Internal Risk Factors

Risks Relating to our Business

1. ***A slowdown in economic growth in India could have an adverse effect on our business, results of operations and financial condition.***

We operate in the luxury-upper upscale and upscale hotel segments in India according to the Horwath Report, where consumer demand from business, leisure, MICE (meetings, incentives, conferences and events) travellers for our services is highly dependent on the general economic performance in India and globally. There is a history of increases and decreases in demand for hotel rooms, in occupancy levels and in rates realized by owners and operators of hotels through macro-economic cycles, according to the Horwath Report. Variability of results through some of the cycles in the past has been more severe due to changes in the supply of hotel rooms in given markets or in given categories of hotels. For example, according to the Horwath Report, a slowdown in demand growth starting from the global financial crisis in the financial year 2008 and a corresponding slowdown in the Indian economy resulted in moderate performance in the industry between the financial years 2008 and 2013. Any future slowdown in

economic growth could affect business and personal discretionary spending levels and lead to a decrease in demand for our services for prolonged periods.

Such events could lead to a reduction in revenue derived from our hotels. During periods of such economic contraction, we may have to delay or cancel our ongoing or proposed investments in new projects or our ongoing investments in developing new properties may not yield results that we anticipated. We cannot assure you that such macroeconomic and other factors, which are beyond our control would not significantly affect demand for our services. Consequently, the occurrence of such events could have an adverse effect on our business, results of operations and financial condition. For details, of fluctuations in demand in the hospitality industry in India in recent years, see “**Industry Overview – Supply and Demand**” and “**Industry Overview – Performance of Hotels in India in Recent Years**” commencing on pages 138 and 144, respectively.

2. *We have entered into hotel operation and related agreements with Marriott to receive operation and marketing services in relation to our hotels. If our hotel operators decide to terminate or not renew any agreement with us, our business, financial condition and results of operations may be adversely affected.*

As of September 30, 2018, we own four hotels (including a hotel with a co-located serviced residence) which are operated by third parties, which represent 2,176 keys in aggregate. Our hotels operated by third parties accounted for 84.73%, 90.23%, 89.46% and 89.92% of our revenue from operations for the six months ended September 30, 2018 and financial years 2018, 2017 and 2016, respectively. As of September 30, 2018, these hotels are operated by a single third party hotel operator, Marriott Hotels India Private Limited and its affiliates (collectively, “**Marriott**”).

We benefit from hotel operation contracts with Marriott, with terms generally ranging from 10 to 20 years, in order to avail hotel operation services for these hotels. The hotel operation agreements provide the hotel operator with day-to-day operational discretion, including personnel management, setting price and rate schedules, managing food and beverage service, procurement of inventories, supplies and services, negotiating and executing agreements with third parties such as vendors, licensees and concessionaires and carrying out marketing, sales, reservations and advertising operations for the hotel, among others. For our hotels we are generally obliged to pay one time fees for design and construction consulting services, as well as, periodic operating fees, management fees, royalty fees for licensing the use of certain trademarks, fees for centralised services, trainings, reservations and loyalty programs and other technical services rendered based on invoices raised and reimbursements for advertising, marketing, promotion, sales and software related expenses incurred by the hotel operator or their affiliates.

Pursuant to such agreements, we are required to maintain good and marketable title in the freehold property and hotel building, free and clear of any and all liens, encumbrances, or other charges. Other than in the manner specifically set out under the agreements, we agree not to enter into or grant a mortgage on the hotels. We are obliged not to enter into any agreement for the sale or transfer of some of the hotels (other than among certain specified affiliates) unless we obtain prior written consent of the respective hotel operator. Further, we may be required to notify hotel operators of our intent to develop a new hotel in a defined area and in good faith negotiate an operating agreement for such hotel as per present or future agreements, we execute.

We cannot assure you that we will be able to fully comply with all the terms of the agreements which we have entered into in relation to our hotels. In the event that any agreement for our hotels is terminated due to our non-compliance with its terms or for any other reason, we may be subject to certain damages and may be unable to replace the operator within a reasonable time or may be required to operate the hotel on our own. In case of termination, we may be unable to benefit from the existing marketing expenditure and similar operating expenditures made by us or the hotel operators. The hotel operation contracts for our hotel, including our serviced residence, at Powai, Mumbai will be due for renewal in March 2020, and for our hotel at Mindspace, Hyderabad will be due for renewal in December 2021. Subject to other terms, these contracts stipulate that they are to be renewed six and 11 months prior to their expiry for the properties at Powai, Mumbai and Mindspace, Hyderabad respectively. We have entered into a non-binding memorandum of understanding with Marriott, which is valid until March 31, 2019, for re-branding our hotel at Powai, Mumbai to ‘Westin’. We are currently in the process of negotiating terms with Marriott and intend to enter into definitive hotel operating agreement(s), subject

to acceptance of terms by both parties and receipt of relevant approvals, including approvals from the board of directors of each party. If we are unable to renew such agreements or enter into new agreements including pursuant to the memorandum of understanding entered into by us, in the future, on terms favourable to us, or at all, we will not be able to leverage our longstanding association with Marriott and we may have to incur additional expenditure to conduct improvements and repairs in accordance with brand standards of subsequent hotel operators. In the event an agreement is terminated prior to its tenure, or if it is not renewed, or if we are required to cease our relationship with certain hotel operators, for any reason whatsoever, our business, financial condition and results of operations may be adversely affected.

3. *We utilize the brands of third party licensors, and rely on third parties for the quality of services at our hotels. Any adverse impact on the reputation of our hotels or a failure of quality control systems at our hotels could adversely affect our business, results of operations and financial condition.*

We do not have our own hotel brand and utilize the brands of our brand licensors to market our hotels. We benefit from agreements entered into with Marriott for use of global brands such as JW Marriott, Westin, Marriott, Marriott Executive Apartments, Renaissance and Four Points by Sheraton. In the event these agreements are terminated prior to their tenure, or if not renewed, we may not have access to these brands and their loyalty programs. For example, our license agreement for our hotel at Vashi, Navi Mumbai will be due for renewal in December 2021. Further, we may seek to rebrand our hotel assets or reposition our properties by using alternate brands at our hotels. In the event we are unable to execute agreements with international brands of similar to higher positioning as our current brands, our business, financial condition and results of operations may be adversely affected including due to disruptions and expenses related to such re-flagging or re-branding.

Further, the performance and quality of services at our hotels are critical to the success of our business. As our hotels are in the luxury-upper upscale and upscale hotel segments, we are expected to provide high levels of service quality. Any incident where our hotels lack, or are perceived to lack, such standards may adversely affect our reputation. Our quality standards depend significantly on the effectiveness of quality control systems and standard operating procedures, which in turn, depend on the skills and experience of our hotel operators, our personnel, the quality of training programs, and our ability to ensure that such hotel operators and personnel adhere to stipulated policies and guidelines. Any decrease in the quality of services rendered at our hotels including due to reasons beyond our control, or on account of deficiency or inefficiency of the hotel operators, or any third party service provider, including but not limited to non-compliance with the terms and conditions set out in the agreements or arrangements with such hotel operators or third party service providers, or allegations of defects, even when false, at any of our hotel properties could tarnish the image of our hotels, result in negative reviews and feedback from our guests on online travel portals and may cause guests to choose the services of our competitors.

We are also dependent on third party service providers for providing some of the services to our guests such as spas, manpower contracts and laundry, among others, and any failure or deficiency on the part of such service providers may adversely affect our hotels' reputation and profitability. Any adverse development or decline in quality involving our hotels may impair our reputation, dilute the impact of branding and marketing initiatives and adversely affect our business, results of operations and financial condition.

4. *A significant portion of our revenues are derived from a few hotels and from hotels concentrated in a few geographical regions and any adverse developments affecting such hotels or regions could have an adverse effect on our business, results of operations and financial condition.*

We own a portfolio of five operating hotels (including a hotel with a co-located serviced residence), representing 2,328 keys as of September 30, 2018, in Mumbai Metropolitan Region, Hyderabad and Bengaluru. Consequently, our revenues are derived from a few hotels and from hotels concentrated in a few geographical regions. Our hotel, convention centre and serviced residence at Powai, Mumbai contributed to 26.08%, 28.14%, 32.41% and 39.82% of our revenue from operations for the six months ended September 30, 2018 and financial years 2018, 2017 and 2016, respectively and our hotel at Sahar, Mumbai, contributed to 25.66%, 27.72%, 29.02% and 26.08% of our revenue from operations for the six months ended September 30, 2018 and financial years 2018, 2017 and 2016, respectively. Further, our hotels located in the Mumbai Metropolitan Region contributed to 57.33%, 61.71%, 68.40% and 74.50% of our revenue from operations for the six months ended September 30, 2018 and financial years 2018, 2017 and 2016, respectively. Any decrease in revenues from these hotels, including due to increased

competition or supply, or reduction in demand, in the markets in which these hotels operate, may have an adverse effect on our business, results of operations and financial condition.

Further, any significant disruption, including due to social, political or economic factors or natural calamities, epidemics or civil disruptions, impacting these hotels or these regions may adversely affect our business. Changes in the policies of the state or local governments of the regions where these hotels are located, could require us to incur significant capital expenditure and change our business strategy. We cannot assure you that we will be able to address our reliance on these few hotels and hotels located in these regions, in the future.

5. *Our residential project at Koramangala, Bengaluru is the subject matter of litigation with Hindustan Aeronautics Limited. Any adverse order in relation to this litigation may adversely affect our ability to complete the project, and our business, results of operations and reputation.*

We own a property situated at Koramangala Industrial Layout, Bengaluru, where we are constructing a residential complex (the “**Property**” and the residential complex, the “**Koramangala Project**”). The Property is located within the proximity of an aerodrome operated by the Hindustan Aeronautics Limited (“**HAL**”). HAL is responsible for the issuance of no-objection certificates (“**NOC**”) related to the height of structures in the vicinity of the aerodrome. Accordingly, we were required to submit a report to HAL and also obtain their NOC in respect of the permissible height of the Koramangala Project. HAL granted their NOC dated October 28, 2011 for the development of a 17 floor residential building with height up to 62 meters on the basis of which we had started development of the Koramangala Project and have allotted apartments to several customers. Thereafter, the NOC granted was cancelled by HAL on August 16, 2013. At the time of such cancellation of the NOC, five wings with 17 floors had been constructed up to the height of 62 meters and more than 200 apartments had been allocated by us to our customers.

We filed a writ petition before the Karnataka High Court challenging HAL’s action cancelling the NOC, for directing HAL to permit us to construct up to the maximum height and further direct HAL to revalidate the NOC for a further period of five years from the date of the final order. Further, several customers of our Company have got themselves impleaded as respondents in the writ petition filed by us. The Karnataka High Court passed an interim order dated October 23, 2013 directing us not to modify/alter/renovate/develop the Property above 40 meters from ground level and further directed us not to sell or agree to sell or enter into an agreement with third parties in any manner whatsoever in respect of any portion of the Property above 40 meters. The Karnataka High Court passed a further order dated July 31, 2014 and an order dated November 5, 2015 directing the Airport Authority of India (“**AAI**”) to conduct an aeronautical study of the Bengaluru aerodrome as per the notified parameters of HAL airport and the requisite government notification. The AAI issued its report dated January 27, 2016 confirming that full height of the completed building-wings up-till then was permissible as it did not adversely affect aircraft operations. The writ petition is currently pending before the Karnataka High Court. For more details, see “**Outstanding Litigation and Other Material Developments**” on page 619.

Further, our Company has registered the Koramangala Project under the Real Estate (Regulation and Development) Act, 2016 (“**RERA**”) on a without prejudice basis and has also informed the Bruhat Bengaluru Mahanagara Palike (“**BBMP**”) as well as the customers of our Company about the writ petition. We have requested the BBMP for an extension of the validity period of the building sanction plan for the Koramangala Project. For our customers, we have also introduced a mitigation program. As part of the mitigation program, we offered the customers who had been allotted apartments an option either to sell the allotted apartment back to our Company or to continue with the Koramangala Project, and accept certain goodwill compensation. Some customers have exited the Koramangala Project whereas other customers have continued to hold their allocations and have accepted the goodwill compensation offered by us under the mitigation program. Further, as at September 30, 2018, in relation to the Koramangala Project, our Company has made provision for impairment of super structure of ₹ 350.89 million and expected cost of alteration of super structure of ₹ 250.00 million, provision for cost of mitigation program compensation and related expenses of ₹ 420.63 million in relation to potential cancellations (net of compensation already provided for), impact of revised estimated cost of completion of the project on the net realisable value of inventory resulting in write down of ₹ 93.74 million. In case all the buyers of flats above the 10th floor decide to exercise exit option, our Company may have to refund ₹ 944.07 million which is presently being accounted for as an advance from customers. For more details, see “**Financial Information**” on page 258.

In order to meet the costs, expenses and liabilities pertaining to the Koramangala Project, Ravi C. Raheja, Neel C. Raheja, K. 7. ***Any adverse development in the writ petition filed by our Promoter Directors, Ravi C. Raheja and Neel C. Raheja before the Karnataka High Court against the Registrar of Companies, Bengaluru in connection with the inclusion of their names in the list of disqualified directors under section 164(2)(a) of the Companies Act, 2013 may affect their ability to continue on the Board of our Company, and on the board of directors of our Subsidiary and Group Companies, and thus, may have an adverse effect on our business and reputation.***

The names of two of our Directors, Ravi C. Raheja and Neel C. Raheja, who are also our Company's Promoters, have been included in the list published on the official website of the Ministry of Corporate Affairs as persons disqualified by the Registrar of Companies, Bengaluru for appointment as directors under section 164(2) (a) of the Companies Act, 2013 for the period from November 1, 2014 to October 31, 2019 and November 1, 2015 to October 31, 2020. The said disqualification is in relation to non-filing of financial statements or annual returns for a continuous period of three financial years by K. Raheja Hotels and Estates Private Limited (which is a private company). K. Raheja Hotels and Estates Private Limited is part of Southern Undivided Companies. The Company Law Board, Chennai, ("**CLB**") appointed an administrator to manage the affairs of K. Raheja Hotels and Estates Private Limited on July 6, 2011 and its directors were not permitted to take any action without the approval of the administrator. The CLB also ordered the company to be marked as one having a 'management dispute' and directed the administrator to carry out all the statutory and other compliances. The said Directors, Ravi C. Raheja and Neel C. Raheja, through their letters dated February 17, 2014 (which is prior to their incurring any disqualification under the provisions of Companies Act 2013 and also prior to the relevant provisions of the Companies Act 2013 becoming applicable to private companies) addressed to the Registrar of Companies, Bengaluru (the "**RoC**") and the administrator resigned as Directors of K. Raheja Hotels and Estates Private Limited. These letters were acknowledged by the RoC and the administrator. The RoC issued a letter dated February 24, 2014 to K Raheja Hotels and Estates Private Limited stating that until the management dispute is settled or an interim order is received from a Court or Tribunal of competent jurisdiction, the documents filed by K Raheja Hotels and Estates Private Limited and the contesting group of its directors will not be approved/registered/recorded. For more details, see ***"Outstanding Litigation and Other Material Developments- Litigation involving Ravi C. Raheja"***.

Our Directors, Ravi C. Raheja and Neel C. Raheja have filed a writ petition before the Karnataka High Court against the Registrar of Companies, Bengaluru to stay the operation of the disqualifications and any other consequential action pursuant to the publication of the disqualification lists under section 164(2)(a) of the Companies Act, 2013. Through an interim order dated June 15, 2018, the Karnataka High Court has stayed the disqualification of Promoter Directors to act as directors. While the disqualification relates to a period when both Ravi C. Raheja and Neel C. Raheja had resigned and the administrator was in charge of fulfilling the statutory and other compliances of K. Raheja Hotels and Estates Private Limited, and that the Director Identification Number (DIN) of Ravi C. Raheja (DIN 00028044) and Neel C. Raheja (DIN 0029010) are currently active, we cannot assure that the Karnataka High Court will decide the writ petition in favour of our Directors, Ravi C. Raheja and Neel C. Raheja and any adverse development in the writ petition which may affect their ability to continue on the Board of our Company or on the board of directors of our Subsidiary or Group Companies may have an adverse effect on our business and reputation. For further details, see ***"Outstanding Litigation and Other Material Developments- Litigation involving Ravi C. Raheja"***.

8. ***We are subject to extensive government regulation with respect to safety, health, environmental, real***

estate, excise and labour laws. Any non-compliance with, or changes in, regulations applicable to us may adversely affect our business, results of operations and financial condition.

We are subject to a broad range of safety, health, environmental, real estate, excise and related laws and regulations in the jurisdictions in which we operate, which impose controls on our operations. In connection with our ownership of hotels and development of properties, we are subject to various national, state and local laws and regulations relating to environmental laws. Under some of these laws, an owner of real estate property may be held liable for the costs of investigating or remediating hazardous or toxic substances or wastes on, under or in such real property. Further, a person who arranges for the disposal or treatment of a hazardous or toxic substance, or who transports such substance to or from such property, may be liable for the costs of removal or remediation of such substance released into the environment at the disposal or treatment facility. The costs of investigating or remediating contamination at our properties or at properties where we sent substances or wastes for disposal, may be substantial.

Further, government regulations and policies of India, can also impact the demand for, expenses related to and availability of our hotel services and rooms. We are also subject to regulations, which are periodically amended, including relating to the sale and service of food, alcoholic and non-alcoholic beverages and hosting of events and weddings at our hotel properties. For example, there is a criminal proceeding initiated against our employee and our client who was hosting an event at our hotel property in Powai, Mumbai, for serving liquor without a valid permit. For details, see “***Outstanding Litigation and Other Material Developments***” on page 619. We have received certain notices in the last three fiscal years from Pollution Control Boards of Karnataka and Mumbai, Public Health Department of Municipal Corporation of Greater Mumbai and Food Safety and Standards Authority of India in relation to certain non-compliances by our Company with environmental, health and safety regulations. While we have responded to the notices and have taken remedial action at certain instances, we cannot assure you that we will not be involved in litigation or other proceedings in the future, in relation to safety, health, real estate, excise and environmental matters, which may result in additional liability for us.

The adoption of stricter health and safety laws and regulations, stricter interpretations of existing laws, increased governmental enforcement of laws or other developments in the future may require that we make additional capital expenditures, incur additional expenses or take other actions in order to remain compliant and maintain our current operations. Further, complying with, and changes in, laws and regulations or terms of approval may increase our compliance costs and adversely affect our business, prospects, results of operations and financial condition. We are also subject to the laws and regulations governing relationships with employees in such areas as minimum wages and maximum working hours, overtime, working conditions, hiring and termination of employees, contract labour and work permits and maintenance of regulatory or statutory records and making periodic payments. There is a risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities. Any losses that we incur in this regard could have an adverse effect on our reputation, business, results of operations and financial condition.

9. *Operational risks are inherent in our business as it includes rendering services at high quality standards at our hotels. A failure to manage such risks could have an adverse impact on our business, results of operations and financial condition.*

Certain operational risks are inherent in our businesses due to the nature of the industry in which we operate. We provide hospitality services, including food and beverage, cleaning and housekeeping, and security services, at our hotels. In rendering such services our personnel are required to adhere to regulatory requirements and standard operating procedures with regard to health, safety and hygiene and in their interaction with our guests and other members of the public. Food and beverage services require proper packaging and labelling and the careful and hygienic handling of food products, which if improperly packaged or handled may have an adverse impact on the health of our guests. Similarly, cleaning and housekeeping services involve the handling of chemicals such as cleaning solutions, which if handled improperly may have an adverse impact on the health of our employees, guests and on the environment. Consequently, our business is associated with certain safety, privacy and public health concerns.

Failure to effectively implement corporate, crisis response, training and management policies and protocols and to adequately address and manage risks inherent in our business, or a failure to meet the requirements of our guests, or a failure to develop effective risk mitigation measures, could have an

adverse effect on our hotels' reputation, guest loyalty and consequently, our business, results of operations and financial condition.

10. ***This Red Herring Prospectus contains information from third party industry sources, including the report commissioned from Horwath HTL India and publicly available reports published by CBRE Research, which have not been independently verified by us. Prospective investors are advised not to place undue reliance on such information.***

This Red Herring Prospectus includes information derived from third party industry sources and from the Horwath Report, prepared by Horwath HTL India, pursuant to an engagement with our Company. We have also referred to publicly available reports, "CBRE India Retail Market View H2 2017", "CBRE India Market Outlook Report April 2018" and "CBRE India Office Market View Q1 2018" released in years 2017 and 2018, prepared by the CBRE Research. We commissioned the Horwath Report for the purpose of confirming our understanding on the Indian hospitality business, together with the future outlook of the hospitality industry in India. Neither we, nor the Promoters, nor Directors, nor any of the BRLMs, nor any other person connected with the Offer has independently verified the information in these reports and other industry sources quoted in this Red Herring Prospectus, and while we believe them to be true, we cannot guarantee the accuracy, adequacy or completeness of any such information. Moreover, these industry sources contain certain industry and market data, based on certain assumptions. Accordingly, investors should read the industry-related disclosure in this Red Herring Prospectus in this context.

Further, the reports use certain methodologies for market sizing and forecasting. There are no standard data gathering methodologies in the hospitality or commercial and retail sector, and methodologies and assumptions vary widely among different industry sources. Such assumptions may change based on various factors. We cannot assure you that such assumptions are correct or will not change and, accordingly, our position in the market may differ from that presented in this Red Herring Prospectus. Further, these reports or any other industry data or sources are not recommendations to invest in our Company. Prospective investors are advised not to place undue reliance on the industry reports or extracts thereof as included in this Red Herring Prospectus, when making their investment decisions. 11. ***Our business is subject to seasonal and cyclical variations that could result in fluctuations in our results of operations.***

The hotel and hospitality industry in India is subject to seasonal variations. The periods during which our hotel properties experience higher revenues vary from property to property, depending principally upon location and the guests served. Our revenues are generally higher during the second half of each financial year as compared to first half of the financial year. Seasonality affects leisure travel and the MICE sector (meetings, incentives, conferences and events) including weddings. According to the Horwath Report, the winter months are preferred for travel in India, for leisure, MICE events, management or business travel and more recently for destination weddings. Further, inbound foreign leisure travel varies more with climatic factors, such that it mainly occurs between October and March and to a lesser extent (with lower visitor profile and travel budgets) during the summer and monsoon seasons, as per the Horwath Report. This seasonality can be expected to cause quarterly fluctuations in our revenue, profit margins and net earnings. Further, the timing of opening of newly constructed hotels and the timing of any hotel acquisitions or dispositions may cause a variation of revenue and earnings from quarter to quarter. Further, the hospitality industry is subject to weekly variations. While leisure travel increases during weekends, business travel is high during the weekdays.

Further, the hospitality industry is cyclical, and demand generally follows, on a lagged basis, key macroeconomic indicators. There is a history of increases and decreases in demand for hotel rooms, in occupancy levels and in room rates realized by owners of hotels through macro-economic cycles according to the Horwath Report. The combination of changes in economic conditions and in the supply of hotel rooms, including periods of excess supply, can result in significant volatility in results for owners and managers of hotel properties. The costs of running a hotel tend to be more fixed than variable. As a result, in an environment of declining revenues the rate of decline in profits can be higher than the rate of decline in revenues.

As a result of such seasonal fluctuations, our room rates, sales and results of operations of a given half of the financial year may not be reliable indicators of the sales or results of operations of the other half of the financial year or of our future performance.

12. *We are exposed to risks associated with the development of our hotel properties and commercial and retail projects. Delays in the constructions of new buildings or improvements on our properties may have an adverse effect on our business, results of operations and financial condition.*

Our development pipeline consists of 588 rooms across three hotels as well as approximately 1.12 million square feet of leasable commercial space across two projects as of September 30, 2018. Certain of our projects are being developed on land parcels contiguous to or adjoining existing hotels or projects. The development of such projects may impact regular business operations at the hotels or projects located in their proximity.

We classify projects for which land is owned by us or for which relevant agreements or memorandum of understanding having been executed for such use; relevant construction approvals have been applied for; and our preliminary design plans are complete, as projects under development. Development and construction of projects subject us to inherent development risks, including:

- the identification of, conducting diligence on and ascertaining title rights associated with suitable strategically located properties and the acquisition of such properties on favourable terms;
- competition from other real estate owner and developers, which may increase the purchase price of a desired property;
- insufficient cash from operations, or an inability to obtain the necessary debt or equity financing on satisfactory terms, to consummate an acquisition or a development project;
- availability, terms and conditions associated with and timely receipt of zoning and other regulatory approvals, the denial of which could delay or prevent placing a hotel or commercial and retail projects into operation;
- the cost and timely completion of construction (including unanticipated risks beyond our control, such as weather conditions or labour suspension, shortages of materials or labour and construction cost overruns); our dependency on the third parties whom we contract to construct our hotels or commercial and retail projects, including their ability to meet construction timing, quality and budget expectations;
- design or construction defects that could result in additional costs associated with repair, delay or the closing of part or all of a property during such repair period;
- the resulting lack of capitalization on any investment related to identifying and valuing development opportunities, should we subsequently decide to abandon such opportunities; and
- the ability to achieve an acceptable level of occupancy or tenancy upon completion of construction.

In the event we experience delays in the delivery of the construction works and design and engineering services for our new buildings or improvements for our existing buildings or if our contractors fail to comply with their obligations under their respective agreements, we will not be able to start operations until completion of the construction of new buildings or improvements on our existing properties. Further, the consents and approvals which we may require to develop and construct our hotels or commercial and retail projects may impose conditions with respect to the height, number of rooms or leasable area, security features and other operational aspects of our hotels and commercial and retail projects. Further, we have entered into memorandums of understanding with Marriott for the branding of, and hotel operations at, certain of our hotels under development. However we cannot assure you that we will be able to enter into definitive hotel operating agreement(s), in a timely manner, or at all, as the terms of the memorandums of understanding are subject to acceptance by both parties and receipt of relevant approvals, including approvals from the board of directors of each party. See “**Our Business – Description of Our Business – Our Projects Under Development**” on page 167.

These risks could result in substantial unanticipated delays or expenses as well alteration to the design and operational parameters of our properties. Under certain circumstances, these risks could prevent completion of development or redevelopment projects once undertaken, resulting in capital expenditure incurred and investments made being written off or making the project less profitable than originally estimated, or not profitable at all, and therefore have an adverse effect on our business, results of operations and financial condition.

13. ***Our hotel located at Vashi, Navi Mumbai is subject matter of a litigation with City & Industrial Development Corporation of Maharashtra Limited (“CIDCO”). Any adverse order by the Supreme Court of India in this matter may result in a direction to demolish our hotel, which may adversely affect our business and results of operations.***

Our hotel located at Vashi, Navi Mumbai is situated on leasehold land allotted to our Promoter, K Raheja Corp Private Limited (“**KRCPL**”) by CIDCO. Agreements entered into by us in this regard provide that the possession of the land would be handed over to us on receipt of occupancy certificate for the premises. The premises after receipt of the occupation certificate, were handed over to us, and we have been operating our hotel since then. In terms of the agreements, we are entitled to use, occupy and operate our hotel at the premises.

The allotment of the land to KRCPL by CIDCO was challenged in two public interest litigations filed before the High Court of Bombay (“**High Court**”). The High Court held the allotment to be illegal, arbitrary and in violation of Article 14 of the Constitution of India and directed KRCPL to hand over vacant possession of the land to CIDCO within a period of six months from November 2014. KRCPL filed a special leave petition dated January 8, 2015 (“**SLP**”) before the Supreme Court of India (“**Supreme Court**”) against the order of the High Court. The Supreme Court has directed the parties to maintain status-quo and a SLP is currently pending before the Supreme Court. For more details, see “**Outstanding Litigation and Other Material Developments**” on page 619. The carrying value of our hotel asset as at September 30, 2018 is ₹ 443.78 million and the balance of prepaid lease rental in relation to the leasehold land as of September 30, 2018 is ₹ 53.92 million. For more details, see “**Financial Information**” on page 258. Any adverse order by the Supreme Court directing demolition of our hotel and handing over possession of the premises to CIDCO may adversely affect our reputation, business and results of operations.

14. ***A substantial portion of the Net Proceeds will be utilized for repayment/pre-payment of loans availed by our Company.***

Our Company intends to deploy ₹ 7,200 million towards repayment/pre-payment of various borrowings availed by our Company, as indicated in the section titled “**Objects of the Offer**” on page 118. The scheduled repayment/pre-payment of the loans is subject to various factors including: (i) cost of the borrowing to our Company including applicable interest rates, (ii) any conditions attached to the borrowings restricting our ability to prepay or repay the borrowings and time taken to fulfil, or obtain waivers for fulfilment of such conditions, (iii) receipt of consents for prepayment from the respective lenders, as applicable (iv) terms and conditions of such consents and waivers, (v) levy of any prepayment penalties and the quantum thereof, (vi) receipt of requisite approvals in accordance with applicable laws, (vii) provisions of any laws, rules and regulations governing such borrowings, and (viii) other commercial considerations including, among others, the amount of the loan outstanding and the remaining tenor of the loan. Accordingly, the Net Proceeds will not be available for any capital expenditure or creation of tangible assets by our Company.

15. ***Low occupancy levels of our leased retail and commercial office space or lower footfalls at our retail malls may adversely affect our results of operations and financial condition.***

We derive lease and rental income from the lease of our commercial and retail projects in Bengaluru and Mumbai. Our commercial and retail projects accounted for 3.62%, 2.76%, 1.99% and 0.13% of our revenue from operations for the six months ended September 30, 2018 and financial years 2018, 2017 and 2016, respectively. The amount that we receive in rental income is based upon the amount of space we have leased, the minimum guaranteed amount we charge for that leased space and our share of revenues from the clients to whom we have leased such space. The occupancy, revenue share and minimum guaranteed amount depend on various factors including the location and design of the project,

the retail client mix, prevailing economic conditions and competition. During the six months ended September 30, 2018, financial years 2018 and 2017, our aggregate average occupancy levels at our commercial and retail projects were 93.70%, 92.34% and 90.16%, respectively. Future inability on our part to maintain and attract clients to lease our completed retail and commercial office projects may have an adverse effect on our revenues, financial condition and results of operations.

