CHAIRMAN'S MESSAGE

Dear Stakeholders,

The fiscal year 2024-25 marked a period of change and learning for the Indian textile industry. While the landscape continued to evolve, our strong commitment to operational excellence and consistency helped us move forward with confidence and purpose.

One of the major challenges we faced this year was the decline in market demand, which intensified competition and put additional pressure on our profit margins. At the same time, the prices of cotton and other raw materials rose moderately. However, to remain competitive and support our customers, we were forced to keep our product prices stable throughout the year. As a result, despite our strict cost-control measures and reduced operational expenses as reflected in the financial statements, our profit margins declined.

In the export market, we operate in a highly competitive global landscape dominated by established players offering high-quality products at competitive prices. Despite a slow international market, we secured an export order scheduled for delivery in May F.Y 2025-26, which is a positive milestone for our export initiatives. We will continue to improve efficiency, strengthen our position in the local market, and look at opportunities to grow internationally.

The slowdown in the hosiery and textile industry during the year was a challenge for everyone. Like many others, we too faced reduced demand, which led to higher unsold stock in our warehouses. Even in these tough times, your company worked hard to stay relevant and competitive, although this meant accepting lower profit margins. At the same time, the tax structure in our country, while important for national growth, has impacted the spending power of retailers and consumers. As a result, overall sales were affected.

In addition, sluggish market conditions and reduced demand adversely impacted the recovery of credit extended to our customers. This further added pressure on overall financial operations during the year.

Despite these challenges, we were compelled to maintain stable pricing in order to preserve our market position and prioritize affordability for our customers. With continued commitment and optimism, we move forward.

It's important to recognize how economic events continue to shape our industry. On one side, global economic shifts and geopolitical changes impact how we operate. On the other, past domestic challenges like demonetization, the effects of GST, and the waves of the pandemic have created on-going hurdles for the hosiery and textile sector. The aftershocks of these events are still

felt across the industry—from supply chain issues to fluctuating raw material costs—forcing us to stay flexible and strong. Even many main-board listed peers are still navigating these hurdles.

Moreover, it is regrettable that the MSME sector, which serves as the backbone of our economy, has not been accorded the priority and support it rightfully deserves. Despite our repeated appeals for assistance and relief, these have largely gone unheeded, compelling us to confront numerous challenges independently. Nonetheless, as an MSME and a regional brand, we remain steadfast in our efforts to compete alongside national and international players within the hosiery segment. Notably, Jet Knitwears Limited stands as the sole MSME from the hosiery industry listed on the NSE EMERGE platform. Without any comparable MSME peers on the exchange, we have successfully sustained our position against larger main board competitors, owing to the strength of our extensive retail network.

Given our limited regional presence and constrained advertising budget, especially when compared to global brands and major market players, our ability to survive and sustain in this highly volatile and uncertain business environment is a significant achievement. When comparing our scale of operations with peers listed on the Main Board of the stock exchange, it becomes evident that the playing field is far from level. These competitors enjoy advantages that, for us, often present substantial barriers.

However, in the face of such challenges, we must find the resilience to persevere. Jet Knitwears Limited is a company founded on the principles of hard work, determination, and innovation. It is precisely during difficult times that we must draw strength from these core values and unite as one team. I urge all our employees to remain committed and focused on our shared objectives. Let us intensify our efforts, seek new avenues for growth, and embrace innovative solutions to overcome the obstacles before us. Together, we will weather this storm and emerge stronger and more resilient.

On behalf of the Board, I express my heartfelt gratitude to the management team, employees, dealers, retailers, suppliers, and all other stakeholders for their unwavering dedication and outstanding performance over the past year. I wish the entire Jet Knitwears Limited family continued success, fuelled by renewed enthusiasm and confidence.

I firmly believe that while many more challenges may still lie ahead, we are well-prepared to face them and move confidently toward a better future. I assure you that Jet Knitwears Limited remains fully committed to leaving no stone unturned in creating value for all our stakeholders as we endeavour to reach new heights and accomplish even greater milestones.

