This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. Internal Risk Factors

- 1. We had, in the past, entered into OTS with our lender in respect of our credit facilities. Any inability to any lenders in future could adversely affect on our business, results of operation and financial condition.**

During 2011, we went for a capacity expansion at multiple manufacturing locations for which our Company had availed credit facilities from time to time (fund based & non-fund based) from State Bank of India (SBI) for an aggregate amount of ₹ 4150 lakhs (₹ 4019 lakhs outstanding as on May 18, 2016). However, on account of losses, we failed to repay our debts. The bank classified our account as NPA (Non-Performing Asset) with effect from September 28, 2014 with total outstanding liability of ₹ 4019 lakhs. Under the applicable provisions of Security Interest (Enforcement) Rules, 2002 and SARFAESI, SBI e-auctioned the Noida Unit located at C-44, Noida, Phase-II (Uttar Pradesh) having plants and machinery on February 28, 2017 at bid amount of ₹ 524 lakhs. Further ₹ 81 lakhs were realized by them from Debtors. The remaining balance was settled by SBI as OTS (One Time Settlement) for an amount of ₹ 1152 lakhs which was

settled in September, 2017, pursuant to which SBI issued a no-due certificate in the name of our Company on March 31, 2018. Our Company is currently not availing any credit facilities from any lender except loan against commercial vehicle to the extent of ₹ 13.59 lakhs.

Any inability in future, on our part to pay to lenders on time may lead to termination of our credit facilities, levy of penal interest, acceleration of all amounts due under such financing agreements and enforcement of any security provided. Any of these circumstances or event would have an impact on the future borrowings of our Company and material adverse effect on our business, results of operation, financial condition and prospects.

2. *In the past, on account of losses, our Company failed to meet financial performance as per the expectation of our Investor which subsequently resulted in dispute. Any failure on our part go meet performance parameters in future may lead to dispute, penal provisions, financial & reputational loss.*

We have entered into Share subscription-cum-shareholder agreement with AA Development Capital India Fund 1, LLC (Investor) in 2010-11 for an investment of around ₹ 3500 lakhs constituting 41.67% stake in our Company. There was a dispute amongst management of our Company and Investor on account of failure to perform as per the expectation of our Investor due to continuous losses in our Company. Upon failure of amicable resolution, Investor decided to take exit from our Company and initiated proceedings against our Promoters before Company Law Board (now NCLT) which was followed by arbitration proceedings. Arbitral Tribunal rejected the claims and counter claims in its award dated October 31, 2017. Consequently, AA Development Capital India Fund 1, LLC withdrew its petition from NCLT and thereby both parties decided for out of court settlement. On July 24, 2018 settlement deed was executed between them and it was decided that Investor will take complete exit by transferring its shareholding to our Promoters. AA Development Capital India Fund 1, LLC transferred all its shareholding on September 6, 2018. As on date, our Company has not entered into any other share purchase agreement. Any failure to meet performance parameters in future and its related covenants in respect of any agreement(s) may restrict or delay certain actions or initiatives that we may propose to take from time to time. This may lead to dispute, penal provisions, financial & reputational loss.

3. *Our Promoters, Mr. Jaiwant Bery and Mrs. Nomita Bery, were associated with companies which were delisted compulsorily by an order of BSE Dissemination Board.*

BSE Dissemination Board vide its notice dated August 21, 2017 compulsory delisted 110 companies (including their whole-time directors, promoters and group companies) and debarred them from accessing the securities market for a period of 10 years. Amongst such 110 companies, name of Hitkari China Limited was also included. The names of our Promoters Mr. Jaiwant Bery and Mrs. Nomita Bery also appeared in the list of compulsory delisting of companies as promoter(s) of *Hitkari China Limited*. On becoming aware of their names appearing in the list of BSE compulsory delisting, our Promoters submitted their written representation clearing out their position in *Hitkari China Limited* as not the promoters but only the shareholders of the company from 1987 to 2005. Subsequently, upon receiving the representations and documents evidencing that none of our Promoters' association with *Hitkari China Limited*, BSE cleared the name of our Promoters Mr. Jaiwant Bery and Mrs. Nomita Bery from the effects of notice dated August 21, 2017. Therefore, our Promoters Mr. Jaiwant Bery and Mrs. Nomita Bery are not debarred from accessing the capital market which is communicated by BSE vide its email dated April 22, 2024 stating that the provisions of compulsory delisting and its related provisions are not applicable on our Promoters.

4. *We have not yet obtained possession of the land/premises where we intend to set up our expansion unit.*

We own Plot No. 17, Industrial Area Barortiwala, Baddi, District Solan, Himachal Pradesh from where we operate Unit-I and Unit-II. The total area of Plot 17 is around 3715 sq.mtrs having covered area of 40,000 sq.ft. However, Unit-III located at Plot No. 15 (admeasuring 8670 sq.ft.) and store/godown (admeasuring 10665 sq.ft.) located at Plot No. 16 are on lease. We are planning to expand our operations from a new location, which has been identified at Khasra Number 183(16/27), 184(29/77) & 398/185 Bated Village- Kotla, Post Office Barotiwala, Tehsil Baddi, District Solan, Himachal Pradesh, having plot size of around 70,000 sq.ft. and is around two km from our existing location of Unit-I & II. The land has necessary industrial shed and office block building ready for usage. We have executed lease agreement with the owner on December 10, 2024. The lease agreement is yet to be registered with the Sub-Registrar of Tehsil Baddi, Distt. Solan, Himachal Pradesh, which will happen closer to gaining possession of the premises. As per the said lease agreement, the lease shall commence w.e.f. February 1, 2025 for a period of 15 years with a lock-in period of 4 years. The possession of the premises has already been delayed by three months as envisaged earlier. There can be no assurance that we would be able to obtain possession of the same premises on time. In case we fail to obtain possession for any

reason whatsoever, we may have to search for an alternate location/premise which may not be available to us on time or on the same terms or any favourable terms or in the same location, which may affect our operations adversely. Any additional burden on account of this may adversely affect our financial conditions.

Further, post-possession of the said location and installation of plant & machinery, we will apply to regulatory authorities for necessary clearances, no objection certificates, consents, approvals, licenses, etc. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

Further, in the event of termination/non-renewal of our existing agreements in future, we may be required to vacate the said premises which may cause disruption in our inventory management, corporate affairs and business and impede our effective operations which could temporarily impact on our business operations until we get suitable alternative premises. For details on the duration of existing rent/lease agreements for our premises, please refer to the section titled “*Our Business*” beginning on page 102 of this Red Herring Prospectus.

In addition, agreements pertaining to the existing lease/rent have irregularities of enforceability, such as non-registration of agreement and inadequate payment of stamp duty, which may affect the value of the relevant agreements in specific performance or other injunctive procedures in a court of law, and could impair our operations. Further, it may result in levy of penal charges, in case cognizance being taken by concerned authorities.

There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations.

- 5. Our Company has yet to place orders for 42.71% of the plant & machineries for our proposed object, as specified in the Objects of the Issue. Any delay in placing orders, procurement of plant & machineries may result in time and cost over-runs and our business, prospects and results of operations may be adversely affected.***

Our Company have identified the type of plant and machineries required to be bought from the proceeds of the Issue. We have placed orders for 57.29% of the plant and machinery and orders for 42.71% are yet to be placed, as detailed in the “*Object of the Issue*” beginning on page no. 76 of this Red Herring Prospectus. We have initially expected completion of orders of plant & machinery by August, 2024; obtaining possession of premises by November, 2024 and commencement of commercial production by February-March, 2025. However, with the delay in obtaining possession of premises, we now expect to complete the orders for plant & machinery by January, 2025; obtain possession of premises by February, 2025 and commencement of commercial production by May, 2025. In the event of any further delay in placement of such orders, the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary accordingly. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. Our proposed project may be subject to potential problems and uncertainties including cost overruns or delays. Problems that could adversely affect our expansion plans include labour shortages, increased costs of equipment or manpower, inadequate performance of the equipment and machinery installed in our manufacturing facilities, delays in completion, defects in design, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory, environmental and other regulatory approvals, incremental pre-operating expenses, taxes and duties, environment and ecology costs and other external factors which may not be within the control of our management.

Further, there can be no assurance that our budgeted costs may be sufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. There can be no assurance that we will be able to complete the aforementioned expansion in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition. For further details, please refer to the chapter titled “*Object of the Issue*” beginning on page no. 76 of this Red Herring Prospectus.

- 6. If we are unable to successfully implement our proposed expansion plans, our results of operations and financial condition could be adversely affected.***

We continue to seek to increase the supply of our products and strengthen our position in the industry. We intend to continue our focus on flexible packaging by expanding our existing capacity by adding new manufacturing units at Baddi, District Solan, Himachal Pradesh, near to our existing manufacturing units. We propose to expand by installing 7-layer film technology, extrusion laminates and bag making machines.

The expansion of our existing manufacturing capacity would involve risks, including risks associated with the timely completion of these projects, and our failure to adequately manage these risks notwithstanding our operational and financial systems, procedures and controls could have a material adverse effect on our business, financial condition, results of operations and prospects. Factors that could affect our ability to complete the expansion on time, include receiving the machineries of desired quality and on the scheduled time, completing installation on time, receiving necessary statutory approvals, a decline in demand for our products and general economic conditions.

Our expansion plans and business growth could strain our managerial, operational and financial resources. Our ability to manage future growth will depend on our ability to continue to implement and improve operational, financial and management information systems on a timely basis and to attract, expand, train, motivate, retain and manage our workforce.

We cannot assure you that our personnel, systems, procedures and controls will be adequate to support our future growth. Failure to effectively manage our expansion may lead to increased costs and reduced profitability and may adversely affect our growth prospects. Any of these factors may cause us to delay, modify or forego some or all aspects of our expansion plans. Further, there can be no assurance that we will be able to execute our strategies on time and within the budget estimated by the Company.

7. *We may not be able to manage our growth or sustain the pace of our growth in future periods, which may adversely affect our business, financial condition, results of operations and prospects.*

Our total revenue for the 8 months period ended on November 30, 2024, fiscal 2024, 2023 and 2022 was ₹ 7,802.09 lakhs, ₹ 11,612.11 lakhs, ₹ 11,040.76 lakhs and ₹ 9,410.27 lakhs respectively. Further, our Earnings Before Interest, Tax, Depreciation and Amortization (“EBITDA”) for period ended on November 30, 2024 and during the fiscal 2024, 2023 and 2022 was ₹ 705.19 lakhs, ₹ 1793.25 lakhs, ₹ 1206.75 lakhs and ₹ 1000.61 lakhs respectively. These EBITDA, being exceptional earnings, may not be sustainable in future. Therefore, our historical financial statements may not be indicative of the pace of our future growth, as we may not be able to sustain our growth at a similar rate in future periods, including as a result of any of the challenges, uncertainties and risks discussed in this section and elsewhere in this Red Herring Prospectus

8. *Our other income include profit from investment in stock market/mutual funds, which being exceptional income, and is not sustainable.*

Our total income for 8 months period ended on November 30, 2024 and during the fiscal 2024, 2023 and 2022 was ₹ 7802.09 lakhs, ₹ 11,612.11 lakhs, ₹ 11040.76 lakhs and ₹ 9410.27 lakhs respectively. This included other income of ₹ 1234.10 lakhs, ₹ 588.74lakhs, ₹ 123.69 lakhs and ₹ 60.55 lakhs for the period ended November 30, 2024 and during fiscal 2024, 2023 and 2022 respectively.

In the COVID-19 impacted period of 2021-22, we had excess funds that couldn't be utilized for expanding our business or related activities. Consequently, we invested those surplus funds in the stock market. We generated revenue of ₹ 1063.18 lakhs during 8 month period ended on November 30, 2024, ₹ 504.74 lakhs during financial year 2023-24, ₹ 32.36 lakhs during financial year 2022-23 and ₹ 30.88 lakhs during the financial year 2021-22 from investment in stock market/mutual fund. This constituted 13.63%, 4.35%, 0.29% and 0.33% of total income during these periods. We have liquidated our significant portfolio of investments as on date. We have no plans to pursue these activities in the future, thus these figures are not expected to be sustainable. Further, any potential future investments in the stock market may significantly impact our financial operations adversely.

9. *There are outstanding litigations involving our Company, Promoters and Directors which, if determined adversely, may affect our business and financial condition.*

10. We failed to meet our export obligations in the past.

During the period 2005-2010, we imported several machines as our Company had plans to export the goods made from such machines, they were imported against customs duty free licenses with export commitments to be fulfilled in subsequent years. A total of 8 licenses were obtained and the total customs duty saved was ₹ 229.41 lakhs. We were able to fulfill export obligation of the first five licenses within the due date and after providing the export data to the DGFT, the department discharged the Export Obligation Discharge Certificates (EODC) for those 5 licenses. The export obligations on the later three licenses were not met on time hence the DGFT created a demand on our Company against all 3 licenses. In respect of two licenses i.e. EPCG License no. 0530144805 dated 16.10.2007 and EPCG License number 0530154079 dated 26.11.2010, our Company completed majority of its export obligations but could not meet its entire 100% export obligations on account of not getting enough export orders due to global recession. As regard to our third license no. 0530145308 dated 01.01.2008, our Company has completed export obligations but had not submitted desired documents with DGFT due to oversight.

Subsequently in FY 2023-24, DGFT offered an “Amnesty Scheme for one time settlement of default in export obligation by advance and EPCG authorization holders”, in which our Company made payment and also submitted proof of exports (including deemed exports). We received EODC in relation to two licenses number 0530154079 and 0530145308. In respect of third license number 0530144805 dated 16.10.2007, we made payment under the amnesty scheme to customs department of ₹ 17.30 lakhs on April 1, 2024. The said amount alongwith our bank guarantee of ₹ 15.50 lakhs (which was already encashed by the custom department) aggregating to ₹ 32.80 lakhs was considered as full discharge of liability. The matter is now pending with the customs department for issuance of EODC. In case of non-acceptance of our application or issuance of any adverse order by DGFT in this matter, our financial operations could be adversely impacted to that extent.

11. A significant portion of our revenue is generated from sales of our top five products. The loss of customers who purchase these products, or a significant reduction in the production and sales of, or demand for said products for any reason may adversely affect our business, financial condition, results of operations and prospects.

We are engaged in manufacturing of 3 ply laminates, 5-layer barrier films, laminate pouches, poly-pouches, BOPP labels/PVC and other products. The revenue contribution from our top five product has been as under:

(₹ in lakhs)

Products***	8 month period ended November 30, 2024		FY 2024		FY 2023		FY2022	
	Revenue	%	Revenue	%	Revenue	%	Revenue	%
5-layer barrier films	1,780.85	27.05%	2,933.91	26.55%	2,778.95	25.41%	2,335.64	24.95%
3 ply laminates	1,958.95	29.79%	3,220.70	29.15%	3,377.08	30.87%	2,859.51	30.55%
Laminate pouches	1,175.38	17.85%	2,048.53	18.54%	2,236.78	20.45%	2,161.74	23.09%
BOPP labels/PVC	500.15	7.60%	909.39	8.23%	857.99	7.84%	694.07	7.41%
Poly Pouches	820.70	12.46%	847.51	7.67%	934.89	8.55%	800.19	8.55%
Revenue from top five products	6,236.03	94.75%	9,960.04	90.14%	10,185.69	93.12%	8,851.15	94.55%

The revenue contribution from our top five product categories has been substantial i.e. more than 90% during the past three financial years. However, the composition of these top products is subject to change due to market dynamics, consumer preferences, and our ongoing product innovation efforts. Potential factors such as increased competition, pricing pressures, or fluctuating demand pose risks that could impact future revenue from these key categories. Any adverse

developments in the sales performance of our top five products could significantly affect our overall revenue and, consequently, have adverse implications for our business operations, financial performance, and overall market position.

12. Our reliance on certain industries for a significant portion of our revenue could have an adverse effect on our business.

We are primarily engaged in the business of manufacturing of flexible packaging material catering to the needs of diversified industries like FMCG, processed foods, adhesive, pharmaceuticals, cosmetic and others. The table set forth below provides industry wise revenue break up for the 8-month period ended November 30, 2024 and for financial year ended March 31, 2024, 2023 and 2022.

