From The Chairman Desk

“Inculcate the habit of being punctual and strict to the words”

Dear Shareholders,

On the back of sustained high competitive environment and lackluster market environment, the blended broking yields declined in FY2011-12 leading to decline in broking revenues as well as expenses increased sharply and costs associated with maintaining capacities in existing set up as well as setting up new business lines. Consequently the brokerage houses' profitability declined in FY 2011-12.

Your Company was started in 1995 by obtaining membership of National Stock Exchange of India Limited. Since then ITSL has proved to be an emerging financial service provider and has grown by leaps and bounds. Today we are a well diversified financial services company, offering a range of products and services including various trading platforms, Depository Services and more.

Retail investors' participation in the equity cash market is at a seven-year low, with more and more savings finding their way to properties, gold, risk-free revenues like bank deposits and high-yield debt

instruments. The daily average volume of retail turnover is down to Rs 6,690 crore in 2012 - the lowest since 2005 and a 51% drop from the peak of Rs 13,709 crore in 2009.

Till 2005, retail investors were active in the Indian equity market. Their contribution to the daily turnover was over 75%, while foreign institutional investors (FIIs) contributed about 14%. But since then, the trend has changed. In 2012, FIIs' contribution to the daily turnover grew to 35% while retail investors' contribution declined to 48%. The percentage daily turnover attributed to domestic institutional investors doubled from 8% in 2007 to 16% in 2012.

Some of the large brokerage houses have reasonably well diversified revenue streams but still remain vulnerable to capital markets environment. Given the current challenging outlook for the equity markets over the short term, I expect pressures on the revenue growth over the next few months or even quarters and consequently the overall profitability.

The difference between **can** and **cannot** are only three letters. Three letters that determine your direction, keeping the same in mind, your company moved forward and successfully floated the IPO, in spite of adverse market and economic conditions. A positive attitude brings strength, energy and initiative and by following the same your company has received a Certificate of Appreciation from the National Stock Exchange for outstanding efforts in promoting Gold Exchange Trades Funds.

Notwithstanding pressures on profitability the liquidity profile of your company remained comfortable with strong network and the fresh capital mobilized through IPO during the year 2011-12. To fulfill the objects of the issue your company has taken clearing membership of both futures & options segment and currency derivatives segment, strengthen the system department by migrating trading activities to ODIN software of Financial Technologies which is very popular among investors. Your company has also started operation from Ahmedabad.

Your Company is going to start trading facility on Mobile Phones and Tablet PC also. Company's Team is working on two types of facilities i.e. iWin and iWin Touch. Through iWin a person will be able to trade on his/her Mobile handset with qwerty pad features; and iWin Touch facility enables the trading platform on Tablet PC or Smart Mobile Phones.

Your Company has taken material steps to setting-up its Corporate Office and in this view Company has acquired a land in Scheme No. -54, PU-4, Indore.

Your Company always believes in adherence of statutory norms, and in this view Company has taken a step ahead and pays Income Tax on regular basis (196 days out of total 249 trading days) instead without waiting for due date of payment of tax on Annual or quarterly basis.

Over the medium to long term, the outcome of various changes, as stated above, taken by our company will definitely improve the profitability.

Your Company has received a summon from SEBI, wherein some information & documents was demanded; your Company has submitted its reply on the same. Ministry of Corporate Affairs has sought Inspection of books of accounts and other record and your Company has submitted all information as demanded.

For maintaining the planet Earth evergreen, the Ministry of Corporate Affairs ("MCA") has taken a "Green Initiative in the Corporate Governance" by allowing paperless compliances by the companies. In accordance with the MCA's circular, Companies can now send various notices and documents, including Annual Report, to its shareholders through electronic mode to the registered e-mail addresses of shareholders.

We seek your whole hearted support for this initiative. We would request you to register your e-mail ID with your depositories to get annual reports and other communications through email instead of paper mode.

