MANAGEMENT DISCUSSION AND ANALYSIS ON SELECT FINANCIAL DATA

In order to better reflect the truly global presence of the Company – with assets in India, the North Sea, the Far East, West Africa, etc. – the Company's name was changed from Garware Offshore Services Limited to Global Offshore Services Limited, during the year.

During the year under review, on stand-alone basis, the Operating Income stood at Rs. 170.17 Crores as against Rs. 181.48 Crores for the previous year ended 2010. This was due to the fact that one old PSV was sold in Jan-10. The Net Profit during the same period was Rs. 40.06 Crores as against Rs. 40.99 Crores for the previous year. This was marginally less compared to the reduction in the operating income. Interest expense fell by approximately 20% in view of the regular repayment of debt as also because of the Company's constant efforts to replace high cost debt with a lower one.

The Company owns and operates two types of vessels viz., Platform Supply Vessels (PSV) and Anchor Handling Tug Cum Supply Vessels (AHTSV). During the year, approximately 60% of the operating income was attributed to the PSVs and the balance to the AHTSVs.

Presently, 4 AHTSVs and 3 PSVs are on long term contracts.

During the year, the Company set up a wholly owned subsidiary in The Netherlands viz., Global Offshore Services B. V. and took delivery of a large Platform Supply Vessel (PSV), named "MV Beaucéphalus". The vessel has commenced work with Petrobras, Brazil on a 4 year + 4 year (option) contract.

The Company's wholly owned subsidiary in Singapore now has 3 vessels on Bareboat Charter. These vessels are – 1 Accommodation Work Barge (AWB) which is on a long term contract in West Africa, 1 PSV which is on a long term contract in the North Sea and 1 AHTSV which is on a short term contract in the Far East.

Future Outlook

The Indian economy "bounced back" with remarkable rapidity from the slow down caused by the global crises in the past couple of years with growth rates of 8.6 % in 2010 – 11 and 9% expected in 2011 – 12. Since growth is firmly in place, fiscal consolidation is progressing rapidly and monetary policy has reverted focus on moderating inflationary pressures.

Efficient and reliable energy supplies are a precondition for accelerated growth of the Indian economy. While the energy needs of the country, especially oil and gas, are going to increase at a rapid rate in the coming decades, the indigenous energy resources are limited. Oil and gas constitute around 45 per cent of total energy consumption. At the same time, the dependence on imports of petroleum and petroleum products continues to be around 80 per cent of total oil consumption in the country.

During 2010-11, production of crude oil is estimated at 37.96 million metric tonne (MMT), which is about 12.67% higher than the crude oil production of 33.69 MMT during 2009-10. The projected production for natural gas, including coal bed methane (CBM), for 2010-11 is 53.59 billion cubic metres (BCM) which is 12.80% higher than the production of 47.51 BCM in 2009-10. The increase in natural gas production is primarily from deep water blocks.

India has an estimated sedimentary area of 3.14 million sq. km, comprising 26 sedimentary basins. Prior to the adoption of the New Exploration Licensing Policy (NELP), only 11 per cent of India's sedimentary basin was under exploration. Since operationalization of the NELP in 1999, the Government of India has awarded 47.3% of it for exploration. So far 87 oil and gas discoveries have been made by private/joint venture (JV) companies in 26 blocks and more than 640 MMT of oil-equivalent hydrocarbon reserves have been added. As on 1 October 2010, investment made by Indian and foreign companies was of the order of US \$ 14.8 billion, of which, US \$ 7.5 billion was in hydrocarbon exploration and US\$ 7.3 billion in development of discoveries.

The ninth round of NELP (NELPIX) was launched on 15 October 2010 and 34 exploration blocks including 8 deep water, 7 shallow water and the rest on shore, were offered.

Concerted efforts have been made to put new and marginal fields in production through in house resources as well as through service contracts. ONGC has an inventory of 165 marginal fields and 131 have either been monetized or are under various stages of development through in-house efforts. So far, 10 fields have been awarded on service contract.