(₹ in lakhs)

Industries catered	8 month period ended November 30, 2024		FY 2024		FY 2023		FY2022	
	Revenue	%	Revenue	%	Revenue	%	Revenue	%
Processed foods	2,552.32	38.76%	4,300.37	38.92%	3,950.15	36.11%	3,389.05	36.20%
FMCG	2,530.16	38.43%	3,780.22	34.21%	3,758.66	34.36%	3,240.15	34.61%
Adhesive	631.79	9.60%	1,220.01	11.04%	1,827.58	16.71%	1,511.36	16.15%
Gross revenue from top-3 industries	5,714.27	86.79%	9,300.60	84.17%	9,536.39	87.18%	8,140.56	86.96%

Factors affecting any of these industries in general, or any of our customers in particular, could have a cascading adverse effect on our business, financial condition and results of operations. Such factors include, but are not limited to, the following:

- a) changes in technology or consumer tastes and requirements that alter demands for our products;
- b) our customers' failure to successfully market their products or to compete effectively;
- c) loss of market share, which may lead our customers to reduce or discontinue the purchase of our products;
- d) downturns or industry cycles that impact demand;
- e) change in any registration requirements or non-renewal of registrations or imposition of a regulatory ban, or trade sanctions imposed across the country or any such restrictions on the business or product or customer's final product;
- f) economic conditions of the markets in which our customers operate;
- g) regulatory issues faced by these industries in India and internationally; and
- h) demand for our customers' products, which may cause our manufacturing capacities to be underutilized during specific periods.

13. Any inability to pass on an increased price of the primary raw material, used for manufacturing our products, may affect our profitability.

The primary raw material used for manufacturing our products is polymer which are used in the form of polyester, low-density polyethylene ("LDPE"), mLLDPE, polyethylene terephthalate ("PET"), biaxially-oriented polypropylene ("BOPP"), aluminum and nylon film in our manufacturing process. Raw material consumed as a percentage of revenue from operations for the 8-month period ended on November 30, 2024 and for financial year ended on March 31, 2024, March 31, 2023 and March 31, 2022 was 71.67%, 68.29%, 72.15% and 73.74% respectively. Some of our raw material is imported, however, we source the same from domestic distributors/suppliers. We have imported directly some of our raw materials in the past. Our direct imports constituted 11.56%, Nil%, 9.46% and 15.26% for 8-month period ended November 30, 2024 and during FY 2024, FY 2023 and FY 2022 respectively of our total raw material cost.

Further, any fluctuations in the demand and/or supply of polymers may impact on its purchase price. Our raw materials, being commoditize, and therefore the prices of it being highly volatile. Within each year, the prices can go up and down substantially on frequent intervals. In addition, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, seasonal factors, environmental factors and changes in government policies and regulations, including those relating to the packaging industry in general. We have not entered into any long-term contracts with our suppliers. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us at reasonable prices and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material could also impact the cost of polymers required by us for manufacturing our finished products. Further, we face a risk that one or more of our existing suppliers may discontinue their supplies to us, and any inability on our part to procure raw materials or products from alternate suppliers in a timely manner, or on commercially acceptable terms, may adversely affect our

business, financial condition and results of operations. Raw material purchases made from our top 10 suppliers for 8-month period ended on November 30, 2024 and financial year ended March 31, 2024, 2023 and 2022, respectively were ₹ 3,539.89 lakhs, ₹ 4370.47 lakhs, ₹ 5177.24 lakhs and ₹ 4574.82 lakhs, respectively representing 75.20%, 58.06%, 65.73%, and 66.35% respectively of our total raw material or products purchases.

We do not have an understanding or formal agreements executed with our customers, wherein we have mutually agreed to pass on any increase in the cost of raw materials to our customers. In the event, we are unable to account the increased cost of polymers in the cost of our products, our financial condition and result of operations would be severely impacted. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers. Our inability to pass on the increased costs of polymers to our customers in future, may affect our financial performance.

14. We do not have any long-term agreements with our customers. If our customers choose not to source their requirements from us, our business and results of operations may be adversely affected to that extent.

We do not have any firm commitment long-term supply agreements with our customers and instead rely on short term purchase orders from our customers. Many of the purchase orders specify a price per unit delivery schedule, and the quantities to be delivered. We are not significantly dependent on certain of our major customers and the details of contribution of our top five and top 10 customers to our total revenue from operations for 8-month period ended November 30, 2024, Fiscals 2024, Fiscals 2023 and Fiscals 2022, have been set out below:

Particulars	8 month period ended November 30, 2024		FY 2024		FY 2023		FY2022	
	Amount (₹ in lakhs)	%	Amount (₹ in lakhs)	%	Amount (₹ in lakhs)	%	Amount (₹ in lakhs)	%
Revenue from operations from top five (5) customers	1,416.61	21.57%	3110.00	28.21%	3172.56	29.06%	2851.48	30.50%
Revenue from operations from top ten (10) customers	2,134.57	32.50%	4262.90	38.67%	4221.40	38.67%	3884.47	41.55%

The composition and revenue generated from these clients might change as we continue to add new customers in normal course of business. While we have developed relationships with certain of our customers in the normal course of business, there can be no assurance that our customers in the past or our newly acquired customers will continue to place similar orders with us in the future. The loss of one or more of these key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

15. Our Promoters Group Entity viz. Packit have similar objects and have engaged in the line of business similar to our Company. There are no non –compete agreements between our Company and this Promoter Group Entity. We cannot assure that our Promoters will not favor the interests of that firm over our interest or that the said entity will not expand which may increase our competition, which may adversely affect business operations and financial condition of our Company.

Our Promoters Group Entity viz. Packit, a partnership firm, is engaged in trading of varieties of multilayers plastic packaging films, laminated films, plastic sheet, plastic powder, PVC compound, plastic granules. As a result, conflicts of interests arise in trading activities in allocating business opportunities amongst our Company and that entity in circumstances where our respective interests conflict. We have not entered into any non-compete agreement with this

entity. We cannot assure that our Promoters who have common interest will not favor the interest of the said entities. In cases of conflict, our Promoters may favour that firm in which our Promoters have interest. There can be no assurance that this Promoter Group Entity will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with us. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

16. We have experienced negative cash flows for investing and financing activities in the recent past, and we may have negative cash flows in the future.

Our net cash flows from operating activities, investing activities and financing activities for 8-month period ended November 30, 2024 and for Fiscal 2024, 2023 and 2022 is set forth below:

19. Underutilization of capacity of our facility may adversely affect our business, results of operations and financial conditions.

Set forth below is the detail of the total existing installed, utilized and processing capacity of our manufacturing units for the last three years and for the period ended November 30, 2024:

Particulars	As at November 30, 2024	As at March 31, 2024	As at March 31, 2023	As at March 31, 2022
Unit – I				
Installed Capacity MT per annum	2400	2400	2400	2400

Unit – II				
Installed Capacity MT per annum	3000	3000	3000	3000
Production volume including wastage	1541	2401	2205	1927
Capacity Utilization (%)	77.05%	80.03%	73.50%	64.23%

Production volume (MT per annum)	129	250	253	202
Capacity Utilization(%)	53.75%	69.44%	70.28%	56.11%

We are almost at optimum capacity utilization for Unit-I & II. At Unit-III, we manufacture only PVC sleeves, where capacity utilization is around 70% during the past two years.

We cannot assure that we shall be able to utilize our facility to their full capacity or up to an optimum capacity, and non-utilization of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition. Even use of the proposed production capacity is subject to several variables like availability of raw material, power, proper working of machinery, orders on hand, supply / demand, manpower, etc.

20. We have not spent certain allocated portions of our profits towards CSR, as required under the Companies Act, 2013. Failure to do so in future, may subject us to penalties, and have an adverse effect on our reputation, financial condition, cash flows and results of operations.

The Companies Act, 2013 mandates that the Board of Directors ensure that we spend, in each Fiscal, at least two percent of our average net profits during the three immediately preceding Fiscals. Accordingly, we are required to spend an

amount of ₹ 15.27 lakhs during FY21, ₹ 13.43 lakhs during FY22 and an amount of ₹ 17.14 lakhs during FY23, which we spent during FY23 aggregating to ₹ 42.21 lakhs. During FY24, we spent an amount of ₹ 32.30 lakhs against our requirement of ₹ 21.09 lakhs. Therefore, there has been a delay in spending the amount for Fiscal 2021 & 2022, as mandated under the Companies Act, 2013 which was later met in FY2023 and FY2024. Currently, there has been an excess amount of CSR spend of ₹ 7.58 lakhs. As per the provisions of Companies Act, 2013 the penalty for not spending CSR expenditure is twice the amount required to be transferred by the Company to the Fund specified in Schedule VII or the Unspent Corporate Social Responsibility Account, as the case may be, or one crore rupees, whichever is less. Further, every officer on default shall be liable to a penalty of one-tenth of the amount required to be transferred by the Company to such Fund specified in Schedule VII, or the Unspent Corporate Social Responsibility Account, as the case may be, or two lakh rupees, whichever is less.

As on date, there was no default in CSR spend by the Company. Since there has been no provision of monetary penalty in case of delayed spending, the amount of penalty cannot be quantified. Any penalty imposed under the Companies Act, 2013 for any delay or non-compliance with the CSR requirements, could adversely affect our cash flows, reputation and business.

21. There has been delay in filing of forms/returns with the Regulatory Authorities and payment of statutory dues as per the stipulated timelines prescribed under certain provisions of statutory regulations. Any penalty or action taken by any regulatory authorities in future, for delay in such compliances could impact the reputation and financial position of the Company.

Our Company in the past have made delay in filings of some RoC forms as per the stipulated timelines prescribed under the Companies Act, 2013. Although, our Company has paid requisite late fees for such filings, no show cause notice in respect of the same has been received by our Company till date. Further, if any such action is initiated by the regulatory authority, then the Company will have to abide by the order of such regulatory authority or pay any penalty that may be imposed by any regulatory authorities in future for non-compliance with provisions of corporate and other law which could impact the financial position of the Company to that extent.

The details of ROC late filings are as follows:

S. No.	ROC Form	Date of event	Particulars of event	Due date of compliance	Actual date of compliance	Delay in days
1	AOC-4 XBRL	28-Sep-22	Form for filing XBRL document in respect of financial statement and other documents with the Registrar for year ended March 31, 2022	27-Oct-22	30-Dec-22	64

Our Company has acknowledged the same and has taken requisite steps to rectify them. We cannot confirm that no action from authorities would be taken against the Company pursuant to the above explained instances which may adversely affect our business and financial operations.

We cannot assure you that, in future, we will not be subject to any liability on account of such non-compliances or that no action would be taken by any regulatory authority or statutory body in relation to these errors. Further, although no penalties have been levied in the past by any of the relevant statutory authorities, any further delay in payment of statutory dues which may arise in the future could lead to imposition of financial penalties from the relevant statutory authorities which in turn may have a material adverse impact on our business, financial condition and cash flows.

22. Any non-compliance or delays in payment of EPF may expose us to penalties/ demurrages from the regulators

We are required to make EPF payment with the regulatory authorities. However, there are certain inadvertent delays in relation to late payment EPF in the past for which the Company have paid the penalties/demurrages amounting to ₹ 7,742, details of which are as under:

We have taken steps to improve the internal system for payment of EPF and have also implemented system of maker-checker policy and delegated this to specific qualified person so that such type of delays will not occur in future. However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our EPF payment in future, which may adversely affect our reputation and goodwill.

23. Any non-compliance or delays in GST Return filings may expose us to penalties from the regulators

As a Company, we are required to file GST returns with the respective authorities. However, there have been certain inadvertent delays in relation to filing of GST returns in the past. These delays were primarily due to technical issues and administrative errors, amongst others. We have taken steps to improve the internal system for filing of GST returns and have also implemented a system of maker-checker policy and delegated this to specific qualified person so that such type of delays will not occur in future. The details of such delays are as under:

*The Company has surrendered its GST Registration for its Noida Unit in April 2024.

We cannot assure you that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our GST filing or payment in future, which may adversely affect our business, financial condition, and reputation.

24. *The commercial success of our products depends to a large extent on the success of the products of our end use customers. If the demand for the end use products in which our products are used as a raw materials declines, it could have a material adverse effect on our business, financial condition and result of operations.*

The products manufactured and supplied by us are primarily utilized as packaging for the finished products manufactured in the FMCG, processed foods, adhesives, engineering, pharmaceutical industry, cosmetics, construction and others. Our customers are mainly manufacturers functioning in the aforementioned industries. Our major customers are in the food, beverage and household industry for manufacturing *inter alia* dairy products; namkeens; frozen snacks and essential products such as tea, spices, rice etc. In the cosmetics industry, our major customers are manufacturers of hair and skin care products. The flexible packaging products manufactured by us in roll form, pouch form and co-extruded films are used by our customers for packaging their final products. For further details, please refer to the chapter titled “*Our Business*” on page 102 of this Red Herring Prospectus.

In the past we dedicated one 5-layer machine for making bags for packing cashew for exports, but over the years, cashew exports from the country became negligible due to price competition from Indonesia. Consequently, this machine was shut and the plant capacity suffered during that time. Therefore, the demand of our products is directly proportional to the demand of the products of our customers who use our products to package their final finished products. The commercial success of our business is highly dependent on the commercial viability, demand and success of the end use products of our customers. Any downturn in the demand of such products could have a direct impact on the demand of our products and our business operations. Any disturbance in the industry in which our customers supply their end use products could adversely impact our business due to our high dependence on our customers. A reduction in the demand, development and production activities in the industries in which the end use products of our customers are supplied to, may correspondingly cause a decline in the demand for our products due to a slump in the business activities of our customers.

Alternatively, in the event our customers are able to manufacture packaging material in-house or if our customers are able to find a better alternative for our products, it could conversely result in a reduction in the demand of our products and have a material adverse effect on our business, financial condition and results of operations.

25. ***Our Company's operations are dependent on our ability to develop and design innovative packaging material suitable for the final finished product of our customers. Our inability to effectively utilize and manage our resources to develop and design packing products would impact our revenue and profitability.***

We are engaged in manufacturing flexible packaging material which is multi-functional and caters to the packaging requirements of various industries. Our business model enables us to provide end to end capabilities from developing and devising the appropriate packaging material, designing the package based on the nature of the product subject to predefined requirement of our customers and lastly manufacturing the final finished packaging material, thereby catering to all packaging related needs of our customers. Since, we cater to manufacturers of various industries such as FMCG, processed foods, adhesives, engineering, pharmaceutical industry, cosmetics, construction and others, we need to continuously design and develop packaging material which is suitable for the products of each industry and is compliant with the regulatory requirements of domestic and international authorities. Furthermore, we intend to expand our customer base and product portfolio by catering to diverse industries domestically and internationally. In order to continuously improve our existing product portfolio and develop innovative and diverse applications in various industries, our team would have to innovate and design resilient packaging material suitable for the robust packaging requirements of these industries.

In the event we are unable to effectively manage our resources, we might not be able to satisfy all the packaging requirements of our customers which may impact our customer base and our ability to retain and efficiently serve our customers. The inability of our team to develop innovative and multifarious packaging material for various industries could impede the growth of our product portfolio and our ability to function in diverse industries, thereby impacting our business operations and diverse customer base. Our failure to successfully develop and design innovative packaging material for new industries or find new applications for our existing products could adversely affect our business, prospects, results of operations and financial condition.

26. ***Growing government regulation and the impact of plastics on the environment could have a severe impact on our ability to continue our business operations, which could adversely affect our business, results of operations and financial condition.***

We are engaged in the business of manufacturing flexible packaging material which is multi-functional and caters to the packaging requirements of various industries. We use polyethylene terephthalate, biaxially-oriented polypropylene, polythene, cast polypropylene, foil, etc. as primary raw materials for manufacturing our finished products. Since, flexible packaging material predominantly consists of plastic as a major raw material, we are subject to government regulations with respect to reusing, recycling and managing the plastic waste generated during our manufacturing process.

