Circular Ref. No: 08/2021

To All Members,

Application Programming Interface (API) for UCC upload

All trading members are required to assign unique client codes for all the clients while trading on the Exchange platform. The trading members collect and upload their client details in the Unique Client Code (UCC) database of the Exchange.

Currently, Exchange has provided a web-based UCI online system for upload of UCC to Exchange. With a view to enhance the efficiency & accuracy of the data submissions, Exchange is pleased to introduce an Application Programming Interface (API) based platform for UCC upload on the Exchange. The API will enable trading members to directly upload data from their back-office system to NSE UCI Online system without any manual intervention.

User manual (UAT and Live) explaining the process to be followed for availing the API facility is provided on the path - *Member Portal-UCI Online-Help Option-Manuals*.

Members are required to successfully test the API in the UAT environment before using the API in the live setup.

For any clarification, please contact at the number/email id given below.