Warm Regards,

The major highlights pertaining to the business and operations of the Company for the year 2024-25 are given below:

3. OBSTACLES FACED DURING THE YEAR

Due to rising inflation in the country, the purchasing power of the consumers has been reduced significantly leading to stagnancy in demand in the market, especially for regional brands like us. Additionally, rise in the overall raw material consumption cost also impacted the industry and the Company could not increase the required selling price of the products as compared to increase in the cost of raw materials. Further, many international players are entering Indian market with fast fashion clothing and heavy advertising leading to decline in the overall market place for small and regional brands like us.

4. GROWTH STRATEGY

Your Company has taken measures for the growth and expansion of the business. We have expanded our clothing range and now we are not limited to just hosiery products and undergarments but we have also ventured into the market of new products such as sweat shirts, jackets denims & hoodies etc. which is a complete different segment in itself. This has resulted into the expansion of our product horizon, opening various doors of opportunities for the Company and thereby exposing our reach to wider market coverage. In addition to this, your company has tried to maintain balance of sales between the e-commerce and retail business.

5. SUBSIDIARY / ASSOCIATE COMPANY / JOINT VENTURE

Company does not have any Subsidiary / Associate Company. There were no Joint Ventures entered into by the Company during the financial year 2024-25.

6. DIVIDEND

Keeping in view the current economic uncertainties, your directors consider it prudent to plough back the profits and not to recommend any dividend for the financial year 2024-25.

7. RESERVES

The Company has not transferred any amount to its reserves, the details in respect of which can be verified from the audited financial statement forming part of this report.

Audit Report

The report given by the Auditors on the Standalone Annual Financial Statements of the Company for the year ended March 31, 2025 forms part of this Annual Report. The Auditor's comments on the Company's account are self-explanatory in nature and do not require any explanation. Further, there is no qualification, reservation, adverse remark or disclaimer given by the Auditors in their reports. The Auditors of the Company have not reported any fraud in terms of the second proviso to Section 143(12) of the Companies Act, 2013 and therefore no detail is required to be disclosed under Section 134 (3)(ca) of the Companies Act, 2013.

However, the Auditors have included certain observations by way of "Emphasis of Matter", which do **not** modify their opinion. In accordance with good governance practices, the Board hereby provides its response to each matter:

1. *"The company's trade receivables (classified as unsecured and considered good by the management & Net of Provisions) are carried at Rs. 1792.48 lakhs, out of which Rs.1387.54 lakhs are outstanding for a period more than six months, which is abnormally high as compared to the turnover of the company. Also out of the above, receivables of Rs. 557.16 lakhs are aged more than three years. The balances of these parties are subject to confirmation, and as per the management of the company is recoverable."*

Management's Reply to Observation: Based on the Management analysis and assumptions, the trade receivables are considered good and are recoverable in nature. The company's trade receivables consist of outstanding balances from over 3000 parties, spread across various remote locations within the operational area of the Company and are generally low in value individually, since the supply chain of the company largely consists of small retailers, who were severely impacted by the post pandemic effects and now by slow market pace. The Management is making full efforts to recover these trade receivables. Hence, management does not believe there is any material financial impact of the observation.

2. *"We draw attention to a petition filed by a shareholder under Sections 241, 242, and 244 of the Companies Act, 2013, alleging oppression and mismanagement by the current Board of Directors. This petition is currently pending before the National Company Law Tribunal, Allahabad Bench. The outcome of this matter is uncertain, and as stated in the said note, the management does not anticipate any impact on the Company at this time".*

Management's Reply to Observation: This observation is self-explanatory.