Further, risk of lower footfalls in our retail malls may adversely affect our revenues, business and results of operations. Various factors may affect customer profile and footfalls in both our existing retail malls and any new retail malls we acquire or develop, including location and floor layout for new retail developments and regional economy, amongst others, specific to the states in which we operate in. In addition, we believe that to successfully operate our retail developments and commercial office projects we need to have the ability to forecast demand, as well as enter into operating and branding relationships with popular retail clients. A decline in consumer and retail spending or a decrease in the popularity of the retail clients' business could cause retail clients to cease operations or experience significant financial difficulties that could harm our ability to continue to attract successful retail clients and visitors to our retail developments, which would adversely affect our business, results of operations and financial condition.

16. *We have a large number of personnel or third party service providers deployed across our hotels, consequently we may be exposed to service related claims and losses or employee disruptions that could have an adverse effect on our reputation, business, results of operations and financial condition.*

We deploy a large workforce across our hotels. As of September 30, 2018, we had 2,457 permanent employees across our operations. In addition to our permanent employees, we utilize 531 personnel engaged on a contractual basis. The risks associated with the utilization of a large number of personnel include possible claims relating to:

- actions, inactions, errors or malicious acts by our personnel or third party service providers, including matters for which we may have to indemnify the guests at our hotels;
- failure of our personnel or third party service providers to adequately perform their duties including rendering deficient services, shortage in shift, absenteeism or lateness;
- violation by personnel of security, privacy, health and safety regulations and procedures;
- any failure to adequately verify personnel backgrounds and qualifications resulting in deficient services;
- injury or damages to any guest's person or property due to negligence of our personnel or third party service providers;
- criminal acts including sexual harassment, torts or other negligent acts by our personnel or third party service providers; and
- use of third party vehicles resulting in accidents.

These claims may give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and adversely impact the reputation of our hotels. We may also be affected in our operations by the acts of third parties, including sub-contractors and service providers. Any losses that we incur in this regard may have an adverse effect on our reputation, business, results of operations and financial condition.

17. *We are exposed to a variety of risks associated with safety, security and crisis management.*

We are committed to ensure the safety and security of our guests, employees and assets against natural and man-made threats. These include, but are not limited to, exceptional events such as extreme weather, civil or political unrest, violence and terrorism, serious and organized crime, fraud, employee dishonesty, cybercrime, pandemics, fire and day-to-day accidents, incidents, health crises of guests and petty crime which impact the guest or employee experience, could cause loss of life, sickness or injury and result in compensation claims, fines from regulatory bodies, litigation and impact our reputation. Further, the terror attacks in Mumbai in November 2008 combined with the global financial crisis led to a decline in

foreign tourist arrivals in India in the financial year 2009, while foreign tourist arrival growth was slower in the year 2013 due to security concerns around women's safety, combined with a slowing economy, according to the Horwath Report. Serious incidents or a combination of events could escalate into a crisis which, if managed poorly, could further expose us and our hotels to significant reputational damage.

Any accidents or any criminal activity at our hotel properties may result in personal injury or loss of life, substantial damage to or destruction of property and equipment resulting in the suspension of operations. Any of the foregoing could subject us to litigation, which may increase our expenses in the event we are found liable, and could adversely affect our reputation and cause a loss of consumer confidence in our business. For example, in the year 2015 a police complaint was lodged against a certain employee at our hotel property at Powai, Mumbai, on the grounds of causing death by negligence as a result of death by drowning of one of our guests in the hotel swimming pool. For details, see ***“Outstanding Litigation and Other Material Developments”*** on page 619. Such events occurring at any one of our hotel properties may also have an adverse effect on our reputation and may also adversely affect operations of our other properties.

18. *Our operations are dependent on our ability to attract and retain qualified personnel, including our key senior management and any inability on our part to do so, could adversely affect our business, results of operations and financial condition.*

Our operations are dependent on our ability to attract and retain qualified personnel since we aim to provide our guests with high levels of service. While we believe that we currently have adequate qualified personnel for our operations, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel. Competition for qualified personnel with relevant industry expertise in India is intense and the loss of the services of our key personnel may adversely affect our business, results of operations and financial condition. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires.

Further, our performance depends largely on the efforts and abilities of our Promoters, including Mr. Ravi C. Raheja and Mr. Neel C. Raheja and senior management, including, Managing Director and CEO, Mr. Sanjay Sethi and our Executive Director and CFO, Mr. Rajeev Newar as well as other Key Managerial Personnel. We believe that the inputs and experience of our senior management and key managerial personnel are valuable for the development of business and operations and the strategic directions taken by our Company. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. Any inability on our part to attract and retain qualified personnel and senior management could adversely affect our business, results of operations and financial condition.

19. *We have incurred indebtedness which requires significant cash flows to service, and limits our ability to operate freely. We will continue to have indebtedness and debt service obligations following the Offer.*

As on December 31, 2018, we had outstanding secured borrowings (excluding interest) of ₹ 25,655.29 million and unsecured borrowings (excluding interest) of ₹ 208.66 million on a consolidated basis. We may also incur additional indebtedness in the future. Our current or future level of leverage could have significant consequences for our shareholders and our future financial results and business prospects, including:

- increasing our vulnerability to a downturn in business in India and other factors which may adversely affect our operations;
- requiring us to dedicate a substantial portion of our cash flow from operations to service debt, thereby reducing the availability of cash-flows to fund capital expenditures and growth initiatives, meet working capital requirements and use for other general corporate purposes or make dividend payouts;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry

in which we operate;

- placing us at a competitive disadvantage to any of our competitors that have less debt;
- increasing our interest expenditure;
- requiring us to meet additional financial covenants; and
- limiting our ability to raise additional funds or refinance existing indebtedness.

We cannot assure you that our business will generate cash in an amount sufficient to enable us to service our debt or proposed borrowings or fund other liquidity needs. In addition, we may need to refinance all or a portion of our debt on or before maturity. We cannot assure you that we will be able to refinance any of our debt on commercially reasonable terms, or at all.

For more information regarding our indebtedness, see the Section titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations – Indebtedness*” and “*Financial Indebtedness*” on pages 585 and 616, respectively, of the Red Herring Prospectus.

20. *Our inability to meet our obligations, including financial and other covenants under our debt financing arrangements could adversely affect our business and results of operations.*

Our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of actions, any of which could adversely affect our business and financial condition. Our Company and/or our Subsidiaries, as applicable, are required to obtain prior written consent from lenders for, among other things:

- change in shareholding control or management control without prior consent of the lender, as applicable;
- undertake or permit any amalgamation, demerger, merger, consolidation, scheme of arrangement or compromise with the shareholders or creditors;
- changing or altering capital structure;
- declaration or payment of dividend in case of event of default in payment of dues;
- raising of new loans against the security provided to existing lender;
- making any amendments to the memorandum and articles of our Company or our Subsidiary, as applicable; and
- reduction of shareholding of promoter group below 51% of our Company.

In addition, certain terms of our borrowings require us to maintain financial ratios, which are tested periodically, including on a quarterly or annual basis. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. Any future failure to satisfactorily comply with any condition or covenant under our financing agreements (including technical defaults) may lead to a termination of one or more of our credit facilities, acceleration of amounts due under such facilities, and enforcement of events of default as well as cross-defaults under certain of our other financing agreements, any of which may adversely affect our business, financial condition and results of operations.

We have in the past breached certain financial and sanction covenants with respect to five facilities that were availed by us. However, we have received letters from the lenders that have waived off the breach in relation to the financial covenant and letters which confirm that the Company has taken corrective actions in the form that were acceptable and no actions have triggered an event of default. For more details, see the Section titled “*History and Certain Corporate Matters – Defaults or rescheduling of borrowings with financial institutions/banks, conversion of loans into equity by the Company*” on page 181.

Further, we have granted security interests over certain of our assets, including our hotels and charge over operating cash flows and book debts, in order to secure our borrowings, and any failure to satisfy our obligations under such borrowings could lead to the forced sale and seizure of such assets, which may adversely affect our business, financial condition and results of operations. For further details of our indebtedness, see “*Financial Indebtedness*” on page 616.

21. *The hotel industry is intensely competitive and our inability to compete effectively may adversely affect our business, results of operations and financial condition.*

The hotel industry in India is intensely competitive and we compete with large multinational and Indian companies, in each of the regions that we operate. Some of our competitors may develop alliances to compete against us or have more financial and other resources. We cannot assure you that new or existing competitors will not significantly lower rates or offer greater convenience, services or amenities or significantly expand or improve facilities in a market in which we operate. We may also face increased competition from internet-based homestay and hostel aggregators and alternative accommodation options such as luxury homestays and bed and breakfasts.

Our success is largely dependent upon our ability to compete in areas such as room rates, location of the property, the quality and scope of other amenities, including food and beverage facilities, quality of accommodation and service level as well as the brand recognition of our hospitality partners. In addition, our competitors may significantly increase their advertising expenses to promote their hotels, which may require us to similarly increase our advertising and marketing expenses and change our pricing strategies, which may have an adverse effect on our business, results of operations and financial condition. As a result, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition.

22. *We have in the past entered into related party transactions which may potentially involve conflicts of interest.*

We have entered into various transactions with related parties, including for the purposes of acquisition of land by sub-lease; provision of goods and services; non-exclusive and limited license use of trademarks; use and occupation of licensed premises; support services; and provision of repairs and maintenance services. See “*Summary Financial Information – Restated Standalone Statement of Related Party Transactions and Balances*” beginning on page 258.

We cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Such related party transactions may potentially involve conflicts of interest which may be detrimental to the interest of our Company. For details on our related party transactions, see “*Related Party Transactions*” on page 255. We cannot assure you that such related party transactions, individually or in the aggregate, will always be in the best interests of our shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition.

23. *Land title in India can be uncertain and we may not be able to identify or correct defects or irregularities in title to the land which we own or intend to acquire in connection with the development or acquisition of new hotels or properties.*

There is no central title registry for real property in India and the documentation of land records in India has not been fully computerized. Property records in India are generally maintained at the state and district level and in local languages, and are updated manually through physical records. Therefore, property records may not be available online for inspection or updated in a timely manner, may be illegible, untraceable, incomplete or inaccurate in certain respects, or may have been kept in poor condition, which may impede title investigations or our ability to rely on such property records. In addition, there may be a discrepancy between the duration of the principal lease under different orders issued by state governments in respect of a particular parcel of revenue land. Furthermore, title to land in India is often fragmented, and in many cases, land may have multiple owners.

The difficulty of obtaining title guarantees in India means that title records provide only for presumptive rather than guaranteed title. The original title to lands may often be fragmented and the land may have multiple owners. In addition, title insurance is not commercially available in India to guarantee title or development rights in respect of land. The absence of title insurance, coupled with the difficulties in verifying title to land, may increase our exposure to third party claims to the property. Title may also suffer from irregularities, such as non-execution or non-registration of conveyance deeds and inadequate stamping, and may be subjected to encumbrances that we are unaware of. Any defects in, or irregularities of, title that we enjoy may prejudice our ability to continue to operate our hotels and commercial and real estate projects on such land and require us to write off substantial expenditures in respect of establishing such properties.

Further, improperly executed, unregistered or insufficiently stamped conveyance instruments in a property's chain of title, unregistered encumbrances in favour of third parties, rights of adverse possessors, ownership claims of family members of prior owners or third parties, or other defects that a purchaser may not be aware of can affect title to a property. Consequently, any acquisition of the land made by us is subject to risks and potential liabilities arising from inaccuracy of such information. Such inaccurate information and any defects or irregularities of title may result in the loss of title or development rights over the land, and the cancellation of our development plan in respect of such land. As a result, potential disputes or claims over title to the land on which our hotels are or will be situated may arise. The title to the land on which our hotel Four Points by Sheraton Navi Mumbai, Vashi is situated is subject to an ongoing litigation. For details, see “*Outstanding Litigation and Other Material Developments*” on page 619. Also, such disputes, whether resolved in our favour or not, may divert management's attention, harm our reputation or otherwise disrupt our business.

- 24. *In the event that we are unable to acquire ownership or leasehold interest in lands or premises for which we have entered into agreements to sell, letters of intent, or similar arrangements, or the agreements to sell, letters of intent or similar agreements are held to be invalid or expire, then we may not be able to acquire such ownership or leasehold interest and may also lose advances paid.***

As part of our land acquisition process, we enter into agreements to sell or similar arrangements with third parties prior to the transfer or conveyance of title to parcels of land to ensure that the sellers of the land satisfy certain conditions within the stipulated time frame specified under these agreements. Upon entering into such agreements to sell, we are required to pay these landowners certain advances towards the purchase of the lands. These agreements also provide that the lands must be conveyed in our favour within a prescribed period of time. In the event that we are not able to acquire the lands covered by these agreements to sell, we may not be able to recover all, or part of the advance monies related to these lands. Further, in the event that these agreements to sell are either invalid or have expired, we may lose the right to acquire these lands and also may not be able to recover the advances made in relation to the land. In addition, as part of our hotel development process, we enter into letters of intent or similar arrangements with third parties prior to the execution of lease deeds in order to ensure that the owners of the land and the hotel premises satisfy certain conditions prior to handing over possession to us.

Any indecisiveness or delay on our part to perform our obligations under these agreements or letters of intent may jeopardize our ability to acquire ownership or leasehold interest in these lands or premises before such agreements or letters of intent expire. Additionally, any failure to renew any of these agreements or letters of intent on similar terms or recover the advanced monies from the relevant counterparties following the expiration of the initial term of such agreement could adversely affect our business, financial condition and results of operations. We cannot assure you that such lands will be conveyed to us or that we will acquire leasehold interest in such premises, as applicable, and that we will be successful in acquiring them or that we will be successful in registering them in our name or the name of our Subsidiary.

- 25. *We are subject to risks relating to owning real estate assets.***

We are subject to risks that generally relate to real estate assets due to the hotel properties and commercial and real estate projects we own. Regulations and interest rates can make it more expensive and time-consuming to develop real property or expand, modify or renovate hotels or commercial and real estate projects. Changes in local markets or neighbourhoods may diminish the value of the real estate assets we hold. Real estate assets may not be as liquid as certain other types of assets, and this lack of liquidity may limit our ability to react promptly to changes in economic, market or other conditions. Our ability to

dispose of real estate assets, if required, on advantageous terms depends on factors beyond our control, including competition from other sellers, demand from potential buyers and the availability of attractive financing for potential buyers. We cannot predict the various market conditions affecting real estate assets that may exist at any particular time in the future. Due to the uncertainty of market conditions that may affect the future disposition of our real estate assets, we cannot assure you that we will be able to sell our real estate assets at a profit in the future, if required.

- 26. *As on the date of this Red Herring Prospectus there are family disputes between some of our Promoters and the G. L. Raheja family as a result of which there could arise, from time to time, claims and counterclaims, between some of our Promoters and the G. L. Raheja family. Further, there are several litigation, pending at different forums in relation to the family separation arrangement and any adverse decision in relation to any of the matters may have an adverse effect on our reputation.***

Our Promoters, Ravi C. Raheja and Neel C. Raheja, are involved in certain family disputes with G.L. Raheja family in relation to the division of properties and management of certain entities forming part of K Raheja Corp group. C.L. Raheja (father of Ravi C. Raheja and Neel C. Raheja) and the late G.L. Raheja had entered into various agreements to split or partition all entities and assets of the K. Raheja Corp Group between them. However, the separation and distribution of certain properties and entities, remained unresolved due to the differences between the groups. The G.L. Raheja family filed various suits in respect of the family arrangement against Ravi C. Raheja, Neel C. Raheja and others. Ravi C. Raheja and Neel C. Raheja have also filed suits against the G.L. Raheja family. For more details, see “**Outstanding Litigation and Other Material Developments**” on page 619. Any adverse decision by the courts in relation to any of these family litigations may have an adverse effect on our reputation.

- 27. *Our financing agreements entail interest at variable rates and any increases in interest rates may adversely affect our results of operations.***

The interest rate for borrowings excluding preference capital of ₹ 160.00 million availed by us, aggregating to ₹ 26,557.15 million as of September 30, 2018, is expressed as the base rate or marginal cost of funds based lending rate of a specified lender or London Interbank Offering Rate and interest spread, which is variable to each Lender. Further, our financing agreements include provisions providing for interest rates to be periodically reset, or changed based on the lender’s internal policies. We are susceptible to fluctuations in interest rates and associated risks. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition. See “**Financial Indebtedness**” on page 616 for a description of the range of interest typically payable under our financing agreements.

- 28. *Our operations entail certain fixed costs and recurring costs, and our inability to reduce such costs during periods of low demand for our services may have an adverse effect on our business, results of operations and financial condition.***

Our operations entail certain fixed costs such as costs incurred towards the maintenance of our hotel properties, employee related costs, property taxes as well as certain significant recurring costs such as utility expenses and insurance payments. Further, the agreements we have entered into with Marriott, generally include agreed periodic payments at fixed rates. We may also have to incur costs towards periodic re-designing, re-structuring, refurbishing or repair of defects at our hotels. The costs of running a hotel tend to be more fixed than variable. The hotel industry experiences changes in demand and supply, which we may not be able to predict accurately. Consequently, we may be unable to reduce fixed and recurring costs in a timely manner, or at all, in response to a reduction in the demand for our services. Further, our hotel properties and commercial and real estate projects may be subject to an increase in operating and other expenses in the event of increases in property and other tax rates, increase in utility costs due to increase in electricity or water supply charges, insurance costs, repairs and maintenance and administrative expenses, which may adversely affect our business, results of operations and financial condition.

- 29. *We may be unable to successfully grow our business in new markets in India, which may adversely affect our business prospects, results of operations and financial condition.***

We seek to diversify our geographical footprint, to reduce our exposure to local, seasonal and cyclical fluctuations and to access a more diversified guest base across geographies. We intend to strengthen and

expand our portfolio to newer geographies across India which typically attract significant traffic from business and leisure travellers. However, we cannot assure you that we will be able to grow our business in these markets. Inability to access infrastructure, certain logistical challenges in these regions and our relative inexperience with certain newer markets, may prevent us from expanding our presence in these regions.

Further, we may be unable to compete effectively with the services of our competitors who are already established in these regions. Our expansion plans may also result in increased advertising and marketing expenditure and challenges caused by distance, language and cultural differences. Also, demand for our services may not grow as anticipated in certain newer markets. If we are unable to grow our business in such markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

- 30. *Our business derives a portion of its revenue from corporate customers, and the loss of such customers, the deterioration of their financial condition or prospects, or a reduction in their demand for our services could adversely affect our business, results of operations and financial condition.***

Our hotel operations are dependent on our corporate customers, including large corporate key accounts such as information technology companies, airlines, multi-national corporations, consultancy firms and banks, for a portion of revenues. Any reduction in growth or a slow-down in the business of our customers in India, could result in a reduction of their requirement for our services, and result in a significant decrease in the revenues we derive from these customers. The loss of one or more of our significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, and thus our results of operations, financial condition and cash flows. Further, corporate customers may be able to negotiate better or more favourable terms or discounts compared to bookings made through direct channels or online travel agents. We cannot assure you that we will be able to maintain historic levels of business from such significant customers in the future.

- 31. *Demand for rooms in our hotels or our conferencing and meeting facilities may be adversely affected by the increased use of business-related technology or change in preference of our corporate customers.***

The increased use of teleconference and video-conference technology by businesses could result in decreased business travel as companies increase the use of technologies that allow multiple parties from different locations to participate at meetings without traveling to a centralized meeting location, such as our hotels. To the extent that such technologies play an increased role in day-to-day business and the necessity for business-related travel decreases, demand for our hotel rooms or our conferencing and meeting facilities may decrease from business travellers and corporate customers. Similarly, changes in business spending and preferences of our corporate customers due to evolving cost of travel, spending habits and budgeting patterns may lead to a change in the perceived attractiveness of our hotels, services and the locations at which our hotels are situated.

- 32. *A portion of our hotel bookings originate from online travel agents and intermediaries. In the event such companies continue to gain market share compared to direct booking channels or our competitors are able to negotiate more favourable terms with such online travel agents and intermediaries, our business and results of operations may be adversely affected.***

A portion of bookings for our hotels originate from large multinational, regional and local online travel agents and intermediaries, such as online aggregators, with whom we have contractual arrangements and to whom we pay commissions. These third-parties, including online travel agents, offer a wide breadth of services, often across multiple brands, have growing booking and review capabilities, and may create the perception that they offer the lowest prices when compared to our direct booking channels. Some of these online travel agents and intermediaries have strong marketing budgets and aim to create brand awareness and brand loyalty among consumers and may seek to commoditize hotel brands through price and attribute comparison. In the event these companies continue to gain market share, they may impact our profitability, undermine direct booking channels and online web presence and may be able to increase commission rates and negotiate other favourable contract terms. Negative reviews and feedback on online travel portals may cause guests to choose the services of our competitors. Further, our competitors may be able to negotiate better or more favourable terms with such online travel agents and

intermediaries, impacting our hotel bookings from these channels, which in turn may adversely affect our business and results of operations.

33. *Our Statutory Auditors have included certain matters of emphasis in their report on our Restated Summary Financial Information.*

Our Statutory Auditors examination reports in respect of Restated Standalone Summary Financial Information and Restated Consolidated Summary Financial Information includes certain emphasis of matter in respect of:

- as of, and for the six months ended, September 30, 2018, the non-presentation of corresponding figures for the previous period;
- as of, and for the financial year ended, March 31, 2018, the accounting of the scheme of arrangement effecting the demerger of Genext with our Company, in the manner prescribed by the NCLT order which is different from that prescribed under Ind AS 103;
- as of, and for the six months ended, September 30, 2018, and the financial years ended, March 31, 2018, 2017 and 2016, no adjustments having been made to the carrying value of leasehold rights in relation to land on which our hotel located at Vashi, Navi Mumbai is situated, during the pendency of litigation. See “- *Our hotel located at Vashi, Navi Mumbai is subject matter of a litigation with City & Industrial Development Corporation of Maharashtra Limited (“CIDCO”). Any adverse order by the Supreme Court of India in this matter may result in a direction to demolish our hotel, which may adversely affect our business and results of operations*” on page 27;
- as of, and for the financial years ended, March 31, 2017 and 2016, no provisions having been included in relation to suspension of construction activity and sale of flats at our residential project in Bengaluru. See “- *Our residential project at Koramangala, Bengaluru is the subject matter of litigation with Hindustan Aeronautics Limited. Any adverse order in relation to this litigation may adversely affect our ability to complete the project, and our business, results of operations and reputation*” on page 21; and
- as of, and for the financial year ended, March 31, 2014, no recognition of profits during the year on flats sold and de-recognition of profits in previous years in relation to sale of flats at our residential project in Bengaluru over the height of 40 meters, together with certain other compensation paid, and provision of estimated loss on account of cancellation in the subsequent year. See “- *Our residential project at Koramangala, Bengaluru is the subject matter of litigation with Hindustan Aeronautics Limited. Any adverse order in relation to this litigation may adversely affect our ability to complete the project, and our business, results of operations and reputation*” on page 21,

which do not require any corrective adjustments in the financial information.

Such emphasis of matter is detailed in the Statutory Auditors’ examination report in relation to the Restated Standalone Summary Financial Information and Restated Consolidated Summary Financial Information. For further details, see “**Summary Financial Information**” on page 258 of this Red Herring Prospectus.

We cannot assure you that our Statutory Auditors reports for any future fiscal periods will not contain qualifications, remarks, comments or emphasis of matter or that such qualifications, remarks, comments or emphasis of matter will not require any adjustment in our financial statements for such future periods or otherwise affect our results of operations in such future periods.

34. *Any failure of our information technology systems could adversely affect our business and our operations.*

We utilize information technology systems that support our business processes, including centralised software and systems such as reservations systems and property management systems of our hotel operators and their affiliates. These systems may be susceptible to outages due to fire, floods, power loss, telecommunications failures, natural disasters, break-ins and similar events. Effective response to such

disruptions will require effort and diligence on the part of our third-party vendors and employees to avoid any adverse effect to our information technology systems.

In addition, our systems and proprietary data stored electronically, including our guests' sensitive personal and financial information, may be vulnerable to computer viruses, cybercrime, computer hacking and similar disruptions from unauthorized tampering. Such technology systems may also be vulnerable to ransomware attacks, which may block or restrict access to these systems and impair their functionality, unless certain ransom money is paid. If such unauthorized use of our systems were to occur, data related to our guests and other proprietary information could be compromised. For example, our hospitality partner recently reported security breaches in its guest reservation database. The occurrence of any such events could adversely affect our business, interrupt our operations, subject us to increased operating costs and expose us to litigation. We are also dependent on third party vendors for providing some of the services to our guests such as internet and television, among others, and any failure or deficiency on the part of such vendors may adversely affect our reputation, brand perception and results of operations.

35. ***In the event we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business, including in respect of which we have made relevant applications that are currently pending, including due to any default on the part of the owners of the properties we lease and manage, our business and results of operations may be adversely affected.***

Our operations are subject to extensive government regulations and we or our hotel operators are required to obtain and maintain a number of statutory and regulatory permits and approvals under central, state and local government rules in India, generally for carrying out our business and for each of our hotel properties including, without limitation, sanction of building plans, occupation certificates, trade licenses, FSSAI registrations, shops and establishments registrations, star classifications and reclassifications for hotels, licenses to sell liquor and environmental approvals and clearances. For details of approvals relating to our business and operations, see ***“Government and Other Approvals”*** on page 663.

While we have obtained a number of approvals required for our operations, certain key approvals for which we have submitted applications are currently pending. We are also in the process of applying for the renewal of certain key approvals. In addition, we may need to apply for more approvals, including the renewal of approvals which may expire from time to time, and approvals in the ordinary course of business. For example, the consent to operate issued by the Maharashtra Pollution Control Board and 5-star classification issued by Government of India - Department of Tourism (H&R Division) for our hotel at Vashi, Navi Mumbai have expired. While we have made applications for renewal of these approvals, we cannot assure that the approvals shall be renewed. Further, majority of our key approvals which are in the nature of operational licenses will expire in the next three years in the ordinary course of business and the Company will seek renewal in line with its past practice. While we will make the applications for renewal of these approvals at the appropriate time, we cannot assure you that we will be granted such approvals in a timely manner. Any inability to renew these approvals may have an adverse effect on the operations of our hotel. For further details on pending approvals, see ***“Government and Other Approvals”*** on page 663.

We cannot assure you that such approvals will be issued or granted to us, or at all. If we fail to obtain or retain any of these approvals or licenses or renewals thereof, in a timely manner or at all, our business may be adversely affected. In addition, we require the co-operation and assistance of the hotel operators in order to apply for and renew such approvals and permits in a timely manner. Any failure on the part of the hotel operators to render cooperation and undertake the necessary actions to obtain and renew such approvals, may adversely impact the operations at our hotels.

Further, the approvals required by us are subject to numerous eligibility or ongoing compliance conditions and we cannot assure you that these would be received or not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. For instance, in relation to our completed residential project in Hyderabad, Quiescent Heights, we may be in breach of the 'built-up area' requirements under the Environment Impact Assessment Notification issued under the Environment (Protection) Rules, 1986, as a governmental office memorandum relied on by us for certain clarifications on the definition of 'built-up area' was struck down pursuant to a pronouncement by the Supreme Court in August, 2018. Further, we

have not obtained environment approvals for Quiescent Heights project. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer disruption in our operations, any of which could adversely affect our business.

- 36. *If we pursue a strategy of expansion through acquisition of hotels or properties, we may not be able to successfully consummate favourable transactions or such transactions may not yield intended results or achieve expected returns and other benefits.***

From time to time, we may evaluate potential acquisition of hotels or properties that would further our strategic objectives. However, we may not be able to identify suitable hotels or properties, consummate a transaction on terms that are favourable to us, or achieve expected returns and other benefits. Hotels or properties acquired by us may not be profitable or may not achieve sales levels and profitability that justify the investments made. Our acquisitions may entail financial and operational risks, including diversion of management attention from its existing core businesses. Future acquisitions could also result in the incurrence of debt, utilization of our internal accruals, increased contingent liabilities and increased operating expenses, all of which could adversely affect our business, financial condition and results of operations. We may incur additional debt or use internal accruals for acquisition which could affect our financial condition.

- 37. *Statements as to the period in which our properties under development are expected to commence operations and the number of rooms or leasable area expected in such properties are based on management estimates and have not been independently appraised.***

The expected period of opening or commencement of operations for our hotels and commercial and retail projects under development, presented in this Red Herring Prospectus, is based on management estimates and has not been independently appraised. The expected date of opening or commencement of operations, number of rooms or leasable area, size, acreage and square footage actually developed may differ, based on various factors such as market conditions, modifications of engineering or design specifications, changes in regulatory requirements, stipulations in the consents and approvals we receive and any inability to obtain required consents and approvals. Investors are cautioned to not place undue reliance on these numbers in their evaluation of our business, prospects and results of operation. See also “*Forward Looking Statements*” on page 17.

- 38. *We may require additional equity or debt in the future in order to continue to grow our business, which may not be available on favourable terms or at all.***

Our strategy to grow our business and maintain our market share may require us to raise additional funds or refinance our existing debt for our working capital or long term loans. We cannot assure you that such funds will be available on favourable terms or at all. Additional debt financing may increase our financing costs. Our financing agreements may contain terms and conditions that may restrict our ability to operate and manage our business, such as terms and conditions that require us to maintain certain pre-set debt service coverage ratios and leverage ratios and require us to use our assets, including our cash balances, as collateral for our indebtedness. If we are unable to raise additional funds on favourable terms or at all as and when required, our business, financial condition, results of operations and prospects could be adversely affected.