The increasing reliance of the world on plastics and plastic products and their impact on the environment, could lead to stricter government regulations and adoption of rigorous waste management rules which in turn may require us to make additional capital expenditures, incur additional expenses or take other actions in order to remain compliant and maintain our current operations. Increased awareness of plastic pollution and its staggering impact on our environment might lead to imposition of complete or partial ban on the industrial usage of plastics or supply of plastics, which could have a severe impact on the operation of our manufacturing units and our continued business operations. On happening of any of the above-mentioned events, our business operations will suffer, which in turn could effect our financial condition and results of operations.

27. ***The introduction of alternative packaging materials caused by changes in technology or consumer preferences may affect demand for our existing products, which may adversely affect our financial results and business prospects.***

Our products are used mainly by companies who require packaging materials for FMCG, processed foods, adhesives, engineering, pharmaceutical, cosmetics, construction and other industries. Our business is affected by changes in technology, consumer preferences, market perception of brand, attractiveness, convenience, safety and environmental norms. During the years, 3-layer film technology shifted to 5-layer film technology and then from 5-layer to 7-layer technology. Our ability to anticipate such changes and to continuously develop and introduce new and enhanced products successfully on a timely basis will be a key factor in our growth and business prospects. There can be no assurance that we will be able to keep pace with the technological advances that may be necessary for us to remain competitive. Further, any substantial change in preference of consumers who are end users of our products will affect our customers' businesses and, in turn, will affect the demand for our products. Any failure to forecast and/or meet the changing demands of packaging businesses and consumer preferences may have an adverse effect on our business, profitability and growth prospects.

28. *We may face risks associated with our manufacturing facilities, which could hamper our growth, prospects, cash flows and business and financial condition.*

We may face difficulties such as cost overruns or delays for various reasons, including, but not limited to, our financial condition, changes in business strategy and external factors such as market conditions, competitive environment, exchange rate fluctuations, changes in design and configuration, increase in labour costs, taxes and duties, and other external factors which may not be within the control of our management. In view of the above, the commencement of the regular commercial production in our proposed manufacturing unit might suffer a delay and we may face time or cost overrun.

Further, manufacturing units may be subject to delays and other risks, which may be caused due to certain other unforeseen events, such as unforeseen engineering or technical problems, disputes with workers, unanticipated cost increases or changes in scope and delays in obtaining certain government approvals and consents. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost and time over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. Furthermore, the quotations for plant and machinery received by us from various suppliers might expire and we may be compelled to purchase the same at a higher cost. Our financial condition, results of operations and liquidity would be materially and adversely affected if our project costs materially exceed such budgeted amounts.

29. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market in which we operate is highly competitive on account of both organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, new products, technology, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

30. *We may have to incur expenditure in relation to repair, maintenance or upkeep of any plant.*

While we have not spent any significant amount on any repair or maintenance in the past, but our existing plants are now more than 15 years old and expenditure on regular repair, maintenance, are incurred. In the event of any major breakdown or failure of any plant, our business operations may be adversely affected. Any significant expenditure, if required on the upkeep of any plant will also adversely affect our financial condition and cash flows.

31. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed expansion, as detailed in the section titled "*Objects of the Issue*" is to be mainly funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun, or cost overrun may adversely affect our growth plans and profitability.

32. *Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.*

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Red Herring Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization rates may differ from the estimated production capacities or historical estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Red Herring Prospectus. For further information, see the section titled "*Our Business*" on page 102 of this Red Herring Prospectus.

33. *Our continued operations are critical to our business and any shutdown of our manufacturing unit may adversely affect our business, results of operations and financial condition.*

Our existing and proposed manufacturing units are located in the state of Himachal Pradesh. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our manufacturing units are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. There has been no past instance wherein the operations of the Company were at halt due to breakdown or failure of equipment, power supply or processes, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents etc.

In such event(s), we will be forced to shut down our manufacturing units for a prolonged period; and it would adversely affect our earnings, our other results of operations and financial condition as a whole. In addition to the above if any of our manufacturing units suffer losses as a result of any industrial accident, we may be forced to shut down our manufacturing units which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our manufacturing units, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

34. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.*

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition. For the period ended November 30, 2024 and for Fiscals 2024, 2023 and 2022, our trade receivables were ₹ 1,843.57 lakhs, ₹ 1415.09 lakhs, ₹ 1444.38 lakhs and ₹ 1170.86 lakhs respectively, which accounted for 28.07%, 12.84%, 13.23% and 12.52% of revenue from operations during these periods.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

35. *We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our finished products to our customers. We have not entered into any formal contracts/agreement(s) with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.*

To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing units or stores and transportation of our finished products from our units or stores to our customers, which may be subject to various uncertainties and risks. Although we own two commercial vehicle to support our logistic requirements, yet we are dependent on third party transportation providers as well for delivery of raw materials to our manufacturing units and delivery of our finished products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

36. *Non-compliance with and changes in, safety, health, labour and environmental laws and other applicable regulations, may adversely affect our business, results of operations and financial condition.*

Our Company is engaged in the business of manufacturing flexible packaging material in rolls, pouches and co-extruded films. We use plastic based polymers as the key and primary raw material in our manufacturing process. Due to the use of plastic based polymers, our manufacturing activities are subject to inter alia laws, regulations, policies issued under the Environment Protection Act, 1986 and guidance issued for plastic waste management under Swachh Bharat Mission

(Urban), promulgated by the Ministry of Housing and Urban Affairs of Government of India, State Pollution Control Board and Central Empowered Committee. These include laws and regulations relating to reusing and recycling of plastic wastes, obligation to collect back the plastic wastes within a stipulated period of time, formulating a mechanism for plastic waste disposal, etc. For further details please refer to the chapter titled “*Key Industry Regulations and Policies*” on page 121 of this Red Herring Prospectus.

There is a risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities. We cannot assure you that there will not be any instances in the future wherein our Company will not be forced to halt the operations in its manufacturing units due to not complying with the applicable laws and such events will not cause loss of revenue and have an adverse impact on our business operations.

Our Company is also subject to safety, health and environment laws and regulations such as the Environment (Protection) Act, 1986, the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981, the Factories Act, 1948. These laws and regulations impose controls on our Company’s safety standards, and other aspects of its operations. Our Company may be liable to the Central and State governmental bodies with respect to its failures to comply with applicable laws and regulations. Further, the adoption of new safety and health laws and regulations, new interpretations of existing laws, increased governmental enforcement of laws or other developments in the future may require that our Company make additional capital expenditures or incur additional operating expenses in order to maintain its current operations or take other actions that could adversely affect its financial condition, results of operations and cash flow.

37. ***Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers’ expectations.***

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of internal and international quality standards. We have a separate team which carries out necessary tests and procedures on raw materials and finished products manufactured in our manufacturing units. However, we cannot assure you that our quality control processes or our product will pass the quality tests and inspections conducted by various agencies as per their prescribed standards will not fail. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence and human error or otherwise, may damage our products and result in deficient products.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard products and reimburse the cost paid by our customers. For the 8-month period ended November 30, 2024 and financial year ended 2024, 2023 and 2022 our sales returned were 0.98%, 0.59%, 0.99% and 0.89% respectively of our gross sales. Such or any major quality lapses in future could strain our longstanding relationship with our customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which may have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we may not experience any material product liability losses in the future or that we may not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

38. ***If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.***

We have registered our trademark under class 17 before the Registrar of Trademarks is granted. Our logo  is also registered under the Trade Marks Act, 1999. There can be no assurance that third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. We may not be able to detect any unauthorized use or our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed.

For further details on our trademark, please refer to chapter titled “*Our Business*” beginning on page 119 of this Red Herring Prospectus.

39. ***We may be unable to grow our business in additional geographic regions or sectors, which may adversely affect our business prospects and results of operations.***

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of technology in the packaging industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

40. *We require power for continuous running of our units. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.*

All our manufacturing units have significant electricity requirements and any interruption in the supply of power may temporarily disrupt our operations. All our manufacturing unit receive power supply from Himachal Pradesh State Electricity Board. We also maintain diesel generator sets at Unit I & II, as a precaution against any disruption in power supply.

Since, we have a high power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing unit and thereby cause an increase in the production cost which we may not be able to pass on to our customers. Himachal Pradesh State Electricity Board Limited is the only electricity provider in the area from where we operate, due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled "*Our Business- Utilities*" on page 108 of this Red Herring Prospectus.

41. *Our Promoters are unable to trace certain of historical records in relation to their past directorships.*

Our Promoters Mr. Jaiwant Bery and Mrs. Nomita Bery were Director in various companies during 1993 to 2005. They are unable to retrieve any document(s)/record(s) supporting their past directorships in two companies. We have mentioned their past directorships on page number 148 of this Red Herring Prospectus under the section titled "*Our Promoter and Promoter Group*" largely based on the disclosure mentioned in the Prospectus of Hitkari China Limited and Hitkari Industries Limited and to the best possible information available with the Promoter. The current master data on MCA website also does not reflect their past directorships in companies completely. Further, we have disclosed Promoter's disassociation during the last three years as required under SEBI ICDR Regulations. However, their disassociations in the past (i.e. for period more than 3 years) have also been disclosed by us, to the extent available, on page number 151 of this Red Herring Prospectus. We may be unable to obtain or retrieve any document(s) in future to ascertain details of their past directorships/disassociations. Any reliance on this information or any dispute in future in this regard may adversely impact the reputation of our Promoter.

42. *Our Promoters/Directors have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Mr. Jaiwant Bery and Mrs. Nomita Bery, our Promoters and Directors may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters and Directors may also be interested to the extent of any transaction entered into with Packit, a partnership firm, where both are partners. For further details please refer to the paragraph titled "*Related Party Disclosures*" on page 178 of this Red Herring Prospectus.

43. *Our Promoters have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters will hold [•]% of the post-issue Equity Share Capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that

materially and adversely affect your investment in the Equity Shares.

44. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.*

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined through a Book Building Process. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "*Capital Structure*" on page 69 of this Red Herring Prospectus.

45. *We have in past entered into related party transactions and we may continue to do so in the future.*

As on November 30, 2024, March 31, 2024, March 31, 2023 and March 31, 2022 we have entered into related party transactions aggregating to ₹ 78.65 lakhs, ₹ 1,664.80 lakhs, ₹ 196.52 lakhs and ₹ 113.83 lakhs respectively with our Promoters and our Group Entity relating to our operations. In addition, we have in the past also entered into transactions with related parties. For further details, please refer to the chapter titled — "*Restated Financial Information- Annexure 42- 'Related Party'*" at page 178 of this Red Herring Prospectus.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

46. *Our Company requires high working capital and our inability in future to maintain sufficient cash flow, working capital facilities from banks or other sources of funding, in a timely manner, or at all, to meet requirement of working capital, could adversely affect our operations.*

Currently, we are not enjoying any working capital facilities from any bank, and manage our working capital from our internal accruals. However, in future we will be requiring working capital for our expansion needs. The working capital gap (i.e. change of current assets over current liabilities) during last three years have been as under:

(₹ in lakhs)

	FY 2022	FY 2023	FY 2024
<i>Current Assets:</i>			
Trade Receivables	0.86	4.38	5.09
Inventories	1.87	.54	3.70
<i>Current Liabilities:</i>			
Trade Payables	.27	.42	.06
Working Capital gap	5.46	3.50	3.73

The working capital gap has been on the positive side and has remained at almost the same level of around ₹ 1900-2000 lakhs. Further, 37.31%, 45.86% and 67.93% of our current assets comprises of trade receivables and inventories for the fiscal year ended March 31, 2024, 2023 and 2022. These percentages mentioned represent percentage of total current assets to trade receivables and inventories. The percentages show a decreasing trend and the reason of the downtrend in the %age was increase in investment in securities and cash balances. We cannot assure that our Company will be able to effectively manage its trade receivables in future. Any such failure in management of trade receivables could result into bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in case of increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability. We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due.

47. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company's future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our

Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 133 of this Red Herring Prospectus.

- 48. *Our Company is dependent on contract labour for manufacturing of our products. Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees. If we are unable to continue to hire contract labour, the quality of our products being manufactured in our units can get affected.***

Our operations are dependent on access to a pool of contract laborers for operation of our manufacturing units. As of May 31, 2024, while we had an aggregate of 182 employees which include 102 permanent employees and 80 contract laborers employed under the Contract Labour (Regulation and Abolition) Act, 1970, the number of contract labourers employed by us varies from time to time based on the nature and extent of work in which we are involved. Our dependence on such contract labour may result in significant risks for our operations, relating to the availability and skill of such contract labourers, as well as contingencies affecting availability of such contract laborers during peak periods. Further, our manufacturing units are surrounded by a number of industries, which may create a demand-supply gap in the labour industry which may impact our business operations. There can be no assurance that we will have adequate access to skilled workmen at reasonable rates. As a result, we may be required to incur additional costs to ensure timely execution of our projects.

Our Company appoints independent contractors who in turn engage on-site contract labourers for carrying out the manufacturing process. Although our Company does not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition. In addition, under the Contract Labour (Regulation and Abolition) Act, 1970, as amended, we may be required to absorb a number of such contract labourers as permanent workmen. Thus, any such order from a regulatory body or court may have an adverse effect on our business, results of operations and financial condition. In addition, on an application made by contract labourers, an Industrial court or Tribunal may direct that the contract labourers shall be regularized or absorbed or the State Government may altogether prohibit the employment of contract labour. If either of the abovementioned events occur, we may be required to induct such labourers on our payroll, as employees, which may result in an increase in our expenses. Further, even though we have obtained all necessary approvals as required under the statutes there can be no assurance that we may continue to hold such permits, licenses or approvals. In the event of cancellation or non-renewal of our approvals it may cause an interruption of our operations and may adversely affect our business, financial condition and future results of operations. Furthermore, all contract labourers engaged in our manufacturing units receive minimum wages that are fixed by the relevant State governments, and any increase in such minimum wages payable may adversely affect our results of operations.

- 49. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.***

Our operations are subject to risks inherent in manufacturing facilities such as risk of plant/machinery failure, work accidents, earthquakes, flood and other force majeure events, acts of terrorism and explosions including hazards that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage. Our significant insurance policies consist of, among others, burglary, group health, fire and vehicle insurance. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as goods in transit, machinery breakdown, keyman insurance, workmen compensation, group personal accident. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

- 50. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. There can be no assurance that our Company will declare dividends in the future. For further details, please refer to the Chapter titled “*Dividend Policy*” on page 156 of this Red Herring Prospectus.

51. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.*

As the issue size shall be less than ₹10,000 lakhs, under Regulation 41 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 76 of this Red Herring Prospectus.

52. *Certain documents in relation to educational qualifications and experience for some of our Directors, Key Management and Senior Management Personnel are not available and reliance has been made on declaration/undertaking furnished by such Key Management and Senior Management Personnel for details of their profiles included in this Red Herring Prospectus.*

Some of our Directors, Key Management and Senior Management Personnel have been unable to trace copies of documents pertaining to their educational qualifications and prior experience. Accordingly, reliance has been placed on mark sheets, declarations/undertakings furnished by them to us, to disclose details of their educational qualifications and professional experience in this Red Herring Prospectus. We have been unable to independently verify these details prior to inclusion in this Red Herring Prospectus. Further, there can be no assurances that our Directors, Key Management and Senior Management Personnel will be able to trace the relevant documents pertaining to their qualifications and prior experience in future, or at all.

53. *Industry information included in this Red Herring Prospectus has been derived from industry reports and annual reports of various listed players of our industry. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party and annual reports of various listed players of our industry for purposes of inclusion of such information in this Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. Although the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Red Herring Prospectus.

54. *Our Promoters were associated as Promoter/Director in some companies which had been struck-off by the Registrar of Companies*

Our Promoter Mr. Jaiwant Bery was associated as promoter/director with Barflex Enterprises Private Limited, Hitkari Houseware Private Limited, Hibar Packaging Private Limited and Himachal Folien Private Limited. Mrs. Nomita Bery was associated with Barflex Enterprises Private Limited and Hibar Packaging Private Limited. These companies were struck-off voluntarily as they had not been carrying on any business or operations. There has been no impact on the business of our Company due to struck-off of these companies in which our Promoters were associated.

Issue Specific Risks

55. ***The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a Book Building Process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

56. ***The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue price and you may not be able to sell your Equity Shares at or above the Issue Price***

The Issue Price of our Equity Shares has been determined by Book Built Method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 84 of this Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation, the following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal, and regulatory factors unrelated to our performance.

57. ***Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

58. ***Subsequent to the listing of the Equity Shares, we may be subject to surveillance measures, such as the Additional Surveillance Measures and the Graded Surveillance Measures by the Stock Exchanges in order to enhance the integrity of the market and safeguard the interest of investors.***

Subsequent to the listing of the Equity Shares, we may be subject to Additional Surveillance Measures (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchange. These measures are in place to enhance the integrity of the market and safeguard the interest of investors. The criteria for shortlisting any security trading on the Stock Exchanges for ASM is based on objective criteria, which includes market-based parameters such as high low price variation, concentration of client accounts, close to close price variation, market capitalization, average daily trading volume and its change, and average delivery percentage, among others. Securities are subject to GSM when its price is not commensurate with the financial health and fundamentals of the issuer. Specific parameters for GSM include net worth,

net fixed assets, price to earning ratio, market capitalization and price to book value, among others.

Factors within and beyond our control may lead to our securities being subject to GSM or ASM. In the event our Equity Shares are subject to such surveillance measures implemented by the Stock Exchange, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

59. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by designated stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

60. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence.

We cannot assure you that the Equity Shares will be credited to the investor's demat accounts, or that trading in the Equity Shares will commence within the time periods specified in the Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, if permission to list the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

61. *QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date, but not thereafter. Therefore, QIB and Non-Institutional Investors will not be able to withdraw or lower their Bids following adverse developments in international or national monetary policy, financial, political or economic conditions our business, results of operations or otherwise at any stage after the submission of their Bids.

62. *The requirements of being a listed company may strain our resources.*

As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and limited reviewed half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

External Risk Factors

63. *Political, economic or other factors that are beyond our control have an adverse effect on our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions, where some of our revenue from operations is generated. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of lowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic and regional economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

64. *Natural or man-made disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19 and manmade disasters, including acts of war, terrorist attacks and other adverse events, many of which are beyond our control caused by matters such as acts of God, strikes, civil commotion, riots, war, revolution, acts of governments, lack of adequate production capacity, failure or delay in plant start up, breakdown of machinery, shortage of raw materials, equipment, fuel, transportation, or containers, or any other cause whether similar or dissimilar to those enumerated that are reasonably beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 virus or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

65. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "*Government and Other Statutory Approvals*" on page 201 of this Red Herring Prospectus for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include

central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India's Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/tribunals/ courts would influence our profitability.

The Finance Act, 2022 ("Finance Act"), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax ("DDT"), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

66. *Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of ₹ 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

67. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. For example, the global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in Nifty, NSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

68. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to

grow our assets, the quality of our assets, and our ability to implement our strategy.

Some of the major factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including India's neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

69. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as USGAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.*

Our annual audited restated summary statements of assets and liabilities for all these reported period and restated summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity has been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited.

70. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations, currently in place in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

71. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company and the Promoter Selling Shareholders in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

The Management shall have the flexibility to finalize estimates (including but not limited to change of vendor or any modification/addition/deletion of plant & machineries) at the time of actual placement of the order. We may have to revise our funding requirements and deployment on account of a variety of factors such as our financial/market condition, business strategy, competition, interest or exchange rate fluctuations and/or other external factors, which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure

and funding requirements, including the expenditure for a particular purpose at the discretion of our management. In such case, the Management can utilize the surplus of proceeds, if any, arising at the time of actual placement of the order, to meet the cost of such other machinery, equipment or utilities, as required. These films may have 2-3 barrier layers as compared to 5-layer films which have only one barrier layer. The barrier layers are normally encapsulated in the middle layer of the 7-layer film structure and for vacuum pouch applications in the outer layer also. Nylon based films are used for packing less oxygen sensitive products like edible oil and vacuum pouches. EVOH based films have a higher OTR oxygen barrier property and are used for packing highly oxygen sensitive products like UHT milk, processed foods etc. These films are fully recyclable.</p>	<ul style="list-style-type: none"> • UHT milk pouch; • High barrier films for making bag-in-box; • Thermoformable films for packing dry fruits, processed foods; • Edible oil.

GLOBAL OUTLOOK

Moderating inflation and steady growth open path to soft landing

Global growth is projected at 3.2 percent in 2024 and 3.3 percent in 2025, with the 2024 forecast 0.3 percentage point higher than that in the October 2023 on account of greater-than expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.9 percent in 2024 and to 4.5 percent in 2025, with the 2025 forecast revised down.

The forecast for growth in *emerging market and developing economies* is revised upward; the projected increase is powered by stronger activity in Asia, particularly China and India. For *China*, the growth forecast is revised upward to 5 percent in 2024, primarily on account of a rebound in private consumption and strong exports in the first quarter. In 2025, GDP is projected to slow to 4.5 percent, and to continue to decelerate over the medium term to 3.3 percent by 2029, because of headwinds from aging and slowing productivity growth. The forecast for growth in *India* has also been revised upward, to 7.0 percent, this year, with the change reflecting carryover from upward revisions to growth in 2023 and improved prospects for private consumption, particularly in rural areas.

Forces shaping the Outlook

Economic activity was surprisingly resilient through the global disinflation of 2022–23. As global inflation descended from its mid-2022 peak, economic activity grew steadily, defying warnings of stagflation and global recession. Growth in employment and incomes held steady, reflecting supportive demand developments—including greater-than-expected government spending and household consumption—and a supply-side expansion amid, notably, an unanticipated boost to labour force participation. The unexpected economic resilience, despite significant central bank interest rate hikes aimed at restoring price stability, also reflects the ability of households in major advanced economies to draw on substantial savings accumulated during the pandemic. Changes in mortgage and housing markets over the pre-pandemic decade of low interest rates moderated the near-term impact of policy rate hikes. As inflation converges toward target levels and central banks pivot toward policy easing in many economies, a tightening of fiscal policies aimed at curbing high government debt, with higher taxes and lower government spending, is expected to weigh on growth.

**For India, data and projections are presented on a fiscal year (FY) basis, with FY 2022/23 (starting in April 2022) shown in the 2022 column. India's growth projections are 7.3 percent in 2024 and 6.5 percent in 2025 based on calendar year.

Growth resilient in major economies: Economic growth is estimated to have been stronger than expected in the second half of 2023 in the United States, and several major emerging market and developing economies. Low-income economies continue to experience large output losses compared with their pre-pandemic (2017–19) paths amid elevated borrowing costs.

Inflation subsiding faster than expected: Amid favorable global supply developments, inflation has been falling faster than expected, with recent monthly readings near the pre-pandemic average for both headline and underlying (core) inflation. Global headline inflation in the fourth quarter of 2023 is estimated to have been about 0.3 percentage point lower than predicted in the October 2023, on a quarter-over-quarter seasonally adjusted basis.

High borrowing costs cooling demand: To reduce inflation, major central banks raised policy interest rates to restrictive levels in 2023, resulting in high mortgage costs, challenges for firms refinancing their debt, tighter credit availability, and weaker business and residential investment. But with inflation easing, market expectations that future policy rates will decline have contributed to a reduction in longer-term interest rates and rising equity markets. Still, long-term borrowing costs remain high in both advanced and emerging market and developing economies, partly because government debt has been rising. In addition, central banks' policy rate decisions are becoming increasingly asynchronous.

Fiscal policy amplifying economic divergences: Governments in advanced economies eased fiscal policy in 2023. The United States, where GDP had already exceeded its pre-pandemic path, eased policy more than did euro area and other economies in which the recovery was incomplete. In emerging market and developing economies, in which output has on average fallen even further below the pre-pandemic trend, on average the fiscal stance is estimated to have been neutral.

Global Prospects and Policies: -

As inflation declines toward target levels across regions, the near-term priority for central banks is to deliver a smooth landing, neither lowering rates prematurely nor delaying such lowering too much. With inflation drivers and dynamics differing across economies, policy needs for ensuring price stability are increasingly differentiated. At the same time, in many cases, amid rising debt and limited budgetary room to maneuver, and with inflation declining and economies better able to absorb effects of fiscal tightening, a renewed focus on fiscal consolidation is needed. Intensifying supply-enhancing reforms would facilitate both inflation and debt reduction and enable a durable rise in living standards.

Managing the final descent of inflation. The faster-than-expected fall in inflation is allowing an increasing number of central banks to move from raising policy rates to adjusting to a less restrictive stance. In this context, ensuring that wage and price pressures are clearly dissipating and avoiding the appearance of prematurely “declaring victory” will guard against later having to backpedal in the event of upside surprises to inflation. At the same time, where measures of underlying inflation and expectations are clearly moving toward target-consistent levels, adjusting rates to more neutral levels—while signaling continued commitment to price stability—may be necessary (considering long transmission lags) to avoid protracted economic weakness and target undershoots. In

some emerging market economies, in which the monetary tightening cycle paved the way for earlier rate reductions, continuing to calibrate the pace of monetary adjustments based on a broad array of wage and price pressure gauges is appropriate. With borrowing costs still high, careful monitoring of financing conditions and readiness to deploy financial stability tools will remain vital for avoiding financial sector strains.

Rebuilding buffers to prepare for future shocks and achieving debt sustainability. With fiscal deficits above prepandemic levels and higher debt-service costs, fiscal consolidation based on credible medium-term plans, with the pace of adjustment depending upon country-specific circumstances, is warranted to restore room for budgetary maneuver. Increasing fiscal balances over a sustained period, while protecting priority investments and support to the vulnerable, is needed in many cases. Well-calibrated plans can support fiscal policy credibility, allow the pace of consolidation to be adjusted as a function of the strength of private demand, and avert disruptive front-loaded adjustments. Mobilizing domestic revenue, addressing spending rigidities, and reinforcing institutional fiscal frameworks are likely to support adjustment efforts, both in economies with sizable spending needs and in others as well. For countries in or at high risk of debt distress, orderly debt restructuring may also be necessary. Faster and more efficient coordination on debt resolution, through the Group of Twenty Common Framework and the Global Sovereign Debt Roundtable, would help mitigate the risk of debt distress spreading.

Enabling durable medium-term growth. Targeted and carefully sequenced structural reforms can reinforce productivity growth and reverse declining medium-term growth prospects despite constrained policy space. Bundling reforms that alleviate the most binding constraints to economic activity can front-load the resulting output gains, even in the short term, and secure public buy-in.³ Industrial policies can be pursued where clearly identifiable externalities or important market failures are well established and other more effective policy options are unavailable, but the policies need to be consistent with World Trade Organization (WTO) rules. Such policies are more likely to be successful if complemented with appropriate economy-wide reforms and good governance frameworks. Carbon pricing, subsidies for green investments, reducing energy subsidies, and carbon border-adjustment mechanisms can speed the green transition but must be designed to support consistency with WTO rules. Investments in climate adaptation activities and infrastructure are also needed to support resilience.

Strengthening resilience through multilateral cooperation. Intensified cooperation in areas of common interest is vital for mitigating the costs of the separation of the world economy into blocs. In addition to coordination on debt resolution, cooperation is required to mitigate the effects of climate change and facilitate the green energy transition, building on recent agreements at the 2023 Conference of the Parties to the UN Framework Convention on Climate Change (COP28). Safeguarding the transportation of critical minerals, restoring the WTO's ability to settle trade disputes, and ensuring the responsible use of potentially disruptive new technologies such as artificial intelligence by, among other things, upgrading domestic regulatory frameworks and harmonizing global principles are further priorities.

INDIAN OUTLOOK

As per the First Advance Estimates of National Income of FY 2023-24, presented along with the Finance Minister's speech, India's Real GDP is projected to grow at 7.3 per cent. This is also in line with the upward revision in growth projections for FY2023-24 by the RBI (in its December 2023 Monetary Policy Committee meeting) from 6.5 per cent to 7 per cent, prompted by strong growth in Q2 of FY2023-24.

Indian economy has demonstrated resilience and maintained healthy macro-economic fundamentals, despite global economic challenges. The International Monetary Fund (IMF), in its World Economic Outlook (WEO), October 2023, has revised its growth projection for India for FY2023-24 upwards to 6.3 per cent from 6.1 per cent projected in July 2023. This reflects increasing global confidence in India's economic prowess at a time when global growth projection for 2023 remains unchanged at 3 per cent.

As per the IMF, India is likely to become the third-largest economy in 2027 (in USD at market exchange rate) and it also estimated that India's contribution to global growth will rise by 200 basis points in 5 years. Moreover, various international agencies such as the World Bank, the IMF, OECD and ADB project India to grow between 6.4 per cent, 6.3 per cent, 6.1 per cent and 6.7 per cent, respectively in 2024-25.

The Finance Minister stated that strong growth in economic activity has imparted buoyancy to revenue collections and pointed out that GST collection stood at ₹1.65 lakh crore in December 2023. This is the seventh-time that gross GST revenues have crossed ₹1.6 lakh crore benchmark.

Market Size:

India's GDP took a big leap on Leap Day in 2024: The country's remarkable growth rate of 8.4% in the third quarter of the fiscal year 2024 surpassed all expectations, as market analysts had penciled in a slower growth last quarter, between 6.6% and 7.2%. Deloitte's projected growth for the quarter was between 7.1% and 7.4% (as published in January 2024). With substantial revisions to the data from the past three quarters of the fiscal year, India's GDP growth already touched 8.2% year over year (YoY) in these quarters.

Growth prediction is revised to a range of 7.6% to 7.8%, up from previous estimates due to GDP revisions and stronger-than-expected growth in fiscal 2024. However, it is expected that growth in the fourth quarter to be modest because of uncertainties related to India's 2024 general elections and modest consumption growth. Our expectations for the near-term future remain in line with previous forecasts with a slight change in the forecast range due to a higher base effect in fiscal 2024. We believe GDP growth to be around 6.6% in the next fiscal year (fiscal 2025) and 6.75% in the year after (fiscal 2026), as markets learn to factor in geopolitical uncertainties in their investment and consumption decisions.

The global economy is expected to witness a synchronous rebound in 2025 as major election uncertainties are out of the way and central banks in the West likely announce a couple of rate cuts later in 2024. India will likely see improved capital flows boosting private investment and a rebound in exports. Inflation concerns remain; however, it is believed that ease only in the latter half of the next fiscal year barring any surprises from rising oil or food prices.

Not only has growth in consumer spending post pandemic been fluctuating, but there is also a shift in consumption patterns, with demand for luxury and high-end products and services growing faster than demand for basic goods. As expected, the number of middle- to high-income households with increasing disposable income to rise, this trend will likely get further amplified, driving overall private consumer expenditure growth. But the challenge of rising household debt and falling savings could weigh on long-term growth sustainability. Controlling household debt to prevent it from crossing unsustainable levels will be essential to mitigate risks of debt overhang, maintain economic stability and protect households against financial vulnerability.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- Capital expenditure outlay for the next year is being increased by 11.1 per cent to ₹ 11,11,111 crore, which would be 3.4 per cent of the GDP.
- Upliftment of 'Garib' (poor), 'Mahilayen' (women), 'Yuva' (youth) and 'Annadata'(farmer) is the highest priority of government.
- A corpus of rupees one lakh crore will be established with fifty-year interest free loan for youth.
- Scheme of 50-year interest free loan for capex to states will be continued this year with total outlay of ₹ 1.3 lakh crore.
- Government is working with an approach to development that is all-round, all-pervasive and all-inclusive.
- The budget contains a number of announcements and strategies indicating directions and development approach for making India Viksit Bharat by 2047.
- Government will pay utmost attention to make the eastern region and its people a powerful driver of India's growth.

- Government will form a high-powered committee for an extensive consideration of the challenges arising from fast population growth and demographic changes.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY2023-24 stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4% in BE 2023-24 to ₹ 10 lakh crore (US\$ 120.12 billion) over ₹7.28 lakh crore (US\$ 87.45 billion) in FY 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In June 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Packaging Industry

Global Overview

The global flexible packaging market size was estimated at USD 270.96 billion in 2023 and is projected to grow at a compound annual growth rate (CAGR) of 4.7% from 2024 to 2030. The increasing demand for packaged food and beverages is one of the prominent factors driving the flexible packaging market growth. The continuous advancements in packaging technology along with the convenience, hygiene and higher shelf life provided by packaging across the application industry are supporting its growth and demand across the globe. Furthermore, the increasing consumption of packaged items across the globe coupled with the growing urban lifestyle and increased spending power is driving the market growth. The U.S. market is projected to grow significantly over the forecast period due to growing demand for packaging from food & beverage and healthcare products.

The increasing concern associated with packaging waste as well as the sustainability and recyclability of flexible packaging is capturing the focus of converters and end users of packaging. The rising environmental issues associated with decreasing soil fertility, water pollution, and increasing temperature are further raising the focus of players and government bodies to increase sustainability across the flexible packaging industry. Additionally, this is supporting the growth of circular packaging to keep the loop of raw material closed across the industry with the proper end-of-life management for packaging.

Global Data estimates indicate that the global flexible packaging market witnessed a year-on-year (YoY) growth of 2.5% by volume in 2022. The flexible packaging growth over the forecast period is estimated to increase on account of noticeable factors including convenience and functionality, diverse market adaptability, cost-effectiveness, sustainability, design and branding opportunities, technological advancements, and changing consumer preferences. However, recycling and waste management is one of the major challenges projected to affect growth over the forecast period.

In addition, U.S. government agencies are funding projects aimed at reducing carbon emissions and energy consumption, which can present a positive outlook for market. In January 2022, the U.S. Department of Energy (DOE) announced USD 13.4 million in funding to produce plastic with low energy consumption and minimum carbon dioxide emissions. This investment is focused on addressing metal waste recycling challenges. As flexible packaging consumes less material compared to rigid packaging, it requires less energy for production and helps in carbon emissions reduction. Such initiatives will help promote development of bioplastic as a sustainable material for flexible packaging as well as highlight flexible packaging as an economical substitute for rigid packaging.

Market Dynamic

The growing importance of increasing food shelf life & reducing food wastage, along with increasing adoption of sustainable & cost-effective packaging by end-users are preponderance for the market. Food wastage is a major concern today globally. Primary reasons for food wastage are spoiled food due to improper packaging and excessive food production beyond consumption requirements.

However, the latter one, i.e., gap between excessive production and consumption requirements depends on the consumer level and lack of an adequate food packaging system often results in food being dumped into landfills. According to The World Bank Group report on solid waste management 2050, food waste accounts for over 44.0% of the overall solid waste dumped into landfills annually.

Traditional rigid packaging consists of glass, metal, and plastic-based packaging containers. Glass and metals are fully recyclable, and some types of plastics are recyclable. However, recyclability of materials is just one of the parameters of a packaging product's life cycle assessment. Cost-effectiveness is a term being used across the packaging industry, wherein emphasis is being given to considering other aspects that can impact packaged product cost.

Product Insights

Based on product, market for flexible packaging is further segmented into pouches, bags, films & wraps, and others. Among these, the pouches segment held the largest market share of over 38.0%, in terms of revenue, in 2023. This high market share is attributed to growing adoption of refill pouches by food & beverage manufacturers to reduce their packaging costs.

The bags segment is projected to grow at a CAGR of 4.9% over the forecast period. This market growth is attributed to wide utilization of these bags for packing products in bulk quantities such as automobile components, agricultural products, chemicals, and detergents.

The films & wraps segment held a significant market share in 2023 owing to their properties such as superior shrinking, twist retention, and transparency. These films are used to shield packaged content during packaging, distribution, and storage stages. They are mostly used on outer flexible packaging to increase its tearing resistance.

Flexible Packaging Market Segmentation by Packaging Type

By packaging type, the flexible packaging market is bifurcated into bags/sachets, film, foil, pouches, tubes, and wrappers among others. Bags/sachets is the dominating segment in terms of volume (millions of pack units) and value (US\$ Million) owing to its wide application area and usability for various types of products including cereals, flour, chips, and snacks, spices, baby food, pet food, and others. The continuously changing consumer preferences where people are more inclined towards convenience, sustainability, and on-the-go consumption, is the factor supporting the demand for required flexible packaging across the globe.

The flexibility of raw material usage including plastic, foil, and paper along with the advanced manufacturing technologies, allows the conversion of these materials into flexible packaging products such as bags, sachets, pouches, wrappers, and others. Furthermore, the advantage of direct printing, advertising, and labelling on the packaging is one of the major factors supporting its growth across the application industry.

Strict rules and regulations are associated with the labelling and packaging of food products to maintain safety, and hygiene, as well as to provide necessary information to the end users which includes nutritional values and shelf life of packaged products. This allows the consumers to make sound decisions related to usage which avoids the risks associated with food poisoning or other health issues by consuming expired or allergic ingredients as per the body's requirement. These are the benefits of flexible packaging which are contributing to its growth in the market.

Application Insights

Based on application, the market is categorized into food & beverage, pharmaceutical, cosmetics, and other segments. Among these, the food & beverages segment emerged as the most significant application segment for flexible packaging in 2023 with a market share of over 55.0%. Growing demand for packaged foods, including ready-to-eat meals, frozen meals, snack foods, and cake mixes, is expected to prompt manufacturers to increase their production capacity, augmenting product demand over the forecast period.

Pharmaceutical application is projected to grow at a CAGR of 5.7% over the forecast period. This growth is attributed to its wide application for packaging and protecting a variety of drug items for medical use, including powders, tablets, and capsules. The most common types of flexible packaging in pharmaceuticals are pouches, blister packages, and strip packages.

The cosmetics application is driven by various shampoo manufacturing brands introducing samples and trial packs in flexible single-serving sachets or pillow pouches. This makes it economical for customers to try out new cosmetic products before purchasing entire bottle. Samples packed in single-use packets are viewed as a great marketing tool by cosmetic product manufacturers to increase brand awareness and encourage low-risk trials.

Flexible Packaging Market Analysis by Region

The Asia Pacific region has emerged as the leader in the flexible packaging market, holding a significant volume share of over 52.2% in 2023. The region is also leading the revenue market with a share of over 45.1% in the same year and the CAGR is projected to be the fastest across the global market over the forecast period from 2023 to 2030. The easy availability of packaging material and low labor costs in developing economies such as China and India are supporting the dominance of the region. The presence of major manufacturers in the regional market such as Uflex Ltd, Fuji Seal International Inc, Sonoco Products Company, and Amcor Limited is also supporting the market growth. The players are continuously involved in the development and manufacturing of advanced packaging products which can meet the requirement of the new-age population in the global market.

Europe accounted for the second largest share in the global flexible packaging market in terms of volume and value. The strict rules and regulations associated with the packaging in the region owing to the high involvement of government and regulatory bodies for environment-friendly packaging is driving growth across the application sector. Furthermore, the region is the origin of major flexible packaging players such as Constantia Flexibles Group GmbH, Huhtamaki Oyj, Smurfit Kappa Group Plc, DS Smith Plc, Mondi Plc, and Amcor Plc. These players have high manufacturing capacities which leads to the potential share in terms of volume and value.

Flexible packaging market was evaluated at 1,417.4 billions of pack units in 2023 and is expected to grow at a CAGR of 2.9% during the forecast period (2023-2030). Flexible Packaging Market in India

The paper and packaging sector in India is growing rapidly and has significant potential for future expansion. The industry was valued at \$50.5 billion in 2019 and is anticipated to reach \$204.81 billion by 2025, registering a CAGR of 26.7% from 2020 to 2025 and is forecasted to grow by USD 15.57 bn during 2023-2028, accelerating at a CAGR of 12.69% during the forecast period. The growth in the sector is being driven by a surge in e-commerce, food processing, pharmaceuticals, FMCG, manufacturing industry and healthcare sector. Additionally, numerous government initiatives including 'Make in India' had positive impact on the packaging industry. The paper and packaging industry is currently the fifth largest sector in the Indian economy and has the potential to achieve pricing levels that are about 40% cheaper compared to European regions.

The Indian packaging sector has distinguished itself with its exports of flattened cans, printed sheets and components, crown cork, lug caps, plastic film laminates, craft paper, paper board and packaging machinery. The packaging segment with the fastest growth include laminates and flexible packaging, particularly PET and weaved sacks.

India uses paper as a major source of packaging. The paper industry accounts for 5% of global production. Demand for paper continues to rise for the packaging of FMCG products and ready-to-eat food. Packaging-grade paper accounts for 55% of the main types of paper produced domestically in the paper and paperboard industry.

The packaging industry can be categorized into two segments: flexible and rigid.

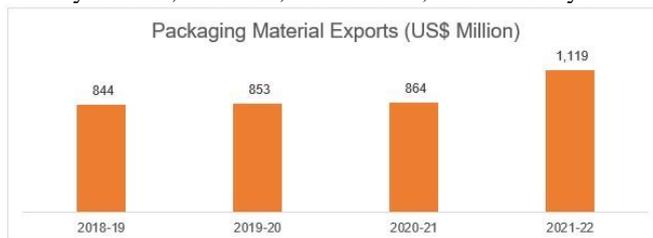

- The rigid sector accounts for 36% of India’s total packaging. Corrugated and paperboard boxes are an example of a rigid packaging category that are made using paper as a raw material. These boxes are considered to be one of the safest and most effective methods for packaging and transporting goods. The cellular structure of corrugated boxes, in addition to being lightweight, has great compressive strength, toughness and impact resistance. The procedure of lining, laminating or coating the boxes can assist them to withstand moisture and other harmful elements, protecting the quality and longevity of the product. The packaging of both industrial and consumer items requires corrugated board boxes. They are used for packaging a variety of commodities including textiles, fruits, vegetables, potteries, chemicals and pharmaceuticals.
- The flexible sector comprises 64% of the total packaging. The application of paper in flexible packaging is in the form of bags, sachets, envelopes and so on. The flexible pouch market, which enables small-quantity packaging, has gained momentum due to demand for small packs. Compared to other types of packaging, flexible paper packaging is less expensive, requires less material and is lighter in weight. Flexible paper packaging has become more popular as a result of its high efficiency and low cost. Flexible packaging is a crucial component of versatile packaging, which includes packaging for food and drink, personal care, home care and healthcare, among others.

Growing Exports of Packaging Material

India is emerging as a key exporter of packaging materials in the global market. The export of packaging materials from India grew at a CAGR of 9.9% to US\$ 1,119 million in 2021-22 from US\$ 844 million in 2018-19. US remains the major export destination for the packaging industry, followed by the UK, the UAE, Netherlands, and Germany.

Sectors of Application:

The packaging has applications in multiple sectors, two of which key sectors are:

- **Pharmaceutical:** India boasts of one of the world's largest pharmaceutical markets and therefore produces a huge quantity of plastic pharmaceutical packaging to cater to the needs of the fast-growing sector. In the pharmaceutical industry, blister packs are one of the most popular types of packaging. Blister packs are used for tablets, ampoules, syringes and vials, and also used for individual packaging for medication doses while maintaining the integrity of other doses. Primary, secondary and tertiary packaging are the three tiers of packaging typically used in the pharmaceutical sector, and the type of application depends on the drug. The material that initially covers and holds the product is referred to as the primary packaging system. This includes all the package elements and sub-elements that come into contact with the product or that may have an impact on its duration of life, such as ampoules and vials, prefilled syringes, IV containers and blister packs. Key players in the pharmaceutical packaging include West Pharmaceuticals, Huhtamaki PPL Ltd and SGD Pharma India Limited
- **Food and Beverage Packaging:** India has seen a rise in the paper and packaging of food and beverage with an increase in demand, along with new companies in the food and beverage space. The entry and meteoric rise of food delivery service companies such as Zomato and Swiggy have led to growth in the consumption of packaging used for food and beverage. Zomato had even introduced tamper-proof packaging to keep the food safe and fresh. Food packaging has seen significant innovations that focus on highlighting the brand while maintaining the quality and standard of the food product contained within. There is intense competition among local manufacturers to produce cutting-edge products and stand up to MNCs that have a dedicated R&D department to test and eventually deploy the latest technologies. The major players in this space are Evirocor, Tetra Pak and Vinayak Ultra Flex.

Key India Flexible Packaging Market Driver

The growing retail industry in India is notably driving the market growth. The retail industry in India is one of the fastest growing in the world. The retail industry is developing in tier-1 and tier-2 cities, in addition to major cities and metros in the country. Factors such as transforming demographic profiles, rising disposable incomes, growing urbanization, and changing consumer tastes and preferences are driving the growth of the organized retail market in India. The primary factor boosting the growth of the market is the shift of consumers, especially millennials, from traditional retail to online channels.

In addition, the fast-moving consumer goods (FMCG) market in India is estimated to grow at a CAGR of more than 18% during the forecast period. Furthermore, the rural FMCG market in the country is also expected to reach USD 220 billion by 2025. Therefore, the growing retail sector in India will increase the demand for flexible packaging, thereby, driving the growth of the India flexible packaging market during the forecast period.

Key India Flexible Packaging Market Trends

The increasing use of stand-up pouches is an emerging trend in the market growth. Vendors are coming up with new and innovative packaging solutions to withstand the high competition in the market. Innovative packaging includes stand-up pouches that have gained popularity primarily in the food industry. A stand-up pouch weighs less compared with a glass bottle. The low weight of stand-up pouches enhances the functionality of portability. Additionally, they are also replacing cans to store processed food.

Moreover, the use of stand-up pouches is easier to open than metal food cans. The stand-up pouches have zips that can be closed if the content in them has to be reused. In addition, metal cans cannot be given any differentiating designs to help consumers use unique designs for their products and brands, whereas stand-up pouches can be designed in different shapes and prints with high-quality graphics. Thus, the growing use of stand-up pouches is expected to drive the growth of the India flexible packaging market during the forecast period.

Key India Flexible Packaging Market Challenge

The volatility in raw material prices is a major challenge impeding market growth. The different types of packaging materials used for the packaging of food include plastic, glass, metals, and paper. The instability in the price of raw materials will result in the reduction of profit margins of vendors due to the increasing production cost. Hence, vendors are forced to increase their product prices due to fluctuating raw material prices. The prices of packaging raw materials such as paper and paper products that are used to manufacture corrugated packaging solutions are also expected to fluctuate.

Consequently, companies are expected to increase the prices of corrugated packaging materials in response to the increase in raw material prices. In addition, aluminium, a key raw material used in manufacturing food cans, is also exhibiting continuous price fluctuations. Hence, these factors are expected to impede the growth of the market during the forecast period.

Government Initiative:

The government has launched the national packaging initiative which focuses on the following measures to promote the sector:

- Set up guidelines and certain requirements for design and material of packaging used;
- Promote the process of moving in bulk quantities;
- Focus on promotion of centralised industrial activity by encouraging application of necessary and sophisticated infrastructure such as specialised logistic parks with appropriate facilities as well as packaging labs to work on designs and carry out tests;
- Encourage processes to reduce packaging waste by establishing material recovery facilities (MRFs);
- Support domestic business to manufacture sophisticated packaging materials;
- Develop training facilities and certified programmes of the highest order to maintain availability of skilled labour.

Road Ahead:

The Indian packaging sector is diverse and caters to a broad sector of industries and products. The government, through its positive promotion of the Make in India policy, has set the packaging sector to grow rapidly due to companies setting up their manufacturing units in the country and using these domestic facilities as a base to export to other countries. The government has implemented a strategy to lower tax rates for new manufacturing companies in order to turn India into a global manufacturing hub. Furthermore, given the need for domestic firms to compete with MNCs, the government is planning to further level the sector among players by launching various initiatives with the aim of promoting the development of packaging, along with technological advancements.