3. *“The company's records relating to the WIP stock are not commensurate with the magnitude of data involved, as more than 30 job workers and 4 different stages are engaged in the process. According to management, a system for data maintenance is currently under development. Additionally, we have not verified the physical inventory and have relied upon the physical verification reports provided by the management in this behalf. The value of the total inventory is abnormally high compared to the turnover, and there is no proper record of the ageing of the inventory. As a result, non-moving or obsolete inventory could not be ascertained”.*

Management's Reply to Observation: Further, the Company manufactures various products like Vest, Underwear (including Boxers, Briefs & Trunks), Brassiere, Panties, Socks, T-shirts, Thermals, Lowers, Jeans etc. for men, women & children in different sizes for all age groups and markets it through various brands like Lycot Australia”, “Jet”, “Jet Eco”, “Fresh- Long”, “Boski” and “Take- off”. This huge product line under various brand names is to cater the customers’ needs which usually vary from affordable to luxury range which helps company to stay relevant & competitive in ever changing business environment. Due to above facts, company’s inventory stays high at most of the times. A new system for improved inventory tracking and WIP accounting is under development, and the Management is committed to further strengthening inventory controls.

4. *“Further, the company had been sanctioned a new Skill Development Project under Deen Dayal Upadhyay Grameen Kaushalya Yojna (DDU GKY Scheme) of Assam State Rural Livelihoods Mission (ASRLM) to train 1000 Candidates in projects (Rural Youth as defined in guidelines of DDU-GKY) with placement linkage by setting up a training/skill center at Majuli and Karimganj for the State of Assam. We did not audit the financial statements and other financial information, in respect of this scheme. Amounts received and expended under this scheme is subject to audit by a separate auditor, which financial statement and other financial information and auditor's reports for the year ended on 31.03.2025 have been furnished to us by the management. As informed by the management there was no further progress so status quo was maintained. Our opinion on the financial statements, in so far as it relates to the amounts and disclosures included in respect of this scheme and our report in terms of sub-sections (3) of Section 143 of the Act, in so far as it relates to the aforesaid scheme is based solely on the report of such other auditor.”*

Management's Reply to Observation: This observation is self-explanatory.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

ECONOMIC OUTLOOK

GLOBAL:

During the financial year 2024–25, the global economy is projected to expand moderately, with GDP growth estimated at approximately 2.8–3.0%, reflecting a cautious recovery from 2023's subdued growth of 2.8%, impacted by ongoing monetary tightening and heightened geopolitical uncertainties. Growth continues to diverge across regions. Advanced economies such as the United States, the Euro Area, and Japan are expected to expand at a slower pace of 1.0–1.9%, constrained by elevated interest rates, persistent core inflation, and subdued external demand. Emerging markets and developing economies, particularly in Asia, are expected to demonstrate greater resilience with growth around 3.7–4.4%, supported by strong domestic consumption, robust public infrastructure investment, and improving market fundamentals.

Inflationary pressures have begun to ease, with global inflation forecast to decline to approximately 4.1–4.3% in 2025, driven by lower commodity prices, easing supply chain disruptions, and continued monetary discipline. However, core inflation remains elevated in many advanced economies, delaying the timeline for full policy normalization. Central banks are expected to begin gradual easing later in the fiscal year, contingent on inflation trends and economic conditions.

Global trade dynamics remain subdued, shaped by the prolonged impacts of the Russia–Ukraine war, the escalating Israel–Gaza conflict, and the recent flare-up in the Iran–Israel confrontation, which has heightened regional instability and triggered volatility in global energy markets. These conflicts, along with broader geopolitical tensions and an increasing shift toward protectionism and strategic decoupling—especially in technology and critical goods sectors—are compelling businesses to reconfigure supply chains to enhance resilience, with greater emphasis on diversified sourcing, regionalization, and inventory buffers.

Sustainability and ESG factors continue to influence investor sentiment, regulatory frameworks, and long-term capital allocation. Concurrently, digital transformation—driven by AI, automation, and cloud technologies—continues to reshape operational models, while remote and hybrid work trends remain embedded in corporate strategies. Despite these uncertainties, strategic opportunities persist in green technologies, e-commerce, digital infrastructure, and health-tech, where innovation and adaptability will be key drivers of value creation in FY 2024–25.

INDIAN:

India has maintained its position as the world's fastest-growing major economy in FY 2024–25, with a projected GDP growth rate of 6.5%, according to the Reserve Bank of India. This growth trajectory underscores the nation's robust economic fundamentals and resilience in the face of global uncertainties.

In the first quarter of FY 2024–25, India surpassed the UK to become the fifth-largest economy globally, marking a significant milestone in its economic ascent. This achievement is a testament to the country's expanding economic influence and its potential to become one of the top three economic powers in the world over the next 10–15 years.

The year 2024 also witnessed India's continued global leadership, following its successful G20 presidency in 2023. The nation's active participation in international forums and its strategic diplomatic engagements have further solidified its standing on the global economic stage.

Current State of the Economy-

- India's economic performance in the fiscal year 2024–25 demonstrated resilience amid global challenges. The country's real GDP at constant prices is estimated to have reached ₹184.88 lakh crore, marking a growth of 6.45 compared to 9.2% in the previous fiscal year. (Source: PIB India Economic times).
- The International Monetary Fund (IMF) has retained India's GDP growth forecast at 6.5% for FY 2025–26, citing steady domestic demand and structural reforms, while the PHD Chamber of Commerce and Industry (PHDCCI) projects growth between 7.8% and 8.2%, emphasizing India's strong economic fundamentals and forecasting an average annual GDP growth of 6.7% over the next 23 years.
- In FY 2024–25, India's GDP growth is estimated at 6.5%, supported by robust performance in key sectors. The construction sector grew by 8.6%, maintaining strong momentum, while the manufacturing sector expanded by 5.3%, reflecting a moderation from the previous year's surge. Private consumption rebounded sharply, with Private Final Consumption Expenditure (PFCE) rising by 7.3%, the highest in recent years, boosting production activity and capacity utilization across sectors. This growth moderation comes after the exceptional post-pandemic recovery witnessed in FY 2023–24..
- In FY 2024–25, India's central government fiscal deficit narrowed to 4.8% of GDP, better than the budgeted 4.9%, supported by strong tax revenues and focused capital expenditure, as per data from the Press Information Bureau and IBEF.
- Personal income tax collections are estimated to have grown by 22.1% in FY2024–25, underscoring rising incomes among salaried professionals. This strong growth also reflects the government's continued success in widening the tax base by maintaining stable exemption limits and leveraging digital tools to curb tax leakage. (Source: PIB India)
- Strong domestic demand for consumption and investment, coupled with the Government's sustained focus on capital expenditure, remained key drivers of GDP growth in the first half of FY 2024–25. Rising household incomes and increased public spending on infrastructure projects provided a solid boost to economic activity. These factors supported the economy's projected growth trajectory, reinforcing India's position as one of the fastest-growing major economies.

INDUSTRY STRUCTURE AND DEVELOPMENT

Textiles & Apparels

The Indian textile and apparel industry continues to be a vital pillar of the national economy, serving as the second-largest employer after agriculture and contributing significantly to industrial output, exports, and GDP. In FY 2024–25, the industry has navigated a complex global and domestic environment, marked by a cautious recovery in exports, evolving consumer preferences, and transformative government interventions. As per the Ministry of Textiles and the Ministry of Commerce & Industry, the sector contributes around 2.3% to India’s GDP, 13% to industrial production, and 12% to total exports, employing more than 45 million people directly and another 100 million in allied sectors.

During April–October 2024, India's overall textile and apparel exports (including handicrafts) reached USD 21.35 billion, up from USD 20 billion in the same period last fiscal—registering a growth of around 7%. This growth has been primarily driven by sustained demand from key global markets such as the US, EU, and emerging Asian economies. However, the industry continues to face headwinds in the form of increased raw material costs, logistical disruptions (notably due to the Red Sea crisis), and import pressure from countries like Bangladesh and China. The US and EU markets, which collectively account for more than 50% of India’s apparel exports, have witnessed cautious buying trends, impacting export volumes and order visibility for Indian manufacturers.

A notable structural development in FY 2024–25 has been the strategic focus on man-made fibres (MMF) and technical textiles. With the global textile trade increasingly shifting toward MMF-based products, India’s reliance on cotton-based manufacturing is being actively rebalanced. The Production Linked Incentive (PLI) Scheme for textiles, with a total outlay of ₹10,683 crore, has received 64 approved investment proposals with committed investments exceeding ₹19,000 crore. These projects are expected to generate over 2.45 lakh new jobs and catalyze production in MMF and technical textile categories, aligning India with global demand patterns.