- 39. *We rely on various contractors or third parties in developing our hotel, commercial, retail and other real assets, and factors affecting the performance of their obligations could adversely affect our projects.***

Most of our hotel and other commercial projects require the services of contractors and various other parties including architects, engineers, consultants and suppliers of labour and materials for such projects. The timing and quality of construction of these projects that we develop depends on the availability and skill of these parties, as well as contingencies affecting them, including labour and construction material shortages and industrial action such as strikes and lockouts. We may not be able to identify appropriately experienced third parties and cannot assure you that skilled third parties will continue to be available at reasonable rates and in the areas in which we undertake our projects, or at all. As a result, we may be required to make additional investments or provide additional services to ensure the adequate performance and delivery of contracted services and any delay in project execution could adversely affect

our profitability. In addition, if such contractors or third parties do not complete our orders in a timely manner or match our requirements on quality, our reputation and financial condition could be adversely affected.

40. *Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.*

Although we have not experienced any material labour unrest, we cannot assure you that we will not experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. We have an external union at our hotel property in Powai, Mumbai and we cannot assure you that our other employees will not unionize in the future. In the event our employee relationships deteriorate or we experience significant labour unrest, strikes and other labour action, work stoppages could occur and there could be an adverse impact on our operations. These actions are impossible for us to predict or control and any such event could adversely affect our business, results of operations and financial condition.

41. *We rely on contract labour for carrying out certain of our operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations and financial condition.*

In order to retain flexibility and control costs, we appoint independent contractors who in turn engage on-site contract labour for performance of certain of our operations. As of September 30, 2018, we utilized 531 personnel engaged on a contractual basis. Although we do not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractor. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition. In addition, under the Contract Labour (Regulation and Abolition) Act, 1970, as notified and enforced by the central government and adopted with such modifications as may be deemed necessary by the respective state governments, we may be required to absorb a number of such contract labourers as permanent employees. In the event of any non-compliance by contractors with statutory requirements, legal proceedings may be initiated against us. Thus, any such order from a regulatory body or court may have an adverse effect on our business, results of operations and financial condition.

42. *Our insurance coverage may not be sufficient or may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.*

We could be held liable for accidents that occur at our hotels or otherwise arise out of our operations. In the event of personal injuries, fires or other accidents suffered by our employees or other people, we could face claims alleging that we were negligent, provided inadequate supervision or be otherwise liable for the injuries. Our properties are insured with independent third parties covering various aspects such as property damage inter-alia in respect of buildings, plant and machinery breakdowns, fire insurance, deterioration of stocks, accidental damage, pressurised equipment such as boilers and vessels, losses of rent, loss of profit, business interruptions, terrorism etc. We also maintain directors' and officers' liability insurance for our management personnel and accident group insurance, health insurance and life insurance for our employees. For the financial year 2018, we have on a consolidated basis insured our net assets (which total approximately ₹ 28,223.36 million) for an amount of ₹ 50,908.30 million representing 180% coverage over our consolidated total net assets and for the six months ended September 30, 2018, we have on a consolidated basis insured our net assets (which total approximately ₹ 27,867.07 million) for an amount of ₹ 50,908.30 million representing 183% coverage over our consolidated total net assets.

While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our business, we cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected,

the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected.

43. *Disruptions or lack of basic infrastructure such as electricity and water supply could adversely affect our operations.*

We require a significant amount and continuous supply of electricity and water and any disruption in the supply thereof could affect the operations of our hotels and the services to our guests. We currently source our water requirements from governmental water supply undertakings and water tankers and depend on state electricity boards and private suppliers for our energy requirements. Although we have diesel generators to meet exigencies at all of our hotels, we cannot assure you that our hotels will have sufficient power during power failures. Any failure on our part to obtain alternate sources of electricity or water, in a timely fashion, and at an acceptable cost, may have an adverse effect on our business, results of operations and financial condition.

44. *We are exposed to the risk of events that adversely affect domestic or international travel, such as epidemics and terrorism or war.*

The room rates and occupancy levels of our hotels could be adversely affected by external events that reduce domestic or international travel, such as epidemics and spread of infectious diseases or threats thereof, actual or threatened acts of terrorism or war, geo-political crisis or civil unrest, travel-related accidents or industrial action, natural disasters, or other local factors impacting individual hotels, as well as increased transportation and fuel costs. A decrease in the demand for hotel rooms as a result of such events may have an adverse impact on our operations and financial results. In addition, inadequate planning, preparation, response or recovery in relation to a major incident or crisis may cause loss of life, prevent operational continuity, or result in financial loss and consequently affect our reputation.

45. *Our inability to protect or use intellectual property rights may adversely affect our business.*

We own the registered name and mark 'Chalet' under various classes provided for under the Trade Marks Act, 1999. Additionally, we have applied for registration of  logo under various classes, while application for registration under certain classes are currently pending. We have in the recent past received a notice of opposition in relation to registration of a class 43 trademark "Chalet Hotels" with the Trade Mark Registry. Any adverse order by the Registrar of Trade Marks may impact our ability to use the said trademark.

Further, the use of our, or those of our brand partners', trademarks or logos by third parties could adversely affect our hotels' reputation, which could in turn adversely affect our business and results of operations. We may not be able to prevent infringement of our or our brand partners' trademarks. If our or our brand partners' trademarks or other intellectual property are improperly used, the value and reputation of our hotels could be harmed. The application of laws governing intellectual property rights in India is uncertain and evolving, and could involve substantial risks to us. While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we are infringing any existing third-party intellectual property rights which may force us to alter our offerings. We may also be susceptible to claims from third parties asserting infringement and other related claims. If similar claims are raised in the future, these claims could result in costly litigation, divert management's attention and resources, subject us to significant liabilities and require us to enter into potentially expensive royalty or licensing agreements or to cease certain offerings. Further, necessary licenses may not be available to us on satisfactory terms, if at all. Any of the foregoing could have an adverse effect on our business, results of operations, cash flows and financial condition.

46. *We, as well as our Promoters and Group Companies, have, from time to time, availed unsecured or other credit facilities that are repayable on demand. Any unexpected demand for repayment may adversely affect our liquidity, business, financial condition, results of operations and prospects.*

We, as well as our Promoters and Group Companies, have from time to time, availed unsecured or other credit facilities that are repayable on demand by the lenders. In the event that the respective lenders call in any such credit facilities, alternative sources of financing may not be available to any of us on commercially reasonable terms, to the same extent, or at all. Any failure to service such indebtedness or comply with any obligations under such financing agreements may cause us to incur penalty interest or

may result in the termination of one or more of our credit facilities or acceleration or cross-acceleration of payments under such credit facilities, as well as the declaration of an event of default or cross-default. Any such unexpected demand for repayment may adversely affect our liquidity, business, financial condition, results of operations and prospects.

47. *Some of our corporate records are not traceable.*

Our Company does not have access to a secretarial form filing i.e., Form 5 for sub-division of equity shares in the year 1998.

While information in relation to such subdivision, has been disclosed under Capital Structure in this Red Herring Prospectus, based on certified true copy of the board and shareholder resolutions, we may not be able to furnish any further document evidencing such subdivision. We cannot further assure you that we will be able to locate the said secretarial filing record, or not be penalized by the relevant supervisory and regulatory authorities in India for not maintaining such RoC form.

48. *Our Company has acquired land in the past from entities which are related to our Promoters and may undertake such acquisitions in the future.*

Our Company acquired approximately 8.62 acres of land from Genext, one of our corporate Promoters in Bengaluru for our Whitefield project. Our Promoters and Directors, Ravi C. Raheja and Neel C. Raheja are also shareholders and directors of Genext. Our Company has also entered into a ‘memorandum of understanding’ that grants our Company an option to acquire leasehold rights for 0.98 acres of land and/or building from Mindspace for our proposed hotel and related services in Airoli and our Company may decide to exercise this option and acquire land in the future. Our Promoters and Directors, Ravi C. Raheja and Neel C. Raheja are also shareholders and directors of Mindspace. Our Company is part of the K Raheja Corp group and generally undertakes transactions with other entities forming part of the group. In the future, our Company may undertake further acquisitions of land from entities forming part of the K Raheja Corp group or entities related to any of our Promoters or Directors. For more information on the acquisition from Genext and the proposed acquisition from Mindspace, please see “***Our Promoters and Promoter Group- Interests of our Promoters and Related Party Transactions***” on page 217.

49. *We have certain contingent liabilities that have not been provided for in our financial statements, which, if they materialize, may adversely affect our financial condition.*

As of September 30, 2018, in accordance with IND AS 37, we had certain contingent liabilities on a restated consolidated basis that have not been provided for in our financial statements. For details, see “***Summary Financial Information – Restated Consolidated Summary Financial Information***” on page 413. If a significant portion of these liabilities materialize, it could have an adverse effect on our business, financial condition and results of operations.

50. *We face foreign exchange risks that could adversely affect our results of operations.*

Our operations are in India, our revenues and most of our expenses in India are denominated in the Indian Rupee, and we report our results of operations in the Indian Rupee. We have availed external commercial borrowings excluding interest accrued of USD 74.06 million as of September 30, 2018, which also exposes us to currency risk. Further, we have certain periodic payment obligations to Marriott which are denominated in United States Dollars. Any fluctuation of the Indian Rupee against such foreign currencies may have a negative impact on our results of operations, as the expenses that we have to incur may be higher in Rupee terms.

51. *Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.*

Our Company has not declared dividends in the past. Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We may decide to retain all of our earnings to

finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. We cannot assure you that we will be able to pay dividends in the future. For details of dividend paid by our Company in the past, see “**Dividend Policy**” on page 256.

52. *We will continue to be controlled by our Promoters after the completion of the Offer*

After the completion of the Offer, our Promoters will continue to hold majority of our outstanding Equity Shares. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. They may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us. We cannot guarantee that our Promoters will act in our interest while exercising their rights.

53. *Some of our Promoters have pledged their Equity Shares with a lender. Any exercise of such pledge by the lender could dilute the shareholding of these Promoters, which may adversely affect our business and prospects.*

As of the date of this Red Herring Prospectus, 47,023,720 Equity Shares constituting 27.48% of the pre-Offer paid-up equity share capital of our Company held by Capstan Trading LLP, Raghukool Estate Developement LLP, Touchstone Properties and Hotels Private Limited, Anbee Construction LLP and Cape Trading LLP, our Promoters, are pledged in favour of HDFC Limited to secure borrowings availed by certain of our Promoters and Group Companies. Any default by one or more of such Promoters or Group Companies, under their respective borrowing arrangements pursuant to which these Equity Shares have been pledged, will entitle the lender to enforce such pledge. In case the lender chooses to invoke the pledge, the aggregate shareholding of our Promoters in our Company will be reduced and may also result in the price of the Equity Shares being adversely affected.

54. *We have issued Equity Shares during the last one year at a price that may be lower than the Offer Price.*

We have allotted 18,953,040 Equity Shares to the shareholders of Genext Hardware & Parks Private Limited (“**Genext**”), pursuant to the scheme of arrangement effecting the demerger of Genext with our Company. No cash consideration was paid at the time of allotment of these Equity Shares. The price at which such Equity Shares were allotted may be lower than the Offer Price. In addition, ESOPs granted, if exercised prior to determination of the Offer Price, may be at a price lower than the Offer Price. For further details, see “**Capital Structure**” on page 91.

55. *Some of our Group Companies have incurred losses in the last preceding financial year and have negative net worth, based on the last audited financial statements available.*

Some of our Group Companies have incurred losses in the preceding financial years and have negative net worth, based on the respective Group Companies’ last available audited financial statements. For further details, see “**Our Group Companies – Group Companies with negative net worth**” and “**Our Group Companies – Details of Loss making Group Companies**” beginning on page 221, respectively. We cannot assure you that our Group Companies will not incur losses or have negative net worth in the future.

56. *We have experienced negative cash flows in relation to our operating activities, investing and financing activities in the last five financial years, on a consolidated basis. Any negative cash flows in the future would adversely affect our results of operations and financial condition.*

We had a negative cash flow from operating activities of ₹ 122.96 million in the financial year 2015, on a restated consolidated basis. Further, we had a negative cash flow from investing activities of ₹ 1,289.98 million, ₹ 1,722.79 million, ₹ 1,895.97 million and ₹ 1,212.44 million in the financial years 2018, 2016, 2015 and 2014, respectively, and we had a negative cash flow from financing activities of ₹ 2,339.46 million, ₹ 1,566.81 million, ₹ 4,633.69 million and ₹ 629.67 million during the six months ended September 30, 2018 and in the financial years 2018, 2017 and 2014, respectively, on a restated

consolidated basis. If we experience any negative cash flows in the future, this could adversely affect our results of operations and financial condition. For further details, see “**Summary Financial Information**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on pages 258 and 585, respectively.

- 57. *Certain of our Group Companies and our Promoters are engaged, or are authorized by their constitutional documents to engage, in business activities which are similar to those undertaken by our Company and Subsidiaries, or have interests in other companies, which are in businesses similar to ours, which may result in conflicts of interest.***

Certain of our Group Companies, are authorised under their respective memorandums of association to carry on the business of owning, operating or managing hotels and resorts. For details, see “**Group Companies**” on page 221. We cannot assure you that our Group Companies, will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business and results of operations. For further details, see “**Our Promoters, Promoter Group and Group Companies – Common Pursuits of our Promoters, members of Promoter Group and Group Companies**” on pages 219 and 253.

Further, a conflict of interest may occur between our business and the business of certain of our Promoters and Group Companies which could have an adverse effect on our operations. For example, certain of our Promoters and Group Companies own a resort in Madh Island, Mumbai and a minority equity interest in the hotel JW Marriott Mumbai Juhu, which compete with our existing hotels. Conflicts of interest may also arise out of common business objectives shared by us and certain of our Promoters. Our Promoters may compete with us and have no obligation to direct any opportunities to us. We cannot assure you that these or other conflicts of interest will be resolved in an impartial manner.

- 58. *Our Directors and Key Management Personnel may have interests in us other than reimbursement of expenses incurred, normal employee remuneration or benefits payable under the terms of their agreements with us, which may potentially involve conflict of interests with our Shareholders.***

Our Directors and Key Management Personnel are interested in us to the extent of remuneration paid to them for services rendered, including any shares and employee stock options held by them and reimbursement of expenses payable to them. Our Company had entered into an agreement dated July 7, 2017 with Arthur William De Haast, one of our Directors, to provide certain consultancy and advisory services to our Company for a term of three years with effect from August 3, 2017, pursuant to which he is entitled to GBP 3,750 per working day spent in accordance with the terms of the consultancy services agreement. The term of the consultancy services agreement has been extended to June 11, 2023. Further, Sanjay Sethi, our Managing Director and Chief Executive Officer and Rajeew Newar, our Executive Director and Chief Financial Officer are interested to the extent of loans availed by them from our Company. Our Directors may also be interested to the extent of any transaction entered into by us with any other company or firm in which they are directors or partners. For details, see the sections “**Capital Structure**”, “**Related Party Transactions**” and “**Our Management**” on pages 91, 255 and 186, respectively.

- 59. *We do not own the land on which our Registered and Corporate Office is situated.***

We do not own the land on which our Registered and Corporate Office is situated. Our Registered and Corporate Office is licensed to us by K. Raheja Corporate Services Private Limited pursuant to a license agreement dated August 22, 2018. The license agreement is valid for a period of 5 years from July 1, 2018. We cannot assure you that we will be able to continue with the uninterrupted use of this premise in the event that we are unable to comply with the terms of our license agreement, which may impair our operations and adversely affect our business, results of operations and financial condition. For further details, see “**Our Business – Immovable Properties**” on page 171.

- 60. *We will not receive any proceeds from the Offer for Sale. The Selling Shareholders will receive the entire proceeds from the Offer for Sale.***

This Offer includes an Offer for Sale of up to 24,685,000 Equity Shares by the Selling Shareholders. The entire proceeds from the Offer for Sale will be paid to the Selling Shareholders and we will not receive

any such proceeds. For further details, see “*Capital Structure*” and “*Objects of the Offer*” on pages 91 and 118, respectively.

61. *Any variation in the utilization of the Net Proceeds would be subject to certain compliance requirements, including prior Shareholders’ approval.*

We propose to utilize the Net Proceeds for retiring certain debts of our Company. For further information of the proposed objects of the Issue, see “*Objects of the Offer*” on page 118. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds without obtaining the Shareholders’ approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders’ approval may adversely affect our business or operations.

Further, our Promoters or controlling Shareholders would be required to provide an exit opportunity to the Shareholders who do not agree with our proposal to change the Objects of the Offer or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling Shareholders to provide an exit opportunity to such dissenting Shareholders may deter the Promoters or controlling Shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling Shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in the Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

External Risk Factors

Risks Related to India

62. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

63. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of

India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

64. *Our Company has prepared financial statements under Ind AS. Significant differences exist between Ind AS and other accounting principles, such as Indian GAAP, IFRS and U.S. GAAP.*

Our Restated Consolidated Summary Financial Information as of and for the six months ended September 30, 2018 and financial years 2018, 2017, 2016, 2015 and 2014 included in this Red Herring Prospectus has been prepared under Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 read with the Companies Act, 2013 and differs from our audited financial information to the extent restated, in accordance with applicable laws. The Restated Consolidated Summary Financial Information has been compiled from the audited consolidated financial statements of our Company as of and for the six months ended September 30, 2018 and financial years 2018 and 2017 prepared under Ind AS and as of and for the financial years 2016, 2015 and 2014 prepared under the previous generally accepted accounting principles followed in India (“**Indian GAAP**”). Our date of transition to Ind AS was April 1, 2016 and the audited consolidated financial statements for the financial year 2017 were the first to be prepared in accordance with Ind AS. The restated consolidated summary financial information for the financial years 2016, 2015 and 2014 included in this Red Herring Prospectus have been prepared under Ind AS on a proforma basis. The implementation of Ind AS is recent and new pronouncements may have a material impact on our profitability going forward and our revenue may fluctuate significantly period over period.

Except as otherwise provided in the Restated Consolidated Summary Financial Information with respect to Indian GAAP, no attempt has been made to reconcile any information given in this Red Herring Prospectus to any other accounting principles or to base the information on any other accounting standards. Ind AS differs from other accounting principles with which prospective investors may be familiar, such as Indian GAAP, IFRS and U.S. GAAP. Accordingly, the degree to which the financial statements, which are restated in accordance with the SEBI ICDR Regulations, included in this Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Ind AS.

65. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“**GST**”) regime with effect from July 1, 2017 that combines multiple taxes and levies by the Central and State Governments into a unified tax structure. While the Government of India and certain state governments have announced that all committed incentives will be protected following the implementation of the GST, given that the various rules and regulations regarding the new regime are being evaluated in terms of various implications concerning the GST, we cannot provide you with any assurance as to this or any other aspect of the tax regime following implementation of the GST including anti-profiteering regulations of the new tax regime and availability of input tax credit (“**ITC**”).

Further, the Finance Act, instituted a number of amendments to the existing direct and indirect tax regime which includes the withdrawal of long term capital gains exemptions on equity shares, long term capital gains applicability in the hands of Foreign Institutional Investors and applicability of dividend distribution tax for certain transactions with shareholders, among others. Prospective investors should consult their own tax advisors in relation to the consequences of investing in the Equity Shares.

In addition, the General Anti-Avoidance Rules (“GAAR”) became effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in the denial of tax benefits to an arrangement, among other consequences. In the absence of any such precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

66. *Investors may not be able to enforce a judgment of a foreign court against our Company.*

Our Company is incorporated under the laws of India, majority of our Directors and all of our Promoters, Key Management Personnel and senior management personnel reside in India. Majority of our assets, and the assets of certain of our Promoters, Directors, Key Management Personnel and other senior management, are also located in India. In addition, the regulatory regime of our various international territories may have similar restrictions on enforcement of foreign judgments. Where investors wish to enforce foreign judgments in India, they may face difficulties in enforcing such judgments. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. India exercises reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions which includes the United Kingdom, Singapore and Hong Kong. In order to be enforceable, a judgment obtained in a jurisdiction which India recognises as a reciprocating territory must meet certain requirements of the Code of Civil Procedures, 1908 (the “Civil Code”). Further, the Civil Code only permits enforcement of monetary decrees not being in the nature of any amounts payable in respect of taxes or, other charges of a like nature or in respect of a fine or other penalty and does not provide for the enforcement of arbitration awards. Judgments or decrees from jurisdictions not recognised as a reciprocating territory by India cannot be enforced or executed in India. Even if a party were to obtain a judgment in such a jurisdiction, it would be required to institute a fresh suit upon the judgment and would not be able to enforce such judgment by proceedings in execution. Further, the party which has obtained such judgment must institute the new proceedings within three years of obtaining the judgment.

As a result, you may be unable to: (i) effect service of process outside of India upon us and such other persons or entities; or (ii) enforce in courts outside of India judgments obtained in such courts against us and such other persons or entities. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if it viewed the amount of damages awarded as excessive or inconsistent with Indian practice. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the RBI to repatriate any amount recovered pursuant to the execution of such foreign judgment, and any such amount may be subject to income tax in accordance with applicable laws.

67. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and fall under any of the exceptions specified by the RBI, then the RBI’s prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required

approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

68. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares is generally taxable in India. Any gain realized on the sale of listed equity shares on or before March 31, 2018, on a stock exchange held for more than 12 months will not be subject to long term capital gains tax in India if securities transaction tax, or STT, has been paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or before October 1, 2004, except in the case of such acquisitions of such equity shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, has now levied taxes on such long term capital gains arising from sale of equity shares on or after April 1, 2018. However, where specified conditions are met, such long term capital gains are only taxed to the extent they exceed ₹ 100,000 and unrealised capital gains earned up to January 31, 2018 continue to be exempt. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to the payment of STT, on the sale of Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which our Equity Shares are sold.

Further, any gain realized on the sale of our Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of Equity Shares.

69. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

70. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

Risks Related to the Offer

71. *The Equity Shares have never been publicly traded, and, after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price, or at all.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares is proposed to be determined through a book-building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response

to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

72. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

73. *You may not be able to sell, any of the Equity Shares you purchase in the Offer immediately on an Indian stock exchange.*

The Equity Shares will be listed on the Stock Exchanges. Pursuant to the applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in this Offer and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately six Working Days from the Bid Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within six Working Days of the Bid Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. We cannot assure you that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

74. *The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.*

The Offer Price of the Equity Shares will be determined by our Company and Selling Shareholders in consultation with the BRLMs, and through the Book Building Process. This price will be based on numerous factors, as described under "**Basis for Offer Price**" on page 126 and may not be indicative of the market price for the Equity Shares after the Offer. The market price of the Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Offer Price.

75. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us may dilute your shareholding and any sale of Equity Shares by our Promoters and other major shareholders may adversely affect the trading price of the Equity Shares.*

We may be required to finance our growth through future equity offerings. Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options or the disposal of Equity Shares by our Promoters or any of our Company's other principal shareholders or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares, which may lead to other adverse

consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. We cannot assure you that we will not issue additional Equity Shares. Any future issuances could also dilute the value of your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of the Equity Shares. Except as disclosed in “*Capital Structure*” on page 91, we cannot assure you that our Promoters and other major shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

76. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by the equity shareholders of such company.

However, if the law of the jurisdiction that you are located in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell them for your benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company may be reduced.

77. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While our Company is required to complete Allotment pursuant to the Offer within six Working Days from the Bid/Offer Closing Date, events affecting the Bidders’ decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders’ ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

Macroeconomic Overview of India

India is the sixth largest economy in the world with GDP at current prices of USD 2.61 trillion and third in terms of purchasing power parity as per 2017 estimates. (Source: IMF). The Indian economy grew by 6.5% in the financial year 2017-2018 (estimates) as against 7.1% growth for the financial year 2016-2017 (Source: Central Statistics Office, Government of India).

India GDP Forecast

India has emerged as a lead growth engine for the next five years, in terms of the rate of GDP growth. As per IMF, per capita GDP in India for 2017 is USD 1,983, up from USD 1,749 for 2016 and USD 1,639 for 2015 and is expected to grow at a CAGR of 8.7% between 2017 and 2022. India’s nominal GDP is forecasted to increase from USD 2,611 billion in the calendar year 2017 to USD 4,227 billion by the calendar year 2022 at a CAGR of 10.1% (at current prices), according to IMF.

Industry Size: Chain-affiliated Hotels

Chain-affiliated hotel rooms in India have increased from 23,751 as at March 31, 2001 to about 135,232 as at March 31, 2018. Actual supply creation was delayed as the development cycle in India is generally longer, with delays caused by varied factors including project, environmental and implementation approval delays, cost overrun and funding shortfalls, delays in receipt of completion and opening related approvals, etc. Several hotels that were completed between the financial years 2012-2015 were from projects initiated between the financial years 2007-2009. Further, the business slowdown from the end of 2008, and particularly after 2010, caused several projects to be dropped. From about financial year 2013, there was a distinct slowdown in initiation of new projects while under completion projects continued to be carried to completion. The trend of slower inventory creation is expected to continue up to the financial year 2020/2021, particularly in the luxury–upper upscale and upscale segments, as there have been fewer commitments made in the last three to four years for new hotel projects. However, several new projects that have recently been initiated, may complete in the financial year 2022 or more likely later.

Segmental Supply

Segmental supply has evolved significantly since the financial year 2001.

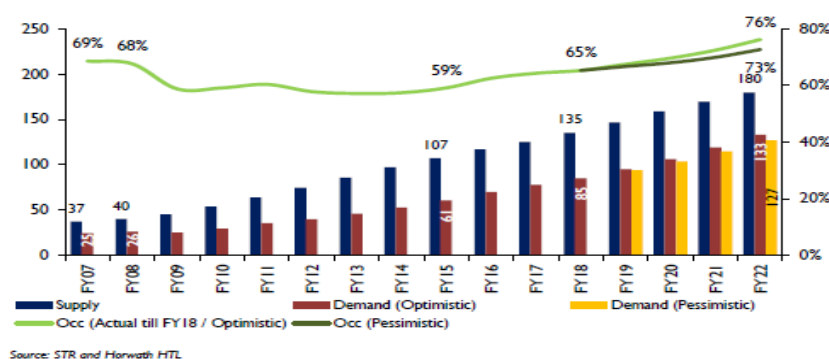

The following table sets forth the composition of chain-affiliated supply of hotel rooms in India:

Supply and Demand

The following chart reflects all India – Rooms supply compared to demand – for the period indicated below:

Source: STR and Horwath HTL

Hotel ownership

Ownership was initially concentrated among hotel chains. At the end of financial year 2001, about 69% of chain affiliated inventory was chain owned. Chain ownership of hotels has slowed and is estimated at about 29 % of total chain affiliated inventory at the financial year 2018. With decline in chain investment into hotels, particularly as international chains penetrated the market, investment was effected by private developers – developer / institutional investor ownership of hotels is scattered with very limited concentration. Only ten parties have ownership of more than 1,000 rooms and the aggregate inventory with these ten parties is about 18,700 rooms (about 14% of total chain affiliated inventory). According to Horwath HTL, we are amongst two asset owners or developers which own over 2,000 rooms in luxury and upper upscale segment as of March 31, 2018.

Overview of Key Impact Factors

Tourism

Foreign Tourist Arrivals (FTA)

FTA for the financial year 2018 was reported at 10.5 million by the Department of Tourism, Government of India. Year-on-year FTA grew by 1.33 million in the financial year 2018. In five years from financial 2014 to 2018, FTA grew by 3.8 million which is over 90% of FTA growth numbers of 4.2 million for the previous ten years from the financial year 2004 to 2013. The e-visa scheme was made available for foreign visitors with effect from November 2014. This has been extremely successful in attracting inbound travel, particularly as visitors can come in with short lead-time for the trip. The leisure sector, MICE and business travel is expected to materially benefit from this facility.

Domestic Tourism

Travel volumes, in terms of visits by domestic travellers, have grown at 13.7% CAGR between calendar year 2001 and calendar year 2016. Although hotels and resorts in India secure only a small percentage of the overall domestic travel in the country, this segment is an increasingly important demand generator for the hotel sector. Domestic travel numbers have grown nearly seven times, from 236.5 million visits in 2001 to 1.61 billion visits in 2016.

Access Infrastructure

Better travel infrastructure, in terms of better roads and airports, is a major benefit for domestic travel whether for business, leisure, MICE or social purposes. Infrastructure projects such as the Golden Quadrilateral program creates greater travel facility within regions and enable speedy vehicular movement combined with a major increase in the vehicular options and the mind-set for short duration vacation with road journeys. The upgraded road infrastructure has helped develop demand and resort capacity in several markets.

Air Traffic

Passenger movement at these key markets for the Company grew at 9.3% CAGR between the financial years 2008 and 2018, with 10.4% CAGR growth was achieved on all-India basis. CAGR between the financial years 2015 and 2018 was 15.6% and 17.5% for key cities and all-India respectively

Business Travel

Business Travel comprises inbound and domestic visitation for business related purposes. This includes travel on corporate account and by individual business travellers. This segment is a predominant source of demand for hotels located in primarily business oriented locations.

Leisure Travel

Leisure travel comprises vacation travel, including short duration vacations. Greater affordability, changing attitudes towards lifestyle, and improved road and air connectivity have materially encouraged short stay vacations including on weekends and extended weekends when a public holiday combines with a weekend as does occur two to four times every year.

MICE Visitation

MICE visitation is mainly corporate driven for conferences, training programs and other events that are of customer-facing intent. MICE demand tends to carry price sensitivity; such demand with optional timing may choose off-season months to enjoy lower rates at better quality hotels. Hotels in predominantly business locations will generate MICE demand for training and corporate seminars – these could be day events or residential events. Conferences that include recreation elements (incentives and rewards for dealers, staff or industry players and events that select a location in order to combine work with recreation for delegates) choose city centre locations and resort destinations.

Weddings and social travel

Weddings and social travel involve mainly domestic visitation for participating in family weddings, destination weddings and other wedding related or family celebrations (such as anniversaries). Wedding and social event demand will of course gravitate to hotels that have the function areas, guest room capacity and also the quality to host such events at a level consistent with the status of the host.

Airlines and airline crew

This demand set helps create a core of demand at hotels, albeit at significantly discounted pricing. Crew demand could arise from international and domestic carriers – while the major international airlines will use upper tier hotels, more price sensitive airlines are open to using upper midscale hotels. Airlines also need to use hotels for layovers in case of significantly delayed flights. This demand is relatively nominal and mainly occurs at hotels that are closer to the airports. In such cases, airlines will prefer more moderately priced hotels that are nevertheless of good standard.