In view of unfavourable demand-supply balance of hydrocarbons in India, acquiring equity oil and gas assets overseas is one of the important components of enhancing energy security. The Government is encouraging national oil companies to aggressively pursue equity oil and gas opportunities overseas.

It is estimated that India's primary commercial energy consumption will increase at an average annual rate of at least 5.8% for the next few decades, and per-capita primary energy consumption will exceed 1 toe by 2030. As a result, concerted effort on oil and gas exploration and production is expected to grow. In addition, India's reliance on energy imports will also increase.

It is expected that crude oil price will not drop below USD 85/bbl over the next two years on account of the following factors—

- a) Revival in global economy.
- b) Increasing demand from developing economies to more than makeup for fall in demand from OECD, (the traditional demand centre for oil).
- c) Falling non-OPEC supply of oil to further strengthen OPEC's position with the latter being called upon to supply the additional barrel of oil to satiate incremental demand and
- d) Increasing use of oil in transportation sector and shift of demand from OECD countries to developing economies where oil is subsidised, is expected to make demand for oil more inelastic with respect to its price.

There is also structural shift in key drivers of the global economic growth and global oil demand from the OECD countries to the developing countries.

According to OPEC estimates, global demand for oil is expected to grow to 90.5mnbpd by 2014e mainly on account of demand growth from the developing countries driven by China and India while demand from OECD countries is expected to average around 45.5mnbpd

Although there is strong opposition to deep water drilling after the BP operated - Deepwater Horizon drilling rig explosion brought to fore the dangers of drilling in deep water, the moratorium imposed by US was subsequently lifted due to the fact that around 5mnbpd comes from deep water fields. In the last decade deep water activities have gained momentum with global oil supplies from deep water increasing from 1.5mnbpd in 2000 to 5mnbpd by 2009. There is a significant potential for deep water production in Brazil and West Africa where 40% of discovered reserves in the last decade are in deep water. This we believe would lead to increasing share of deep water fields in the overall oil supplies.

Gas sector – to benefit from huge gas supplies and massive capex spends

Energy deficient India's natural gas sector has undergone a dramatic change with the discovery of prolific KG basin gas and increasing LNG imports. Supply of natural gas which stood at 156mmscmd in FY10 is expected to increase to 256mmscmd by FY14e. Riding on a strong economic growth, India's insatiable demand for gas continues to outpace supply. Domestic demand for gas is expected to increase from 169mmscmd in FY10 to 298mmscmd by FY14e resulting in increase in shortfall from 13mmscmd to 42mmscmd.

Conclusion

From the above discussion, we can conclude that the consumption of oil and gas is on increasing trend, resulting in increased exploration and production activities thereby creating a demand for offshore support vessels. According to certain reports, Global E&P spending is expected to increase 15% year – on – year in 2012.

However, with addition of new fleet in the market, we also expect some correction in the day rates and this is likely to put pressure on margins. Additionally, there will continue to be “competition” between old and new tonnage which will also put some pressure on charter rates.

As per various available reports, currently there are about 1,670 AHTSVs of varying capacities with an average age of about 15 years and more than 200 AHTSV of various sizes are scheduled for delivery in the coming 2 – 3 years. The average utilization of AHTSVs has been more than 67%. The number of larger AHTSVs is increasing over a period of time.

As regards PSVs, currently there are about 1,310 PSVs of various sizes with an average age of about 14 years and more than 220 PSVs of various sizes are under construction with delivery scheduled from 2011 to 2014. The average utilisation of PSVs is more than 62% and is increasing.

However, there will be a time when older tonnage will not be acceptable by major Exploration and Production Companies, which in turn will increase demand for newer and more modern vessels.

The increase in utilization rates / increase in fleet of offshore support vessels can further be justified by the fact that almost 306 offshore fields are under development and development in another 240 – 244 offshore fields will be starting by 2011 – 2014. Out of these, development of almost 12 – 15 offshore fields will be in India alone.

Your Company is exploring the possibility of acquiring modern tonnage as a policy of growth. Older tonnage will progressively be removed from the Company's fleet.