Complementing this is the launch and development of PM MITRA Parks—seven mega textile parks spread across key states like Tamil Nadu, Maharashtra, Gujarat, and Karnataka, with a cumulative investment of ₹4,445 crore from the central government. These integrated parks aim to offer world-class infrastructure, reduce logistics costs, and strengthen India’s global competitiveness by enabling “farm-to-fashion” value chain consolidation at a single location.

In the area of skill development, the Samarth Scheme (Skill Development in Textiles Sector) has been extended till FY 2025–26 with an allocation of ₹495 crore. It aims to train over 3 lakh youth, especially in emerging areas like technical textiles, apparel design, and garment technology. Alongside this, the Amended Technology upgradation Fund Scheme (ATUFS), with a sanctioned budget of ₹17,822 crore, continues to support modernization and scale enhancement in weaving, processing, and finishing units—helping domestic producers bridge the technology gap.

Technical textiles, a segment with high growth potential, is also gaining momentum under the National Technical Textiles Mission (NTTM). Over 160 R&D and innovation projects worth ₹500 crore have been approved so far, focusing on high-value segments such as geotextiles, agrotech, meditech, and defence textiles. This reflects a structural transformation in India's textile basket—from low-value cotton yarn exports to value-added functional and performance-based textiles.

On the raw material front, FY 2024–25 saw volatility in cotton production. The Cotton Association of India (CAI) has projected India's output to decline by 7.4% to 30.2 million bales due to adverse weather conditions. This has prompted higher imports (projected at 2.5 million bales) and pushed procurement costs upward for domestic manufacturers. Additionally, polyester and spandex-based fabric imports—mainly from China, Taiwan, and Vietnam—have remained high, particularly for segments like sportswear and active wear, underscoring the need to ramp up domestic MMF production capabilities.

The rising import of finished fabrics and garments—particularly from Bangladesh (benefiting from zero-duty access under SAFTA and LDC status)—remains a concern. Import of knitwear garments alone surged by over 50% in FY 2023–24 and has continued an upward trend in the current fiscal. This import surge has adversely impacted domestic production, especially for MSMEs, and has fueled the demand for a level-playing field through trade rationalization measures.

Despite challenges, the domestic demand environment is gradually stabilizing. Urban discretionary spending has shown signs of improvement post-festive season, with segments like at leisure, innerwear, and kids wear reporting healthy growth. Additionally, the push for sustainability, traceability, and circularity is gaining ground, with more Indian manufacturers investing in green technologies, recycled fibers, and water-efficient processes. The government's initiatives such as Quality Control Orders (QCOs), extended producer responsibility (EPR) frameworks, and support for textile machinery manufacturing will further support this transition.

In summary, the Indian textile and apparel industry is undergoing a structural evolution. While short-term global uncertainties and domestic supply-chain constraints persist, the medium to long-term outlook remains optimistic. The alignment of policy support, infrastructure investment, and product diversification into MMF and technical textiles is setting the stage for India to enhance its competitiveness and aim for the government's USD 100 billion export target by 2030. For textile companies, especially those integrated across the value chain, FY 2024–25 presents a critical opportunity to modernize operations, expand product offerings, and tap into emerging global trends for sustainable and inclusive growth. Innerwear Market Segment

The innerwear market in India, which has witnessed substantial growth over the past decade, has exhibited notable resilience during times of adversity. Market size reached ₹84,992 crore in 2024. Looking forward, it is expected that the market will reach ₹1,59,775 crore by 2033, exhibiting a growth rate (CAGR) of 6.70% during 2025-2033.

The market is driven by increasing fashion consciousness, rising disposable incomes, growing urbanization, and a shift toward premium and branded products. Changing consumer preferences, e-commerce growth,

rising awareness of comfort and functionality, and advancements in fabric technology also contribute to the India innerwear market share, particularly in women's and athleisure segments.

> Increasing health consciousness among consumers has spurred demand for innerwear made from breathable materials.

> Rising disposable incomes have led consumers to invest in premium branded innerwear that matches their preferences.