Transit demand

Persons at overnight transits between cities also need to use hotel accommodation which is typically located close to the point of onward journey. Transit demand could occur on the inward and/or outward leg of international travel or for travel between cities that are connected through a regional hub.

Barriers to Entry

Development of hotels in India faces several challenges, principal among which are:

Land: Availability of land at locations that are suitable for hotels, and high cost of available land, create limitations on hotel development and viability. Limited development rights and end-use restrictions on available sites create further challenges. These factors often result in development of hotels with limited inventory.

Regulatory approvals: Hotel projects require several regulatory approvals and licenses, before implementation of the project and upon its completion prior to opening. The process of obtaining approvals can be time consuming and materially adds to the development lifecycle. Uncertainties associated with the timing of approvals have often caused delays in opening of hotels, these delays significantly add to interest cost during construction period and pressure on debt service obligations. Additionally, cost escalations occur due to delayed completion impacting project viability, funding of completion and initial operations, and project quality.

Financing and capital Requirement (Equity and Debt): In the backdrop of several hotel projects which are in debt default, bankers are extremely selective in providing development finance for hotel projects. Further, interest rates tend to be high - currently in the range of 10% to 14% with the lower range only being available to borrowers with established credibility. In addition, hotel projects require sizeable equity capital for project development and to meet cash shortfalls during operations. Shortage of suitable equity capital is a significant constraint towards development of hotels, particularly a portfolio of assets or hotels with large inventory of rooms and other facilities.

Manpower shortages: Manpower shortages are increasing particularly staff and managers with sufficient operating experience and skills for hotel. This poses limitations for all hotels but more specifically for hotel operated by owners as independent properties.

Distressed assets – The hotel industry has seen considerable debt-related stressed assets, including projects that are left incomplete or completion prolonged due to lack of funding. Stress has arisen due to various factors: (a) debt terms, by way of high interest rates and repayment obligations over shorter periods than are generally impracticable for hotels; (b) higher project costs emanating from delays, such delays caused by funding, regulatory approvals and project execution issues; and (c) slower demand growth due to slow general business conditions. The stressed assets create acquisition opportunities for interested investors.

Commercial and Retail Real Estate Market in India (Source: CBRE)

Overview

The Indian economy's growth rate reached a five-quarter high of 7.2% during the quarter ended December 2017, compared with 6.5% in the previous quarter. The upward momentum was largely attributed to the continued recovery of the manufacturing sector, which grew by 8.1%. In addition, sectors such as trade, hotels and transport (9%), and public administration, defence and other services (7.2%) also contributed to this strong momentum. The construction sector's performance improved sharply as it grew by 6.8% compared with 2.8% in the previous quarter. Moreover, the growth of real estate services (along with financial, insurance and professional services) sector increased from 6.4% to 6.7% during the review period. However, despite the visible recovery in quarterly GDP, the Reserve Bank of India continued to project 2017-2018 growth rate at 6.6%.

According to CBRE Research, after rising to 5.2% in December 2017, retail inflation (measured by consumer price inflation) continued on its downward curve, declining to 4.4% in February 2018. In February 2018, the Monetary Policy Committee also estimated inflation at 4.3% to 4.7% during the second half of 2017 and 5.1% to 5.6% during the first half of 2018. Due to the constant fluctuation in inflation, the central bank has decided to keep lending rates stable for now at 6.0%. However, if inflation continues to pose a challenge, the bank might become inclined towards adopting monetary tightening measures in 2018.

Recent disruptions in the technology sector does not seem to have significantly affected the overall leasing activity in the country. Moreover, growth in other sectors appears to have helped plug the gap created by reduced leasing by most Indian tech firms. Despite a drop in its share in office space take-up in India, technology corporates remained the biggest demand driver with a share of 25% during the first quarter of 2018.

Overview

We are an owner, developer and asset manager of high-end hotels in key metro cities in India. Our hotel platform comprises five operating hotels, including a hotel with a co-located serviced residence, located in the Mumbai Metropolitan Region, Hyderabad and Bengaluru, representing 2,328 keys, as of September 30, 2018. Our hotels are branded with globally recognized hospitality brands and are in the luxury-upper upscale and upscale hotel segments, according to the Horwath Report. Our hotel platform emphasizes strategic locations, efficient design and development, appropriate positioning in hotel segments together with branding and operational tie-ups with leading hospitality companies. We use our experience to actively manage the hotel assets to drive performance. In addition, we have developed commercial and retail spaces, in close proximity to certain of our hotels.

We have developed our hotels at strategic locations generally with high barriers-to-entry and in high density business districts of their respective metro cities, according to the Horwath Report. We generally develop our hotels on large land parcels, allowing us to situate a greater number of rooms, as well as provide a wide range of amenities, such as, fine dining and specialty restaurants, large banquet and outdoor spaces. We endeavour to build our hotels to superior standards targeting the luxury-upper upscale and upscale hotel segments at an efficient gross built up area and development cost per key.

We believe we have a competitive advantage in key metro cities due to, the significant time outlay required to build and establish a profitable hotel or commercial project, our early mover advantage in large, mixed-use developments in specific micro-markets and availability of unutilized land at certain of our hotel properties to further expand our operations, among others.

We seek to brand our hotels with leading global hospitality brands, which we believe are well matched to the location, size, target customer base and intended hotel segment of our hotel properties. This allows us to save on the time and cost required to build, develop and maintain our ‘own hotel brand’. Our hotels are currently branded with global brands such as JW Marriott, Westin, Marriott, Marriott Executive Apartments, Renaissance and Four Points by Sheraton which are held by Marriott Hotels India Private Limited and its affiliates (collectively “Marriott”). We also determine, by detailed financial and operational analysis, whether hotel operations should be undertaken directly by us or by engaging third party hotel operators. Currently, our hotel at Vashi, Navi Mumbai, is operated by us under a license agreement with Marriott, and four of our hotels, including our serviced residence, are operated pursuant to hotel operation and related agreements with Marriott.

We follow an active asset management model for our hotels operated by third parties, pursuant to which we closely monitor, and exercise regular oversight over, the performance of our hotel properties. Among other things, we discuss and agree on budgeting and operational and financial targets, review performance reports, engage with the hotel management team at each hotel by conducting detailed monthly performance review meetings and provide regular inputs on cost saving initiatives and potential improvements. We believe that our active asset management model, the premium location of our hotels, our large room inventory and large function spaces, together with our relationship with international hospitality brands, has allowed our hotels to achieve competitive financial and operational parameters. For example most of our hotels have higher ADR, occupancies and RevPAR

compared to the average of other hotels in their respective micro-markets and hotel segments, for the financial year 2018, according to the Horwath Report. See “**Industry Overview**” on page 133.

We are part of K. Raheja Corp group which is a leading business group in India and we believe that we derive significant benefit from the confidence that consumers, lenders, hospitality partners, vendors and others place in the group. The companies forming part of the K. Raheja Corp group (“**K. Raheja Companies**”) have extensive experience in developing large scale real estate, hospitality and commercial projects resulting in a strong understanding of industry and market trends, which we leverage to identify suitable locations and opportunities. We further leverage the experience and relationships of these companies with construction companies, architects and designers, to develop, refurbish and maintain hotels at optimal cost and quality.

Our Promoters include Mr. Ravi C. Raheja and Mr. Neel C. Raheja, who have been instrumental in the growth of our business and actively advise us on finance, corporate strategy and planning as well as our hotel and retail businesses. We have a strong management team with significant industry experience. Our Managing Director and CEO, Mr. Sanjay Sethi has three decades of experience in the hospitality industry and our Executive Director and CFO, Mr. Rajeev Newar, has over 26 years of experience in various industries. Our Key Management Personnel and senior management include qualified professionals and industry experts with significant experience across various industries and functions including finance, legal, projects and design, asset management, hospitality.

Competitive Strengths

High-End Branded Hotels Strategically Located in Key Metro Cities of India

We are an owner, developer and asset manager of high-end hotels in key metro cities in India. Our hotel platform comprises five operating hotels, including a hotel with a co-located serviced residence, located in the Mumbai Metropolitan Region, Hyderabad and Bengaluru, representing 2,328 keys, as of September 30, 2018. Our hotels are branded with globally recognized hospitality brands and are in the luxury-upper upscale and upscale hotel segments, according to the Horwath Report. Our hotel platform emphasizes strategic locations, efficient design and development, appropriate positioning in hotel segments together with branding and operational tie-ups with leading hospitality companies.

All our hotel assets are located in high density business districts of key metro cities in India, according to the Horwath Report. We have developed our hotels at strategic locations generally with high barriers-to-entry. For example, we have a hotel in Sahar, Mumbai and another located across 15 acres at the banks of Powai lake, both in proximity to Mumbai’s international airport. Similarly, our hotel in Vashi, Navi Mumbai is located close to new business districts and the proposed international airport and our hotels in Hyderabad and Bengaluru are located near the offices of major technology corporations, business centres and retail and commercial facilities. Our design and development team manages construction, design, approval and engineering for our projects and utilizes modern technology for quicker and more efficient development of our properties. We generally locate our hotels on large land parcels, allowing us to situate a greater number of rooms, as well as provide a wide variety of amenities such as fine dining and specialty restaurants, large banquet halls, ball rooms and executive lounges, swimming pools and outdoor spaces, spas and gymnasiums. For example, our four largest hotels have 773, 585, 427 and 391 keys, respectively as of September 30, 2018.

We seek to brand our hotels with leading global hospitality brands, which we believe are well matched to the location, size, target customer base and intended hotel segment of our hotel properties. This allows us to save on the time and cost required to build, develop and maintain our ‘own hotel brand’. Currently, all our hotels are branded with global brands, such as, JW Marriott, Westin, Marriott, Marriott Executive Apartments, Renaissance and Four Points by Sheraton, which are held by Marriott. We believe that our active asset management model, the premium location of our hotels, our large room inventory and large function spaces, together with our relationship with leading international hospitality brands, enables us to attract our target customer base including large

corporate key accounts such as information technology companies, airlines, multi-national corporations, consultancy firms and banks, deliver an enhanced customer experience, encourage repeat business and drive customer loyalty.

Active Asset Management Model

We follow an active asset management model for our four hotels, including a hotel with a co-located serviced residence, which are operated by Marriott pursuant to hotel operation and related agreements. These agreements give us access to Marriott's management expertise, industry best practices, online reservation systems, marketing strategies, systems and processes, human resources and operational know-how. Our active asset management model entails that in addition to contractual obligations under agreements with Marriott, we closely monitor, exercise regular oversight and contribute to the performance of our hotel properties. As part of our active asset management model, we regularly:

- engage with the hotel management team at each hotel in order to discuss and agree on budgeting, cost management initiatives and operational and financial targets for each of our hotel properties. For example, we conduct detailed performance review meetings each month with the hotel management team to assess hotel performance on a host of parameters and provide regular inputs on cost saving initiatives and potential improvements;
- review performance reports generated by each hotel;
- conduct periodic meetings with hotel operator's management teams;
- discuss and optimize pricing strategies to maximize room yield by active monitoring of key corporate accounts and provide inputs on promotional activities;
- review furniture, fixtures and equipment deployment plans and assist with execution of these plans;
- review competitor set performance and penetration across relevant micro-markets; and
- assist in renewing licenses and consents, as necessary.

We believe that our active asset management model, the premium location of our hotels and our large room inventory together with large function spaces, together with our relationship with leading international hospitality brands, has allowed our hotels to achieve competitive financial and operational parameters. For example most of our hotels had higher ADR, occupancies and RevPAR compared to the average of other hotels in their respective micro-markets and hotel segments, for the financial year 2018, according to the Horwath Report.

The table below sets forth certain key performance parameters for our hotels:

Our total income was ₹ 4,970.43 million for the six months ended September 30, 2018 and ₹ 9,295.14 million for the financial year 2018, and our total income grew at a CAGR of 15.81% between the financial years 2014 and 2018. Well Positioned to Benefit from Industry Trends

According to the Horwath Report, growth in per capita income, changing demographic dynamics, rising urbanization, growth in travel and higher discretionary spending trends, are expected to assist the growth of the hospitality industry in India. Given our presence in key metro cities which are expected to benefit from the growth in these parameters, we are well placed to benefit from the potential growth opportunity. We believe we have a competitive advantage in the key metro cities due to the significant time outlay required for companies to build and establish a profitable hotel or commercial office space or mall and our early mover advantage in large, mixed-use developments in specific micro-markets. Further, the availability of land with our company in proximity to our developments for further expansion and high entry costs to develop projects in metro cities where our developments and projects are located, provide us with an advantage in our relevant micro-markets.

Further, according to the Horwath Report, the luxury-upper upscale hotel segment is expected to witness a growth in the MICE (meetings, incentives, conferences and events) segment. We believe that given our presence in key metro cities and size of our hotels, including large sized banquet, outdoor and conferencing facilities, particularly at our hotel at Sahar Mumbai and at our hotel and convention centre at Powai, Mumbai, we are well-positioned to benefit from the growth potential in the MICE segment, facilitating both domestic and international business meetings and conferences. We believe, the technology and facilities available at our properties in addition to their locational advantage will allow us to capture the expected growth in this segment.

According to CBRE Research, due to sustained occupier interest, leasing activity for commercial and office real estate rose by about 25% on a yearly basis and crossed 10 million square feet during the first quarter of 2018. Further, according to CBRE Research, the Indian retail real estate market witnessed continuous foray of international brands, launch of new retail developments and robust demand for space in the second half of 2017. We believe we are well positioned to leverage this growth due to our in-depth understanding of the rental market and the needs and preferences of consumers. We believe that our clients have confidence in us, demonstrated by our relationships with several large corporate clients and domestic and global retail brands, including a long-term agreement with a leading global professional services company for 109,228 square feet of commercial space at Whitefield, Bengaluru. Such relationships may help us to secure clients for our new developments and mitigate the risks that may arise from an inability to secure clients for large commercial or retail spaces at suitable rates.

Experienced Management Team

We have a strong management team with significant industry experience. Our Promoters, Mr. Ravi Raheja and Mr. Neel Raheja, have been instrumental in the growth of our hospitality and retail business and actively advise on finance, corporate strategy and planning. Further, our Managing Director and CEO, Mr. Sanjay Sethi has three decades of experience in the hospitality industry, including with leading Indian hotel chains, and across hotel segments. Further, our Executive Director and CFO, Mr. Rajeev Newar, has over 26 years of experience in roles in finance and management. Our Key Management Personnel and senior management include qualified

professionals and industry experts, with significant experience across various industries and functions including finance, legal, projects and design, asset management, hospitality and logistics. Our Promoters, Board and management team have demonstrated an ability to enhance our performance by growing our business through different economic and industry cycles. We believe that the strength of our management team and its understanding of the hospitality and real estate market in India enables us to continue to take advantage of current and future market opportunities.

Backed by Leading Indian Real Estate Developer

We are part of K. Raheja Corp group which is a leading business group in India and we believe that we derive significant benefit from the confidence that consumers, lenders, commercial partners, vendors and others place in the group. The K. Raheja Companies have extensive experience in developing large scale real estate and commercial projects resulting in a strong understanding of industry and market trends, which we leverage to identify suitable locations and opportunities. We further leverage the experience and relationships of these companies with construction companies to develop hotels at optimal cost and quality. For example, the average development cost per room (including the cost of land), for our luxury hotel at Sahar, Mumbai, completed in financial year 2015 was ₹ 13.99 million. Further, our hotel project management and design team, works together with the K. Raheja Companies and leverages the experience of K. Raheja Companies' design teams to develop our hotel properties, commercial offices and malls.

Competitive Strategies

Focus on Maximizing Performance in Existing Portfolio through Active Asset Management

A critical part of our growth strategy is to continue our focus on maximizing the cost efficiency of our portfolio by following a disciplined approach to asset management, and a collaborative working arrangement with our hotel operators to drive strategic and tactical initiatives, to drive profitability. Some of the initiatives are listed below:

- alternative and optimal utilization of hotel spaces to maximize and diversify revenue sources besides room revenue by increasing our share of revenue from food and beverage, meeting rooms, club floors, conferences, events and commercial or retail space;
- continued focus on upgrading facilities to work towards a best-in-class experience across our existing hotels by undertaking renovations and rebranding exercises;
- improve staff productivity and efficiency through appropriate training and learning exercises and an optimal use of technology;
- undertake energy saving initiatives that are both cost-efficient and environmentally friendly as well explore shared service opportunities, such as laundry and finance operations, for our hotels located in the same city; and
- ensuring presence of leadership personnel commensurate with the size and scale of each hotel property.

Disciplined Development of Assets in the Current Pipeline

We are in the process of developing three additional hotel projects which are expected to have 588 keys and two projects representing commercial office space with built-up area (excluding car parking/utilities) of approximately 1.12 million square feet. We have traditionally acquired large parcels of land at competitive prices with the intention to develop hotel-led mixed-use projects. We seek to leverage unutilized FSI at some of our hotel locations which allows us to develop additional commercial or retail spaces. For example, we are developing commercial space in Powai, Mumbai and an IT Park in Whitefield, Bengaluru located on unutilized land at our hotel properties. We also intend to focus on developing new hotel-led mixed-use projects in prime locations with development sizes similar to our existing projects, and which feature a combination of hotels, retail developments and commercial office space. Our retail and commercial space under construction is expected to generate regular rental income and cushion the hospitality cash flow cyclicality. Retail and commercial space are also expected to complement the hospitality business and generate synergies within the hotel led mixed-use projects. For example, we believe that the development of our commercial and retail real estate projects in proximity to our hotels will provide benefits to our hotel business for MICE events and assist in driving room occupancy.

Expand Portfolio by way of Opportunistic and Accretive Acquisitions

The hospitality industry in India has recently experienced some consolidation according to the Horwath Report, and we will continue to explore opportunities for acquiring operating hotel assets. The hotel industry has seen considerable debt-related stressed assets, including projects that are left incomplete or completion prolonged due to lack of funding which creates acquisition opportunities, according to the Horwath Report. We seek to leverage our experience and in-house capabilities to acquire operational or near complete hotel assets at an attractive price to reduce replacement cost, initiate turnaround strategies through active asset management, brand repositioning, property enhancement or cost controls and derive benefits of economies of scale. We believe that our asset ownership model allows us the flexibility to acquire a variety of existing branded hotels unlike hotel companies which operate under their own brand.

Further, we will evaluate inorganic growth opportunities, in keeping with our strategy to grow and develop our market share. We may consider opportunities for inorganic growth, such as through acquisitions of operating hotel assets, if, among other things, they:

- are consistent with the positioning and parameters of our existing hotels and which we estimate are high-yielding hotel assets;
- consolidate our market position in strategic micro-markets in key metro cities;
- achieve operating leverage by unlocking potential efficiency and synergy benefits;
- strengthen and expand our portfolio to newer geographies across India which typically attract significant traffic from business and leisure travellers particularly in the NCR, Bengaluru, Pune, Chennai and Goa; and
- enhance our depth of experience and know-how.

Maintain a Sustainable Capital Structure and Ensure Prudent Capital Allocation

We seek to expand our portfolio of hotel properties organically or inorganically, based on industry developments and supply and demand movements across the hotel sector and in specific locations and micro markets. Our strategy is to invest in buying completed projects in demand dense markets when acquisition costs are low and we are able to obtain financing at suitable rates. We leverage our Company's and K. Raheja Companies' development strength to construct and develop our hotels and thereafter actively manage properties along with a suitable hospitality brand partner. Our approach has allowed us to allocate capital at opportune times to acquire land and build hotels efficiently. Once our hotels are operational, we aim to take advantage of growing demand to maximize revenue and returns by partnering with well-renowned hotel operators, as well as to reduce existing debt. As of September 30, 2018 and March 31, 2018, 2017 and 2016, our Average Cost of Indebtedness (including exchange (gain)/loss) was 12.92% 8.65%, 9.68% and 11.11%, respectively; Average Cost of Indebtedness (excluding exchange (gain)/loss) was 9.09%, 8.73%, 9.82% and 9.18%, respectively and our debt to equity ratio was 5.75, 5.42, 5.59 and 4.51, respectively. We aim to continue to reduce our cost of indebtedness through active evaluation of refinancing and alternative capital sources.

Opportunity for reflagging hotels or renegotiating hotel operation contracts

The hotel operation contracts for our operational hotels, including our serviced residence, at Powai, Mumbai and Hyderabad will be due for renewal in March 2020 and December 2021, respectively. Further, our license agreement for our hotel at Vashi, Navi Mumbai will be due for renewal in December 2021. This provides us with an opportunity to rebrand hotel assets or reposition our properties by using alternate brands at these hotels to better cater to expected demand in the respective micro markets where our hotels are located. Given the demand potential in the hospitality sector according to the Horwath Report, we believe that we may also be able to renegotiate better terms for our hotel operation contracts. We may also evaluate options of diversifying our asset portfolio to include more international brands of similar to higher positioning as our current brands, in order to reduce risk of reliance on any one hospitality company.

Details of the Objects

1. Repayment/prepayment of certain indebtedness

Our Company has entered into various financing arrangements with banks, financial institutions and other entities. The borrowing arrangements entered into by our Company include borrowings in the form of terms loans, and fund based and non-fund based working capital facilities. For details of these financing arrangements including indicative terms and conditions, see “**Financial Indebtedness**” on page 616. As on December 31, 2018, the amount outstanding under the borrowing arrangements entered into by our Company was ₹ 25,845.80 million (excluding interest) on a standalone basis.

Our Company intends to utilize ₹ 7,200.00 million (approximately) of the Net Proceeds towards repayment or prepayment of term loans availed by our Company (including any penalty arising out of such prepayment of loans). We believe that such repayment or prepayment will help reduce our outstanding indebtedness and debt servicing costs and enable utilization of the internal accruals for further investment towards business growth and expansion. In addition, we believe that this would improve our ability to raise further resources in the future to fund potential business development opportunities.

The selection of borrowings proposed to be prepaid or repaid amongst our borrowing arrangements availed will be based on various factors, including (i) cost of the borrowing to our Company including applicable interest rates, (ii) any conditions attached to the borrowings restricting our ability to prepay/ repay the borrowings and time taken to fulfil, or obtain waivers for fulfilment of such conditions, (iii) receipt of consents for prepayment from the respective lenders, (iv) terms and conditions of such consents and waivers, (v) levy of any prepayment penalties and the quantum thereof, (vi) receipt of requisite approvals in accordance with applicable laws, (vii) provisions of any laws, rules and regulations governing such borrowings, and (viii) other commercial considerations including, among others, the amount of the loan outstanding and the remaining tenor of the loan. For details, see “**Risk Factors – Some of our loan agreements contain restrictive covenants. Inability to effectively service our borrowings, comply with or obtain waivers of applicable loan covenants, as the case may be, may adversely affect our business, results of operations and financial conditions.**” on page 30.

Macroeconomic Overview of India

India is the sixth largest economy in the world with GDP at current prices of USD 2.61 trillion and third in terms of purchasing power parity as per 2017 estimates. (Source: IMF). The Indian economy grew by 6.5% in the financial year 2017-2018 (estimates) as against 7.1% growth for the financial year 2016-2017 (Source: Central Statistics Office, Government of India).

India GDP Forecast

India has emerged as a lead growth engine for the next five years, in terms of the rate of GDP growth. As per IMF, per capita GDP in India for 2017 is USD 1,983, up from USD 1,749 for 2016 and USD 1,639 for 2015 and is expected to grow at a CAGR of 8.7% between 2017 and 2022. India’s nominal GDP is forecasted to increase from USD 2,611 billion in the calendar year 2017 to USD 4,227 billion by the calendar year 2022 at a CAGR of 10.1% (at current prices), according to IMF.

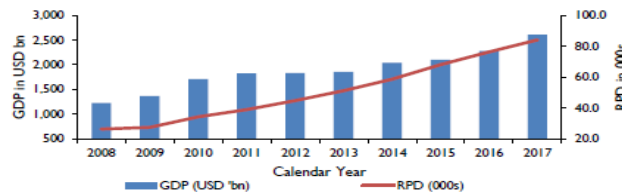

The chart below provides the IMF forecast for GDP growth rate (at constant prices) for India and the top seven global economies for the next five years.

India GDP and Hotel Room Demand

Economic growth has a material benefit in creating demand for hotels. With an increase in GDP (at current prices) from USD 1,224 billion in 2008 to USD 2,611 billion for 2017, the demand for hotel rooms has increased from 26,300 rooms per day in 2008 to 84,100 rooms per day for 2017. With India’s GDP is expected to grow at 7.4% to 8.1% (at constant prices) over the next five years, growth in the demand for hotel rooms can reasonably be expected. The chart below compares the demand for hotel rooms (RPD growth) with the GDP levels for India.

Key demographic aspects

Increased urbanisation: India's urban population has increased from 27% of total population (per census 2001) to 31.16% of the total population (per Census 2011) (Source: Census of India, 2011).

Middle class population: The middle class population in India has doubled from 300 million to 600 million between 2004 and 2012, according to World Economic Forum, and is likely to overtake that of US and China by 2027.

Young Population: Estimates by PwC in a study focusing on Indian workplace of 2022, indicate that by 2020, the average age of an Indian will be 29 years, compared with average age of 38 years for both China and USA and 48 years for Japan. This young population will help constitute a large working population, with an estimated 64% of India's population to be in the working age population by year 2020-2021 (Source: Union budget and economic survey 2013). A large working population with young demographics can reasonably be expected to enhance the discretionary spending capacity.

Classifications of Hotel Rooms Supply

Certain terms which are used for classifying and categorizing hotels, are listed below:

Luxury and upper upscale segment – these classifications typically refer to top tier hotels. In India, these would generally be classified as five star, deluxe and luxury hotels.

Upscale segment – these are hotels which are more moderately positioned and priced, with smaller room sizes, than the top tier hotels. In India, these would generally be classified as four or even five star hotels.

Upper midscale segment – these hotels are more moderately positioned and priced than upscale hotels. These may be full service or even select service hotels, typically with fewer public areas and facilities and possibly smaller room sizes, than upscale hotels. In India, these would generally be classified as four star and sometimes three star hotels.

Midscale segment – these are typically three star hotels with distinctly moderate room sizes, quality and pricing, and a lower quality of services, while domestic brand midscale hotels are often more full service in nature, services tend to be more selectively available among international branded midscale hotels.

Economy segment – these are typically two star hotels providing functional accommodations and limited services, while being focused on price consciousness.

Chain-affiliated hotels are hotels that are either (i) owned and operated by hotel chains, (ii) operated by hotel chains on behalf of other owners, or (iii) operated by owners themselves or third parties under a franchise arrangement from hotel chains. These include all recognized international global chains operating in India, irrespective of the number of hotels or rooms operated by them in the country and domestic hotel chains that are generally considered as operating under common branding.

Chain-affiliated hotels do not include other domestic chains which have less than five hotels operating regionally in India, groups that have multiple hotels only within one state (unless they are generally regarded as chain-affiliated hotels by the market), companies that are primarily operating time share facilities and one star hotels. There is significant amount of room inventory outside the chain-affiliated hotels in India, with a mix of product types, positioning, service and operating standards and varied degrees of competitiveness. Independent hotels have not been included due to the following main reasons:

1. lack of sufficiently co-ordinated data for independent hotels that is available under a reliable and consistent standard;
2. increasingly challenged competitiveness of these independent hotels against growing presence of chain-affiliated hotels, particularly under an environment of multi-city corporate travel needs, and the cost and efficiency of digital marketing capability;
3. longer-term constraints on independent hotel growth as hotel chains, particularly domestic chains, spread their presence outside the main cities; and
4. limited size of independent hotels given the reluctance of banks to finance larger projects unless these have access to strong marketing and management systems.

The pace of growth of independent hotels has considerably slowed over the years, relative to chain-affiliated hotels. Thus, considering past and current performance of chain-affiliated hotels while also competing with the available supply of independent hotels is an adequate reflection of the competitive ability and environment for chain-affiliated hotels. In this context the trends and outlook presented for chain-affiliated hotels will not be materially impacted if independent hotels were also to be considered.

Industry Size: Chain-affiliated Hotels

Chain-affiliated hotel rooms in India have increased from 23,751 as at March 31, 2001 to about 135,232 as at March 31, 2018.

Supply growth and diversity of supply was initially spurred by a very strong business period from the financial year 2005 through the initial months of the financial year 2009, particularly financial year 2007 to the summer of 2008. About 18,500 rooms were added in the financial years 2010 and 2011. Thereafter, an average of just under 11,000 rooms were added each year for the next four years. The pace of addition of new rooms slowed to an average of just below 9,400 rooms per year for the next three years, i.e. financial year 2016 through 2018, with approximately 10,000 rooms added in the financial year 2018. Supply growth is expected to regain some momentum over the next four years, with an average of about 11,500 rooms expected to be added each year over the next four years. This growth is mainly concentrated in the upscale and upper midscale segments, comprising about 48% of total expected supply over the next four years.

For the upscale segment, real supply growth only picked up from the financial year 2011. Nine years between the financial years 2001 and 2010 saw supply being doubled, but only from a very modest base of 5,000 rooms. 14,000 rooms were added in the next six years through the financial year 2016, at 12.5% CAGR.

Actual supply creation was delayed as the development cycle in India is generally longer, with delays caused by varied factors including project, environmental and implementation approval delays, cost overrun and funding shortfalls, delays in receipt of completion and opening related approvals, etc. Several hotels that were completed between the financial years 2012-2015 were from projects initiated between the financial years 2007-2009. Further, the business slowdown from the end of 2008, and particularly after 2010, caused several projects to be dropped. From about financial year 2013, there was a distinct slowdown in initiation of new projects while under completion projects continued to be carried to completion. The trend of slower inventory creation is expected to continue up to the financial year 2020/2021, particularly in the luxury-upper upscale and upscale segments, as there have been fewer commitments made in the last three to four years for new hotel projects. However, several new projects that have recently been initiated, may complete in the financial year 2022 or more likely later.

Segmental Supply

Segmental supply has evolved significantly since the financial year 2001.