OUR BUSINESS STRATEGIES

Our strategy is to build upon our competitive strengths and business opportunities to become one of the leading packaging companies in domestically and internationally. Our objective is to improve and consolidate our position in the manufacturing and marketing of flexible packaging related products. We intend to achieve this by implementing the following strategies:

a) **Expand our existing product portfolio**

We have been in the flexible packaging market for the past 19 years. We are currently engaged in manufacturing of 3-layer films, 5-layer films, 5-layer pouches, laminate pouches, BOPP labels, 2 ply laminate film, 3 ply laminate film and 4 ply laminate film and serving a variety of industries including FMCG, adhesive, processed foods, engineering, pharmaceutical and cosmetic, and others. We at present are running at our optimum capacity utilization and with an intent to expand its product portfolio, we plan for expansion. We intend to diversify our product portfolio which could cater to customers across segments, sectors, and geographies. In accordance with this, while we seek to continue to strengthen our existing product portfolio, we intend to further diversify into products with prospects for increased growth and profitability. We plan to continue to increase offerings in our current business segments as well as diversify into new products by tapping into segments which in the view of our management have growth prospects. We are planning to tap into the market with demand of 7-layer COEX film, woven PP bags and e-commerce and retail bags. The 7-layer technology gives additional flexibility in product development and enhances product performance. We have already acquired clients for 7-layer films which are serviced by outsourcing the 7-layer films and printing in-house. However, to expand the market share it is imperative our Company has in-house facility to manufacture 7-layer films so that the cost is optimized, and customer service is assured. For 7-layer COEX film machine, the order has been placed with Mamata Machinery Limited, Ahmedabad on August 13, 2024, the delivery is anticipated by March, 2025 and installation is expected to be completed by the month of March, 2025.

Our Company has a significant customer base of manufacturers of cereals such as flour, rice, etc. These customers pack their consumer packs in laminates which are presently supplied by our Company. In addition, for their bulk packaging application, they use WPP bags. It is presently not possible to outsource WPP bags and therefore our Company will offer WPP bags to their existing client base after commencing commercial production of WPP bags. Our Company has placed order and advance amount given to Zhejiang Jianda Machinery Co. Ltd., China in January, 2024 and delivery is expected by January, 2025 and installation will be completed by the month of February, 2025.

We also plan to invest in bag making machines to make bags for the e-commerce industry, which is rapidly expanding. With the addition of new products, we believe that we will be able to widen our presence in the flexible packaging market.

Our Company can procure orders for WPP bags and e-commerce bags only after we have in-house manufacturing facilities. In respect of e-commerce and retail bags machine, we have yet to place order for plant & machinery, as the machine delivery time is only 45-60 days therefore, our Company believes this can be ordered later on. The machines shall be installed in the new unit towards the end of February, 2025, the orders will therefore, be placed by end of January, 2025.

We have placed orders for 57.29% of the plant and machinery and orders for 42.71% are yet to be placed, as detailed in the "Object of the Issue" beginning on page no. 76 of this Red Herring Prospectus. There has been a delay of about five months in ordering plant & machinery and obtaining possession of premises. The entire installation of plant & machinery is expected to be completed by March-April, 2025 and trial runs begin from April, 2025.

b) **Increasing our market presence**

Currently we are not exporting significantly as we are exporting our products mostly to Ivory Coast, a country in Western African region. Our aim is to provide a range of customized products tailored to our customers' needs. By enhancing our capabilities, optimizing costs, expanding product specifications, adhering to global standards, implementing marketing strategies and offering competitive pricing, we plan to broaden our global presence.

c) *Expand our customer base by strengthening our marketing network*

We manufacture flexible packaging material suitable for packaging products manufactured in FMCG, processed foods, adhesive, engineering, pharmaceutical, cosmetics, construction and other industries. Our major customers are leading players in their own industry segment. We believe that the relationships that we have enjoyed with our customers over the years are an indicator of our position as a preferred supplier to our customers. We believe our continued initiatives will help increase our market share and product portfolio with existing customers. We believe we offer customers with a reliable, convenient and cost-effective option to satisfy their packaging requirements and we intend to continue to leverage our sales and marketing network, diversified product portfolio and our industry standing to establish relationships with new regional and local customers to expand our customer base.

We continue to enhance our business operations by ensuring that our customer base increases through our marketing efforts. We intend to strengthen our existing marketing team by inducting qualified and experienced personnel, who will supplement our existing marketing strategies in the domestic and international markets. The certifications such as ISO 22000: 2018 and ISO 9001:2015 certify the quality of our products. For further details, please refer to the heading titled “*Quality Certifications*” in the chapter titled “*Government and other Statutory Approvals*” at page 207 of this Red Herring Prospectus.

d) *Cost effectiveness approach*

Apart from expanding business and revenues, we intend to optimize our resources in order to remain competitive in the industry. Measuring and evaluating costs at each cost center and bench marking the same to industry standards is our core strategy to control direct costs and overheads. Our focus has been to reduce the operational costs to gain a competitive edge.

In addition to the power supply, our Company has two DG sets for 400 KVA each installed at Unit-I and Unit-II.

(b) Water supply

Our manufacturing process does not require any water. The water supply receives from Department of Irrigation & Public Health, Himachal Pradesh in our manufacturing units is used majorly for drinking purposes. In addition, water is required in chillers for cooling.

(c) Effluents

Since, plastic waste is generated during our manufacturing units, our Company has executed memorandum of arrangement with third parties for collection, segregation, transportation, recycling and disposal of plastic waste generated in our manufacturing units. Further, our Company has set up the facility of chillers to cool down the hot air generated during our manufacturing process. We had availed the requisite consents and environmental approvals from the regulatory authorities for operating our manufacturing units. For further details, please refer to the chapter titled “Government and other Statutory Approvals” at page 201 of this Red Herring Prospectus.

Raw material

The major raw materials used in our manufacturing process are:

Raw Material	Description	Application in end-products manufactured by our Company
Polyester (PET films)	Polyester film forms a part of a laminate. It is used as a film on which printing is done as it has good transparency and shine. Since it has a higher temperature resistance than LDPE, it is used as the outer layer of a laminate as is required for smooth packaging on automatic FFS and seal machines on which the products are packed in pouches.	PET films are used in all 2,3 and 4 laminates produced. Main end use applications are in food packaging like atta, rice, processed foods, dry fruits etc. Non-food applications include detergents, chemicals, adhesives, engineering goods etc.
Low-density polyethylene (“LDPE”)	LDPE granules are normally added 15-20% in the sealing layer of any film or laminate. This is used to stabilize the film during production.	It has no specific end use application and is used as a blend material to stabilize film production.
Metallocenes (“mLLDPE”)	Metallocenes are high performance LLDPE plastic granules. They form bulk of the inner sealing layer of the plastic film and or laminate. These materials have a good seal strength especially for packing through product contamination. They have a high bursting strength. These are normally forming 50-70% of the poly film used in laminates.	The major end use applications include sealing layer of 5-layer edible oil pouch, high seal strength and bursting strength for big bags for packing atta, rice and other products requiring a high strength, detergents, milk pouch, vacuum packaging etc. It forms a major component of almost all end use pack applications due to its superior sealing properties and high tensile strength.
Biaxially oriented polypropylene (“BOPP”)	BOPP films are having good moisture barrier, easy tear properties and good printability.	Mainly used for snack food, confectionery packaging where a good moisture barrier is required and easy opening of the pack. Also used for laminates for packing spices for single use by food service industry.
Aluminum foil	Aluminum foil has high oxygen and moisture barrier properties	Used in retort pouches, vacuum pouches, adhesive pack, processed perishable foods (like tomato sauce).
Nylon	Nylon granules are used as an oxygen barrier layer in 5 layer and 7-layer films. This material has a high barrier against oxygen and other gases and helps to extend shelf life of oxygen sensitive food products.	Major end use application is edible oil pouch and vacuum pouches.

The cost breakup of primary raw material, used by our Company, for 8-month period ended on November 30, 2024 and for the fiscal ended on March 31, 2024, March 31, 2023 and March 31, 2022 is provided below:

OUR PRODUCTS

Our Company is in the business of manufacturing and supplying diversified flexible packaging materials. The main products of our Company are as follows:

Sr. No.	Description of product*	Application	Sample photograph
1.	COEX films		
(a)	3-layer films 3-layer films are made from a combination of LDPE, LLDPE, mLLDPE, HDPE and PP granules. The recipe and quality of the film is dependent on the end use application for example in edible oil packaging there is a high concentration of mLLDPE which is a plastic material which has good sealing properties through edible oil contamination. These films are fully recyclable.	<ul style="list-style-type: none"> • Mainly used as an input raw material for making laminates; • In pasteurised milk pouch; • In vanaspati pouch; • Poly shrink film for collation packing. 	

<p>(b)</p>	<p>5-layer barrier films</p> <p>5-layer COEX films are made using a combination of mLLDPE, LLDPE, LDPE, tie, EVOH and NYLON. The barrier layers are normally encapsulated in the middle layer of the 5-layer film structure. Nylon based films are used for packing less oxygen sensitive products like Edible Oil and Vacuum Pouches. EVOH based films have a higher OTR oxygen barrier property and are used for packing highly oxygen sensitive products like UHT milk, processed foods etc. These films are fully recyclable.</p>	<ul style="list-style-type: none"> • Edible oil pouch; • Ghee pouch; • Mayonnaise; • tomatoes puree etc. used by food service companies; • Distempers and paints; • Base film used as a raw material input for making high barrier laminates for packing aggressive chemicals. 	
<p>(c)</p>	<p>5-layer pouches</p> <p>5-layer pouches are made from 5-layer films and used by those customers who cannot use automatic pouch packing machines. The biggest application is in cashew vacuum bags in sizes 25 Lbs. and 50 Lbs.</p>	<ul style="list-style-type: none"> • Bulk vacuum bags for cashew nuts; • Vacuum pouches for cheese, meat, sweets etc.; • Vacuum pouches for engineering parts. 	
<p>2. Flexible printed laminates</p>			
<p>(a)</p>	<p>2 ply laminates</p> <p>These laminates are made from 2 films. The most common laminate is a 2-ply polyester / 3-layer film laminate used for FMCG products which are less oxygen sensitive. Polyester top layer gives good printability and high temperature resistance thus making it suitable to pack on automatic form film deal (FFS) machines. For packaging of confectionery products, a commonly used 2 ply laminate is polyester / BOPP in which BOPP is used for improved moisture barrier properties. For oxygen sensitive products laminates are made using polyester / 5-layer barrier films.</p>	<p>To pack cereals, detergents, shampoo, tea, general FMCG products, spices for food service.</p>	

<p>(b)</p>	<p>3 ply laminates</p> <p>In 3-ply laminates, there is an additional layer of metalized polyester, or metalized BOPP. These are normally used for application requiring higher moisture barrier properties as a metalized film enhances the moisture barrier properties. Also used for premium branded products as metalized finish enhances the printability and overall look of the pack.</p>	<p>For premium brands of all FMCG products.</p>	
<p>(c)</p>	<p>4 ply laminates</p> <p>In 4 ply laminates, there is an additional layer of aluminum foil which is incorporated to further enhance the oxygen and moisture barrier properties. They could also incorporate an inner CPP layer for hot fill retort packaging applications used for processed foods.</p>	<p>For snack foods, tomatoes paste, ready to eat foods, contraceptives.</p>	
<p>3.</p>	<p>Laminate pouches</p> <p>Laminated pouches are pouches made using 2, 3 or 4 ply laminates and are supplied to those customers who cannot use automatic FFS machines.</p>	<p>It is mainly used by customers seeking to use readymade pouches due to non-availability of their own automatic packaging lines.</p>	
<p>4.</p>	<p>BOPP labels</p> <p>BOPP labels are made from transparent BOPP or pearlized BOPP. They have a paper like feel and after printing are used as labels for PET bottles to pack beverages, water, edible oil etc.</p>	<p>For labelling of beverage and mineral water bottles.</p>	
<p>5.</p>	<p>PVC shrink label</p> <p>PVC shrink labels are made from PVC granules converted to blown PVC shrinkable films. After printing they are converted into labels. These labels are applied onto bottles and then they are tightly shrunk onto the bottle when passed through a heat shrink tunnel. These labels are used to package edible oils, beverages, water and FMCG products.</p>	<ul style="list-style-type: none"> • Beverages; • Cosmetics; • Health foods; • Mineral water; • General FMCG products. 	

*Our Company offers 7-layer of COEX films to our customers by procuring the same from the market, as per the demand raised by our existing

customers. However, the said sale of 7-layer COEX films is at a very miniscule level, at present. But with the implementation of proposed expansion, our Company will be able to manufacture 7-layer COEX films inhouse.

Export and export obligation

Our export revenue for the 8-month period ended on November 30, 2024 and fiscal ended on 2024, 2023 and 2022 is ₹ 193.59 lakhs, ₹ 222.09 lakhs, ₹ 254.42 lakhs and ₹ 84.74 lakhs, respectively and represented 2.94%, 2.01%, 2.33% and 0.91% of our revenue from operations, respectively. Further, we have no export obligations as on the date of this Red Herring Prospectus except the following:

- During the period 2005-2010, we imported several machines as our Company had plans to export the goods made from such machines, they were imported against customs duty free licenses with export commitments to be fulfilled in

subsequent years. A total of 8 licenses were obtained and the total customs duty saved was ₹ 229.41 lakhs. We were able to fulfill export obligation of the first five licenses within the due date and after providing the export data to the DGFT, the department discharged the Export Obligation Discharge Certificates (EODC) for those 5 licenses. The export obligations on the later three licenses were not met on time hence the DGFT created a demand on our Company against all 3 licenses. In respect of two licenses i.e. EPCG License no. 0530144805 dated 16.10.2007 and EPCG License no. 0530154079 dated 26.11.2010, our Company completed majority of its export obligations but could not meet its entire 100% export obligations on account of not getting enough export orders due to global recession. As regard to our third license no. 0530145308 dated 01.01.2008, our Company has completed export obligations but had not submitted desired documents with DGFT due to oversight. Subsequently, DGFT offered an “Amnesty Scheme for one time settlement of default in export obligation by advance and EPCG authorization holders” dated April 1, 2023, in which our Company submitted their proof of exports (including deemed exports). We received EODC in relation to two licenses number 0530154079 and 0530145308. In respect of third license number 0530144805 dated 16.10.2007, we made payment under the amnesty scheme to customs department of ₹ 17.30 lakhs on April 1, 2024. The said amount alongwith our bank guarantee of ₹ 15.50 lakhs (which was already encashed by the custom department) aggregating to ₹ 32.80 lakhs was considered as full discharge of liability. The matter is now pending with the customs department for issuance of EODC.

MANUFACTURING PROCESS

Raw Material Procurement

The primary raw material used during the manufacture of flexible packaging material are low-density polyethylene (“LDPE”), polyester PET films, biaxially oriented polypropylene (“BOPP”), Metallocenes (“mLLDPE”), aluminum foil and nylon. Further, during the process, secondary raw materials are infused which are ink, granules and adhesive. We domestically source our raw materials from various suppliers. For ensuring the compliance with the quality standards and regulations of the resultant product, it is important for us to undertake a quality check on the raw materials sourced. Within our organization, we carry out various tests for checking grammage, tensile strength, transparency, elongation, etc. All our raw materials are easily available in the market.

Manufacturing Process

There are different processes carried out to manufacture flexible packaging material, the key process has been described below:

(a) Extrusion Process:

Extrusion is the most commonly used method to prepare packaging films and is widely used in the packaging industry. This process involves extruding a tube of molten polymer through a die and inflating its initial diameter to form a thin film bubble. We also manufacture products with three layer blown film extrusion, wherein three polymers are simultaneously extruded through a common die to form an integral film to provide unique strength and barrier properties. Extremely thin layers of resin that cannot be made into a film by themselves can be layered by co-extrusion which harness a number of functions such as heat resistance, heat sealing capabilities, rigidity, flexibility, cold resistance and easy-peel capabilities.

(b) Printing:

We adopt rotogravure printing and simple gravure printing, in order to print on the raw packaging material using rotary printing press. The process involves engraving an image or design onto a copper plated steel cylinder base for each colour that has to be printed. There are five basic components of the printing process, (i) an engraved cylinder, the circumference of which differs in accordance with the layout of the job; (ii) an ink tank or reservoir; (iii) a doctor blade; (iv) an impression roller; and (v) a dryer. The engraving process creates cells on the cylinder surface which contain the ink to be transferred to the substrate (film or paper). The ink is applied directly to the cylinder and from the cylinder it is transferred to the substrate with the help of an impression roller. While the press is in operation, the engraved cylinder is partially immersed in the ink tank, filling the recessed cells and as the cylinder rotates, it draws ink out of the tank with it. Acting as a squeegee, the doctor blade scrapes the cylinder before it contacts the substrate, removing excess ink from the non-printing (non-recessed) areas therefore leaving the right amount of ink required for printing. The capillary action of the substrate and the pressure from impression rollers force the ink out of the cell cavity and transfer it to the substrate. Lastly, the substrate goes through a dryer in order for the ink to dry completely before going through the next colour unit and absorbing another coat of ink.

