The credit risk surrounding loans receivable is assessed as low risk.

Credit risk on cash and cash equivalents is assessed as low risk as the Company deposits cash surpluses with financial institutions of high quality and standing.

(ii) Liquidity Risk

The Company actively monitors its cash flows to ensure there is sufficient cash available to meet its working capital requirements. Due to the dynamic nature of the underlying businesses, the Company maintains flexibility in funding by maintaining availability under committed credit lines. Management monitors rolling forecasts of the Company's cash and cash equivalents on the basis of expected cash flow.

The Company's current trade and other payables are all due within one year.

The table below summarizes the maturity profile of the Company's financial liabilities as at 31 March 2026 based on contractual undiscounted payments:

Amount in Rs. Lakhs

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report

S.no.	Key Audit Matter	Auditor's Response
1.	Revenue: Management estimate of provision for sales return and Discount & schemes	
	Estimate for sales returns and discounts and schemes was a critical audit matter in the audit of the Company's consolidated financial statements for the year ended 31 March 2026. Management estimates the amount of returns expected based on the goods returned in the past and current market demands. The Company operates in a highly competitive seed industry wherein sales are subject to various discounts, incentive schemes, rebates and potential sales returns based on product performance, seasonal demand and market conditions. The management considers revenue as key measure for evaluation of performance. We consider this as a key audit matter due to:- Due to the significance of revenue to the financial statements and the degree of management judgment involved in determining the related provisions and adjustments to revenue.	Principal Audit Procedures:- We have performed the following principal audit procedures in relation to revenue recognised: Assessing the appropriateness of the Company's revenue recognition accounting policies in line with Ind AS 115 ("Revenue from Contracts with Customers"). Understanding and Testing of design and operating effectiveness of internal controls in place relating to recognition and measurement of sales returns and discount amounts. Testing of relevant information technology general controls, automated controls, and the related information used in recording and disclosing revenue Performed analytical procedures on current year revenue based on seasonal trends and where appropriate, conducting further enquiries and testing. Reviewed reasonableness of estimates made by management in respect of sales return of previous year by comparing them with actual returns. Substantive testing of Sales, sales returns and discounts with the underlying documents on a sample basis. Testing of supporting documentation for sales return transactions recorded during the period closer to the year end and subsequent to year end, including examination of credit notes issued after the year end to determine whether the returns were recognised in respective accounting period
2.	Pending Litigations	
	As disclosed in Note 37 to the consolidated financial statements, the Company is involved in an ongoing litigation with the Income Tax Department, currently pending before the Commissioner of Appeals. The	Our audit procedures included, among others:- Obtaining an understanding of the nature of the disputed matters and reviewing the Company's assessment

	litigation pertains to certain additions and disallowances made during assessment proceedings for Assessment Year 2022-23, resulting in a demand of Rs. 599.10 Lakhs. The Company is of the opinion, based on legal advice and facts of the case, that the demand is likely to be either deleted in full or substantially reduced and accordingly, no provision has been considered necessary in the financial statements. The matter has been disclosed as a contingent liability. We considered this to be a key audit matter due to: - The significant judgment involved in assessing the likely outcome of the appeal; The materiality of the amount under dispute; and The potential impact on the financial statements if the outcome is unfavorable.	of the potential outcome. Examining relevant documents including the assessment order, grounds of appeal, and legal opinions obtained by the Company. Discussing the case status and strategy with management and, where applicable, their external legal counsel. Evaluating the Company's accounting treatment and disclosures in accordance with Ind AS 37 Provisions, Contingent Liabilities and Contingent Assets. Assessing whether the disclosures in the financial statements adequately describe the nature of the litigation and management's judgment

ANNEXURE B

To the Independent Auditors' Report on Consolidated Financial Statements of SHREEOSWAL SEEDS AND CHEMICALS LIMITED (Referred to our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act") We have audited the internal financial controls over financial reporting of SHREEOSWAL SEEDS AND CHEMICALS LIMITED ("the Company") as of March 31, 2026 in conjunction with our audit of the consolidated financial statements of the Company for the year ended on that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

MEANING OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted

accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- 1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- 2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- 3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2026, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Notes to Consolidated Financial Statements

Note No: 40 Financial Risk Management

(i) Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Credit risk primarily relates to trade and other receivables, long-term loans, cash and cash equivalents.

The Company's exposure to credit risk with regards to trade and other receivables is influenced mainly by the individual characteristics of each customer and there is no significant concentration of risk related to industry segments. The granting of credit is controlled by well-established criteria that are reviewed on a regular basis. The maximum exposure to credit risk at the reporting date is the carrying amount of each trade receivable.

The credit policy requires each new customer to be analyzed individually for credit worthiness before delivery and payment terms are offered.

Other receivables consist primarily of security deposits, loans to employees and other receivables. The risk of default is assessed as low.

The credit risk surrounding loans receivable is assessed as low risk.

Credit risk on cash and cash equivalents is assessed as low risk as the Company deposits cash surpluses with financial institutions of high quality and standing.

(ii) Liquidity Risk

The Company actively monitors its cash flows to ensure there is sufficient cash available to meet its working capital requirements. Due to the dynamic nature of the underlying businesses, the Company maintains flexibility in funding by maintaining availability under committed credit lines. Management monitors rolling forecasts of the Company's cash and cash equivalents on the basis of expected cash flow.

The Company's current trade and other payables are all due within one year.

The table below summarizes the maturity profile of the Company's financial liabilities as at 31 March 2026 based on contractual undiscounted payments:
