ppportunity often opens up newer avenues for growth. To capture it one needs deep insight and complete preparedness.

Embracing change, constantly optimizing our structure, our actions, our opportunities and regularly reviewing our standards, is the core key factor of our success.

The ever increasing E&P (Exploration & Production) activities in the Oil & Gas sector in India combined with capacity enhancement in the Power sector and fresh investment in Refinery project are enough impetus to push up demand for both ERW and Seamless pipes. At MSL, we are geared up to seize this opportunity to maximize our strength and market leadership through technology upgradation and resource optimization.

xpansion is inevitable to meet the demand of current market and stay ahead of the competition. Expansion is not merely in terms of plant capacity enhancement. It is all about integrating our production, planned diversification and expert resource planning.

MSL is working on a steel plant for Billets as a backward integration support and plan for development of Coal Blocks allotted near Nagpur in a Joint Venture - Gondkhari Coal Mining Ltd., is also under progress.

Another 6" Seamless Pipe plant, at Mangaon, Maharashtra, is also at an advance stage of completion. This will also have the facility of manufacturing Drill Pipe and other special grade pipes for boilers and other value added products. The Project has been awarded the status of "Mega Project" by State Govt. of Maharashtra.

# Capacity Expansion

## In Seamless Plant

- 14" Plant facilities added to produce Pipe upto 20" size.
- Finishing facilities like straightener, Facer, Hydro tester and NDT machine installation under progress.
- 6" Pipe mill at Mangaon with MPM Technology, the equipment erection getting finished and trial run in near future.
- 6" Pipe mill will produce drill Pipe, High alloy Pipes and tubes and high wall thickness pipes for use in Oil sectors, Boilers, Automobiles and General Engineering sectors.
- 6" Pipe mill facilitated for manufacturing of high grade casing, tubing & drill pipe and boiler pipes with maximum length of 22 mtrs. to meet growing demand.

## In ERW Plant

- One more Pipe finish line equipments are under erection to enhance the production capacity.
- End facer, Hydro tester for pipe grade upto APIX80, Ultrasonic Equipment etc. are the new addition of equipments for the finishing line.
- Weld on connector welded casing upto 20" all facilities installed and under regular production.
- Square and rectangle section pipe production planned and the development under progress in 20" ERW pipe mill.

rowth for us is to move forward strategically.  
To respond faster to market demands. To continue  
delivering value in the future.

For our customers, employees, investors and society.  
For the community at large.

**As we grow. So does our responsibilities too.**

For us growth is not mere healthy financial standing. It makes us more concerned towards our employees, our community and the environment at large.

Employees are our most valuable assets. We take Health and Safety at work very seriously and provide diverse training, education opportunities and welfare facilities to keep employees engaged, motivated and innovative.

Our efforts do not end doing good for the organization only. We are equally concerned about the quality

of products and services, we provide to our customers. We have been investing significantly on R&D programmes to achieve sustainability and competitive advantage so that we can always deliver better quality products to our customers at the same time stay most eco friendly.

Moreover, our various CSR activities helping people in and around the plant site in various ways, may it be in healthcare, education or provision for potable water.

# beyond Pipe making

Diversification into eco friendly power generation:

## 7 MW

Windpower Project at Satara (Maharashtra)  
an entirely environment friendly project.

### Solar Power Project at Rajasthan

Maharashtra Seamless Limited (MSL) is setting up a 5 MW PV Solar Power Plant at Pokharan, Distt. Jaisalmer, Rajasthan under Jawaharlal Nehru National Solar Mission, Phase- I, Batch -I. This project was allocated to MSL by NTPC Vidyut Vyapar Nigam (NVVN) against competitive bidding. NVVN and MSL have signed a Power Purchase Agreement (PPA) for a period of 25 years. As per PPA the plant is to be commissioned by 9th January 2012.

The estimated project cost is around Rs. 73 Crores. The annual expected Power generation is 9.855 million units. Under competitive bidding MSL has bid Rs.12.24/ unit.

# Expanding horizon:

- MSL is the leading Exporter to USA markets.
- MSL accounts for more than 30% Exports, of its Total Production.
- MSL Seamless & ERW Pipes are widely used all over the world by Prestigious Oil Companies such as Shell Global Solutions , International B.V, The Netherland, AL - Furat Petroleum Corporation, Syria ( JV Company of Shell ), Saudi Aramco, Saudi Arabia, Occidental Of OMAN ( OXY ) Oman, Petroleum Development Oman L.L.C., to name a few of Them.

# Chairman's Statement

**D.P. Jindal**  
Chairman, DP JINDAL Group

Dear Shareholders,

2010 - 11 has been a landmark year for your Company. The Company achieved a record net profit of Rs. 341.66 Crores. This performance has been a result of improved global economic recovery, your Company's ability to manage its resources optimally, product innovation, technology and delivery.

India's economy grew at 8.6% last year, next only to China and this is certainly a remarkable achievement as it comes in the backdrop of a challenging period of global recession where a few countries were even on the brink of bankruptcy and had to seek huge bailouts. With the world economy coming out of recession, the Indian economy has successfully re-positioned itself on a faster growth trajectory, which prompts us to believe that the country will be able to grow at a rate of 9%, on a sustained basis.

However this remarkable growth has brought with it the malice of high double digit inflation and the need for tighter monetary and fiscal measures. The Reserve Bank of India has been hiking interest rates for last several quarters and there is a fear of rude shock to the country's growth story.

## Company Strategy

Under these testing circumstances, your Company has continued to accelerate on the growth path and is on

course to maintain its leadership in steel pipes and tubes. We continue to sharpen our competitive advantage against cheaper Chinese pipes through high quality standards, cost controls, Product innovation and superior efficiencies. Our strong relationship with customers has been instrumental in sustained market leadership despite the temptation of cheaper and lower quality Chinese pipes.

Your Company has been able to maintain reasonable margins through consolidation of market share in US which has imposed anti-dumping duties on Chinese pipes and tubes. We continue to strengthen our distribution network in US and Latin America market. We will continue to explore further opportunities in exports.

Your Company continues to invest in R&D for long term enduring benefit. I am pleased to inform that the R&D centre is now in a new building with State of the Art facilities.

## Growth and Expansion

You will be pleased to know that 200,000 mtpa of seamless pipes plant at Mangaon is in the advanced stage of execution. This will give us additional economies of scale and a unique product mix. We are hopeful of further gain in market share both in domestic and exports market.

We understand that going forward we need to optimize the value chain through completely integrated

manufacturing facility. We are aggressively pursuing both organic and inorganic opportunities to build round billets manufacturing facility to fulfill our requirement of raw material for pipes. We are conscious of the need to insulate ourselves from the volatility and inconsistency of steel supply. Given the challenges in land acquisition due to vague land related laws and farmer's unrest, we are facing roadblocks in our strategy but hope to overcome them sooner rather than later.

#### Human Resources

We have always believed that our employees are our real strength. We have been able to maintain an unprecedented low turnover of people through proactive Human resources policy initiatives. We continue to equip our people with skills to contribute higher value. Our investment in people through continuous training and on the job learning will give attractive returns in future. In coming years we will introduce new initiatives in Human resource to ensure higher motivation and commitment towards corporate goal.

#### Environment

One of the biggest threats to the mankind is depleting environment due to aggressive industrialization. It is the responsibility of every industry to ensure sustainability of the surrounding flora and fauna through afforestation and reduced pollution. We have been investing towards this goal. The Company has undertaken business initiatives in

this direction by entering into renewal energy sector. The Company is presently executing a 5 MW Solar Power project in Rajasthan. Besides providing reasonable tax free returns over its investment, it also helps in protecting environment.

#### Ethics and Corporate Governance

Last few years have raised serious questions on the credibility of general corporate ethics and governance across the world. It is extremely important to provide a transparent eco system to the investors, consumers, suppliers and creditors. We are committed to fulfill our obligation to stakeholders through zero tolerance to any act which jeopardizes their interests. We are conscious of these obligations and effectively introduced disclosure norms for our employees.

#### Future

Thus while expressing satisfaction over performance achieved by your Company last year, I am confident your Company will again achieve new mile stones in future by continued cooperation of all stakeholders.

Thank You,  
**D.P. Jindal**

## Message from the Managing Director

**Saket Jindal**  
Managing Director

Dear shareholders,

You shall be happy to note that our Company has posted a substantial growth in the bottomline in the last financial year driven by stringent cost control, inventory management and bold marketing strategy. We have applied a six sigma philosophy and a TQM culture in our organisation; customer satisfaction has been paramount when it comes to measuring success in our day to day operations. With the market conditions becoming ever more competitive, the key to success lies in becoming a leaner, customer friendly organisation which can meet the requirements of a modern, more informed and highly demanding customer. We believe in having a focused approach in delivering our commitments by carefully monitoring our planning process and aligning them to suit the needs of the customer. We have built this Company on the foundation of this underlying philosophy and our brand and reputation speak for themselves not only in India but also internationally.

During the year, we have continued to face stiff competition from Chinese players in domestic market besides addition of new capacities. However, the market is growing at a reasonable pace and all surplus production can be exported. We along with other domestic players have moved to lobby with the government for protection against the

Chinese goods; however, the process is taking time and we hope to have some anti dumping duties in the near future. Our exports have been focussed mainly on USA as we have a strong brand presence over there and our product is widely accepted in terms of quality and customer service. We have also added new channels of distribution to this market through appointing agents and to have deeper penetration. Besides USA, we want to consolidate our customer base globally in Middle East, South America, Canada and Europe. One major milestone in this direction has been the vendor registration with Shell Global, Netherland, which is a leading oil Company worldwide. With this approval, we can supply pipes directly to oil wells operated by Shell and its joint ventures and gives us a strong foothold to tap other oil majors. Another major oil Company, Petrobras of South America is on our radar and we are doing necessary formalities for enlistment. These breakthroughs shall give us the confidence to expand our brand presence and to add capacity to meet the expanded customer base. Our horizontal expansion to make seamless pipes by adding capacity upto 2 lac metric tons is near completion. By this accomplishment, we shall consolidate our leadership in domestic market. With a low capex of under 300 crores, this project shall yield a high return on capital, and also reaffirm our technical expertise to refurbish a second hand unit into a running

plant with world class quality product conforming to international standards. MSL also has plans to integrate vertically into billet manufacturing which has been delaying due to land acquisition problems, but we should be able to have something transpired in near future. This integration shall reduce our cost drastically as majority of production will be for captive use as raw material cost is more than fifty percent in pipe making.

We have been awarded a contract by NVVN, a subsidiary of NTPC to develop solar power in Rajasthan under Jawahar Lal Nehru National Solar Mission. Renewable energy is a futuristic arena and environment friendly. In today's context of global warming and depleting ozone layer, green energy has gained significance. With the incentives provided by government and also the reducing capital cost, this looks to be a promising sector and we wish to consolidate our presence in this sector.

Another milestone in this year has been the ISO-14001 and OHSAS certification which makes us even more conscious with respect to our environment, health and safety standards and puts us in an appealing position when it comes to enlistment with international oil majors. Our CSR activities are always setting new targets, we have added a school building near our facility to cater the requirements of children of our staff and also residents

of nearby villages. This school shall be managed by Zee Education in collaboration with us and give quality education to the new generation.

Last but not the least I would like to thank all our employees for their contribution to make this year a successful year; I hope they continue to grow as an individual along with other members of our team. I wish to also thank our other stakeholders like our bankers, collaborators, suppliers, customers and all associates who have been instrumental in our progress. With our combined efforts, we wish to break new records in future.

Thank You,

**Saket Jindal**

## MANAGEMENT DISCUSSION AND ANALYSIS

### FORWARD LOOKING STATEMENTS

*The statement in the Directors' Report and Management Discussion and Analysis Report contains "forward-looking statements" about the business, financial performance, skills and prospects of the Company. Statements about the plans, intentions, expectations, beliefs, estimates, predictions or similar expression for future are forward-looking statements.*

*Forward-looking statements should be viewed in the context of many risk issues, and events that could cause the actual performance to be different from that contemplated in the Directors' Report and Management Discussion and Analysis Report, including but not limited to, risks arising from uncertainties as to future Oil & Gas Prices and their impact on investment programs by Oil & Gas Companies, Steel prices worldwide and domestic, economic and political conditions. We cannot assure that outcome of this forward-looking statements will be realized.*

*The Company disclaims any duty to update the information given in the aforesaid reports*

### INDUSTRY COMPOSITION

Pipe can be broadly classified into two categories, seamless and welded. Seamless pipes do not have any joints and are manufactured by piercing billets. Since seamless pipes have high strength, they are best suited for use as line pipes for high pressure applications and in oil and gas exploration for casing, tubing and drilling, as process pipes in refineries and boilers, and in other areas requiring high pressure transportation. Besides, these pipes also find use in the automotive industry and other engineering sectors.

Welded pipes can be classified into SAW pipes and ERW pipes. SAW pipes are manufactured from steel plates and hot-rolled steel coils using automatic submerged arc welding process. ERW pipes, which are manufactured by electric resistance welding of hot rolled coils, have low strength and are used in low pressure applications like low pressure oil and gas transportation and transportation of water and sewerage.

The characteristics of seamless steel tubes differ with applications. The characteristics are specified for each application in almost all international standards. Seamless steel tubes find their application in special areas where strength is prime consideration. The seamless steel tubes employed for rotary drilling must possess great torsion strength and high resistance to fatigue stresses. The casing pipes for deep oil wells require seamless pipe having high resistance to collapse and to withstand the high external pressures. The oil refining, chemical and pressure steam industries also demand special seamless steel tubes/pipes to withstand temperatures. Seamless tubes find application in the manufacture of bearings, automobile parts, drill rods, hydraulic cylinders, gas cylinders, boilers, etc.

Seamless tube has homogenous wall without any weld or joint along its length. The homogenous wall and smooth inner surface of the tube is not subjected to weaknesses caused by internal weld, bend and different chemical compositions and micro structures at the weld zone. As such, there is no danger of preferential corrosion caused by self engendered galvanic action. This makes the seamless tube a natural choice for applications where strength and resistance to corrosion are of high importance. The end-uses of seamless steel tubes are diversified.

The encouraging development of indigenous end-using industries stimulated the growth of direct consumption of seamless steel tubes. Survey reveals that oil sector accounts for around 60 percent of the total consumption while the share of bearings, automobile & boiler sector together are estimated as about 30 percent and the rest are consumed in other miscellaneous engineering industries.

Seamless pipes and tubes are produced in several steel grades, depending on application, from ordinary carbon steel to high alloy and stainless steel.

Your Company's current capacity is 350,000 MTPA seamless pipes and 200,000 MTPA ERW pipes. The Company is in the process of expanding its seamless pipe capacity by 200,000 MTPA and the project is in advanced stage of implementation. The Company is a major supplier of seamless pipes to the oil & gas, hydrocarbons, process and engineering industries. In the ERW segment, it mainly serves the oil & gas and water transportation sectors. The Company has obtained various domestic and international accreditations for its products. It has obtained accreditation from the American Petroleum Institute (API) for its seamless and ERW pipes. Its seamless pipes are also approved by the Central Boilers Board in India. Your Company derives around 30% of its revenues from exports and is an approved vendor for several international clients.

### EXPANSION PLANS

The erection work of 6" Seamless Pipe Plant at Mangaon, referred to above is in the advanced stage of execution. This will also have the facility of manufacturing Drill Pipes and other special grade pipes for boilers and other value added products. The Project has been awarded the status of "Mega Project" by State Govt. of Maharashtra.

### **BACKWARD INTEGRATION PROJECT**

Your Company is working on backward integration project and is planning an Integrated Steel plant for steel billets. This would help the Company in its raw material planning, cost control, and timely delivery of raw material.

Planning for development of Coal Blocks allotted near Nagpur in a Joint Venture Company named Gondkhari Coal Mining Ltd is also in progress.

### **RESEARCH & DEVELOPMENT**

The Company, over the years, has invested significantly in its Research & Development (R&D) programme to develop a unique source of sustainable competitive advantage.

The Company's R&D is poised to deliver long term competitive advantage and play a leading role in creating significant business impact.

Research & Development is undertaken in the field of Ferrous & Ferrous Alloy metallurgy, process and other welding process, of pipe manufacturing (both seamless & ERW pipes), developing pipes of new standards & allied products including coating and Rust preventive oil, Varnish, Lacquers etc.

Equipped with advanced Testing and diagnostic equipments R&D Centre undertakes projects encompassing entire spectrum of processing manufacturing of steel pipes starting from raw material developments to manufacturing including various finishing activities.

R&D Centre is continuously engaged in development of new and value added products, improving the process parameters, improvement in product Quality, upgrading of existing technologies and introduction of new technologies.

While making significant contribution to the overall performance of the Company, R&D Centre accords highest priority and attention to the customer needs and delivers the technological services to the plant for full satisfaction of the customer.

### **OPPORTUNITIES THREATS & FUTURE OUTLOOK**

Following the financial meltdown of 2008-09, economies over the world are on a steady path of revival. Under the circumstances, production of Petroleum products and electrical energy are expected to pick up to meet the domestic demand and sustaining future supplies would require heavy investment in E&P activities and power projects which would drive the demand for seamless pipes.

One of the major driving forces for the demand for seamless pipes are exploration and production (E & P) activities in the oil and gas sector. The ever increasing energy needs have resulted in increased production of oil and gas in India. This is expected to provide impetus to demand for seamless pipes & tubes.

Thermal power forms a major chunk of the capacity enhancement being planned in the power sector during the 12th plan period. As such, it bodes an encouraging outlook for the seamless pipes / tubes industry.

Transportation of oil and gas at high pressure within a refinery requires high strength pipes, hence seamless pipes are extensively used for such purpose. Over the last decade the ever increasing domestic demand for oil and gas products has led to large capacity buildup in India. Thus fresh investment in refinery project is expected to push up demand for both seamless and ERW pipes. The total capex on addition refinery capacity is expected to be around Rs. 40,000 crore over the next 2-3 years.

All this including imposition of anti dumping duties on Chinese seamless pipes in the US and European markets augurs well for the Company. However the continued dumping by Chinese manufactures in the Indian market is having an adverse effect in the domestic market. While the domestic industry is working on imposition of anti dumping duties on Chinese seamless pipes, conclusive action on the same is awaited. Imposition of anti dumping duties on import of Chinese pipes in the domestic market would ease unnecessary pressure and would also benefit the Company.

### **INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY**

The Company has robust internal control systems and processes in place for the smooth conduct of its businesses. Our internal control systems are regularly checked by both external and internal auditors, who have access to all records and information about the Company. The Board and the management reviews the findings and recommendations of the Auditors and take corrective actions wherever necessary.

An independent firm of Chartered Accountants carries out an extensive internal audit. The Audit Committee reviews the Audit Reports submitted by the Internal Auditors, suggestions for improvements and the Audit Committee follows up on the implementation of the corrective actions.

SIGNIFICANT ACCOUNTING POLICIES & NOTES ON ACCOUNTS

**SIGNIFICANT ACCOUNTING POLICIES**

a. **Basis of Preparation of Financial Statements**

The financial statements are prepared under the historical cost convention, on accrual basis of accounting in accordance with the generally accepted accounting principles as applicable, accounting standards issued by The Institute of Chartered Accountants of India and the relevant provisions of the Companies Act, 1956.

b. **Use of Estimates**

The preparation of financial statements requires use of estimates and assumptions to be made that affect the reported amounts of assets, liabilities and disclosure of contingent liabilities on the date of financial statements and the reported amounts of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known / materialized.

c. **Revenue Recognition**

Sale of goods is recognized at the point of despatch to customers and is stated net of Sales Return & Sales Tax and inclusive of Excise Duty. Inter division transfer of goods for captive consumption/ internal uses are at market value. Dividend income is accounted when right to receive the same is established. All other income is accounted for on accrual basis. Claims are accounted for, in the year of settlement.

d. **Fixed Assets & Depreciation**

i) **Fixed Assets**

Fixed Assets other than those, which have been revalued, are stated at cost of acquisition, construction less accumulated depreciation and impairment losses. The cost comprises of purchase price and any other directly attributable cost of bringing the assets to working condition for its intended use. Fixed Assets, which have been revalued, are stated at the revalued figures, on the basis of revaluation report of Approved Valuer, less depreciation.

ii) **Depreciation & Amortisation**

Depreciation on Fixed Assets including revalued assets has been provided on Straight Line Method basis at the rates and in the manner specified in Schedule XIV of the Companies Act, 1956. The additional depreciation on Revalued Assets has been calculated on the basis of Estimated Life of the assets revalued. The additional depreciation on account of Revaluation has been adjusted from Revaluation Reserve.

iii) **Expenditure during construction period**

All Revenue expenditure incurred during the construction period, which are directly or indirectly attributable to acquisition/ construction of fixed assets, are capitalised at the time of commissioning of such assets.

iv) **Impairment of Assets**

Impairment loss is recognized wherever the carrying amount of an asset is in excess of its recoverable amount and the same is recognized as an expense in the statement of profit and loss and carrying amount of the asset is reduced to its recoverable amount. Post impairment, depreciation is provided on the revised carrying value of the asset over its remaining useful life.

Reversal of impairment losses recognized in prior years is recorded when there is an indication that the impairment losses recognized for the asset no longer exist or have decreased.

v) **Intangible Assets**

Intangible assets are stated at cost of acquisition less accumulated amortization. These are amortized over a period of time on the basis of estimated useful life based on Managements' estimates.

e. **Investments**

Investments are classified as long-term or current based on the Management intention at the time of purchase. Long-term investments are valued at their acquisition cost. Current investments are stated at lower of cost or fair market value. The provision for diminution in the value of long- term investments is made only if such a decline is other than temporary in the opinion of the Management.

f. **Inventories**

Raw Materials are valued at lower of cost (FIFO basis) or net realisable value.

Work-in-process is valued at direct material cost plus conversion cost depending upon the stage of completion or estimated net realisable value whichever is lower.

Finished goods are valued at lower of cost or net realisable value. Cost for this purpose includes direct material cost plus conversion cost and other direct overheads incurred to bring the goods to their present location & conditions. Excise Duty on goods manufactured by the company and remaining in inventory is included as a part of valuation of finished goods.

Stores & Spare parts are valued at lower of cost or net realisable value.