(c) Lamination Process:

Laminating is the process through which two or more flexible packaging webs are joined together using a bonding agent. The substrates making up the webs consist of films, papers or aluminum foils. The multi-layer composite structure can be produced either through a process using adhesives or by extrusion. Web laminating is used to improve the appearance and barrier properties of substrates. The choice of the most suitable web laminating process is mainly dictated by the end-use of the product. A number of different technologies are available that cover the wide variety of applications in the food and non-food packaging industries. Laminating machinery can be classified according to the type of bonding agent used to produce the laminates. These types are i) *Wet lamination*: where the bonding agent is still in a liquid state when the webs are joined together. It is commonly used to produce a paper-aluminum foil laminate that is widely used in flexible packaging. ii) *Dry lamination*: where the bonding agent, dissolved into a liquid (water or a solvent), is applied to one of the webs, before being evaporated in the drying oven. The adhesive coated web is laminated to the other under strong pressure and using heated rollers, which improves the bond strength of the

laminate. iii) *Solvent less lamination*: where the adhesives used do not contain solvents. Solventless adhesive generally indicates a specific type of adhesive composed by two components reacting with each other and consequently not requiring drying. The resulting laminated web is then rewound into a finished roll. iv) *Ex-coating Lamination*: where co-extruded films are used to bond two films resulting into formation of three layer/ five-layer lamination.

(d) Slitting/Rewinding Process:

Slitting is the final step in the production process for most roll stock flexible packaging material wherein a large “master roll” of the packaging material is cut to its final width. For preparation of pouches, the packaging material received from the lamination process has to go through another process known as the pouching process, to reach the end of its manufacturing cycle.

(e) Pouching Process:

There are many types of pouches used for packing various products like central sealing, 3 side sealing, zipper pouch, stand up pouches and pouch with slider membrane. These are made with the help of specific machines on which the rolls are placed and passed through to form pouches. Stand up pouches are laminated film bags, typically made of plastics or a blend of plastic film and aluminum foil. They can be printed with any color, logo, or design, so the potential to really make an impact on retail shelves is very high. The first step in the stand-up pouch manufacturing process is passing the laminated packaging material through a set of plows that fold a W-shape gusset into the bottom, so that the pouch can stand up. If a zipper is to be part of the package, it is sealed on the inside facing of the web near the top edge. Once the gusset is formed, vertical seals are then made along the sides, and the zipper is pressed into the same area to seal its ends and reduce its thickness. The bottom folds of the pouch are then sealed, and the pouch is then cut apart vertically through the center of the side seals to create the container part of the bag, and it is then carried to the station that will fill the pouch with the final product or packaged in cartons for shipment to the end user. After the product is dispensed into the pouch, it travels to another manufacturing station where the zipper is closed, and the pouch is sealed again, above the zipper. A notch is usually cut into the sides of the pouch between the top seal and the zipper, so it is easy for end users to open. Stand up pouches can be used for both dry food packaging and liquid products, such as pet food, liquid household cleaners, personal care items, chemical products, and granular products like salt or sugar.

Quality control and tests at each stage at the manufacturing process:

The raw materials procured and the finished products manufactured are checked and inspected to ensure that the desired quality is achieved. Our organization is well equipped to meet all the specifications required to follow domestically as well as internationally. Our Company has standard operating procedure laid down in written form which is referred and adhered to by the employees engaged in manufacturing process. The said standard operating procedure narrates the quality standards as well which are strictly adhered to by the employees while checking finished products for quality assurances. Quality control tests are undertaken at various stages.

In the *first stage* we convert plastic granules to plastic films. The tests carried out on the films are as follows:

- Thickness variation check which should be under +/- 10% from standard thickness. This is checked using a thickness gauge;
- Width variation check;
- Tensile strength test;
- Elongation test;
- Opacity test;
- Occasionally, if required, we get tests done for barrier properties and global migration from external labs at the request of the customer.

In *stage two* the plastic films are printed. After printing the following tests are carried out:

- Match printed shades to customer’s pre-approved shades;
- Check ink adhesion test to ensure that ink will not peel off.

In *stage three* the printed film will be laminated to other films or aluminum foil. After which the following tests are carried out:

- Inter layer bond strength to ensure that the films do not de-laminate;
- Tensile strength test;
- Seal strength test;
- COF test.

In *stage four* the laminate will be either slit into smaller rolls or converted to pouches as finished goods ready for supply. At this stage following tests are carried out:

- To check width per roll if supply is in roll;
- To check pouch dimensions if supply is in pouch form;
- To fill product in pouch and do *drop test* to check the strength of the pouch and its seal.

Once the finished good is ready for dispatch, a COA (Certificate of Assurance) is prepared which certifies that goods are produced as per ordered specifications and the same certificate is sent to customer with the shipment.

ENVIRONMENTAL LAWS:

In India, waste management is governed by multiple sub-ordinate regulations and the Ministry of Environment, Forest and Climate Change, Government of India (MoEF) with Central Pollution Control Board (CPCB) and State Pollution Control Boards of different states (SPCB). For disposal of cases, enforcement of any legal right or giving relief and compensation for damages to persons and property relating to the environment i.e. to adjudicate environmental cases in the country, the National Green Tribunal (NGT) was established in 2010 as per the National Green Tribunal Act. The Environment (Protection) Act, 1986 and various rules govern compliance and issues of waste management in India.

The Environment (Protection) Act, 1986 as amended (“EPA”)

The Environmental Protection Act, 1986 is an "umbrella" legislation designed to provide a framework for coordination of the activities of various Central and State authorities established under various laws. The potential scope of the EPA is broad, with "environment" defined to include water, air and land and the interrelationships which exist amongst water, air, land and human beings and other living creatures such as plants, micro-organisms and property. The purpose is protecting and improving the quality of the environment and preventing controlling and abating environmental pollution. Further, the Ministry of Environment, Forest and Climate Change looks into Environment Impact Assessment (EIA). MoEF receives proposals for expansion, modernization and setting up of projects and the impact which such projects would have on the environment which is assessed by MoEF in detail before granting clearances for such proposed projects.

Environment (Protection) Rules, 1986

The rules framed under EPA mandates industrial units and corporates to act in a responsible manner to protect environment, ensure location and functioning of industries and manner of dealing with waste generation. Various rules are notified to govern areas like waste prevention, minimization, reuse and recycle of municipal solid waste, industrial, agricultural and hazardous waste. Non-compliance with the provisions of EPA, or the rules made or orders or directions issued thereunder attracts imprisonment or fine or both.

Plastic Waste Management Rules, 2016 (“PWM”)

Under the Plastic Waste Management Rules, 2016, all institutional generators of plastic waste, are required to inter alia, segregate and store the waste generated by them in accordance with the Solid Waste Management Rules, 2016, and handover segregated wastes to authorized waste processing or disposal facilities or deposition centres, either on its own or through the authorized waste collection agency. The waste generator shall also take steps to minimize the generation of plastic waste. PWM also requires every waste generator, local body, producers, manufacturer, importers and brand owners to collect back the plastic waste generated due to their products. PWM, as amended, provides the statutory framework for environmentally sound management and disposal of plastic waste including waste generated from single use plastic.

Guidelines on Extended Producer Responsibility for Plastic Packaging (“Guidelines”)

These Guidelines for plastic packaging vide Plastic Waste Management Amendment Rules, 2022 notified on February 16, 2022, provide a framework for implementation of Extended Producer Responsibility (EPR) and stipulate mandatory targets on EPR, recycling of plastic packaging waste, reuse of rigid plastic packaging and use of recycled plastic content. The Guidelines provide the roles and responsibilities of producers, importers, brand owners, Central Pollution Control Board, State Pollution Control Board or Pollution Control Committees, recyclers and waste processors for effective implementation of EPR.

National Environmental Policy, 2006 (“Policy”)

This Policy seeks to extend the coverage and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace but builds on the earlier policies. It is a statement of India's commitment of making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this Policy is that while the conservation of environmental resources is necessary to secure the livelihoods and well-being of all, the most secure basis

for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation than from degradation of the resource. The following are the objectives of the National Environmental Policy:

1. Conservation of critical environmental resources
2. Intra-generational equity: livelihood security for the poor
3. Inter-generational equity
4. Integration of environmental concerns in economic and social development
5. Efficiency in environmental resource use

The CA, 2013 deals with incorporation of companies and the procedure for incorporation and post incorporation. The conversion of private companies into public companies and vice versa is also laid down under the provisions of CA, 2013. The procedure related to the appointment of directors, the procedure relating to winding up, voluntary winding up, appointment of liquidator also forms part of the CA, 2013. Further, Schedule V (read with sections 196 and 197), Part I lays down the conditions to be fulfilled for the appointment of a managing or whole-time director or manager. The provisions relating to remuneration of the directors payable by the companies is under Part II of the said schedule.

A contract of sale may be an absolute one or based on certain conditions. The Sale of Goods Act contains provisions in relation to the essential aspects of such contracts, including the transfer of ownership of the goods, delivery of goods, rights and duties of the buyer and seller, remedies for breach of contract and the conditions and warranties implied under a contract for sale of goods.

The Registration Act, 1908

The Registration Act was passed to consolidate the enactments relating to the registration of documents. The main purpose for which the Registration Act was designed was to ensure information about all deals concerning land so that correct land records could be maintained. The Registration Act is used for proper recording of transactions relating to other immovable property also. The Registration Act provides for registration of other documents also, which can give these documents more authenticity. Registering authorities have been provided in all the districts for this purpose.

The Indian Contract Act, 1872

The Indian Contract Act, 1872 codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and the breach enforced. It provides a framework of rules and regulations that govern the formation and performance of contracts. The contracting parties themselves decide the rights and duties of the parties and terms of agreement.

The Specific Relief Act, 1963

The Specific Relief Act is complementary to the provisions of the Contract Act and the Transfer of Property Act, 1882 as the Specific Relief Act applies both to movable property and immovable property. The Specific Relief Act applies in cases where the court can order specific performance of a contract. Specific relief can be granted only for the purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. Specific performance means the court will order the party to perform his part of the agreement, instead of imposing on him any monetary liability to pay damages to another party.

Negotiable Instruments Act, 1881

In India, cheques are governed by the Negotiable Instruments Act, 1881, which is largely a codification of the English Law on the subject. The Act provides effective legal provision to restrain people from issuing cheques without having sufficient funds in their account or any stringent provision to punish them in the event of such cheques not being honored by their bankers and returned unpaid. Section 138 of the Negotiable Instrument Act creates statutory offence in the matter of dishonor of cheques on the ground of insufficiency of funds in the account maintained by a person with the banker which is punishable with imprisonment for a term which may extend to two years, or with fine which may extend to twice the amount of the cheque, or with both.

INTELLECTUAL PROPERTY RIGHTS:

The Trade Marks Act, 1999 (“Trade Marks Act”)

The Trade Marks Act provides for the process for making an application and obtaining registration of trademarks in India. The purpose of the Trademarks Act is to grant exclusive rights to marks such as a brand, label, heading and to obtain relief in case of infringement for commercial purposes as a trade description. The Trademarks Act prohibits registration of deceptively similar trademarks and provides for penalties for infringement, falsifying and falsely applying trademarks.

Copyright Act, 1957 (“Copyright Act”)

The Copyright Act governs copyright protection in India. Even while copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration under the Copyright Act acts as prima facie evidence of the particulars entered therein and helps expedite infringement proceedings and reduce delay caused due to evidentiary considerations.

The Patents Act, 1970 (“Patent Act”)

Under statute, India provides for the patent protection under the Patents Act. The Patents Act governs the patent regime in India and recognizes process patents as well as product patents. Patents obtained in India are valid for a period of 20 years from the date of filing the application. The Patents Act also provides for grant of compulsory license on patents after expiry of three years of its grant in certain circumstances such as reasonable requirements of the public, non-availability of patented invention to public at affordable price or failure to work the patented invention.

Every company which is assessed for income tax under the IT Act is required to comply with the provisions thereof, including those relating to Tax Deduction at Source, Advance Tax, Minimum Alternative Tax and like. Every such company is also required to file its returns by September 30 of each assessment year.

Central Goods and Services Tax Act, 2017 (“GST Act”)

The GST Act levies indirect tax throughout India to replace many taxes levied by the Central and State Governments. The GST Act was applicable from July 1, 2017 and combined the Central Excise Duty, Commercial Tax, Value Added Tax (VAT), Food Tax, Central Sales Tax (CST), Introit, Octroi, Entertainment Tax, Entry Tax, Purchase Tax, Luxury Tax, Advertisement Tax, Service Tax, Customs Duty, Surcharges. GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and/or services. India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single state are levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that state. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the state where the goods or services are consumed and not the state in which they were produced.

Customs Act, 1962

The provisions of the Customs Act, 1962 and rules made thereunder are applicable at the time of import of goods i.e., bringing into India from a place outside India or at the time of export of goods i.e., taken out of India to a place outside India. It authorizes the government to formulate as well as announce the export and import policy and to keep amending the same on a timely basis. The government has also been given wide powers to prohibit, restrict and regulate exports and imports in general as well as specified cases of foreign trade. The FTA read with the Foreign Trade Policy, 2023, prohibits anybody from undertaking any import or export except under an importer-exporter code (“IEC”) number granted by the Director General of Foreign Trade. Hence, every entity in India engaged in any activity involving import/export is required to obtain an IEC unless specifically exempted from doing so. The IEC shall be valid until it is cancelled by the issuing authority. An IEC number allotted to an applicant is valid for all its branches, divisions, units and factories. Failure to obtain the IEC number shall attract a penalty under the FTA.

Foreign investment in India is governed primarily by the provisions of the FEMA, and the rules, regulations and notifications thereunder, as issued by the RBI from time to time and the FEMA Rules and the Consolidated FDI Policy. Additional Disclosure

Association/Disassociation with Hitkari Group

The Hitkari group was engaged in manufacturing of potteries (crocery) and flexible packaging. Hitkari Group promoters were (a) Mr. Ved Kapur (*father-in-law of Jaiwant Bery*); and (b) younger brother of Mr. Ved Kapur viz. Mr. Krishan Kapur. In the year 1987, Mr. Jaiwant Bery joined the Hitkari Group with a new project of flexible packaging, envisaged by him. This was known under the name *Hitkari Potteries Limited (Plastics Division)* (“HPL”) and was wholly owned by Hitkari group.

Under the Hitkari group, the packaging business was managed by Mr. Jaiwant Bery whereas the crocery business was managed by the promoters of Hitkari group (i.e. Mr. Ved Kapur and Mr. Krishan Kapur). In 1995, the Hitkari group decided to delink both businesses and to grow them independently.

- (a) The plastics/packaging business was hived off to a new company called *Hitkari Industries Limited* (“HIL”) managed by Mr. Jaiwant Bery. HIL did an initial public offer in the year 1995; and
- (b) The potteries business was hived off into a new entity *Hitkari China Limited* (“HCL”) which also went public in 1995.

In the year 1998, Mr. Krishan Kapur passed away due to illness and his son Mr. Ajay Kapur joined the business of HCL. With passage of time, differences arose within the families, on account of losses in the HCL potteries business. The dispute escalated to Company Law Board (*now NCLT*) (“CLB”) in 2003.

At CLB, both families agreed to a global settlement in 2005 by way of bidding for the combined businesses of the Hitkari group which included the profitable packaging business of HIL and the loss-making potteries business of HCL and HPL. Mr. Ajay Kapur won the bidding of the Hitkari Group and VK group (i.e. Mr. Ved Kapur and Mr. Jaiwant Bery) had to take the exit from their respective companies of the group. Post his exit, Mr. Jaiwant Bery set up his own venture named *‘Hitkari Polyfilms Private Ltd’* in January, 2005 whose name was immediately changed to Barflex Polyfilms Private Limited (“Barflex”) in June 30, 2005 in pursuance of order received from High Court of New Delhi dated May 31, 2005. By the year 2007-2008, HIL wound up their operations.