Acknowledgement

I express my sincere and grateful thanks to the Board of Director for their unwavering support and guidance in ensuring smooth operations and performance of the Company. Banks, Financial Institutions, SEBI, Stock Exchanges, Clearing Member, Registrar of Companies, Registrar and Transfer Agent, Merchant Banker, Print & Electronic Media, Business Partners, Clients, and other agencies, for their continuous support and untiring support as well. I express my gratitude to all stakeholders, who showed their confidence and trust in us.

My special thanks and warm appreciation to our valued clients for bestowed faith in the Company and also for their valued suggestions, which have definitely gone a long way in the betterment of our performance.

I hope the coming years will further strengthen this partnership growth through expansion in core business and diversification strategy, which will lead to overall development of the Company.

With Warm Regards

MANAGEMENT DISCUSSION AND ANALYSIS

» Global Economic Conditions

Global recovery is likely to slow down due to the continuing euro area debt crisis. The news flow from the US has been mixed, with growth accelerating in Q3 of 2011 but getting revised downwards substantially from the initial estimates. However, growth in euro area is already stagnating and as fiscal austerity progresses, the area could enter into a recession.

The S&P's (Standard and Poor's) sovereign rating downgrade of nine euro area countries on January 13, 2011, was reflective of the rising sovereign balance sheet problems. Tightening credit conditions, rising risk premiums, weakening economic growth in the euro area are keeping global financial markets under stress.

» Indian Economic Conditions

Global spillovers through trade and capital flow channels are slowing down India's growth more than anticipated. Monetary policy was strongly anti-inflationary until October 2011. Subsequently, decelerating growth and declining inflation momentum prompted monetary policy to move to a neutral stance since December 2011. Inelastic demand for oil and rising gold imports has widened the trade deficit, while exports decelerated. As capital flows have also moderated since August 2011, financing pressure on the current account deficit (CAD) translated into exchange rate pressures. Some easing in liquidity was effected through a total of 125 basis points reduction in the Cash Reserve Ratio (CRR) during January-March 2012. Inflation has fallen in Q4 of 2011-12.

Inflation in June fell to 7.25 per cent, although lower than projections, but still above the comfort level of the Reserve Bank. Keeping the same in mind the RBI kept interest rates unchanged in first quarter of current financial year.

1. Industry Structure & Developments

Securities market play an extremely important role in promoting and sustaining the growth of an economy. It plays a critical role in mobilizing savings for investment in productive assets, with a view to enhancing a country's long-term growth prospects. It acts as a major catalyst in transforming the economy into a more efficient, innovative and competitive marketplace. Various activities in the securities market in India are regulated, in a coordinated manner by four regulators, namely, Department of Economic Affairs (DEA) of the Ministry of Finance, Ministry of Company Affairs (MCA), Securities and Exchange Board of India (SEBI) and the Reserve Bank of India (RBI).

Usually, index movements depend on various factors - some predictable and some unpredictable. Among the predictable bugbears include European sovereign debt

crisis and slowdown in the US economy, which are expected to spill over into the coming year as there is no light seen at the end of the tunnel on these issues yet.

The ultimate market direction depends on inflation and interest rate, which can allow rate reversal and in turn bring the economy back on the growth trajectory. China has done well on these fronts and cut even rates, but somehow India has failed in showing prudence on this front.

During the period 2011-12 Rupee has already weakened against the dollar and the Indian securities market also witnessed a slowdown, inline with global scenario. Due to slack in liquidity conditions, the resources raised by India Inc. through euro issues also saw a sharp fall. In the secondary market, all stocks saw major correction in their prices. Even redemptions by mutual funds increased on a large scale and Foreign Institutional Investors pulled out money from the Indian markets.

Trade deficit

India reported a trade deficit equivalent to 10303 million USD in June of 2012.

Trend of CRR

2. Opportunities and Threats

» Opportunity

Increase geographical presence

We intend to further expand the scale of our operations, explore new distribution channels and increase our reach and client base domestically. We are focused on increasing the number of our client relationships through our network of offices across India. Our emphasis is on expanding the scale of our operations as well as growing our network in the smaller Indian cities, which we believe present attractive opportunities to grow our client base and revenues.