The Company will continue to strive to improve the value of all its shareholders.

The other Income for the year stood at ₹ 2.52 crores aggregating the total income to ₹ 172.69 crores. The reduced operational income was on account of sale of vessel, M.V.Everest in the last quarter of the previous year. Hence, there were no earnings from her for the entire year.

The Net Profit for the year ended 31.03.2011 stood at ₹ 40.06 crores as against ₹ 40.99 crores for the previous year in spite of a reduction of operating income of approx. 5%.

The Company continues its efforts to reduce its interest burden by replacing high cost debt with lower cost debt. As a result of this and the regular pay back of debt, interest and finance charges have reduced by approx. 20%.

The Company continues to follow Accounting Standard 30 'AS-30 Financial Instrument: (Recognition & Measurement)'.

OPERATIONS:

During the year under review, the Company sold its second hand Platform Supply Vessel 'M.V. Mana'. Further the Board of Directors have resolved to sell two of the Company's AHTSVs., viz., 'M.V.Garware-I' & 'M.V. Garware-V', in view of their age and since employment prospects for these vessels are reducing.

The Company's wholly owned subsidiary in The Netherlands took delivery of one Large Platform Supply Vessel, 'M.V.Beaucéphalus' in December, 2010. The vessel has been awarded a contract for 4 year + 4 year (option) in Brazil in May, 2011.

The Company's Platform Supply Vessel, 'M.V.Kailash' has recently been awarded a 4 year contract by Petrobras (Brazil). The vessel should commence contract in the latter part of August/early September, 2011, after the required modification as per needs of Petrobras and mobilization is completed.

The total cash outflow on account of Dividend and Tax thereon (including Interim Dividends) amounts to ₹ 6.66 crores (previous year ₹ 6.40 crores).

FUTURE OUTLOOK:

Price of oil has increased and stabilized during the year under review. This has led to an increase in E & P activities (with oil at around \$85 - \$100) and the outlook appears bright on a global basis – in spite of economic problems in Europe & USA.

Presently most of the Company's new vessels (owned & Bareboat) are on long term contracts and we hope that those vessels come off contract in the next 12 months will be redeployed on long term jobs. The Company is actively looking to expanding its fleet in India as well as in The Netherlands subsidiary.

WHOLLY OWNED SUBSIDIARIES (WOS):

During the year under review, the Company established a Wholly Owned Subsidiary in The Netherlands, viz., Global Offshore Services B.V., (GOSBV). GOSBV has taken delivery of 'M.V. Beucephalus'. The vessel is presently working in Brazil with Petrobras, on a 4 year firm contract. Since the vessel commenced this contract only in June, 2011, its performance will only be reflected in the current year.

The Company's subsidiary, viz., Garware Offshore International Services Pte Ltd., (GOISPL) in Singapore made a loss during the year under review, in view of the fact that the Accommodation Work Barge remained unemployed for several months. However, in November, 2010, the Barge has gone on a 5 year contract with Singapore based charterers and is presently located in Nigeria.

GOISPL added a Platform Supply Vessel on a Bare Boat basis to its fleet. This Platform Supply Vessel is presently working on a long term contract in the North Sea.

The Accounts of the WOS based in Singapore and The Netherlands are prepared in accordance with the respective local regulations.

For this purpose the economic useful life of vessels is estimated as 30 years. However, in the current year in the case of two vessels M.V.Garware I and M.V.Garware V, management has decided to reduce the economic useful life of the vessel from 30 years to 29 years. As a result depreciation for the year has increased by Rs. 248.46 lacs.

Any additions or extensions to existing vessels which forms an integral part of the vessels is depreciated by 95% over the remaining useful life of the vessels, in accordance with the requirement of para. 24 of Accounting Standard 6 (Revised) - Depreciation Accounting, issued by The Institute of Chartered Accountants of India.

(b) On Motor Vehicles :

Depreciation is arrived at on straight line method as 25% p.a. of the cost, based on the estimated useful life of 4 (four) years for the motor vehicles.