BSE Dissemination Board issued a Notice No. 20170821-24 dated August 21, 2017 in respect of *‘Compulsory Delisting of Company’* (“Notice”). The said Notice reflects Mr. Jaiwant Bery’s name and his wife’s name Mrs. Nomita Bery as the promoters of Hitkari China Limited. Pursuant to the said Notice/order and regulation 24 of Delisting Regulations, the delisted company, its whole-time directors, promoters and group companies shall be debarred from accessing the securities market for a period of 10 years from the date of compulsory delisting.

In this regard, Mr. Jaiwant Bery and Mrs. Nomita Bery submitted to BSE that they were not associated with *‘Hitkari China Limited’* as Promoter or Director or Shareholder in 2017 with following submissions:

- **Position as Promoter**

Hitkari China Limited was incorporated on June 25, 1987 and was promoted by Mr. Ved Kapur, Mr. Krishan Kapur and Hitkari Potteries Limited. Their names appeared in the prospectus of the Hitkari China Limited as ‘Promoter’ or ‘Promoter Group’, which came out with its initial public offer in December, 1995. However, names of Mr. Jaiwant Bery and Mrs. Nomita Bery did not appear in the offer document/ prospectus as ‘Promoter’ or ‘Promoter Group’.

- **Position as Shareholder**

Mr. Jaiwant Bery held 89,830 equity shares and his wife held 95,300 equity shares in Hitkari China Limited till the year 2005-06. There was family dispute amongst the promoters/directors of Hitkari China Limited for long in relation to gaining control over Hitkari Industries Limited (group company of Hitkari China Limited). Mr. Ajay Kapur, Mr. Ved Kapur, Hitkari China Limited and Hitkari Industries Limited were parties to the said family dispute. On the basis of bidding and compromise/ settlement arrived amongst the parties, Hon’ble Company Law Board ordered for taking control of Hitkari Industries Limited by Mr. Ajay Kapur through order dated January 17, 2005 (“Order”). He also opted to take control of Hitkari China Limited and Hitkari Potteries Limited. To give effect to this Order, Mr. Jaiwant Bery & Mrs. Nomita Bery were obliged to transfer their entire shareholding in 2005-06 (August, 2005) to Kapur family.

- **Position as Director**

Mrs. Nomita Bery was never appointed as director in Hitkari China Limited. However, Mr. Jaiwant Bery had been appointed as director in Hitkari China Limited for a period of only three months starting from January 17, 2005 and ended on April 9, 2005 in accordance with CLB Order dated January 17, 2005. Except this, they had never been appointed as director on the Board of Hitkari China Limited at any point of time.

Based on these submissions, BSE vide its email dated April 22, 2024 communicated to them that these regulations will not apply to them.

Further, Mrs. (late) Ambika Kapoor (mother of Mrs. Nomita Bery), Mrs. Ameeta Khanna (sister of Mrs. Nomita Bery), Mrs. Kavita Dhawan (sister of Mrs. Nomita Bery), and Mr.(late) Ved Kapoor (father of Mrs. Nomita Bery), transferred their entire shares held in Hitkari China Limited on August 20, 2005 and disassociated themselves from Hitkari China Limited.

Further, name of *Hitkari Industries Limited* was also mentioned in the list of ‘*Compulsory Delisted Companies*’ in the BSE Notice dated August 21, 2017, however, the same was revoked on July 20, 2018 basis of clarification received from SEBI vide email dated July 19, 2018. Mr. Jaiwant Bery disassociated from Hitkari Industries Limited as he ceased to be the director with effect from January 17, 2005, and transferred his entire shareholding in 2005. Mrs. Nomita Bery was never appointed as director of Hitkari Industries Limited. She transferred her entire shareholding to Ajay Kapoor Group in 2005 and disassociated herself from Hitkari Industries Limited.

Mr. Jaiwant Bery was not the promoter and shareholder of Hitkari Potteries Limited. He ceased to be director with effect from April 9, 2005. Mrs. Nomita Bery was never appointed as director of Hitkari Potteries Limited. She transferred her entire shareholding in 2005 and disassociated herself from Hitkari Potteries Limited.

1.02 Significant accounting policies

a) Basis of preparation

These financial statements have been prepared under the historical cost convention, on the accrual basis of accounting in accordance with the Generally Accepted Accounting Principles (GAAP) in India. Indian GAAP includes mandatory accounting standards as specified under the Companies (Accounting Standards) Rules, 2006 and presentational requirements of the Companies Act, 2013 and other accounting pronouncements of The Institute of Chartered Accountants of India.

b) Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles in India (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements and the results of operations during the year. Differences between actual results and estimates are recognised in the year in which the results are known or materialised. Examples of such estimates are estimated useful life of assets, provision for doubtful debts and retirement benefits, etc. Actual results could differ from those estimates. Any revision to accounting estimates is recognised prospectively in current and future periods.

c) Revenue Recognition

Revenue from sale of goods is recognized on transfer of all significant risks and rewards of ownership to the customer, which generally coincides with dispatch against orders from customers in accordance with the contract terms.

Sales are recognized, net of returns and trade discounts, on transfer of significant risks and rewards of ownership to the buyer. Sales exclude Goods & Service Tax.

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

d) Current and non-current classification

All assets and liabilities are classified into current and non-current

Assets

An asset is classified as current when it satisfies any of the following criteria:-

- a. It is expected to be realized in, or is intended for sale or consumption in, the company’s normal operating cycle.
- b. It is held for the purpose of being traded.
- c. It is expected to be realized within 12 months after the reporting period.
- d. It is cash or cash equivalents unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

Current assets include the current portion of non-financial assets.

All other assets are classified as non-current.

Liabilities

A liability is classified as current when it satisfies any of the following criteria:-

- a. It is expected to be settled in the company's normal operating cycle.
- b. It is held primarily for the purpose of being traded.
- c. It is due to be settled within 12 months from the reporting period
- d. The company does not have an unconditional right to defer settlement of liability at least 12 months after the reporting date. Terms of the liability that could at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Current liabilities include the current portion of non-financial liabilities.

All other liabilities are classified as non-current.

Operating cycle

Operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents.

e) Fixed assets and depreciation

Fixed assets are stated at cost of acquisition less accumulated depreciation and / or less accumulated impairment loss, if any. Cost of acquisition is inclusive of freight, duties, levies and all other incidental expenditure attributable to bring the assets to its working conditions for their intended use.

Depreciation is provided on straight line method at the rates which management believes is representative of useful lives of the assets prescribed under Schedule II of the Companies Act, 2013, except for cylinders which are depreciated over a period of 1 year. Assets costing up to ₹5,000 are fully depreciated in the year of acquisition.

Leasehold improvements are amortised over the period of lease, or the useful lives of assets as prescribed in Schedule II to the Companies Act, 2013, whichever is shorter.

Leasehold land is amortised on a straight line basis over the period of lease.

A fixed asset is eliminated from the financial statements on disposal or when no further benefit is expected from its use and disposal.

Losses arising from retirement or gains or losses arising from disposal of fixed assets which are carried at cost are recognised in the Statement of Profit and Loss.

f) Inventories

Inventories which comprise raw materials, work-in-progress and finished goods are carried at the lower of cost and net realisable value.

Cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

In determining the cost, FIFO method is used. In the case of manufactured inventories and work in progress, fixed production overheads are allocated on the basis of normal capacity of production facilities.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

The net realisable value of work-in-progress is determined with reference to the selling prices of related finished products. Raw materials and other supplies held for use in the production of finished products are not written down below cost except in cases where material prices have declined and it is estimated that the cost of the finished products will exceed their net realisable value.

The comparison of cost and net realisable value is made on an item-by-item basis.

g) Foreign currency transactions

Foreign currency transactions are recorded at the rate of exchange prevailing on the date of the respective transactions. Monetary foreign currency assets and liabilities remaining unsettled at the balance sheet date are translated at the rates of exchange prevailing on that date. Gains / losses arising on account of realization / settlement of foreign exchange transactions and on translation of foreign currency assets and liabilities are recognised in the Statement of Profit and Loss.

h) Employee benefits

Short-term employee benefits

Employee benefits payable wholly within twelve months of receiving employee services are classified as short-term employee

benefits. These benefits include salaries and wages, bonus and ex-gratia. The undiscounted amount of short-term employee benefits to be paid in exchange for employee services is recognised as an expense as the related service is rendered by employees.

Post employment benefit

Defined contribution plan

A defined contribution plan is a post-employment benefit plan under which an entity pays specified contributions to a separate entity and has no obligation to pay any further amounts. The Company makes specified monthly contributions towards employee provident fund to Government administered provident fund scheme which is a defined contribution plan. The Company's contribution is recognised as an expense in the Statement of Profit and Loss during the period in which the employee renders the related service

Defined Benefit Plan

The Company's gratuity benefit scheme is the defined benefit plan. The Company's net obligation in respect of a defined benefit plan is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value. Any unrecognised past service costs and the fair value of any plan assets are deducted. The calculation of the Company's obligation under plan is performed annually by a qualified actuary using the projected unit credit method.

The Company recognises all actuarial gains and losses arising from defined benefit plans immediately in the Statement of Profit and Loss. All expenses related to defined benefit plans are recognised in employee benefits expense in the Statement of Profit and Loss. When the benefits of a plan are improved, the portion of the increased benefit related to past service by employees is recognised in Statement of Profit and Loss on a straight-line basis over the average period until the benefits become vested. The Company recognises gains and losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs.

i) Taxation

Income-tax expense comprises current tax (i.e. the amount of tax for the year determined in accordance with the Income-tax Act, 1961) and deferred tax charge or credit (reflecting the tax effects of timing differences between the accounting income and taxable income for the year). The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted as of the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty of realization. However, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is virtual certainty of realisation of such assets. Deferred tax assets are reviewed at each balance sheet date and written down or written up to reflect the amount that is reasonably/virtually certain (as the case may be) to be realised.

Deferred tax assets or liabilities arising due to timing differences.

Minimum Alternative Tax ('MAT') under the provisions of the Income-tax Act, 1961 is recognised as current tax in the Statement of Profit and Loss. The credit available under the Act in respect of MAT paid is recognised as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the period for which the MAT credit can be carried forward for set-off against the normal tax liability. MAT credit recognised as an asset is reviewed at each balance sheet date and written down to the extent the aforesaid convincing evidence no longer exists.

j) Operating leases

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased term are classified as operating leases. Operating lease charges are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term, considering the renewal terms, if appropriate.

k) Borrowing costs

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalized as part of the cost of such assets to the extent that they relate to the period till such assets are ready to be put to use. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to Statement of profit and loss.

l) Earnings per share

The Company reports basic and diluted earnings / (loss) per equity share in accordance with Accounting Standard 20, Earnings per Share. The basic and dilutive earnings / (loss) per share is computed by dividing the net profit / (loss) attributable to equity shareholders for the period / year by the weighted average number of equities shares outstanding during the year. Dilutive earnings per share is computed and disclosed after adjusting the effects of all dilutive potential equity shares, if any, except when the results will be anti-dilutive.

m) Impairment of assets

The carrying amounts of assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the recoverable amount of the asset is estimated. For assets that are not ready for use, the recoverable amount is estimated at each reporting date. An impairment loss is recognised in Statement of Profit and Loss whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is recorded only to the extent that the carrying amount of the assets does not exceed the carrying amount that would have been determined net of depreciation or amortization, if no impairment loss had been recognised.

n) Provisions and contingent liabilities

A provision is recognised when the Company has a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and reliable estimate can be made of the amount of the obligation. A contingent liability is recognised where there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. The Company does not recognise assets which are of contingent nature until there is virtual certainty of the realisation of such assets. However, if it has become virtually certain that an inflow of economic benefits will arise the asset and related income are recognised in the financial statements of the year in which the change occurs.

1.03 Contingent liabilities and commitments (to the extent not provided for)

Contingent liabilities:

(i) The Company has availed custom duty exemptions under the Export Promotion Capital Goods Scheme of the Government of India on import of capital equipment for use in its manufacturing business. Under the said Scheme, the Company is required to discharge the export obligation 'Scheme' over a period of next eight years.

Profit after tax:

Our profit after tax increased from ₹ 1013.07 lakhs in FY23 to ₹ 1623.55 lakhs in FY24. This increase of 60.26% was mainly on account of decrease in raw material prices. The total consumption of raw material during FY24 was ₹ 7527.83 lakhs as against ₹ 7876.46 lakhs during FY23. There are very few public domains which disclose the raw material prices. The major raw materials used in the manufacturing process of Company are Metallocene Linear Low Density Polyethylene (mLLDPE), Liner Low Density Polyethylene (LLDPE), Low-density polyethylene (LDPE), inks, adhesives, BOPP, nylon, solvent & chemicals, etc. The mLLDPE, LLDPE & LDPE together constitute more than 50% of total primary raw material cost, is dependent on the prices of LLDPE (code F19010; Depot: Baddi, Himachal Pradesh) which are available on the website at www.plastemart.com. As per the said website, the cost of raw material in April, 2023 was ₹ 1,09,240 per ton and in March, 2024 it was ₹ 1,00,720 per ton i.e. change of around 8%. The highest price of LLDPE during the year was ₹ 1,09,240 per ton and the lowest price during the year was ₹ 91,710 per ton i.e. variation of around 16.04% which is considered substantial. The prices of other raw materials viz. inks, adhesives, solvent & chemicals, aluminium foil etc. have not reduced significantly during the same period.

The benefit of the reduction in prices of LLDPE & polyester films were not passed on to the customers, which give rise to increase in profit after tax. A pictorial graph of LLDPE prices during the year is as under:

Source: <https://www.plastemart.com/polymer-pricelist>

(d) Actions by statutory and regulatory authorities against the Company

During the period 2005-2010, the Company imported several machines as our Company had plans to export the goods made from such machines, they were imported against customs duty free licenses with export commitments to be fulfilled in subsequent years. A total of 8 licenses were obtained and the total customs duty saved was ₹ 229.41 lakhs. The Company has not fulfilled its export obligations on following three EPCG license:

S.NO	EPCG License Number	Date	Duty saved (₹ In lakhs)	Export obligations in US\$	Expiry Date	Status
1	530144805	16.10.2007	102.02	20,37,911.75	15.10.2015 (8 years)	Amnesty Scheme Benefit availed by the Company

2	530145308	01.01.2008	13.07	2,62,455	31.12.2015 (8 years)	Documents submitted. EODC received.
3	530154079	26.11.2010	13.18	1,76,175.76	25.11.2016 (6 years)	Amnesty Scheme Benefit availed by the Company. EODC received.

We were able to fulfill export obligation of the first five licenses within the due date and after providing the export data to the DGFT, the department discharged the Export Obligation Discharge Certificates (EODC) for those 5 licenses. The export obligations on the later three licenses were not met on time hence the DGFT created a demand on our Company against all 3 licenses. In respect of two licenses i.e. EPCG License no. 0530144805 dated 16.10.2007 and EPCG License no. 0530154079 dated 26.11.2010, our Company completed majority of its export obligations but could not meet its entire 100% export obligations on account of not getting enough export orders due to global recession. As regard to our third license no. 0530145308 dated 01.01.2008, our Company has completed export obligations but had not submitted desired documents with DGFT due to oversight. EODC is pending in this matter. Subsequently in FY 2023-24, DGFT offered an “Amnesty Scheme for one time settlement of default in export obligation by advance and EPCG authorization holders”, in which our Company made payment and also submitted proof of exports (including deemed exports). We received EODC in relation to two licenses number 0530154079 and 0530145308. In respect of third license number 0530144805 dated 16.10.2007, we made payment under the amnesty scheme to customs department of ₹ 17.30 lakhs on April 1, 2024. The said amount alongwith our bank guarantee of ₹ 15.50 lakhs (which was already encashed by the custom department) aggregating to ₹ 32.80 lakhs was considered as full discharge of liability. Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I:

This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended until June 30, 2019. Under

this phase, an RIB also had the option to submit the ASBA Form with any of the Designated Intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II:

This phase had become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Under this phase, submission of the physical ASBA Form by an RIB through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice

Phase III:

This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government.