Around 2 Crores demat account are opened till June 2012 with both the Depositories of India. Hence there is a huge scope of penetration in untapped areas.

Expand our Internet-based trading

We plan to significantly enhance our on-line trading capabilities and have established our on-line trading system to complement our other products and services offerings. We believe that we have the technological platform and systems in place to accommodate and service significant increases in on-line trading accounts and clients. We believe that an Internet-based, easily scalable product delivery model will enable us to respond effectively to the competitive challenges of discount equity brokerages and eventually move into delivering a wider range of products and services on-line.

Grow existing product lines and expand our products and services portfolio

We are planning to expand our operations beyond broking to distribution of third party financial products like NBFC Activities, IPO's, Mutual funds, Margin Funding, Internet Trading. We plan to introduce new products that provide clients access to a range of financial products and services to suit their varied needs. In addition to growing our traditional equity share broking business, we intend to develop our recent initiatives such as currency derivatives and Internet Based Trading through Mobile & Tablet PC etc.

Continue to develop our Cliental

We plan to grow our business primarily by growing the number of clients by increasing trading working stations / franchisees / authorized-persons in untapped states of India and providing them additional facilities like funding, research reports, internet based trading. We believe that increased client will add stability to our business. We also believe that the rapid growth in the middle market company sector offers us a significant opportunity to provide a wide variety of financial services and products to this segment. We also seek to offer our clients diversified products and services to increase our revenues per client by selling different products to the same client.

To provide information to Investors about investment options with special emphasis on the advantages and disadvantages, Company organized Investors Awareness Programmes with exchange(s)/Depository.

» Threats

The volatility in the Indian equity markets, coupled with the slowdown in economy would be a threat for the Company's business growth. We encounter intense competition in all aspects of our business and compete directly with many other brokerage companies for clients. Many of our competitors have significantly greater financial, technical, marketing and other resources than those available to us.

In addition, a number of firms offer discount brokerage services to retail customers and generally effect transactions at substantially lower commission rates on an "execution only" basis, without offering other services such as investment recommendations and research. Moreover, there is substantial commission discounting by full-service broker-dealers competing for institutional and retail brokerage business. The margin in the retail broking market is thinning and the competition is getting intense every day, thus affecting our bottom-lines.

We offer our clients the facility to trade in derivative instruments in the securities and currency markets as permitted by applicable laws. Since these derivative instruments involve taking leveraged positions on the underlying assets, these are more risky to deal with compared to the other financial instruments. We may face financial losses if we fail to manage risks associated with the clients' dealings in derivative instruments, particularly due to price and market volatility.

We have experienced intense price competition in this business in recent years. In particular, the ability to execute trades electronically and through other alternative trading systems has increased the pressure on trading commissions, volume and spreads. We expect this trend toward alternative trading systems to continue. We believe we may experience competitive pressures in these and other areas as some of our competitors seek to obtain market share by competing on the basis of price. In addition, we face pressure from our larger competitors and we are unable to ascertain the likely impact of such competitive pressures on our results and operations.

Our computer systems and network infrastructure may be exposed to physical breakins as well as security breaches and other disruptive problems caused by our increased internet connectivity. There is no assurance that the security systems and security measures employed by us are adequate. A failure in security measures could have a material adverse effect on our business and our future financial performance.

4. Outlook

The strong Client book coupled with wide range of financial instruments in financial market may increase in operating margins of company. India's national income is expected to grow and financial sector has tremendous

long term potential to grow, has distinct characteristic of being cyclical. Therefore we see a sort of roller coaster ride. Long term players like your company, see this as an opportunity rather than obstacle. Invariably when head winds are strong, the weaker players fall off the roller coaster, paving way for the long term players to emerge strong. These forward looking statements shows management view for nearer future. Due to uncertainties and various other factors the development of company's business may differ from management expectations.

5. Risk and Concerns:

The main object of risk management is to balance the trade Off between risk and return and ensure optimum risk adjusted return on the capital.

Company operates in highly dynamic business environment, many of those risks are driven by factors that the company cannot control or predict. Hence adequate risk management system has become helpless to minimize business risk. The objective of our risk management is to ensure adequate return at specified level of risk .The following discussion addresses those risks that management believes are the most significant, although there may be other risks that could arise or may affect company's financial operations or financial results.

Capital Market Risk

The major sources of our revenues are derived from equity brokerage business. Hence, like other players in the market, our business is highly sensitive to economic and political conditions prevalent in the country. Any downturn in general economic conditions or Indian equity markets and severe market fluctuation would likely to result in reduced client trading volumes and net revenue, and hence, will have a material adverse effect on our probability and beyond our control.

Technology Risk

Technology involves a huge amount of funds for its deployments and upgradation. Over the years, the company has invested in progressive technology with an end motive of elevating customer satisfaction and better controls. Obsolescence and up gradation is an ongoing major concern .Any significant impulsive change in technology would bring a pressure on our profitability.

Credit and Finance Risk

Being an financial service provider we are exposed to number of risks such as we provide exposure limits for our client to purchase securities on margin. Sharp change in the market values of securities and the failure by parties to honor their commitment on a timely basis could have adverse effect on the profitability of our operations.

Human Resources Risks

9. Employees Retirement Benefits

Provident Fund

The Company contributes to a recognized provident fund which is a defined contribution scheme. The contributions are accounted for on an accrual basis and recognized in the profit and loss account.

Gratuity

Gratuity is accounted for on the basis of actuarial valuation as per the requirement of Accounting Standard - 15 Employees Benefits.

Leave Encashment

Unutilized leave of staff lapses as at the year end and is not encashable.

10. Equity Index/Stock - Futures :

Equity Index/Stock Futures are marked-to-market on a daily basis. Debit or credit balance disclosed under Loans and advances or Current liabilities, respectively, in the "Mark-to-Market Margin - Equity Index/Stock Futures Account", represents the net amount paid or received on the basis of movement in the prices of Index/Stock Futures till the balance sheet date. As on the Balance Sheet date, the profit/ loss on open position in Index/Stock futures are accounted for as follows:

- a. Credit balance in the "Mark-to-Market Margin-Equity Index/Stock Futures Account", being anticipated profit, is ignored and no credit is taken in the profit & loss account.
- b. Debit balance in the "Mark-to-Market Margin-Equity Index/Stock Futures Account", being anticipated loss, is recognized in the profit & loss account.

On final settlement or squaring up of contracts for equity index/stock futures, the profit or loss is calculated as difference between settlement/squaring up price and contract price. Accordingly, debit or credit balance pertaining to the settlement/squared up contract in "Mark-to-Market Margin Equity Index/Stock Futures Account" is recognized in the profit & loss account upon expiry of the contracts. "Initial Margin - Equity Index/Stock Futures Account", representing initial margin paid, for entering into contracts for Equity Index/Stock Futures, which are released on final settlement/squaring-up of underlying contracts, is disclosed as under Loans and advances.

11. Taxation

Income-tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the

income-tax law), deferred tax charge or credit (reflecting the tax effect of timing differences between accounting income and taxable income for the period) and fringe benefit tax.

Deferred taxation

The deferred tax charge or credit and the corresponding deferred tax liabilities and assets are recognized using the tax rates that have been enacted or substantially enacted at the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the asset can be realized in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized only if there is a virtual certainty of realization of the assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written-up to reflect the amount that is reasonable/virtually certain (as the case may be) to be realized.

12. Impairment of Assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired based on internal/external factors. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generated unit to which the asset belongs, is less than its carrying amount, the carrying amount is reduced to its recoverable amount.

13. Provisions, Contingent Liabilities & Contingent Assets

Contingent liabilities, if material, are disclosed by way of notes, contingent assets are not recognized or disclosed in the financial statements. A provision is recognized when an enterprise has a present obligation as a result of past event(s) and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation(s), in respect of which a reliable estimate can be made for the amount of obligation.