The following table sets forth the composition of chain-affiliated supply of hotel rooms in India:

India has moved from a top-heavy supply scenario, at the start of the century, to a more balanced supply. The midscale-economy segment has gained material supply share, almost trebling its supply relevance between the financial years 2001 (when it had a fledgling share) and 2018. The trend for the next 3-5 years is broadly expected to be the same, with the luxury-upper upscale supply share continuing to gradually decline with gains to the upscale and upper midscale sectors.

International tourists (particularly the first time visitors) often prefer luxury-upper upscale hotels as it gives them greater sense of comfort and security in an environment that is quite alien to their home country experience. Besides, hotels in this segment are necessary to better position cities, leisure destinations and key micro-markets to the international market and thereby better capitalize on global demand potential. Higher rates charged also enable better overall revenue realisations. India lacks convention centres and is missing out on a significant revenue stream – a similar consequence could ensue from prolonged supply slowdown in the upper-upscale segment.

Company's supply share is mainly in the luxury-upper upscale segment with 4.4% room inventory share by the end of financial year 2018.

Supply Composition by City

The top 10 markets (based on hotel inventory) in India have 66% of rooms supply in the financial year 2018 and each market has at least 3,000 chain-affiliated hotel rooms.

The following table sets forth the supply of chain-affiliated hotel rooms in the top 10 markets for the periods indicated:

(Inventory in 000s)					
Category	FY01	FY08	FY15	FY18	FY22
NCR	4.9	6.6	18.5	22.2	26.7

The share of top 10 markets in inventory added between the financial years 2008 and 2015 was 71%. This share slowed materially to 52% of additions in the last three years. Bengaluru, Delhi, Chennai and, to a smaller extent, Hyderabad and Kolkata, have continued to grow through these ten years. Mumbai and Pune had slower supply growth between the financial years 2015 and 2018.

Supply share of other markets, outside the ten major markets, has remained at or around the one-third level although there has been an addition of about 38,000 rooms in absolute terms.

The markets of focus for the Company are currently the top seven markets in India in terms of supply. The Company already has hotels in Mumbai (including Navi Mumbai), Bengaluru and Hyderabad and is further developing a hotel in Navi Mumbai. Additionally, the Company is seeking to acquire or develop hotels and resorts in Delhi, Chennai, Pune and Goa.

The following table sets forth the city wide composition of chain-affiliated hotel rooms in the luxury-upper upscale segment of the top 10 cities in terms of inventory:

Each of the main cities has gone through a change in supply composition, which was inevitable considering the top-heavy nature of the market in the financial year 2001. As the modest supply levels of the financial year 2001 have expanded, the supply composition has materially changed. The southern cities of Bengaluru, Chennai and Hyderabad, and Pune, have seen the sharpest shift with a decline of 34% to 42% in the supply share of luxury-upper upscale hotels between the financial years 2001 and 2018. During this period, these cities have grown in importance as business cities becoming technology hubs and embracing the new economy. This new economy has also encouraged supply creation across difference price points, by creating relevant demand. Mumbai still has 67% of its supply in the luxury-upper upscale segment, possibly an outcome of high land prices and its status as a financial capital and finance centre. It is the only city with luxury-upper upscale supply share in excess of 50%.

While investment interest (and commitments) for the luxury-upper upscale space have gained pace in the last 12-15 months, the pace of project completion is slow. We do not foresee major supply growth in this segment till the financial year 2021, with expected CAGR of 5% for this period. The supply estimates for the financial year 2022 are higher on an assumption of several new projects being completed in about four years, leading to an assumed completion by financial year 2022 and a related higher CAGR of 6.2% between the financial years 2018 and 2022.

The following table sets forth the city wide composition of chain-affiliated hotel rooms in the upscale segment:

Upscale										
Category	Upscale					Upscale (% of total city)

TOTAL	5.2	7.7	21.6	27.1	38.4	22%	19%	20%	20%	21%

Source: Horwath HTL

All three southern cities have upscale supply share of 19% with Pune being a little bit higher, at 23%. Among leisure markets, Goa has 43% supply share in the luxury-upper upscale segment but only 18% in the upscale segment. This means that 39% of supply is of M-E category. While the continued rate growth in that market is remarkable despite the changed supply share, the destination could do with some truly luxury and upper-upscale hotels and also more sustained upscale hotel supply.

Foreign and Domestic Chain-affiliated Supply

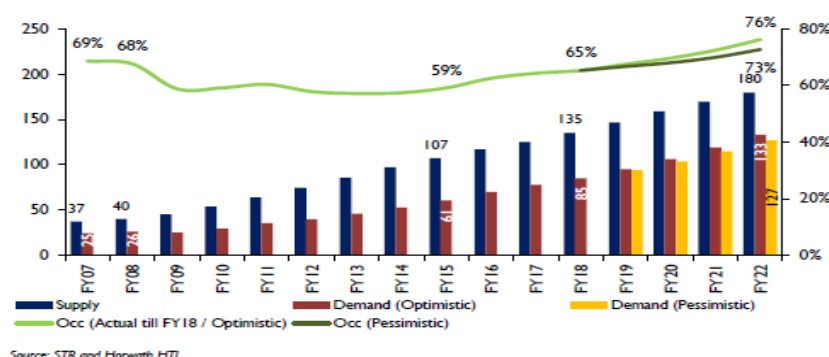

The primacy of domestic chains as of financial year 2001, slowly started ceding ground to international chains which expanded on the basis of aggressive pursuit of management contracts. They also gained from supporting the development of large format hotels with larger scale that added function and meetings spaces of substance in key cities. Domestic chains had earlier based their expansion on a combination of asset ownership and management contracts, often weighted more substantially towards asset ownership.

An interesting feature of hotel supply in India is the lack of scale – hotels tend to have lesser number of rooms than in several other international markets. Larger inventories help create economies of scale and enable hotels to widen their demand reach across varied demand segments, such as MICE and groups. This also creates benefit of larger revenue capture from F&B elements, besides benefitting costs due to economies of scale. While the varied demand sources and need for larger core occupancies may impact the ADR levels at larger hotels – relative to say a hotel of comparable standards but with lesser inventory and more business segment focused demand in the same market, the overall revenue and profit gain is often beneficial.

New supply since the financial year 2001 has seen a modest increase in willingness of developers to build larger hotels. Nevertheless, the number of hotels with sizeable inventory still remain very modest. New supply is predominantly of small to medium sized inventory, reflecting minor to moderate changes in the last 17 years. As of financial year 2018, the average room size for hotels in the luxury, upper-upscale, upscale categories is 208, 169 and 126 respectively. This compares to 585, 398 and 152 for assets in our portfolio for respective categories.

Most markets have moved to the right in the graph above by the financial year 2018, relative to the financial year 2015, indicating sizeable occupancy improvements. The vertical movement has been rather limited with Goa and Mumbai recording bigger gains. This is a result of a combination of factors including a slow economy and investment climate, financial sector stress, demand and occupancy pressure exacerbated by new supply arising from delayed completion of projects. Further, lower city-wide ADR is also an outcome of changing supply composition – as more mid-priced sector hotels come on board, the overall city rate levels naturally decline. On the other hand, ADR has improved in Mumbai and Goa on the back of consistently ‘busy’ occupancy levels.

The following chart sets forth the overall performances of key markets in India for the first quarter of the financial year 2019 as compared to the first quarter of the financial year 2018:

Source: Smith Travel Research and Horwath HTL

The performance of the key markets for the first quarter of the financial year 2019 reflected improved occupancy levels and ADR relative to the first quarter of the financial year 2018, except for the decline in occupancy levels in Bengaluru, primarily due to supply additions of approximately 1,000 room between the first quarter of the financial year 2018 and the first quarter of the financial year 2019. However, ADR increase in Bengaluru has resulted in a RevPAR increase of 7.9%.

The following table sets forth the RevPAR percentage change of the first quarter of the financial year 2019 as compared to the first quarter of the financial year 2018 for market where Chalet Hotels Limited has a presence:

Mumbai	5,740	6.9%
Bengaluru	4,048	7.9%

Overview of Key Impact Factors

Tourism

Foreign Tourist Arrivals (FTA)

FTA for the financial year 2018 was reported at 10.5 million by the Department of Tourism, Government of India. Year-on-year FTA grew by 1.33 million in the financial year 2018. In five years from financial 2014 to 2018, FTA grew by 3.8 million which is over 90% of FTA growth numbers of 4.2 million for the previous ten years from the financial year 2004 to 2013. The e-visa scheme was made available for foreign visitors with effect from November 2014. This has been extremely successful in attracting inbound travel, particularly as visitors can come in with short lead-time for the trip. The leisure sector, MICE and business travel is expected to materially benefit from this facility.

The following chart reflects the foreign tourist arrivals in India for the period indicated below (in millions):

Source: Ministry of Tourism, Government of India

Domestic Tourism

Travel volumes, in terms of visits by domestic travellers, have grown at 13.7% CAGR between calendar year 2001 and calendar year 2016. Although hotels and resorts in India secure only a small percentage of the overall domestic travel in the country, this segment is an increasingly important demand generator for the hotel sector. Domestic travel numbers have grown nearly seven times, from 236.5 million visits in 2001 to 1.61 billion visits in 2016.

Access Infrastructure

Better travel infrastructure, in terms of better roads and airports, is a major benefit for domestic travel whether for business, leisure, MICE or social purposes. Infrastructure projects such as the Golden Quadrilateral program creates greater travel facility within regions and enable speedy vehicular movement combined with a major increase in the vehicular options and the mind-set for short duration vacation with road journeys. The upgraded road infrastructure has helped develop demand and resort capacity in several markets.

Air Traffic

Passenger movement at these key markets for the Company grew at 9.3% CAGR between the financial years 2008 and 2018, with 10.4% CAGR growth was achieved on all-India basis. CAGR between the financial years 2015 and 2018 was 15.6% and 17.5% for key cities and all-India respectively

Business Travel

Business Travel comprises inbound and domestic visitation for business related purposes. This includes travel on corporate account and by individual business travellers. This segment is a predominant source of demand for hotels located in primarily business oriented locations.

Select hotels also secure up to 15% of total demand from the extended stay segment i.e. guests staying for 15 days and longer in connection with projects, training programs, transfers and new jobs in a given location. Such demand particularly arises in luxury-upper upscale and upscale hotels. Of course, long stay demand is the core element of business for serviced apartment facilities such as MEA owned by the Company in Mumbai.

Leisure Travel

Leisure travel comprises vacation travel, including short duration vacations. Greater affordability, changing attitudes towards lifestyle, and improved road and air connectivity have materially encouraged short stay vacations including on weekends and extended weekends when a public holiday combines with a weekend as does occur two to four times every year.

Currently this demand is more predominant at upper tier hotels though it has now started percolating to upscale and other hotels in some cities. Leisure travel will predominate for hotels that are in essentially leisure destinations such as Goa, Jaipur and Udaipur. City centre hotels in mainly business cities may secure some staycation business or even some leisure business if the city has the draw for this, for example New Delhi.

MICE Visitation

MICE visitation is mainly corporate driven for conferences, training programs and other events that are of customer-facing intent. MICE demand tends to carry price sensitivity; such demand with optional timing may choose off-season months to enjoy lower rates at better quality hotels. Hotels in predominantly business locations will generate MICE demand for training and corporate seminars – these could be day events or residential events. Conferences that include recreation elements (incentives and rewards for dealers, staff or industry players and events that select a location in order to combine work with recreation for delegates) choose city centre locations and resort destinations.

At present, MICE events are hosted in hotels (mainly premium and upscale hotels) with large function spaces. These hotels have gained material revenue scale and diversified business segments from making the investment in such large meeting and function spaces. It is also important to recognize that these hotels will not lose their primacy when convention centres are set up in cities because there are numerous needs for events which are of a size that are not suitable for large convention centre. Further, convention centres are not truly suitable for weddings and social events.

Weddings and social travel

Weddings and social travel involve mainly domestic visitation for participating in family weddings, destination weddings and other wedding related or family celebrations (such as anniversaries). Wedding and social event demand will of course gravitate to hotels that have the function areas, guest room capacity and also the quality to host such events at a level consistent with the status of the host. Amongst the Company hotels, JW Marriott Mumbai Sahar and Renaissance Mumbai Convention Centre Hotel both of which have substantial function spaces (covered and open lawns) and large rooms inventory, are oriented towards attracting and servicing wedding demand; these hotels are amongst the main venues for corporate and social MICE or events and weddings in Mumbai.

Airlines and airline crew

This demand set helps create a core of demand at hotels, albeit at significantly discounted pricing. Crew demand could arise from international and domestic carriers – while the major international airlines will use upper tier hotels, more price sensitive airlines are open to using upper midscale hotels. Airlines also need to use hotels for layovers in case of significantly delayed flights. This demand is relatively nominal and mainly occurs at hotels that are closer to the airports. In such cases, airlines will prefer more moderately priced hotels that are nevertheless of good standard.

Transit demand

Persons at overnight transits between cities also need to use hotel accommodation which is typically located close to the point of onward journey. Transit demand could occur on the inward and/or outward leg of international travel or for travel between cities that are connected through a regional hub.

Barriers to Entry

Development of hotels in India faces several challenges, principal among which are:

Land: Availability of land at locations that are suitable for hotels, and high cost of available land, create limitations on hotel development and viability. Limited development rights and end-use restrictions on available sites create further challenges. These factors often result in development of hotels with limited inventory.

Regulatory approvals: Hotel projects require several regulatory approvals and licenses, before implementation of the project and upon its completion prior to opening. The process of obtaining approvals can be time consuming and materially adds to the development lifecycle. Uncertainties associated with the timing of approvals have often caused delays in opening of hotels, these delays significantly add to interest cost during construction period and pressure on debt service obligations. Additionally, cost escalations occur due to delayed completion impacting project viability, funding of completion and initial operations, and project quality.

Financing and capital Requirement (Equity and Debt): In the backdrop of several hotel projects which are in debt default, bankers are extremely selective in providing development finance for hotel projects. Further, interest rates tend to be high - currently in the range of 10% to 14% with the lower range only being available to borrowers with established credibility. In addition, hotel projects require sizeable equity capital for project development and to meet cash shortfalls during operations. Shortage of suitable equity capital is a significant constraint towards development of hotels, particularly a portfolio of assets or hotels with large inventory of rooms and other facilities.

Manpower shortages: Manpower shortages are increasing particularly staff and managers with sufficient operating experience and skills for hotel. This poses limitations for all hotels but more specifically for hotel operated by owners as independent properties.

Distressed assets – The hotel industry has seen considerable debt-related stressed assets, including projects that are left incomplete or completion prolonged due to lack of funding. Stress has arisen due to various factors: (a) debt terms, by way of high interest rates and repayment obligations over shorter periods than are generally impracticable for hotels; (b) higher project costs emanating from delays, such delays caused by funding, regulatory approvals and project execution issues; and (c) slower demand growth due to slow general business conditions. The stressed assets create acquisition opportunities for interested investors.

Hotel ownership

Ownership was initially concentrated among hotel chains. At the end of financial year 2001, about 69% of chain affiliated inventory was chain owned. Chain ownership of hotels has slowed and is estimated at about 29 % of total chain affiliated inventory at the financial year 2018. With decline in chain investment into hotels, particularly

as international chains penetrated the market, investment was effected by private developers – developer / institutional investor ownership of hotels is scattered with very limited concentration. Only ten parties have ownership of more than 1,000 rooms and the aggregate inventory with these ten parties is about 18,700 rooms (about 14% of total chain affiliated inventory). According to Horwath HTL, we are amongst two asset owners or developers which own over 2,000 rooms in luxury and upper upscale segment as of March 31, 2018.

The chart below illustrates the change in occupancy, ADR and RevPAR across India between the financial years 2007 and 2018:

Source: Smith Travel Research and Horwath HTL

The hotel sector in India experienced a difficult period from late 2008, with a double dip in occupancy. This was primarily due to the demand-supply mismatch caused by substantial supply growth, on the one hand, and slow down of demand on the other hand. The occupancy rates across India stagnated at 57% between the financial years 2012 to 2014 and grew marginally in the financial year 2015. During financial year 2012 to 2015, 44,000 rooms were added creating nearly 70% new capacity; simultaneously the economy and demand patterns were slow.

Slowdown of occupancy invariably leads to rate decline thereby impacting RevPAR levels. Occupancy has revived since the financial year 2014 and more notably from the financial year 2015, as demand conditions have improved and new supply has slowed. The upward trend in RevPAR has mainly been occupancy led, and is expected to continue or gain momentum. ADR levels are expected to improve, slowly in some markets and more strongly in some other markets which are already experiencing strong occupancy, as demand and occupancy levels improve. Between the financial years 2015 and 2018, demand growth for luxury-upper upscale and upscale-upper midscale segments exceeded the supply growth and there was growth in ADR during this period resulting in positive RevPAR growth. Luxury-upper upscale occupancy increased from 59.9% in the financial year 2015 to 65.4% in the financial year 2018 with supply growth of 8,700 rooms. For the upscale-upper midscale segment, occupancy improved from 56.8% in the financial year 2015 to 65.6% in the financial year 2018 absorbing about 16,400 rooms during this period. RevPAR growth for these segments is higher than the all India RevPAR growth during this period by increase in both occupancy and rates reflecting the growth potential of this segment.

RevPAR trends have been positive across at all India level and across most of the select markets. Although positive, the absolute amounts still remain modest across the country. Luxury–upper upscale and upscale-upper midscale year-on-year RevPAR growth was higher than the all India average for both years (financial year 2017 and 2018). Growth in the financial year 2018 was lower than in the financial year 2017 because of relatively higher supply growth in the financial year 2018.

Bengaluru: Bengaluru which has good supply balance between segments has seen good growth in the upscale and mid-tier segment. RevPAR growth in the luxury–upper upscale segment has been slow. The growth was a moderate 2.7% in the financial year 2017 while in the financial year 2018 the RevPAR declined by 0.6%. This was due to addition of about 1,200 new rooms since the financial year 2015 of which 500 rooms have been added in the financial year 2018.

Mumbai: RevPAR growth for Mumbai at the luxury–upper upscale level between the financial year 2016 and 2018 has been driven mainly from ADR increase. The increase has however been modest in absolute terms (between INR 300 to 400) in these years, despite no supply growth during this period. City occupancy crossed 75% in the financial year 2018, however growth is impacted by limited business on weekends for hotels.

Hyderabad: Hyderabad has gained from return of demand and growth in the general market, after resolution of the Telangana statehood issue. City occupancy crossed 65% in the financial year 2018 - first time since the financial year 2009.

Outlook for Select Geographical Markets in India

Mumbai: luxury–upper upscale and upscale

Positive business conditions are expected to increase the demand for hotels, occupancy and ADR across all segments. ADR is expected to grow at a faster pace than in recent past years, arising mainly from high occupancies and moderate new supply. The supply for new luxury-upper upscale hotels is expected to be located in north and central Mumbai with the upscale supply located mainly in north and north-eastern Mumbai and the Navi Mumbai market area. A new convention centre in Bandra Kurla Complex is expected to increase demand, with limited room inventory in its vicinity. This is expected to help increase overall demand in north Mumbai. Business travel and MICE are expected to be the main sources of demand sources. Demand from airline crew is expected to continue to grow and may result in increased demand for hotels outside the upper tier, in the event ADR levels rise.

Bengaluru: luxury- upper upscale

There has been a continued supply growth for hotel rooms in Bengaluru, 360 new rooms have been added in April 2018 and 280 rooms are expected to be added over the next two months. With strong demand during working weekdays, new supply is expected to ease weekday pressure in the medium term. Horwath expects rate pressure from regular supply expansion, across segments. The market experiences lack of demand diversity and is dependent on business travel. There is a potential for demand from aerospace and defence sectors. Micro-market factors are expected to impact hotels in different zones in the city. Two new upper upscale hotels opened in Whitefield, with 226 rooms in December 2017 and 360 rooms in April 2018. This will have short to medium term impact on hotels in this competitive set.

Hyderabad

Moderate supply growth of 1,489 rooms is expected by the financial year 2022, with 271 rooms in luxury-upper upscale segment and 670 rooms in the upscale segment. 271 rooms of ITC hotel in competitive zone of The Westin Hyderabad Mindspace are expected to open in June 2018. Whilst this is expected to have only modest impact on The Westin Hyderabad Mindspace, it may impact other hotels in the area more significantly. There is expected to be 32.6 million square-foot of new commercial space expected by December 2020. The state government is actively promoting investment in the city and state. In addition, good airport and excellent road infrastructure is expected to attract fresh investment. There is also a potential to capitalise on a convention centre, which did not occur in its initial years due to uncertainties from political agitations.

*For four hotels in this segment.

Note: (i) JW Marriott Mumbai Sahar opened in February 2015 and has been in market penetration phase in the last 3 years, up to financial year 2018. The hotel is positioned as a luxury hotel and has the largest inventory in Mumbai in that segment; (ii) Renaissance Mumbai Convention Centre Hotel was under phased renovation in the financial years 2016 and 2017. Consequently, available rooms inventory was smaller, the three meal restaurant was closed for 8 months in the financial year 2018 and the spa was closed for 4 months in the financial year 2017; (iii) MEA was also renovated over a period of 36-38 months between 2011 and 2014; and (iv) 67 rooms were added at Bengaluru Marriott Hotel Whitefield effective April 2017, increasing its available inventory by 21%.

The Company hotels have large rooms inventory, enabling substantial revenue share for the rooms department. F&B revenue is also material, benefitting from large function spaces at two of its hotels. Improved GOP is a function of more stabilised operating levels at the Mumbai hotels and the benefit of sizeable revenue contribution from rooms department which typically has materially larger margins compared to other departments such as F&B.

The Company has two hotels with large function and meeting spaces – JW Marriott Mumbai Sahar and Renaissance Mumbai Convention Centre Hotel. Both hotels have achieved material revenue from the F&B and banquet operations. On a combined basis, these hotels had F&B revenue at 80% of room revenue in the financial year 2016 and 72% of room revenue in the financial year 2017. Function revenue for the financial year 2017 was undoubtedly impacted by the demonetization in November 2016, causing a dent in revenue growth which was restricted to 7.6%. On the other hand, rooms' revenue grew nearly 20%. It is important to recognize that the large rooms' inventory and the significant function spaces support each other, creating rooms and banquet demand to the overall benefit of the hotel.

Comparison of Company hotels with segmental performance in each market

The performance of individual Company hotels is presented as occupancy index, ADR index and RevPAR index. Occupancy index = Occupancy of hotel / Occupancy of market. Similar calculation basis is used for ADR index and RevPAR index.

An occupancy index of greater than one indicates that hotel's occupancy is higher than market occupancy; an index of one indicates that hotel's occupancy is equal to the market occupancy and an index of less than one indicates that the hotel's occupancy is lower than the market occupancy. Similar interpretation basis applies for ADR index and RevPAR index in this report.

JW Marriott Mumbai Sahar

JW Marriott Mumbai Sahar opened in February 2015 and has steadily penetrated the luxury-upper upscale segment in its market area of Eastern Suburban Mumbai, as seen from the table below.

Luxury-Upper Upscale – Eastern Suburban Mumbai					
	FY 2016	FY 2017	FY 2018	Q1 FY 2018	Q1 FY 2019
Occupancy Index	0.62	0.92	0.99	0.94	0.97

RevPAR Index	0.62	0.96	1.03	0.99	1.03

Source: Smith Travel Research and Horwath HTL

By the end of its third full operating year, the hotel has starting deriving ADR and RevPAR premium in the luxury-upper upscale segment of Eastern suburban Mumbai. About 70% of the increase in rooms demand per day for between the financial year 2016 and 2018 in the Eastern Suburban luxury-upper upscale market accrued to the benefit of JW Marriott Mumbai Sahar.

The following table sets forth the performance of JW Marriott Mumbai Sahar, relative to aggregation of hotels with large inventory:

	Index of JW Marriott Mumbai Sahar to large hotel compsets								
	(Luxury-upper upscale segment for FY 2018)			(Luxury-upper upscale segment for Q1 FY 2018)			(Luxury-upper upscale segment for Q1 FY 2019)

The comparative data has been restricted to Luxury-Upper upscale hotels that participate with Smith Travel Research.

JW Marriott Mumbai Sahar has achieved nominal to sizeable premiums over large sized hotels on all-India basis, with only a limited catch-up to be done on the rate front in Mumbai; having achieved its fair-share of demand, rate improvement can reasonably be expected to follow.

Renaissance Mumbai Convention Centre Hotel

Renaissance Mumbai Convention Centre Hotel was impacted by a phased renovation program covering about half the hotel rooms and several public areas.

The following table has been presented on a full inventory basis:

Luxury-Upper Upscale – Eastern Suburban Mumbai					
	FY 2016	FY 2017	FY 2018	Q1 FY 2018	Q1 FY 2019
Occupancy Index	0.87	0.83	0.89	0.88	0.99
ADR Index	0.99	0.94	0.87	0.91	0.87
RevPAR Index	0.87	0.78	0.77	0.80	0.86

Source: Smith Travel Research and Horwath HTL

Renaissance Mumbai Convention Centre Hotel has substantial focus on MICE and events demand; when compared to a market set that includes luxury hotels and hotels with smaller inventory focused more on business travellers, Renaissance Mumbai Convention Centre Hotel will understandably stand discounted on the ADR front. Renaissance Mumbai Convention Centre Hotel needs to regain the business that was dropped during the renovation period and thereby improve its occupancy and rate index. Its rate declined in financial year 2018 at a

time when the eastern suburban market rates grew for the Luxury-Upper Upscale segment. On comparison of the increase in demand between the financial years 2017 and 2018 in luxury-upper upscale segment in Eastern Suburban Mumbai, Renaissance Mumbai Convention Centre Hotel alone has contributed to one third of the demand growth consequent to its full inventory becoming operational after the renovation. When combined with JW Marriott Mumbai Sahar, both these hotels have contributed to almost two-thirds of this demand growth in luxury-upper upscale segment in the micro market. Going forward from the financial year 2018 to the first quarter of the financial year 2019, the Renaissance Mumbai Convention Centre Hotel has improved its occupancy index while retaining its ADR index at the same level as the financial year 2018 index.

The Westin Hyderabad Mindspace

The Westin Hyderabad Mindspace, is among the lead performing hotels in Hyderabad. Its performance is compared to the luxury-upper upscale segment performance for the New Business District micro market:

	Luxury-Upper Upscale – New Business District*

*-comprises of hotels in Hitech City, Gachibowli, Madhapur and Kondapur area (as defined by Smith Travel Research)

Hyderabad is a business city with limited travel for leisure, recreation and destination based social events. MICE demand is also largely corporate and business based. As such, demand and occupancy challenges on weekends create limitations on occupancy growth beyond a level. This principally explains the narrowing occupancy index; while occupancy at The Westin Hyderabad Mindspace grew 3.2 pts and 2.8 pts respectively in the financial years 2017 and 2018, other hotels have also registered growth due to improved weekday demand, thereby seemingly narrowing the occupancy index premium for The Westin Hyderabad Mindspace.

Bengaluru Marriott Hotel Whitefield

Bengaluru Marriott Hotel Whitefield is a significant player in the Whitefield market. Its location and positioning in a key business district of Bengaluru enables the hotel to gain sizeable premium over luxury-upper upscale hotels in the micro market. The hotel has also had an expansion and a strategic contract that seemingly impacts overall numbers. The Company management is confident that the overall gain from the strategic contract will be material.

	Luxury-Upper Upscale – Whitefield & Sarjapur			
	FY 2017	FY 2018	Q1 FY 2018	Q1 FY 2019
Occupancy Index	1.14	1.11	1.11	1.48
ADR Index	1.17	1.12	1.08	1.08
RevPAR Index	1.33	1.24	1.20	1.60

Source: Smith Travel Research and Horwath HTL

The hotel added 67 rooms effective April 2017 and an office tower with 300,000 square foot of commercial space; as part of the overall contract. The new rooms are fully occupied by a single occupant albeit at a discounted rate that is typical of such long-term commitments. Consequently, the Bengaluru Marriott Hotel Whitefield enjoys 100% occupancy for these new rooms. Ignoring these rooms and the contracted commitments therefore, the hotel achieved 12.6% ADR growth for the financial year 2018, although occupancy declined by 3.9%, the RevPAR increased by 2.7%. A new competitive hotel with 226 rooms opened in the immediate market in December 2017 and added materially to the competitive inventory. The gain in occupancy index was primarily due to limited occupancy growth achieved by the hotel while occupancy for the comparable market declined due to the impact of new supply.

Four Points by Sheraton, Navi Mumbai, Vashi

Four Points by Sheraton Navi Mumbai, Vashi has lead the Navi Mumbai market as summarised below:

Upscale-Upper Midscale – Navi Mumbai & Thane

	FY 2016	FY 2017	FY 2018	Q1 FY 2018	Q1 FY 2019
Occupancy Index	1.04	1.09	1.07	1.02	1.07

RevPAR Index	1.42	1.45	1.40	1.37	1.46

Source: Smith Travel Research and Horwath HTL

The hotel has enjoyed occupancy at 86.8% to 88.0% in the three years of the financial year 2016 to 2018. Strong rate premium is helping the hotel to get RevPAR premium of about 42% to 45% over financial years 2016 to 2018, while comparing it with the upscale & upper midscale hotels in Navi Mumbai and Thane. If we compare the performance against all hotels in Navi Mumbai and Thane, the RevPAR premium for Four Points by Sheraton Navi Mumbai, Vashi is between 66% and 69% over the same period. The micro-market is seeing strong demand and this augers well for the new upscale hotel with 260 room under development by the Company in Airoli.

Commercial and Retail Real Estate Market in India (Source: CBRE, cbre.co.in)

Overview

The Indian economy's growth rate reached a five-quarter high of 7.2% during the quarter ended December 2017, compared with 6.5% in the previous quarter. The upward momentum was largely attributed to the continued recovery of the manufacturing sector, which grew by 8.1%. In addition, sectors such as trade, hotels and transport (9%), and public administration, defence and other services (7.2%) also contributed to this strong momentum. The construction sector's performance improved sharply as it grew by 6.8% compared with 2.8% in the previous quarter. Moreover, the growth of real estate services (along with financial, insurance and professional services) sector increased from 6.4% to 6.7% during the review period. However, despite the visible recovery in quarterly GDP, the Reserve Bank of India continued to project 2017-2018 growth rate at 6.6%.