> Fashion trends showcased on various channels including social media have fueled a preference for innerwear that reflects personal style.

> Additionally, urbanization is amplifying these trends, particularly in tier 2 and tier 3 cities, highlighting the market's potential.

> Trends such as consumers prioritizing both aesthetics and comfort, catalysed by the pandemic, have also spurred growth in the comfort wear segment, which was estimated at Rs 11,571 crores in 2023 and is expected to grow at a CAGR of 17% to reach Rs 15,840 crores by 2025.

> Together, the inner & comfort wear market are projected to be valued at Rs 91,306 crores in 2025, growing at a CAGR of 12.1% between 2023-25, with innerwear accounting for over 80% of this market.

However, even though innerwear market segment is growing; the consumer preference has shifted from affordable products to heavily branded products and this gap between the branded market segment which is acquired by big market players and the unbranded market segment is widening by every passing day.

In the men's inner & comfort wear realm, the ascendancy of branded products has been notable, constituting 62% of the market share in 2023 and projected to strengthen to 64% by 2025. This upward trajectory reflects a distinct consumer preference for established brands only.

The women's inner & comfort wear branded market, which had a 39% share in 2023, is expected to grow at a faster pace than men's branded market to reach 41% share by 2025.

OPPORTUNITIES AND THREATS

Opportunities

- The Indian government has several portals for the welfare of laborers. Udyam, NCS, e-Shram, and ASEEM are the government portals that help people in finding employment in various MSMEs. All these portals are now interlinked to help business owners in finding manpower.
- The Production-Linked Incentive (PLI) scheme has attracted investments of around ₹19,000 crore into the textile sector, creating approximately 7.5 lakh jobs. With a focus on man-made fibres (MMF) and technical textiles, the scheme is driving innovation and scalability—key growth areas that are positively impacting the innerwear segment.
- The Union Finance Minister has emphasized the development of infrastructure and the setting of centralized Effluent treatment plants for the textile industry under IPDS and CETP. So, funds are allotted in the current budget for these purposes, for the best interest of this industry in India.
- Production-linked incentive (PLI) scheme launched for promoting the apparel industry has attracted investment of Rs. 19,000 Crores approximately and generate almost 7.5 Lakhs new employment opportunities.
- With regard to 'Make In India' initiative and to boost employment generation through setting up of 7 (Seven) PM Mega Integrated Textile Region and Apparel (PM MITRA) Parks in Greenfield/Brownfield sites with world class infrastructure
- Increase in fashion and brand consciousness making consumers more aspirational and discerning; increasing urban women population and women corporate workforce has proved to be beneficial for women segment of apparel market.
- Today with technological advancements, we notice a wide array of comfortable fabrics being used. From nylon to organic cotton, spandex blend cotton fabric to modal and from micro-fiber to more durable material. This has led to product innovations in the industry.

Threats & challenges

- The post pandemic effects and multiple global as well as domestic factors have slowed down the commercial activities. The lack of funds to buy raw materials for production was another drawback in this industry. Political tensions or militant activities in some places hinder the smooth operations of the textile industry there. Many textile companies face severe labor shortages and a lack of regular transportation if their factories are located in remote places.
- The inflation in the Indian economy results in frequent demands among laborers for salary hikes. Thus, industry owners do not find the means to expand their business and compete with global textile leaders from other countries.
- The high cost of power in India is another hindrance to textile production. Most modern machines are power-driven, which raises the overall production costs for business owners.
- Fluctuating prices of the raw materials such as cotton, yarn, and chemicals, and thereby raising price of the finished products not be viable in a competitive market.
- Ever changing fashion needs of consumers put industry players in a pressure to constantly adapt emerging fashion trends in the markets.
- Several International apparel brands are entering into India as the country is emerging as one of the largest apparel market in the world and on the other hand new start ups are entering market with aggressive marketing and discounts.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standard on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control system over financial reporting includes those policies and procedures that:

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with generally accepted accounting principles, and that the receipts and expenditures of the company are being made only in accordance with authorizations of the management and directors of the company; and

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.