According to CBRE Research, after rising to 5.2% in December 2017, retail inflation (measured by consumer price inflation) continued on its downward curve, declining to 4.4% in February 2018. In February 2018, the Monetary Policy Committee also estimated inflation at 4.3% to 4.7% during the second half of 2017 and 5.1% to 5.6% during the first half of 2018. Due to the constant fluctuation in inflation, the central bank has decided to keep lending rates stable for now at 6.0%. However, if inflation continues to pose a challenge, the bank might become inclined towards adopting monetary tightening measures in 2018.

Recent disruptions in the technology sector does not seem to have significantly affected the overall leasing activity in the country. Moreover, growth in other sectors appears to have helped plug the gap created by reduced leasing by most Indian tech firms. Despite a drop in its share in office space take-up in India, technology corporates remained the biggest demand driver with a share of 25% during the first quarter of 2018.

Strengthening Domestic Demand and Governmental Reforms

According to CBRE Research, while 2016 was a year of policy announcements, 2017 saw their implementation. Last year, the government finally implemented several policies, initiatives and reforms it had announced over the past two years, infusing positively in the real estate landscape. 2018 is expected to be a year of fructification as these initiatives are likely to bear fruit.

Commercial and Office Real Estate Sector

According to CBRE Research, due to sustained occupier interest, leasing activity rose by about 25% on a yearly basis and crossed 10 million square feet during the first quarter of 2018. Bengaluru remained a key driver of office leasing in India, accounting for more than the combined share of other markets such as Delhi-NCR, Mumbai and Hyderabad. Except Bengaluru, Mumbai and Kochi, all other cities witnessed a marginal dip in space take-up on a quarterly basis.

As in the previous quarters, office space take-up was dominated by small and medium sized transactions. Small-sized transactions (less than 10,000 square feet) accounted for about 45% of the transaction activity in the quarter, while mid-sized transactions (ranging between 10,000 square feet and 50,000 square feet) held a 42% share. The share of large sized deals (greater than 100,000 square feet) marginally dipped from 5% in the previous quarter to about 4% in the first quarter of 2018. Bengaluru dominated large-sized deal closures, while a few deals were reported in Mumbai, Delhi-NCR, Chennai and Hyderabad. Sectors such as technology, e-commerce, banking/financial services and insurance (BFSI), and engineering and manufacturing dominated large-scale deal closures.

According to CBRE Research, supply addition more than tripled on an annual basis, with about 9.7 million square feet of development completions being reported during the first quarter of 2018. Four cities – Bengaluru, Mumbai, Chennai and Delhi NCR – accounted for more than 80% of the quarterly supply addition, followed by Pune. Strong supply addition was a key driver of the increase in transaction volumes in the current quarter.

Sustained occupier interest resulted in rental values rising by about 1% to 7% on a quarterly basis across several micro-markets in Bengaluru, Hyderabad and Pune. Rental growth remained limited to core locations in Delhi-NCR and Chennai during the first quarter.

Mumbai

According to CBRE Research, there has been a quarter-on-quarter increase in the leasing activity.

Sustained interest from occupiers accounted for more than half of the city's overall leasing activity in Secondary Business District and Peripheral Business District (Powai, Vikhroli). Primary space taken-up dominated leasing activity, owing to the availability of space in recently completed investment-grade developments.

According to CBRE Research, demand was primarily driven by BFSI firms which took up small and medium sized spaces across micro-markets. Although small to medium sized deals continued to dominate leasing activity, the quarter also witnessed a large-sized deal (greater than 100,000 square feet) involving a leading co-working operator in Goregaon Peripheral Business District. Co-working operators also took up space in Andheri Secondary Business District. In addition, a few medium-sized transactions (70,000 to 80,000 square feet) involving firms from sectors such as infrastructure, real estate and logistics were also reported.

Rental values remained stable during the review period across all micro-markets.

The table below sets forth the key statistics of sub market:

Micro-market	Average rent in Quarter 1, 2018 (INR / square feet / month)	Average rent in Quarter 4, 2017 (INR / square feet / month)	Quarter-on-Quarter Change (%)	Year-on-Year Change (%)
Secondary Business District (Andheri, Vile Parle, Jogeshwari) Grade A	115	115	0.0	0.0
Peripheral Business District (Powai, Vikhroli) Grade A (IT)	100	100	0.0	0.0

Bengaluru

There has been a quarter-on-quarter increase in the leasing activity.

According to CBRE Research, office space take-up remained concentrated in non-SEZ developments, with Outer Ring Road and Central Business District dominating leasing activity, followed by Extended Business District. Transaction activity mostly consisted of space take-up (and culmination of pre-commitments) in recently completed developments in Peripheral Business District (Whitefield, Electronic City) and Outer Ring Road.

Leasing activity was primarily driven by BFSI corporates followed by e-commerce, research, consulting and analytics and tech firms. Co-working / business centre operators continued to be active in the city. Small-to-medium sized deals dominated leasing activity, with a few large-sized deals being closed in Outer Ring Road.

According to CBRE Research, sustained occupier interest led to a 2% to 7% quarterly rental appreciation across non-SEZ buildings in all micro-markets. Due to lack of available space, rentals of SEZ developments in Outer Ring Road and North Bengaluru District increased by about 1% to 3% on a quarterly basis.

The table below sets forth the key statistics of sub market:

Micro-market	Average rent in Quarter 1, 2018 (INR / square feet / month)	Average rent in Quarter 4, 2017 (INR / square feet / month)	Quarter-on- Quarter Change (%)	Year-on-Year Change (%)
Peripheral Business District (Whitefield, Electronic City) Grade A	45	42	7.1	12.5

Retail Real Estate Sector

According to CBRE Research, the Indian retail real estate market witnessed continuous foray of international brands, launch of new retail developments and robust demand for space in the second half of 2017. The second half of 2017 saw an addition of about two million square feet of fresh supply across the seven key cities; majority of which was concentrated in Kolkata, Delhi NCR, Chennai, Pune and Bengaluru. Supply on an annual basis was around 3.4 million square feet, almost in line with the supply that entered the key cities in 2016.

The demand for retail space remained strong as several international brands such as Tom tailor, Simon Carter and Jo Malone opened their first outlets in India, while others such as H&M and Starbucks continued to expand operations.

According to CBRE Research, a key noticeable trend in 2017 was retailers adopting an “omni-channel” strategy to connect with their consumers; whereby leading e-commerce players such as Urban Ladder and Pepperfry forayed into the brick and mortar space and set up their experience centers, while established retailers such as Zara launched their online channel in India in October.

Rental trends varied across key high-streets in major cities during the second half of 2017. High street markets such as Brigade Road and Commercial Street observed an appreciation in rentals, while rents maintained stability across most of the other high-streets in India.

According to CBRE Research, the second half of 2017 was upbeat from a policy perspective with further easing of the FDI norms. The key initiative to further encourage FDI inflows in the retail sector came in January 2018 when the Government allowed up to 100% FDI in single-brand retail through the automatic route. The policy initiative would further ease the entry of international retailers in India.

Bengaluru

According to CBRE Research, the average market rental in the East Bengaluru Retail Market (Airport Road, Ulsoor and Whitefield) is estimated to be ₹ 125-130 per square feet per month in the second half of 2017.

We generally develop our hotels on large land parcels, allowing us to situate a greater number of rooms, as well as provide a wide range of amenities, such as, fine dining and specialty restaurants, large banquet and outdoor spaces. We endeavour to build our hotels to superior standards targeting the luxury-upper upscale and upscale hotel segments at an efficient gross built up area and development cost per key.

We believe we have a competitive advantage in key metro cities due to, the significant time outlay required to build and establish a profitable hotel or commercial project, our early mover advantage in large, mixed-use developments in specific micro-markets and availability of unutilized land at certain of our hotel properties to further expand our operations, among others.

We seek to brand our hotels with leading global hospitality brands, which we believe are well matched to the location, size, target customer base and intended hotel segment of our hotel properties. This allows us to save on the time and cost required to build, develop and maintain our ‘own hotel brand’. We also determine, by detailed financial and operational analysis, whether hotel operations should be undertaken directly by us or by engaging third party hotel operators. Currently, our hotel at Vashi, Navi Mumbai, is operated by us under a license agreement with Marriott, and four of our hotels, including our serviced residence, are operated pursuant to hotel operation and related agreements with Marriott.

We follow an active asset management model for our hotels operated by third parties, pursuant to which we closely monitor, and exercise regular oversight over, the performance of our hotel properties. Among other things, we discuss and agree on budgeting and operational and financial targets, review performance reports, engage with the hotel management team at each hotel by conducting detailed monthly performance review meetings and provide regular inputs on cost saving initiatives and potential improvements. We believe that our active asset management model, the premium location of our hotels, our large room inventory and large function spaces, together with our relationship with international hospitality brands, has allowed our hotels to achieve competitive financial and operational parameters. For example most of our hotels have higher ADR, occupancies and RevPAR

compared to the average of other hotels in their respective micro-markets and hotel segments, for the financial year 2018, according to the Horwath Report. See “**Industry Overview**” on page 133.

Competitive Strengths

High-End Branded Hotels Strategically Located in Key Metro Cities of India

We are an owner, developer and asset manager of high-end hotels in key metro cities in India. Our hotel platform comprises five operating hotels, including a hotel with a co-located serviced residence, located in the Mumbai Metropolitan Region, Hyderabad and Bengaluru, representing 2,328 keys, as of September 30, 2018. Our hotels are branded with globally recognized hospitality brands and are in the luxury-upper upscale and upscale hotel segments, according to the Horwath Report. Our hotel platform emphasizes strategic locations, efficient design and development, appropriate positioning in hotel segments together with branding and operational tie-ups with leading hospitality companies.

All our hotel assets are located in high density business districts of key metro cities in India, according to the Horwath Report. We have developed our hotels at strategic locations generally with high barriers-to-entry. For example, we have a hotel in Sahar, Mumbai and another located across 15 acres at the banks of Powai lake, both in proximity to Mumbai’s international airport. Similarly, our hotel in Vashi, Navi Mumbai is located close to new business districts and the proposed international airport and our hotels in Hyderabad and Bengaluru are located near the offices of major technology corporations, business centres and retail and commercial facilities. Our design and development team manages construction, design, approval and engineering for our projects and utilizes modern technology for quicker and more efficient development of our properties. We generally locate our hotels on large land parcels, allowing us to situate a greater number of rooms, as well as provide a wide variety of amenities such as fine dining and specialty restaurants, large banquet halls, ball rooms and executive lounges, swimming pools and outdoor spaces, spas and gymnasiums. For example, our four largest hotels have 773, 585, 427 and 391 keys, respectively as of September 30, 2018.

We seek to brand our hotels with leading global hospitality brands, which we believe are well matched to the location, size, target customer base and intended hotel segment of our hotel properties. This allows us to save on the time and cost required to build, develop and maintain our ‘own hotel brand’. Currently, all our hotels are branded with global brands, such as, JW Marriott, Westin, Marriott, Marriott Executive Apartments, Renaissance and Four Points by Sheraton, which are held by Marriott. We believe that our active asset management model, the premium location of our hotels, our large room inventory and large function spaces, together with our relationship with leading international hospitality brands, enables us to attract our target customer base including large

corporate key accounts such as information technology companies, airlines, multi-national corporations, consultancy firms and banks, deliver an enhanced customer experience, encourage repeat business and drive customer loyalty.

Active Asset Management Model

We follow an active asset management model for our four hotels, including a hotel with a co-located serviced residence, which are operated by Marriott pursuant to hotel operation and related agreements. These agreements give us access to Marriott's management expertise, industry best practices, online reservation systems, marketing strategies, systems and processes, human resources and operational know-how. Our active asset management model entails that in addition to contractual obligations under agreements with Marriott, we closely monitor, exercise regular oversight and contribute to the performance of our hotel properties. As part of our active asset management model, we regularly:

- engage with the hotel management team at each hotel in order to discuss and agree on budgeting, cost management initiatives and operational and financial targets for each of our hotel properties. For example, we conduct detailed performance review meetings each month with the hotel management team to assess hotel performance on a host of parameters and provide regular inputs on cost saving initiatives and potential improvements;
- review performance reports generated by each hotel;
- conduct periodic meetings with hotel operator's management teams;
- discuss and optimize pricing strategies to maximize room yield by active monitoring of key corporate accounts and provide inputs on promotional activities;
- review furniture, fixtures and equipment deployment plans and assist with execution of these plans;
- review competitor set performance and penetration across relevant micro-markets; and
- assist in renewing licenses and consents, as necessary.

We believe that our active asset management model, the premium location of our hotels and our large room inventory together with large function spaces, together with our relationship with leading international hospitality brands, has allowed our hotels to achieve competitive financial and operational parameters. For example most of our hotels had higher ADR, occupancies and RevPAR compared to the average of other hotels in their respective micro-markets and hotel segments, for the financial year 2018, according to the Horwath Report.

Well Positioned to Benefit from Industry Trends

According to the Horwath Report, growth in per capita income, changing demographic dynamics, rising urbanization, growth in travel and higher discretionary spending trends, are expected to assist the growth of the hospitality industry in India. Given our presence in key metro cities which are expected to benefit from the growth in these parameters, we are well placed to benefit from the potential growth opportunity. We believe we have a competitive advantage in the key metro cities due to the significant time outlay required for companies to build and establish a profitable hotel or commercial office space or mall and our early mover advantage in large, mixed-use developments in specific micro-markets. Further, the availability of land with our company in proximity to our developments for further expansion and high entry costs to develop projects in metro cities where our developments and projects are located, provide us with an advantage in our relevant micro-markets.

Further, according to the Horwath Report, the luxury-upper upscale hotel segment is expected to witness a growth in the MICE (meetings, incentives, conferences and events) segment. We believe that given our presence in key metro cities and size of our hotels, including large sized banquet, outdoor and conferencing facilities, particularly at our hotel at Sahar Mumbai and at our hotel and convention centre at Powai, Mumbai, we are well-positioned to benefit from the growth potential in the MICE segment, facilitating both domestic and international business meetings and conferences. We believe, the technology and facilities available at our properties in addition to their locational advantage will allow us to capture the expected growth in this segment.

According to CBRE Research, due to sustained occupier interest, leasing activity for commercial and office real estate rose by about 25% on a yearly basis and crossed 10 million square feet during the first quarter of 2018. Further, according to CBRE Research, the Indian retail real estate market witnessed continuous foray of international brands, launch of new retail developments and robust demand for space in the second half of 2017. We believe we are well positioned to leverage this growth due to our in-depth understanding of the rental market and the needs and preferences of consumers. We believe that our clients have confidence in us, demonstrated by our relationships with several large corporate clients and domestic and global retail brands, including a long-term agreement with a leading global professional services company for 109,228 square feet of commercial space at Whitefield, Bengaluru. Such relationships may help us to secure clients for our new developments and mitigate the risks that may arise from an inability to secure clients for large commercial or retail spaces at suitable rates.

Experienced Management Team

We have a strong management team with significant industry experience. Our Promoters, Mr. Ravi Raheja and Mr. Neel Raheja, have been instrumental in the growth of our hospitality and retail business and actively advise on finance, corporate strategy and planning. Further, our Managing Director and CEO, Mr. Sanjay Sethi has three decades of experience in the hospitality industry, including with leading Indian hotel chains, and across hotel segments. professionals and industry experts, with significant experience across various industries and functions including finance, legal, projects and design, asset management, hospitality and logistics. Our Promoters, Board and management team have demonstrated an ability to enhance our performance by growing our business through different economic and industry cycles. We believe that the strength of our management team and its understanding of the hospitality and real estate market in India enables us to continue to take advantage of current and future market opportunities.

Backed by Leading Indian Real Estate Developer

We are part of K. Raheja Corp group which is a leading business group in India and we believe that we derive significant benefit from the confidence that consumers, lenders, commercial partners, vendors and others place in the group. The K. Raheja Companies have extensive experience in developing large scale real estate and commercial projects resulting in a strong understanding of industry and market trends, which we leverage to identify suitable locations and opportunities. We further leverage the experience and relationships of these companies with construction companies to develop hotels at optimal cost and quality. For example, the average development cost per room (including the cost of land), for our luxury hotel at Sahar, Mumbai, completed in financial year 2015 was ₹ 13.99 million. Further, our hotel project management and design team, works together with the K. Raheja Companies and leverages the experience of K. Raheja Companies' design teams to develop our hotel properties, commercial offices and malls.

Competitive Strategies

Focus on Maximizing Performance in Existing Portfolio through Active Asset Management

A critical part of our growth strategy is to continue our focus on maximizing the cost efficiency of our portfolio by following a disciplined approach to asset management, and a collaborative working arrangement with our hotel operators to drive strategic and tactical initiatives, to drive profitability. Some of the initiatives are listed below:

- alternative and optimal utilization of hotel spaces to maximize and diversify revenue sources besides room revenue by increasing our share of revenue from food and beverage, meeting rooms, club floors, conferences, events and commercial or retail space;
- continued focus on upgrading facilities to work towards a best-in-class experience across our existing hotels by undertaking renovations and rebranding exercises;
- improve staff productivity and efficiency through appropriate training and learning exercises and an optimal use of technology;
- undertake energy saving initiatives that are both cost-efficient and environmentally friendly as well explore shared service opportunities, such as laundry and finance operations, for our hotels located in the same city; and
- ensuring presence of leadership personnel commensurate with the size and scale of each hotel property.

Disciplined Development of Assets in the Current Pipeline

We are in the process of developing three additional hotel projects which are expected to have 588 keys and two projects representing commercial office space with built-up area (excluding car parking/utilities) of approximately 1.12 million square feet. We have traditionally acquired large parcels of land at competitive prices with the intention to develop hotel-led mixed-use projects. We seek to leverage unutilized FSI at some of our hotel locations which allows us to develop additional commercial or retail spaces. For example, we are developing commercial space in Powai, Mumbai and an IT Park in Whitefield, Bengaluru located on unutilized land at our hotel properties. We also intend to focus on developing new hotel-led mixed-use projects in prime locations with development sizes similar to our existing projects, and which feature a combination of hotels, retail developments and commercial office space. Our retail and commercial space under construction is expected to generate regular rental income and cushion the hospitality cash flow cyclicality. Retail and commercial space are also expected to complement the hospitality business and generate synergies within the hotel led mixed-use projects. For example, we believe that the development of our commercial and retail real estate projects in proximity to our hotels will provide benefits to our hotel business for MICE events and assist in driving room occupancy.

Expand Portfolio by way of Opportunistic and Accretive Acquisitions

The hospitality industry in India has recently experienced some consolidation according to the Horwath Report, and we will continue to explore opportunities for acquiring operating hotel assets. The hotel industry has seen considerable debt-related stressed assets, including projects that are left incomplete or completion prolonged due to lack of funding which creates acquisition opportunities, according to the Horwath Report. We seek to leverage our experience and in-house capabilities to acquire operational or near complete hotel assets at an attractive price to reduce replacement cost, initiate turnaround strategies through active asset management, brand repositioning, property enhancement or cost controls and derive benefits of economies of scale. We believe that our asset ownership model allows us the flexibility to acquire a variety of existing branded hotels unlike hotel companies which operate under their own brand.

Further, we will evaluate inorganic growth opportunities, in keeping with our strategy to grow and develop our market share. We may consider opportunities for inorganic growth, such as through acquisitions of operating hotel assets, if, among other things, they:

- are consistent with the positioning and parameters of our existing hotels and which we estimate are high-yielding hotel assets;
- consolidate our market position in strategic micro-markets in key metro cities;
- achieve operating leverage by unlocking potential efficiency and synergy benefits;
- strengthen and expand our portfolio to newer geographies across India which typically attract significant traffic from business and leisure travellers particularly in the NCR, Bengaluru, Pune, Chennai and Goa; and
- enhance our depth of experience and know-how.

Maintain a Sustainable Capital Structure and Ensure Prudent Capital Allocation

We seek to expand our portfolio of hotel properties organically or inorganically, based on industry developments and supply and demand movements across the hotel sector and in and specific locations and micro markets. Our strategy is to invest in buying completed projects in demand dense markets when acquisition costs are low and we are able to obtain financing at suitable rates. We leverage our Company's and K. Raheja Companies' development strength to construct and develop our hotels and thereafter actively manage properties along with a suitable hospitality brand partner. Our approach has allowed us to allocate capital at opportune times to acquire land and build hotels efficiently. Once our hotels are operational, we aim to take advantage of growing demand to maximize revenue and returns by partnering with well-renowned hotel operators, as well as to reduce existing debt. As of September 30, 2018 and March 31, 2018, 2017 and 2016, our Average Cost of Indebtedness (including exchange (gain)/loss) was 12.92% 8.65%, 9.68% and 11.11%, respectively; Average Cost of Indebtedness (excluding exchange (gain)/loss) was 9.09%, 8.73%, 9.82% and 9.18%, respectively and our debt to equity ratio was 5.75, 5.42, 5.59 and 4.51, respectively. We aim to continue to reduce our cost of indebtedness through active evaluation of refinancing and alternative capital sources.

Opportunity for reflagging hotels or renegotiating hotel operation contracts

The hotel operation contracts for our operational hotels, including our serviced residence, at Powai, Mumbai and Hyderabad will be due for renewal in March 2020 and December 2021, respectively. Further, our license agreement for our hotel at Vashi, Navi Mumbai will be due for renewal in December 2021. This provides us with an opportunity to rebrand hotel assets or reposition our properties by using alternate brands at these hotels to better cater to expected demand in the respective micro markets where our hotels are located. Given the demand potential in the hospitality sector according to the Horwath Report, we believe that we may also be able to renegotiate better terms for our hotel operation contracts. We may also evaluate options of diversifying our asset portfolio to include more international brands of similar to higher positioning as our current brands, in order to reduce risk of reliance on any one hospitality company.

DESCRIPTION OF OUR BUSINESS

We are an owner, developer and asset manager of high-end hotels in key metro cities in India. Our hotel platform comprises five operating hotels, including a hotel with a co-located serviced residence, located in Mumbai Metropolitan Region, Hyderabad and Bengaluru, representing 2,328 keys, as of September 30, 2018. Our Hotel Business

As part of our hotel business, we are focused on developing high-end hotels and use our experience to actively manage the property to drive hotel performance. All of our hotels are in the luxury-upper upscale and upscale segments, according to the Horwath Report. We have developed our hotels at strategic locations generally with high barriers-to-entry close to airports, major business centres or commercial districts and other convenient locations. We determine, by detailed financial and operational analysis, whether the hotel operations should be undertaken directly by us or by engaging third party hotel operators. Currently, one of our hotels is operated by us under a license agreement, and four of our hotels, including our serviced residence, are operated by third party hotel operators pursuant to hotel operation and related agreements, all executed with Marriott.

Our Hotels Managed by Third Party Hotel Operators

As of September 30, 2018, we own four hotels, including a hotel with a co-located serviced residence, which are managed by third parties, which represent 2,176 keys. These hotels accounted for 84.73% and 90.23% of our revenue from operations for the six months ended September 30, 2018 and for the financial year 2018, respectively. Our hotels which are managed by third parties are located in three major metro cities in India, namely, Mumbai, Bengaluru and Hyderabad. The hotel operation agreements subject to the terms and limitations set forth in the agreements, generally provide the hotel operator with day-to-day operational control, including selection, recruitment, training and management of our personnel for the hotel together with determining their remuneration, determining the price and rate schedules for rooms, commercial spaces and other services, credit policies, managing food and beverage service, employment policies, receipt, holding, and disbursement of funds, maintenance of bank accounts, procurement of inventories, supplies and services, maintaining and renewing licenses and consents and entering into agreements on our behalf with regulatory and governmental authorities to ensure the smooth functioning of the hotel, negotiating and executing agreements with third parties such as vendors, licensees and concessionaires and carrying out marketing, sales, reservations and advertising operations for the hotel, among others. Our Active Asset Management Model

We follow an active asset management model for our hotels which are operated by Marriott. Our active asset management model entails that in addition to contractual obligations under agreements with Marriott, we closely monitor, exercise regular oversight and contribute to the performance of our hotel properties. As part of our active asset management model, we regularly:

- engage with the hotel management team at each hotel in order to discuss and agree on budgeting, cost management initiatives and operational and financial targets for each of our hotel properties. For example, we conduct detailed performance review meetings each month with the hotel management team to assess hotel performance on a host of parameters and provide regular inputs on cost saving initiatives and potential improvements;
- review performance reports generated by each hotel;
- conduct periodic meetings with hotel operator's management teams;
- discuss and optimize pricing strategies to maximize room yield by active monitoring of key corporate accounts and provide inputs on promotional activities;
- review furniture, fixtures and equipment deployment plans and assist with execution of these plans;
- review competitor set performance and penetration across relevant micro-markets; and
- assist in renewing licenses and consents, as necessary.

We have a specialised asset management team which, aiming to optimize profitability, undertakes extensive and comprehensive research and provides business intelligence, feasibility studies, capital outlay plans and financial analysis. This allows us to monitor property functioning, rationally review and control costs, and explore opportunities to further improve asset productivity. Learnings from each hotel are pooled in to ensure best practices are replicated, resulting in improved functioning.

Our Hotel Operations

Our five operating hotels, including a hotel with a co-located serviced residence, as of September 30, 2018 cater to the growing needs of our customers. Five key hotel operations departments: front office, housekeeping, food and beverage service, food production and spa services, are focused on ensuring customer experience and comfort through quality product and service offerings. In addition, support departments such as finance, stores, purchase, sales and marketing, engineering and maintenance, IT and security also play a role in ensuring efficient day-to-day operations. For our hotels operated by third parties, these functions are generally controlled by the hotel operators leveraging the operational experience of Marriott, while for our hotel at Vashi, Navi Mumbai, we carry out day-to-day operations with assistance from Marriott in the form of brand standards and guidelines and other assistance.

The marketing and loyalty strategy for our hotels is conducted by the hotel operators and licensor in discussion with us. Our hotels use online travel agents (“OTAs”) and websites of our hotel operators, as well as strategic and tactical sales and marketing initiatives to acquire customers. The loyalty programs of our hotel operators, reward guests for staying at our hotels and provides extra benefits, exclusive offers and personalized services to get repeat business from these members and also generate word of mouth publicity. We believe the premium location of our hotels and the high quality of our hotel properties, together with our relationship with leading international hospitality brands, enables us to attract our target customer base including large corporate key accounts such as information technology companies, airlines, multi-national corporations, consultancy firms and banks, deliver an enhanced customer experience, encourage repeat business and drive customer loyalty.

Certain Key Agreements

Hotel Operation Agreements and Related Agreements

The operation of the hotels is under the supervision and control of hotel operator. The hotel operators have discretion in matters relating to operation of the hotel, including, charges for guestrooms and commercial space, credit policies, food and beverage service, employment policies, receipt, holding, and disbursement of funds, maintenance of bank accounts, procurement of inventories, supplies and services, promotion and publicity, and such other activities as are specifically provided for or otherwise reasonably necessary for the proper and efficient operation of the hotel. The annual operating plan is to be provided by the hotel operators to us for our review and the hotel operators are required to meet with us to discuss the annual operating plan.

Support Services

The hotel operators or their affiliates provide our hotels with access to international programs for advertising, marketing, promotion, and sales. We are required to incur the expenses to install hardware and software necessary for use at the hotel to participate in the reservations system.

Improvements and Fit-Outs

On a periodic basis, we are required to carry out, at our own cost and expense, improvements including planning, design, construction, furnishing, and fitting equipment in accordance with hotel standards of the hotel operators and as agreed on in the agreements, within a stipulated time-frame. The hotel operators or their affiliates have provided us with design and construction consulting services, in order for us to implement the improvements and fit-outs at our hotels.

Hotel Employees

While the agreements state that certain key employees may be employees of the hotel operator, as of September 30, 2018, all employees working at our hotels are our employees together with certain personnel who are engaged

on a contractual basis. The hotel operator has full discretion to hire, promote, supervise, direct, train, fix compensation, and generally establish and maintain all employment policies and practices. The payroll and related costs for all hotel employees such as, salaries, wages, bonuses, payroll taxes, social security, retirement payments or accruals, and provident fund and worker's compensation funds and employees' state insurance, among others are paid by the hotel.

Payment Terms

Pursuant to the agreements entered into with hotel operators and their affiliates, our hotels are generally obliged to pay one time fees for design and construction consulting services, as well as, periodic operating fees, management fees, royalty fees for licensing the use of certain trademarks, fees for technical services rendered based on invoices raised and reimbursements for advertising, marketing, promotion, sales and software related expenses incurred by the hotel operator or their affiliates. These operating and related agreements together provide for a multi-tiered fee structure that compensates the hotel operators based on a fixed percentage of the gross revenue of the hotel as well as a portion of gross operational profits as an incentive fees, subject to certain exclusions and adjustments including periodic increments. See "***Management's Discussion and Analysis of Financial Condition and Results of Operations***" on page 585 for details of payments made by us pursuant to these agreements in the previous three financial years.

Under the operating agreements, we are generally responsible to provide the initial working capital and inventories in amounts determined by the hotel operator as well as the funds necessary to supply the project with fixed asset supplies. Further, we are obliged to establish a separate interest-bearing bank account or reserve account, to cover the cost of, renewals, replacements, and additions to the furniture, fixtures, or other equipment of the hotel; and routine repairs, maintenance and additions to the hotel building, including, interior repairs, resurfacing walls, floors, ceilings and parking areas. The reserve is stipulated as a fixed percentage of the gross revenues of the hotel over a particular accounting period. The hotel operator is required to submit for our review, with the annual operating plan, a repairs and equipment estimate of the expenditures necessary in this regard.

Further, for major repairs, alterations, improvements, renewals, replacement, or additions, the hotel operator is required to submit for our approval, with the annual operating projection, a major repairs and building improvements estimate of the expenditures necessary. The hotel operator is not allowed to make any expenditures for any such major purpose without our prior consent, subject to certain limitations.

Certain Additional Obligations

We are required to maintain good and marketable title in the freehold property and hotel building, free and clear of any and all liens, encumbrances, or other charges. Other than in the manner specifically set out under the agreements, we agree not to enter into or grant a mortgage on the hotels. We are obliged to agree with the hotel operator on an auditor to be engaged to perform quarterly audits of selected aspects of the books of control and account for the hotels.

License and Related Agreements

We benefit from an international license agreement with Luxury Hotels International of Hong Kong Limited for the global brand Four Points by Sheraton together with a centralised services agreement with Marriott. We are granted a non-exclusive right to develop and operate a hotel under the brand at the specified premises and using the systems provided. This gives us access to the Four Points by Sheraton brand and network, industry best practices, online reservation systems and websites, marketing strategies, systems and processes and operational know-how. We utilize the marketing, sales, reservations and advertising operations of the licensor and its affiliates on a central basis. Our hotels also receive access to software and systems such as reservations systems, sales program, marketing program and loyalty programs of the licensor and its affiliates together with related services.

The agreements include a schedule of specified services together with relevant rates for utilizing such services, which are expressed either as a fixed amount per use or on a monthly basis or as a percentage of gross room

revenue, among other parameters. Pursuant to the agreements, our hotel was obliged to pay initial fees for design and construction consulting services at the time of construction. The hotel pays periodic license fees for licensing the use of certain trademarks, administrative fees. See “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on page 585 for details of payments made by us pursuant to these agreements in the previous three financial years.

We are obliged to adhere to stipulated brand standards and guidelines issued by the licensor including, purchasing, installing in the hotel and renovating or refurbishing such furniture, fixtures, or other equipment as required to adhere to the stipulated requirements; maintaining supply or utilising only such products, materials, goods, and services in the operation of the hotel that comply with the brand standards or as approved by the licensor; keep open and operate the hotel on a continuous basis; and respond to and address guest complaints in a manner provided in the standards and policies of the licensor, among others. Our hotel is subject to periodic inspections by the licensor.

Our Commercial and Retail Business

As of September 30, 2018, we have developed two projects representing approximately 0.86 million square feet, adjacent to our hotel properties. These projects accounted for 3.62% of our revenue from operations for the six months ended September 30, 2018 and 2.76 % of our revenue from operations for the financial year 2018. These projects are located on freehold land owned directly by our Company. We earn lease and rental income from these properties. We have established longstanding relationships with several large corporate clients and domestic and global retail brands including food and beverage chains, department stores, consulting and management companies, among others. Such relationships help us secure retail clients for our new developments and mitigate the risks that may arise from an inability to secure corporate or retail clients for large commercial or retail spaces at suitable rates. In particular, we believe that our track record and the quality of our commercial and retail developments has enabled us to maximise our lease revenues through our established relationships with corporate clients and domestic and global retail clients.

Any adverse order in relation to this litigation may adversely affect our ability to complete the project, and our business, results of operations and reputation.*” on page 21.

Our Projects under Development

We periodically evaluate new sites for greenfield development as well as prospective hotel assets for conversion or acquisition. We have traditionally acquired large parcels of land at competitive prices with the intention to develop hotel-led mixed-use projects. In addition, we intend to focus on developing new hotel-led mixed-use projects in prime locations with development sizes similar to our existing projects, and which feature a combination of hotels, retail developments and commercial office.

Our development pipeline for hotels consists of 588 rooms across three hotels. We classify owned hotels for which: (i) land is owned by us together with relevant agreements, memorandum of understanding or letter of intent having been executed for such use; (ii) relevant construction approvals have been applied for; and (iii) our preliminary design plans are complete, as hotels under development. Property Development Cycle

We utilise specialised design and project management teams for the development of our properties managing various aspects of our real-estate development from construction, design, approval and engineering. We have 19 personnel as of September 30, 2018 who have competencies in project execution, engineering and architecture. Our team is involved from technical feasibility assessment of a property, to design and supervision of on-site execution, through to commencement of operations and selectively engages third parties to support them in this initiative. Our team undertakes technical feasibility assessment, wherein they test product mix as per business development and market inputs; prepares project execution plans, budget estimates and schedules and monitors project progress, as well as works to mitigate involved risks and challenges. Our team keeps track of new technologies and products to adopt cost and time effective methods of construction to drive operational efficiency.

We leverage our capability in project management for efficient development and renovation of our projects. This team works with consultants and specialist agencies to deliver target results where we believe utilizing third party project management companies will be more efficient. The property development process entails employment of standardized parameters that allow for a consistent and replicable process, which in turn reduces variations in development costs and project time. The development model focuses on standardized designs and defined process for selection of sites, contractors and materials. K. Raheja Companies’ knowledge of construction dynamics in the markets in which we operate helps us ensure cost efficient development

Identification Process and Land Acquisition and Development Arrangements

Our site identification is based on a market selection process that leverages our management’s knowledge of Indian cities, understanding of our customer base, an analytical approach to site-selection that encompasses accessibility, local economy, potential for growth, demographics and socio-economic environment and adequate infrastructure.

While we do not fix any site specific criteria and consider location specific factors, key considerations for site selection include the economics of the site and our geographic strategy. Analysis of the economics of the site include assessment of the demand potential, considering among other factors the current and likely future demand, existing and future competition, pricing potential, local talent availability and prospects for increased infrastructure and accessibility. After the site is fully analysed from both a marketing and development perspective, the project is either discarded or advanced for a subsequent financial analysis and due diligence.

Project Planning and Tenders

While our management is generally involved in the design, project management and supervision of hotel development, it hires third party contractors for construction of the hotel. Contractors are awarded projects through a tender process. While each project is generally awarded subject to a project-specific bid, we also factor in the selection our prior experience, if any, with the vendor. While we maintain certain standard design features such as room size, bathroom size, dimensions for corridors and lobby, we continuously seek new and improved ideas that are then incorporated in future developments. Due to our standardization procedures, the customization required by contractors selected by us is minimized, which streamlines the construction timeframe and costs.

Execution, Construction and Safety Standards

The project planning and execution process commences with obtaining the requisite regulatory approvals, environmental clearances and location specific approvals. Completion and occupancy certificates are obtained from the appropriate authorities after the construction of properties is completed, in accordance with applicable law. For a more detailed explanation of the applicable regulations, see “**Key Regulations and Policies in India**” on page 173.

We monitor the development process, construction quality, actual and estimated project costs and construction schedules. The project management team and the contractor conduct site and activity reviews including a review of quality of work, adherence to project timelines and materials used.

We have endeavoured to develop each property with high safety standards. During construction, standards maintained by us are generally in line with those prescribed in India. A detailed safety manual has been created by us which ensures guidelines such as proper safety wear, safety signage, first aid protocol and task specific safety measures.

Our Intellectual Property

We own the registered name and mark ‘Chalet’ under various classes provided for under the Trade Marks Act, 1999. Additionally, we have applied for registration of  logo under various classes. We have received trademark registrations for the logo under Classes 31, 32, 33, 39, 41, 44 and 45 and application for registration under Classes 16, 29, 30, 35 and 43 are currently pending. See “**Risk Factors – Our inability to protect or use intellectual property rights may adversely affect our business.**” on page 39.

Information Technology

We utilize leading software and technology infrastructure to ensure our business runs smoothly. We have instituted a corporate data-center, which is equipped with virtual server environment supported by multi-layered advanced security infrastructure, policies and procedures and advanced threat protection tools to protect against cyber-attacks. We use an enterprise resource planning (“**ERP**”) software for our core business transactions along with an enterprise document management system. Further, we utilize third party software for sourcing and employee connectivity. We intend to implement software to cover tracking and managing compliance across locations, business analytics and dashboards, and business planning and consolidation software. We believe we have a strong IT setup with skilled resources that ensure secure working for our business.

Environmental Matters and Quality Standards

In connection with our ownership and management of hotels and development of properties, we are subject to various national, state and local laws and regulations relating to environmental laws. We have established construction and operating standards that comply with environmental sustainability requirements. We incorporate U.S. Green Building Council’s Gold Leadership in Energy and Environmental Design (“**LEED**”) criteria in our hotel designs in order to achieve energy and water efficiency. For example our hotels at Sahar, Mumbai and Bengaluru have been built in accordance with the Indian Green Building Council’s LEED standards. Over time, environmental and cost saving the measures implemented at certain of our hotels by us include:

- energy management systems such as use of energy-saving LED lighting, solar panels, energy-saving key tags for guest rooms, and efficient evaporative cooling pad systems, heat recovery from boilers, chiller de-super heater, flash steam recovery and heat pumps;
- auto time management (for lighting, air-conditioning and ventilation fans) through timers and motion sensors;

- water management initiatives such as plant room optimiser with variable pumps and remote monitoring, sewage treatment plants which recycle water, motion sensors for public area wash rooms, dual-flow or low volume flush tanks and rain water harvesting; and
- building management systems.

We are also subject to various requirements, including those contained in environmental permits required for our operations, governing air emissions, effluent discharges, the use, management and disposal of hazardous substances and wastes and health and safety. See ***“Risk Factors – We are subject to extensive government regulation with respect to safety, health, environmental, real estate, excise and labour laws. Any non-compliance with, or changes in, regulations applicable to us may adversely affect our business, results of operations and financial condition”*** on page 23.

Our Community Initiatives

We believe that the benefits that we derive from operating in our geographical locations should also benefit the local communities. We conduct several community outreach initiatives, including:

- differently abled and special children were invited to display a variety of products made by them;
- donation to Mumbai mobile creches to provide comprehensive and holistic day care to migrant children on construction sites;
- clothes and grains donation at the Cheshire Home for the old aged; and
- cleanliness drive was organized and around 30 employees actively took part and were able to clean the designated area, near Vashi Station.

Competition

Our hotels operate in the luxury-upper upscale and upscale hotel segments in India. The hotel industry in India is intensely competitive and we compete with large multinational and Indian companies in each of the regions in which we operate. We experience competition from other chain affiliated and independent hotels in the segments in which we operate, as well as certain hotels in the upper-midscale segments. Our success is largely dependent upon our ability to compete in areas such as location of the property, room rates, quality of accommodation, service level, and the quality and scope of other amenities, including food and beverage facilities.

See *“Risk Factors – The hotel industry is intensely competitive and our inability to compete effectively may adversely affect our business, results of operations and financial condition.”* on page 31.

Environmental Legislations

Environment (Protection) Act, 1986 (“Environment Act”) and the Environment (Protection) Rules, 1986 (“Environment Rules”)

The Environment Act is an umbrella legislation designed to provide a framework for the Central Government to coordinate activities of various state and central authorities established under previous environmental laws. The Environment Act specifies that no person carrying on any industry, operation or process shall discharge or emit or permit to be discharged or emitted any environment pollutants in excess of such standards as may be prescribed. The Environment Act empowers the Central Government to make rules for various purposes viz., to prescribe:

- the standards of quality of air, water or soil for various areas;
- the maximum allowable limits of concentration of various environmental pollutants for different areas;

- the procedures and safeguards for the prevention of accidents which may cause environmental pollution and remedial measures for such accidents;
- the procedures and safeguards for extracting and utilizing ground water.

Further, pursuant to Environment Rules, every person who carries on an industry, operation or process requiring consent under Water (Prevention and Control of Pollution) Act, 1974 (“**Water Act**”) or Air (Prevention and Control of Pollution) Act, 1981 (“**Air Act**”) or shall submit to the concerned Pollution Control Board (“**PCB**”) an environmental statement for that financial year in the prescribed form.

Air (Prevention and Control of Pollution) Act, 1981

The Air Act stipulates that no person shall, without prior written consent of the relevant state pollution control board, establish or operate any industrial plant which emits air pollutants in an air pollution control area, as notified by the state pollution control board. The PCB is required to grant, or refuse, the consent within four months of receipt of the application. The consent may contain conditions relating to specifications of pollution control equipment to be installed.

Water (Prevention and Control of Pollution) Act, 1974

The Water Act aims to prevent and control water pollution and to maintain or restore water purity. Under the provisions of the Water Act, any individual, industry or institution discharging industrial or domestic wastewater or establishing any treatment or disposal system or the using of any new or altered outlet for the discharge of sewage is required to obtain the consent of the applicable state PCB, which is empowered to establish standards and conditions that are required to be complied with. The consent to operate is granted for a specific period after which the conditions stipulated at the time of granting consent are reviewed by the state PCB. Even before the expiry of the consent period, the state PCB is authorized to carry out random checks on any industry to verify if the standards prescribed are being complied with by the industry. In the event of non-compliance, the state PCB after serving notice to the concerned industry may, among other measures, close the premises, withdraw water supply to the premises or cause magistrates to pass injunctions to restrain such polluters.

Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 (“Hazardous Waste Rules”)

The Hazardous Waste Rules regulate the management, treatment, storage and disposal of hazardous waste by imposing an obligation on every occupier and operator of a facility generating hazardous waste to obtain an approval from the relevant state pollution control board and to dispose of such waste without harming the environment.

The Environmental Impact Assessment Notification, 2006 (the “EIA Notification”)

As per the EIA Notification, any construction of new projects or activities or the expansion or modernisation of existing projects or activities as listed in the schedule to the EIA Notification and meeting the thresholds specified therein can be undertaken only after the prior environmental clearance from the Central government or as the case may be, by the State Level Environment Impact Assessment Authority. The environmental clearance process for new projects comprises of four stages viz. screening, scoping, public consultation and appraisal. In 2016, the Ministry of Environment, Forest and Climate Change (“**MoEF**”) issued a notification for integrating standard and objectively monitorable environmental conditions with building permissions for buildings of different sizes with rigorous monitoring mechanism for implementation of environmental concerns and obligations in building projects.

NIL	<i>Emphasis of matter in Independent Auditors' Report –</i>	<i>Emphasis of Matter</i>
	<i>As more fully explained in note no. 3.39 to the standalone financial statements, the company has invested ₹711,800,000 by way of investment in equity shares advanced in its four wholly owned subsidiaries, which have cumulative accumulated losses of ₹54,319,751 as at 31 March 2017. The management of the company is in the process of commencing the process to merge these four subsidiaries with the company and hence no adjustment has been made towards the investment in equity shares. Our opinion is not modified in respect of this matter.</i>	<i>We draw attention to Note 34 to the Standalone Ind AS financial Statements in respect of the Scheme of Arrangement of demerger of "TPPL Undertaking" of Trion Properties Private Limited and "KRCPL Commerzone undertaking" of K. Raheja Corp Private Limited into the company under Section 230, 232 and 52 of the Companies Act, 2013 ("the Scheme"), sanctioned by the National Company Law Tribunal (NCLT) vide its order dated September 07, 2017 (effective date November 1, 2017). The company has given effect to the Scheme from the appointed date specified in the Scheme i.e. 1 April 2016 (acquisition date). The company has followed the accounting treatment for this arrangement as specified in the scheme at book values based on the NCLT order from the appointed date. Pursuant to the Scheme as approved by the Court, the company has debited the Reserves by Rs. 1.32 Lakhs in accordance with the Scheme. The accounting treatment at book values and the date from which the arrangement is accounted (appointed date) is different from that prescribed under Ind AS 103 – "Business Combinations".</i>

Raheja Corp Private Limited (Commerzone Division) and demerger of Pune Undertaking of Trion Properties Private Limited (Pune Undertaking) into the company, the company had filed an application before the Competition Commission of India (CCI), seeking its approval. Subsequent to the</i>	<i>Note No. 34 referred above - Business Combination</i>

Fiscal 2016	Fiscal 2017	Fiscal 2018
	<p>receipt of CCI approval, the in-principle decision of merger of Newfound and Gigaplex was dropped and the company proposed to proceed with the said demergers. During the year ended 31 March 2016, the company had acquired the entire shareholdings of Dices Realcon Private Limited, Educator Protech Private Limited, Happy Eastcon Private Limited and Sampada Eastpro Private Limited (collectively referred to as 'the Subsidiaries'), who had entered into agreements to acquire certain premises in the project of the said Commerzone Division. Given the decision by the company to proceed with the demerger of the Commerzone Division and with the view to achieve consolidation of the said premises with the Commerzone Division, the Subsidiaries cancelled the said agreements and the said premises vested back in the Commerzone Division. The aforesaid developments had taken place around the end of the financial year 2015-2016 and the management of the company was evaluating various options relating to the Subsidiaries, including any possible merger of the Subsidiaries into the company.</p> <p>The company had also advanced certain loans to the Subsidiaries in the earlier years, and the principal and the interest thereon was recovered during the current financial year. The company has further invested Rs.54,300,000 in equity shares of the subsidiaries during the year. During the year ended 31 March 2017, the Board of Directors of the company have resolved to consider a merger of the Subsidiaries with the Companies under the pooling of interests method specified in Accounting Standard (AS) 14. Alternatively, the company continues to explore possibilities of commencing other projects in these subsidiaries, the plans of which are in a preliminary stage as of date. Given the future plans of the company to merge the Subsidiaries with the company or alternatively commence new projects in the Subsidiaries, the management believes that there is no impairment in respect of the investments made by the company in its Subsidiaries.</p>	<p>The company ('transferee company') and Trion Properties private Limited (TPPL) and K. Raheja Corp Private Limited (KRCPL) (together known as transferor companies) had filed Scheme of Arrangement of demerger of "TPPL undertaking" and "KRCPL Commerzone undertaking" under Section 230, 232 and 52 of the Companies Act, 2013 ('the Scheme') with the National Company Law Tribunal (NCLT) during the year ended 31 March, 2017.</p> <p>Pursuant to the Scheme, the TPPL undertaking and the KRCPL Commerzone undertaking of transferor companies were transferred along with assets and liabilities to the company, with effect from the appointed date i.e. 1 April 2016.</p> <p>The Scheme was sanctioned by NCLT, Mumbai vide its order dated September 7, 2017 (effective date November 1, 2017). The total consideration of Rs. 970.26 Lakhs and Rs. 1.06 Lakhs is payable by the company for TPPL undertaking and KRCPL Commerzone undertaking to the respective transferor companies which is settled by the company through issue of equity shares during the year ended 31 March, 2018. The Scheme has become operative from 31 October upon filing of certified copy of order of NCLT, Mumbai with Registrar of Companies with an appointed date of 1 April 2016.</p> <p>The excess of amount of total consideration payable by the company over carrying value of net assets of TPPL undertaking and KRCPL Commerzone undertaking of the transferor companies on the appointed date aggregating to Rs. 1.32 Lakhs has been debited to the Reserves (under Retained Earnings).</p> <p>The company has accounted for this scheme of arrangement in accordance with the provisions of the Scheme as approved by NCLT, Mumbai whereby the assets and liabilities of the TPPL undertaking and KRCPL Commerzone undertaking of the transferor companies have been recognized at their respective carrying values in the balance sheet of the company as on 1 April 2016.</p> <p>As a result of the scheme of arrangement, the financial statements of the company as at 1 April 2016, for the years ended 31 March 2017 and 31 March 2018 incorporate and merge the book values of assets and liabilities and the profits and losses of TPPL undertaking and KRCPL Commerzone undertaking of transferor companies as given in table below. The accounting treatment of the net assets at book values instead of fair values and the acquisition date considered as the appointed date (i.e. 1 April 2016), instead of the effective date (i.e. November 1, 2017), based on the order of the NCLT, is not in accordance with Ind AS 103 – Business Combinations.</p>

This policy shall be effective and applicable for dividend, if any, declared for Fiscal 2019 onwards. Dividends will generally be recommended by the Board once a year, after the announcement of the full year results and before the AGM, out of the profits of our Company for the current year or out of profits of our Company for any previous financial years or out of both, as may be permitted by the Companies Act 2013. In the event of inadequacy or absence of profits in any year, the Board may recommend declaring dividend out of the accumulated profits earned by our Company in any previous financial years and transferred to free reserves, provided such declaration of dividend shall be in accordance with the provisions of the Companies Act 2013 and rules framed thereunder. The Board may also declare interim dividends as may be permitted by the Companies Act 2013. Subject to the provisions of the applicable laws, our Company's dividend pay-out will be determined based on available financial resources, investment and business requirements and taking into account optimal shareholder return.

While determining the nature and quantum of the dividend pay-out, the Board would take into account the following factors:

Internal Factors: Cash flow position of our Company, profit after tax during the financial year, working capital requirements, capital expenditure requirement, future cash requirements for business expansion / organic growth and / or for inorganic growth, likelihood of crystallization of contingent liabilities, if any, up-gradation of technology and physical infrastructure, debt levels and cost of borrowings and past dividend pay-out ratio / trends.

External Factors: Business cycles, industry outlook for the future, economic environment, capital markets, global conditions, changes in the government policies and regulatory provisions and guidelines.

Circumstances under which the shareholders of the Company may or may not expect dividend: The shareholders of our Company may not expect dividend in the following circumstances, subject to discretion of the Board: a) proposed expansion plans, renovations and up-gradations requiring higher capital allocation, b) decision to undertake any acquisitions, amalgamations, merger, joint ventures, new launches etc. which requires significant capital outflow, c) requirement of higher working capital for the purpose of business of the Company, d) debt obligations, e) proposal for buy-back of securities and f) in the event of loss or inadequacy of profit.

Utilization of retained earnings: The Board may retain its earnings in order to make better use of the available funds and increase the value of the stakeholders in the long run. The decision of utilization of the retained earnings of our Company shall be based on the following factors: a) market expansion plans, b) organic and / or inorganic growth, c) diversification of business, d) long term strategic plans for growth, e) replacement of capital assets and f) such other criteria's as the Board may deem fit from time to time.

Objective of the dividend policy: The Board our Company has considered the above, and also taken into account the following objectives of the dividend distribution policy:

- This dividend distribution policy establishes the principles to ascertain amounts that can be distributed to Equity Shareholders as dividend by our Company as well as enable our Company to strike a balance between pay-out and retained earnings, in order to address future needs of our Company.
- The hospitality industry is a capital intensive industry and the hotels of our Company are owned by our Company which entails substantial capital outlays.
- The objective of this Policy is to reward its shareholders by returning a portion of its profits after retaining sufficient funds for growth of our Company thus maximizing shareholders' value.
- The Policy sets forth the broad principles for guiding the Board and the Management in matters concerning declaration and distribution of dividend, with a view to ensure fairness, transparency, sustainability and consistency in the decision for distributing profits to shareholders.

- Our Company believes that driving growth creates maximum shareholder value. Thus, our Company would first utilise its profits inter- alia for working capital requirements, capital expenditure to meet expansion needs, reducing borrowings, earmarking reserves for growth opportunities and thereafter distributing the surplus profits in the form of dividend to the shareholders.
- The Policy shall broadly specify the external and internal factors including financial parameters that shall be considered while declaring dividend and the circumstances under which the shareholders of our Company may or may not expect dividend and how the retained earnings shall be utilized, etc.

The amounts paid as dividends in the past are not necessarily indicative of our Company's dividend amounts, if any, in the future and there is no guarantee that any dividends will be declared or paid in the future. For details in relation to the risk involved, see "**Risk Factors**" on page 18.

In addition, our ability to pay dividends may be impacted by restrictive covenants under the loan or financing arrangements which our Company is currently availing of or may enter into to finance our fund requirements for our business activities. For further details, see "**Financial Indebtedness**" on page 617.

Our Company has not paid any dividend on the Equity Shares or Preference Shares issued by our Company in the last five financial years.

Basis of preparation and presentation (continued)

A. Functional and presentation currency

The Restated Standalone Summary Financial Information is presented in Indian rupees, which is the Company's functional currency. All amounts have been rounded off to the nearest million with two decimals, unless otherwise indicated.

B. Use of estimates and judgements

While preparing the Restated Standalone Summary Financial Information in conformity with Ind AS, the management has made certain estimates and assumptions that require subjective and complex judgments. These judgments affect the application of accounting policies and the reported amount of assets, liabilities, income and expenses, disclosure of contingent liabilities at the restated standalone summary statement of assets and liabilities date and the reported amount of income and expenses for the reporting period. Future events rarely develop exactly as forecasted and the best estimates require adjustments, as actual results may differ from these estimates under different assumptions or conditions.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Judgement, estimates and assumptions are required in particular for:

- Determination of the estimated useful lives

Useful lives of property, plant and equipment and investment property are based on the life prescribed in Schedule II of the Act. In cases, where the useful lives are different from that prescribed in Schedule II and in case of intangible assets, they are estimated by management based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers' warranties and maintenance support.

- Recognition and measurement of defined benefit obligations

The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation, actuarial rates and life expectancy. The discount rate is determined by reference to market yields at the end of the reporting period on government bonds. The period to maturity of the underlying bonds correspond to the probable maturity of the post-employment benefit obligations. Due to complexities involved in the valuation and its long term nature, defined benefit obligation is sensitive to changes in these assumptions. All assumptions are reviewed at each reporting period.

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies **(continued)**

Basis of preparation and presentation (continued)

- **Recognition of deferred tax assets**

Deferred tax assets and liabilities are recognised for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilised business loss and depreciation carry-forwards and tax credits. Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilised.

- **Recognition and measurement of other provisions**

The recognition and measurement of other provisions are based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the closing date. The actual outflow of resources at a future date may therefore, vary from the amount included in other provisions.

- **Discounting of long-term financial assets / liabilities**

All financial assets / liabilities are required to be measured at fair value on initial recognition. In case of financial liabilities/assets which are required to subsequently be measured at amortised cost, interest is accrued using the effective interest method.

- **Determining whether an arrangement contains a lease**

At inception of an arrangement, the Company determines whether the arrangement is or contains a lease.

At inception or on reassessment of an arrangement that contains a lease, the Company separates payments and other consideration required by the arrangement into those for the lease and those for other elements on the basis of their relative fair values. If the Company concludes for a finance lease that it is impracticable to separate the payments reliably, then an asset and a liability are recognised at an amount equal to the fair value of the underlying asset; subsequently, the liability is reduced as payments are made and an imputed finance cost on the liability is recognised using the Companies incremental borrowing rate. And in case of operating lease, treat all payments under the arrangement as lease payments.

- **Fair value of financial instruments**

Derivatives are carried at fair value. Derivatives includes foreign currency forward contracts. Fair value of foreign currency forward contracts are determined using the fair value reports provided by respective bankers.

Further information about the assumptions made in measuring fair values is included in the following notes:

- Note J – impairment test of non-financial assets: key assumptions underlying recoverable amounts; and
- Note L – determining the fair value less costs to sell of the assets classified as held for sale on the basis of significant unobservable inputs.

Annexure V: Basis of preparation and Significant Accounting Policies ***(continued)***

Basis of preparation and presentation *(continued)*

C. Measurement of fair values

The Company's accounting policies and disclosures require the measurement of fair values for, both financial and non-financial assets and liabilities.

The Company has an established control framework with respect to the measurement of fair values. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. The management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of a financial asset or a financial liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- *Level 1:* quoted prices (unadjusted) in active markets for identical assets or liabilities.
- *Level 2:* inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- *Level 3:* inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in the following notes:

- Note 2 to Annexure VI – Property, plant and equipment (Freehold land)
- Note 4 to Annexure VI – Investment property
- Note 17 to Annexure VI – Assets classified as held for sale
- Note 47 to Annexure VI – Financial instruments

Interest income is included in other income in the Restated Standalone statement of profit or loss.

The amount recognised as expense is based on the estimate of the number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the number of awards that do meet the related service and non-market vesting conditions at the vesting date.

E. **Income-tax**

Income-tax expense comprises current and deferred tax. It is recognised in net profit in the restated standalone statement of profit or loss except to the extent that it relates to items recognised directly in equity or in the OCI.

i. **Current tax**

Current tax is the amount of tax payable (recoverable) in respect of the taxable profit / (tax loss) for the year determined in accordance with the provisions of the Income-tax Act, 1961. Taxable profit differs from 'profit before tax' as reported in the Restated Standalone Summary Statement of Profit and Loss because of items of income or expenses that are taxable or deductible in other years & items that are never taxable or deductible. Current income tax for current and prior periods is recognised at the amount expected to be paid to or recovered from the tax authorities, using tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Chalet Hotels Limited

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies ***(continued)***

Significant accounting policies *(continued)*

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves. Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Taxes relating to items recognised directly in equity or OCI is recognised in equity or OCI and not in the Restated Standalone Summary Statement of profit and loss.

The fair value was determined based on a combination of Discounted Cash Flow method and Residual method. The fair value of such freehold land has been pushed back to the earliest of reporting period in the restated financial statements in accordance with the Guidance Note on Reports in Company Prospectuses (Revised 2016).

H. Borrowing costs

Borrowing costs are interest and other costs (including exchange differences relating to foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs) incurred in connection with the borrowing of funds. Borrowing costs directly attributable to acquisition or construction of a qualifying asset which necessarily take a substantial period of time to get ready for their intended use or sale are capitalised as part of the cost of that asset until such time as the assets are substantially ready for their intended use or sale. Other borrowing costs are recognised as an expense in the period in which they are incurred.

I. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The management committee assesses the financial performance and position of the company, and makes strategic decisions. It is identified as being the chief operating decision maker for the Company. Refer note 49 for segment information presented.

J. Intangible assets

Recognition and measurement

Intangible assets comprises of trademarks and computer software and are measured at cost less any accumulated amortisation and accumulated impairment loss, if any.

Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates.

Transition to Ind AS

On transition of Ind AS, the Company has elected to continue with the carrying value of all of its intangible assets recognised as at 1 April 2016, measured as per the previous GAAP, and use that carrying value as the deemed cost of such intangible assets.

Amortisation

Amortisation is calculated over the cost of the asset, or other amount substituted for cost, less its residual value. Amortisation is recognised in the Restated Standalone Statement of profit or loss on a straight-line basis over the estimated useful lives of intangible assets, from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

Intangible assets are amortised on straight-line method over estimated useful life of 3 years, which in management's view represents the economic useful life of these assets.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate prospectively.

Chalet Hotels Limited

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies (continued)

Significant accounting policies (continued)

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognised for such excess amount. The impairment loss is recognised as an expense in the Restated standalone summary statement of profit and loss, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset.

Goodwill on business combination is not amortised but it is tested for impairment annually or more frequently if events or changes in circumstances indicate that it might be impaired.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognised for an asset (other than a revalued asset) in earlier accounting periods which no longer exists or may have decreased, such reversal of impairment loss is recognised in the Restated standalone summary statement of profit and loss, to the extent the amount was previously charged to the Restated standalone summary statement of profit and loss. In case of revalued assets, such reversal is not recognised.

K. Investment property and investment property under construction

(a) Recognition and measurement

Investment property is property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Upon initial recognition, an investment property is measured at cost. Subsequent to initial recognition, investment property is measured at cost less accumulated depreciation and accumulated impairment losses, if any.

On transition to Ind AS, the Company has elected to continue with the carrying value of all of its investment property recognised as at 1 April 2016, measured as per the previous GAAP and use that carrying value as the deemed cost of such investment property.

Investment property and investment property under construction represents the cost incurred in respect of areas retail block and commercial office space. Property under construction is accounted for as investment property under construction until construction or development is complete.

Direct expenses like cost of land, including related transaction costs, site labour cost, material used for project construction, project management consultancy, costs for moving the plant and machinery to the site and general expenses incurred specifically for the respective project like insurance, design and technical assistance, and construction overheads are taken as the cost of the project.

Investment properties are carried individually at cost less accumulated depreciation and impairment, if any. Investment properties under construction are carried individually at cost less impairment, if any. Impairment of investment property is determined in accordance with the policy stated for impairment of assets.

(a) Depreciation

Depreciation on investment property has been provided pro rata for the period of use by the Straight Line Method. The useful lives of Investment Property is estimated by management and the same is as prescribed in Schedule II to the Act, except in respect of the following categories of assets, where the life of these assets differs from Schedule II.

Any gain or loss on disposal of an investment property is recognised in Restated Standalone summary statement of profit and loss.

The fair values of investment property are disclosed in the notes. Fair values are determined by an independent valuer who holds a recognised and relevant professional qualification and has recent experience in the location and category of the investment property being valued.

L. Assets held for sale

Non-current assets are classified as held for sale if it is highly probable that their carrying amount will be recovered primarily through sale rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Annexure V: Basis of preparation and Significant Accounting Policies ***(continued)***

Significant accounting policies *(continued)*

When the Company is committed to a sale plan involving disposal of an investment, or a portion of an investment, in an associate, the investment or the portion of the investment that will be disposed of is classified as held for sale when the criteria described above are met, and the Company discontinues the use of the equity method in relation to the portion that is classified as held for sale. Any retained portion of an investment in an associate that has not been classified as held for sale continues to be accounted for using the equity method. The Company discontinues the use of the equity method at the time of disposal when the disposal results in the Company losing Significant influence over the associate or joint venture.

After the disposal takes place, the Company accounts for any retained interest in the associate in accordance with Ind AS 109 unless the retained interest continues to be an associate, in which case the Company uses the equity method (see the accounting policy regarding investments in associates above).

Such assets are generally measured at the lower of their carrying amount and fair value less costs to sell. Losses on initial classification as held for sale and subsequent gains and losses on remeasurement are recognised in Restated Standalone summary statement of profit and loss. Refer Note 18.

M. Financial Instruments

1. Financial assets

(a) Recognition and initial measurement

Trade receivable are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset is initially measured at fair value plus, for an item not at Fair Value through Profit and Loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

(b) Classification and subsequent measurement

The Company classifies its financial assets into a) financial assets measured at amortised cost, and b) financial assets measured at fair value through profit or loss (FVTPL). Management determines the classification of its financial assets at the time of initial recognition or, where applicable, at the time of reclassification.

(i) Financial assets measured at amortised costs

A financial asset is classified at amortised costs if it is held within a business model whose objective is to a) hold financial asset in order to collect contractual cash flows and b) the contractual terms of the financial asset give rise on specific dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Chalet Hotels Limited

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies ***(continued)***

Significant accounting policies *(continued)*

After initial measurement, such financial assets are subsequently measured at amortised cost using effective interest rate method (EIR). Amortised cost is arrived at after taking into consideration any discount on fees or costs that are an integral part of the EIR. The amortisation of such interests forms part of finance income in the restated standalone summary statement of profit and loss. Any impairment loss arising from these assets are recognised in the restated standalone summary statement of profit and loss.

(ii) Financial assets measured at fair value through profit and loss (FVTPL)

This is a residual category for classification. Any asset which do not meet the criteria for classification as at amortised cost, is classified as FVTPL. Financial assets at fair value through profit or loss are measured at fair value, and changes therein are recognised in the restated standalone statement of profit or loss.

(iii) Financial assets measured at fair value through other comprehensive income (FVOCI)

- Debt investments at FVOCI: These assets are subsequently measured at fair value. Interest income under the effective interest method, foreign exchange gains and losses and impairment are recognised in restated standalone summary statement of profit and loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to restated standalone summary statement of profit and loss.

- Equity investments at FVOCI: These assets are subsequently measured at fair value. Dividends are recognised as income in Restated standalone summary statement of profit and loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to Restated standalone summary statement of profit and loss.

(c) Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognised as a separate asset and associated liability for any amounts it may have to pay.

(d) Impairment of financial assets

In accordance with Ind-AS 109, the Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, and bank balance.

3. Offsetting of financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount presented in the restated standalone summary statement of financial position when, and only when, the Company has legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

4. Derivative financial instruments

The Company uses derivative financial instruments, such as foreign exchange forward contracts, interest rate swaps and currency options to manage its exposure to interest rate and foreign exchange risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured to their fair value. The resulting gain/loss is recognised in Restated standalone summary statement of profit and loss immediately at the end of each reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. The Company does not designate the derivative instrument as a hedging instrument.

N. Provisions, contingent liabilities and contingent assets

Provisions are recognised when there is a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognised as finance cost.

O. Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases. In determining whether an arrangement is, or contains a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset, even if that right is not explicitly specified in the arrangement.

i. Lease payments

Payments made under operating leases are recognised in the Restated standalone summary statement of profit and loss on a straight line basis over the term of the lease unless such payments are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increase, such increases are recognised in the years in which such benefits accrue.

Chalet Hotels Limited

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies ***(continued)***

Significant accounting policies *(continued)*

ii. Lease assets

Assets held by the Company under leases that transfer to the Company substantially all of the risks and rewards of ownership are classified as finance leases. The leased assets are measured initially at an amount equal to the lower of their fair value and the present value of the minimum lease payments. The corresponding liability to the lessor is included in the restated standalone summary statement of assets and liabilities. Subsequent to initial recognition, the assets are accounted for in accordance with the accounting policy applicable to that asset.

Assets held under other leases are classified as operating leases and are not recognised in the Companies restated standalone statement of financial position.

P. Cash and cash equivalents

Cash and cash equivalent in the Restated standalone summary statement of assets and liabilities comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

Q. Government Grants

Government grants are not recognised until there is reasonable assurance that the Company will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in Restated standalone summary statement of profit and loss on a systematic basis over the periods in which the Company recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Company should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the Restated standalone summary statement of assets and liabilities and transferred to Restated standalone summary statement of profit and loss on a systematic and rational basis over the useful lives of the related assets.

R. Earnings Per Share (“EPS”)

The basic Earnings Per Share (“EPS”) is computed by dividing the net profit / (loss) after tax for the year attributable to the equity shareholders by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, net profit/(loss) after tax for the year attributable to the equity shareholders and the weighted average number of equity shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

Consequently, depreciation charged for the period April 1, 2014 to March 31, 2015 is higher by Rs 9.04 million due to change in estimated useful life of certain assets wherein the opening carrying value as at April 1, 2014 is depreciated over the balance useful life.

Consequently, the depreciation expense for the year ended March 31, 2018 is lower by Rs. 52.14 million. The change in estimated useful lives has effect of reduction in depreciation charge in future periods.
3. Borrowing cost aggregating to Rs 0.13 million (March 2018, Rs. 221.41 million, March 31, 2017: 266.57 million, March 31, 2016: Rs 224.52 million, March 31, 2015 : Rs. 193.21 million, March 31, 2014 : Rs. 17.93 million) are capitalised under investment property under construction

Valuation technique

The fair value of investment property has been determined by external, independent property valuers / management, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued.

The fair value measurement for all of the investment property has been categorised as a Level 3 fair value based on the inputs to the valuation technique used.

The Company follows discounted cash flows technique. The valuation model considers the present value of net cash flows to be generated from the property, taking into account the expected rental growth rate, vacant periods, occupancy rate, lease incentive costs such as rent-free periods and other costs not paid by tenants. The expected net cash flows are discounted using risk-adjusted discount rates. Among other factors, the discount rate estimation considers the quality of a building and its location (prime vs secondary), tenant credit quality and lease terms. The land of Commercial Complex, Bengaluru - I office is valued by residual method.

Goodwill

Impairment testing for cash generating unit (CGU) containing goodwill

For the purpose of impairment testing, goodwill is allocated to the Company's operating segments which represent the lowest level within the Company at which goodwill is monitored for internal management purposes. The aggregate carrying amounts of goodwill allocated to each cash generating unit are as follows:

Particulars	September 30, 2018	March 31, 2018	March 31, 2017	March 31, 2016 Proforma	March 31, 2015 Proforma	March 31, 2014 Proforma

	226.11	226.11	226.11	36.58	36.58	36.58

The recoverable amount is based on a value-in-use calculation using the discounted cash flow method.

Value in use has been determined by discounting the future cash flows generated from the continuing use of the unit. The calculation of the value in use is based on the following key assumptions:

The table below shows the key assumptions used in the value in use calculations of :

A. Hotel

Particulars (in %)	September 30, 2018	March 31, 2018	March 31, 2017	March 31, 2016 Proforma	March 31, 2015 Proforma	March 31, 2014 Proforma
Discount rate	12.00%	9.59%	9.13%	9.55%	9.83%	10.82%
Terminal value growth rate	7.27%	8.50%	8.50%	8.50%	8.50%	8.50%

Discount rate

The discount rate is a pre tax measure based on the rate of 10 year government bonds issued by the Government of India, adjusted for a risk premium to reflect both the increased risk of investing in equities generally and the systematic risk of the specific CGU.

Terminal value growth rate

Terminal value growth rate used for the purpose of calculation of terminal value has been determined based on the long-term compound annual growth rate in EBITDA.

The above assumptions are reviewed annually as part of management's budgeting and strategic planning cycles. These estimates may differ from actual results. The values assigned to each of the key assumptions reflect the Management's past experience as their assessment of future trends, and are consistent with external / internal sources of information.

Based on the above assumptions and analysis, no impairment was identified for any of the CGU as at September 30, 2018, March 31, 2018, March 31, 2017, March 31, 2016, March 31, 2015 and March 31, 2014 as the recoverable value of the CGU exceeded the carrying value.

With regard to the assessment of value in use, no reasonably possible change in any of the above key assumptions would cause the carrying amount of the CGUs to exceed their recoverable amount.

In December 2005, the Company had purchased the entire building comprising of the hotel and apartments therein, together with a demarcated portion of the leasehold rights to land at Vashi (Navi Mumbai) from K. Raheja Corp Private Limited (reflected under prepayment and others above). The Company has been operating the Four Points By Sheraton Hotel at the said premises. Two Public Interest Litigations challenging the allotment of land by CIDCO to K. Raheja Corp Private Limited had been filed in FY 2003-04. K Raheja Corp Private Limited has filed a special leave petition against the order in the Supreme Court. The Supreme Court on January 22, 2015 directed the maintenance of a status quo. Pending the outcome of proceedings and a final closure of the matter no adjustments have been made in the Restated financial information. The balance of prepaid lease rental in relation to such leasehold land as of September 30, 2018 is Rs. 53.92 million. The Company's weighted average tax rates for period/years ended September 30, 2018 : 31.53% March 31, 2018, 2017, 2016, 2015 and 2014 were (75.55%), (59.06%), 32.12%, 11.03% and 21.50%, respectively.

The effective tax rate is primarily lower on account of indexation benefit recognised on land and unquoted equity shares. Further unabsorbed tax losses have been utilised during some years to reduce the current tax expense.

The company offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

Significant management judgement is required in determining provision for income tax, deferred income tax assets and liabilities and recoverability of deferred income tax assets. The recoverability of deferred income tax assets is based on estimates of taxable income and the period over which deferred income tax assets will be recovered. Any changes in future taxable income would impact the recoverability of deferred tax assets.

Given that the holding company does not have any intention to dispose investments in subsidiaries in the foreseeable future, deferred tax asset on indexation benefit in relation to such investments has not been recognised.

Deferred tax assets (DTA) have not been recognised in respect of the following items, because it is not probable that future taxable profit will be available against which the company can use the benefits therefrom:

Deferred tax assets for the carry forward of unused tax losses are recognised to the extent that it is probable that future taxable profits will be available against which the unused tax losses can be utilised. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets – unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

The Company has recognised deferred tax asset to the extent that the same will be recoverable using the estimated future taxable income based on the approved business plans and budgets of the Company. The Company has generated taxable income for the financial year ended March 31, 2018 and has adjusted the carry forward losses partially. The Company is expected to continue generating taxable income going forward. The business losses can be carried forward for a period of 8 years as per the tax regulations and the Company expects to recover the losses.

The Retail block at Sahar, Mumbai will become operational during the financial year ended March 31, 2019 and is expected to generate profits for the Company. Further, the Company has merged the hotel and retail undertaking from Genext Hardware & Parks Private Limited for which the Scheme was filed in the financial year ended March 31, 2017. The said Scheme received the approval of the National Company Law Tribunal (NCLT) at Mumbai and Bangalore and other statutory and regulatory authorities and became effective from October 1, 2017.

Further, the Company had incurred losses in relation to the residential project at Bengaluru pursuant to litigation which arose during the financial year ended March 31, 2014. During the financial year ended March 31, 2018, without prejudice to its rights and remedies under law and keeping the commercial considerations in perspective, the Board of Directors of the Company, decided that the Company should proactively consider re-commencement of construction upto the minimum permissible limits and engage with the buyers above the 10th floor for evaluating possible options. Consequently, the Company has made a provision for estimated losses on such cancellations pertaining to all flats above 10 floors and had recognised the same during the financial year ended March 31, 2018 (refer note 36 of Annexure VI). Such costs have been pushed back for the purpose of restated consolidated summary financial statements (refer Annexure VII). Further, the Company does not expect any further material losses to be incurred in relation to the said project.

Accordingly, the Company, has recognised deferred tax asset on the carried forward business losses after considering the relevant facts and circumstances during each financial year to the extent that the Company had convincing evidence based on its business plans and budgets to the extent that the deferred tax asset will be realised. Consequently, the Company has recognised a deferred tax asset of Rs. 1,053.91 million as at September 30, 2018 (March 31, 2018: Rs. 856.32 million, March 31, 2017: Rs. 865.20 million, March 31, 2016: Rs. 519.12 million, March 31, 2015: Rs. 116.20 million, March 31, 2014: Rs. 114.13 million) on the carried forward losses of the Company.

Current provisions

Bengaluru residential project

During the year 2013-14, Hindustan Aeronautics Limited (HAL) had raised an objection with regard to the permissible height of buildings of the Company's Bengaluru residential project. Pursuant to an interim order passed by the Karnataka High Court, in the petition filed by the Company, the Company had suspended construction activity at the project and sale of flats.

Pending the outcome of the proceedings and a final closure of the matter, the Company suspended revenue recognition based on the percentage completion method after financial year ended March 31, 2014. Further, in case of cancellations subsequent to March 31, 2014, the Company reversed the revenue and derecognised margins in the respective year of cancellation. The Company also recompensed flat owners, in accordance with mitigation plans framed by the Company on account of the delay in completion of the project.

During the year ended March 31, 2018, without prejudice to its rights and remedies under law and keeping the commercial considerations in perspective, the Board of Directors of the Company, decided that the Company should proactively consider re-commencement of construction upto the minimum permissible limit and engage with the buyers above 10th floor for evaluating possible options. Accordingly, the Company has reassessed the estimated cost of completion of the project up to 10th floor as per the aforementioned plan and has recognised a provision towards the following:

- cost of alteration of superstructure
- Estimated cost in relation to expected potential cancellations

Further, cost of actual cancellations (where applicable) has also been provided for and included in the provision referred to above.

Note

During the year 2013-14, Hindustan Aeronautics Limited (HAL) had raised an objection with regard to the permissible height of buildings of the Company's Bengaluru Residential Project ("Project"). Pursuant to an interim order passed by the Karnataka High Court, in the petition filed by the Company, the Company had suspended construction activity at the Bengaluru Project and sale of flats.

Pending the outcome of the proceedings and a final closure of the matter, the Company suspended revenue recognition based on the percentage completion method after financial year ended March 31, 2014. Further, in case of cancellations subsequent to March 31, 2014, the Company reversed the revenue and derecognised margins in the respective year of cancellation. The Company also recompensed flat owners, in accordance with mitigation plans framed by the Company on account of the delay in completion of the Project.

During the year ended March 31, 2018, without prejudice to its rights and remedies under law and keeping the commercial considerations in perspective, the Board of Directors of the Company, decided that the Company should proactively consider re-commencement of construction up to the permissible limits and engage with the buyers above 10th floor for evaluating possible options. Accordingly, the Company has reassessed the estimated cost of completion of the Project up to 10th floor as per the aforementioned plan and has recorded the following adjustments as exceptional items as at March 31, 2018:

- Provision towards impairment of super structure of Rs 350.89 million and expected cost of alteration of super structure of Rs 250 million;
- Provision for cost of mitigation program compensation and related expenses of Rs 420.63 million in relation to potential cancellations referred to in above, net of compensation already provided for; and
- Impact of revised estimated cost of completion of the project on the net realisable value of inventory resulting in write down of Rs 93.74 million.
- In the event all the buyers of flats above 10th floor decide to exercise exit option, the Company has to refund Rs 944.07 million which is presently being accounted as an advance from customers.

Construction of and sales in the Project have been suspended due to an on-going litigation relating to the Project. Parties who have booked flats in the Project, are paid compensation for delay in delivery of their respective units and those who seek to cancel their bookings are repaid the advances / deposits made by them together with interest thereon, leading to considerable cash out flows for the Company.

Subsequent to March 31, 2018 the Promoter-Directors of the Company have agreed to provide funds to the Company either by themselves or through their Nominees, to meet its cash flow requirements for the Project to the extent of Rs. 200 Crores by way of subscription to '0%' Non-Cumulative Redeemable Preference Shares of the Company, for which a Subscription Agreement has been executed by them.

The proceeds of issue of Preference Shares will be deposited in a separate Designated Bank Account of the Company and will be utilised for meeting future cash outflows of the Project. The redemption of Preference Shares shall be not later than one month prior to completion of 20 years from the date of allotment, or earlier, out of surplus from the Project, subject to applicable law/s.

In practice, generally it does not occur. When we change one variable, it affects to others. In calculating the sensitivity, project unit credit method at the end of the reporting period has been applied.

Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

8 Expected contributions to gratuity fund for the year ended March 31, 2019 is Rs 13.00 million.

(ii) Valuation techniques used to determine fair value

Specific valuation techniques used to value financial instruments include :

- the fair value of certain unlisted equity shares are determined based on the income approach or the comparable market approach.
- the fair value for the currency swap is determined using forward exchange rate for balance maturity
- the fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves
- the fair value of the forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date for residual maturity.
- the fair value preference shares and the remaining financial instruments is determined using discounted cash flow analysis. The valuation model considers the present value of expected receipt/payment discounted using appropriate discounting rates.

The investments included in level 3 of the fair value hierarchy have been valued using the discounted cash flow technique to arrive at the fair value.

(iii) Fair value measurements using significant unobservable inputs (level 3)

(C) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Liquidity risk is managed by Company through effective fund management. The Company has obtained fund and non-fund based working capital lines from various banks. Furthermore, the Company has access to funds from debt markets through foreign currency borrowings and other debt instruments.

(D) Market risk

Market risk is the risk that the changes in market prices such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company uses derivative to manage market risk.

(E) Currency risk

The Company is exposed to currency risk on account of its operating and financing activities. The functional currency of the Company is Indian Rupee. The exchange rate between the Indian rupee and foreign currencies has changed substantially in recent periods and may continue to fluctuate substantially in the future. Consequently, the Company uses derivative instruments, i.e., foreign exchange forward contracts to mitigate the risk of changes in foreign currency exchange rates in respect of recognized liabilities. The company enters into foreign currency forward contracts which are not intended for trading or speculative purposes but for hedge purposes to establish the amount of reporting currency required or available at the settlement date of certain payables.

Sensitivity analysis

A reasonably possible strengthening (weakening) of the Indian Rupee against all other foreign currencies at September 30, would have affected the measurement of financial instruments denominated in a foreign currency and affected profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

Financial instruments – Fair values and risk management (Continued)

(Rs in million)

(F) Interest rate risk

Interest rate risk can be either fair value interest rate risk or cash flow interest rate risk. Fair value interest rate risk is the risk of changes in fair values of fixed interest bearing financial assets or borrowings because of fluctuations in the interest rates, if such assets/borrowings are measured at fair value through profit or loss. Cash flow interest rate risk is the risk that the future cash flows of floating interest bearing borrowings will fluctuate because of fluctuations in the interest rates.

The Company adopts a policy to hedge the interest rate movement in order to mitigate the risk with regards to floating rate linked loans based on the market outlook on interest rates. This is achieved partly by entering into fixed rate instruments and partly by borrowing at a floating rate and using interest rate swaps as hedges of the variability in cash flows attributable to interest rate risk.

Fair value sensitivity analysis for fixed-rate instruments

The company's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk as defined in Ind AS 107, Financial Instruments : Disclosures, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

Cash flow sensitivity analysis for variable-rate instruments

A reasonably possible change of 100 basis points in interest rates at the reporting date would have increased (decreased) profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant. In cases where the related interest rate risk is capitalised to fixed assets, the impact indicated below may affect the Company's income statement over the remaining life of the related fixed assets.

Capital management

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Management monitors the return on capital as well as the level of dividends to ordinary shareholders.

The Company monitors capital using a ratio of 'adjusted net debt' to 'adjusted equity'. For this purpose, adjusted net debt is defined as total borrowings, comprising interest-bearing loans and borrowings, less cash and cash equivalents and bank deposits. Adjusted equity comprises all components of equity.

The Company's adjusted net debt to equity ratio was as follows:

First time adoption

The Restated statement of assets and liabilities of the Company as at March 31, 2018 and March 31, 2017 and the Restated statement of profit and loss, the Restated statement of changes in equity and the restated statement of cash flows for the years ended March 31, 2018 and March 31 2017 and restated other financial information (together referred as 'restated financial information') has been prepared under Indian Accounting Standards ('Ind AS') notified under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015.

The Company has elected to present all five years as per Ind AS/Proforma Ind AS. The restated financial information for the years ended March 31, 2016, 2015 and 2014 has been prepared on Proforma basis (i.e. "Proforma Ind AS financial information") in accordance with requirements of SEBI Circular SEBI/HO/CFD/DIL/CIR/P/2016/47 dated March 31, 2016 ("SEBI Circular") and Guidance note on reports in company prospectuses issued by ICAI. For the purpose of Proforma Ind AS financial information for the year ended March 31, 2016, 2015 and 2014, the Company has followed the same accounting policy and accounting policy choices (both mandatory exceptions and optional exemptions availed as per Ind AS 101) as initially adopted on transition date i.e. April 1, 2016. Accordingly, suitable restatement adjustments (both re-measurements and reclassifications) in the accounting heads are made to the Proforma Ind AS financial information as of and for the years ended March 31, 2016, 2015, and 2014 following accounting policies and accounting policy choices (both mandatory exceptions and optional exemptions) consistent with that used at the date of transition to Ind AS (i.e. April 1, 2016).

In addition to the adjustments carried herein, the Company has also made material restatement adjustments in accordance with SEBI Circular and Guidance note on reports in company prospectuses issued by ICAI (refer Annexure VII). Together these constitute the restated standalone summary financial information.

Exemptions applied

Ind AS 101 allows first-time adopters certain exemptions from the retrospective application of certain requirements under Ind AS. The Company has applied the following exemptions:

- 1 **Business combination exemption:**
The Company has applied the exemption as provided in Ind AS 101 in relation to Ind AS 103, "Business Combinations" for business combinations consummated prior to the date of transition (April 1, 2016). Pursuant to this exemption, goodwill arising from business combination has been stated at the carrying amount under previous GAAP IND AS 103 will be applied prospectively to business combinations occurring after its transition date.
- 2 **Investment in subsidiaries and associates**
As permitted by Ind AS 101, for measuring investment in subsidiaries and associates, the Company has considered their previous GAAP carrying amount as their deemed cost as at 1 April 2016. For the purpose of Proforma Ind AS financial information, the Company has used carrying amount as per previous GAAP as at March 31, 2016, 2015 and 2014 to be the value of Investments for such respective years.
- 3 **Property, plant and equipment**
As permitted by Ind AS 101, the Company has chosen to reflect the fair value of all freehold land as of April 1, 2016 as their respective deemed cost. All other items of property, plant and equipment have been measured as per the requirements of Ind AS 16 "Property, Plant and Equipment" retrospectively.
- 4 **Intangible assets and investment property**
As permitted by IND AS 101, the Company has elected to continue with the carrying values under previous GAAP as 'deemed cost' at April 1, 2016 for all the items of intangible assets and investment property. For the purpose of Proforma Ind AS financial information for the year ended March 31, 2016, 2015 and 2014, the Company has provided the depreciation based on the estimated useful life of respective years.
- 5 **Classification and measurement of financial assets and financial liabilities**
Ind AS 101 requires an entity to assess classification of financial assets and financial liabilities on the basis of facts and circumstances existing as on the date of transition. Further, the standard permits measurement of financial assets and financial liabilities accounted at amortised cost based on facts and circumstances existing at the date of transition if retrospective application is impracticable. Accordingly, the Company has determined the classification of financial assets and financial liabilities based on facts and circumstances that exist on the date of transition. Measurement of the financial assets and financial liabilities accounted at amortised cost has been done retrospectively except where the same is impracticable.
- 6 **Estimates**
On assessment of the estimate made under the Previous GAAP financial statements, the Company has concluded that there is no necessity to revise the estimates under Ind AS, as there is no objective evidence of an error in those estimates. However estimates that were required under Ind AS but not required under Previous GAAP are made by the Company for the relevant reporting dates reflecting conditions as at that date.

Annexure VI-Notes to the Restated Standalone Summary Financial Information (Continued)

Note 54

First time adoption of Ind AS

(IV) Notes to First time adoption:

The Company has followed the same accounting policy choice as initially adopted on transition date i.e. April 1, 2016 while preparing Proforma Restated Financial Information for the years ended March 31, 2016, March 31, 2015, March 31, 2014 and as at April 1, 2013. Accordingly, suitable restatement adjustments are made to the retained earnings as at March 31, 2016, March 31, 2015, March 31, 2014 and April 1, 2013.

1 Fair valuation of land treated as deemed cost

On the date of transition the Company has chosen to reflect the fair value of all freehold land as of April 1, 2016 as their respective deemed cost. All other items of property, plant and equipment have been measured as per the requirements of Ind AS 16 "Property, Plant and Equipment" retrospectively. The impact of both these adjustments has been considered through retained earnings and corresponding assets/liabilities, as appropriate. The fair value has been determined with reference to residual value approach which also involves determining the business value of the respective hotel building. The fair value so determined is categorised as Level 3 in accordance with the requirements of Ind AS 113. The key unobservable inputs used for determination of the fair value referred to above includes the rate used for discounting (12.10%) and growth rate (5%).

The fair value of land taken as deemed cost on transition date has been pushed back for restated standalone financial statements as per the Guidance note on Reports in Company Prospectus (revised 2016) issued by the Institute of Chartered Accountants of India. The fair value as on transition date is basis the land parcels and subsequent capitalisations made to the cost of land (for purchase of additional FSI) till such date (i.e. April 1, 2016). For the purpose of pushback of such fair value, proportionate fair value of such additions made is calculated based on the ratio of cost (adjusted for inflation) incurred for purchase of such additions to the total cost of such land. The fair value of such additions has been considered in their respective years of purchase by the company.

2 Accounting for transaction costs on borrowings as per effective interest method

Under previous GAAP, directly attributable transaction costs were charged to the Statement of Profit or Loss or capitalised as part of property, plant and equipment in the year of disbursement of the loan. As per the requirements of Ind AS, the Company has measured the borrowings at amortised cost (including the directly attributable transaction costs) based on the effective interest rate of the borrowings. Accordingly, suitable restatement adjustments have been made in the Restated Summary Statement of Profit and Loss and Property, plant and equipment.

3 Fair value movement of FVTPL investments

Under previous GAAP, non-current investments were carried at cost less provision for diminution (other than temporary). Under Ind AS, investment in equity shares (other than subsidiaries and associates) are measured at fair value, with fair value changes being routed through the Summary Statement of Profit and Loss.

4 Investment in preference shares measured at amortised cost

Under previous GAAP, non-current investments in preference shares were carried at cost less provision for diminution (other than temporary). Under Ind AS, investment in 0.001% non-cumulative redeemable preference shares of Genext Hardware & Parks Private Limited are measured at amortised cost as per Ind AS 109. Accordingly, suitable restatement adjustments have been made in the Restated Summary Statement of Profit and Loss and Investment in preference shares.

5 Accounting of EPCG Scheme as a government grant, including depreciation impact

The Company under the EPCG scheme has received grants from the Government in form of waiver of import duty on purchase of capital goods. These, however are conditional on the Company achieving specified future export obligations.

Under previous GAAP, the Company recognised its property, plant and equipment at the net cost i.e. the import duty was excluded from the cost of the property, plant and equipment and adjusted directly with the export benefits. Under Ind AS, the Company has recognised the value of import duty waiver as part of the cost of the property, plant and equipment with the corresponding impact to deferred grant. The deferred grant is recognised in Restated Summary Statement of Profit and Loss on fulfilment of the respective export obligation.

6 Business combination of Magna Warehousing & Distribution Private Limited (refer note 42)

The Board of Directors of the Company at its meeting held on January 5, 2017, approved the merger of Magna Warehousing & Distribution Private Limited ("Transferor Company"), its wholly owned subsidiary, with the Company ("Transferee Company") under Section 230 to 232 of the Companies Act, 2013, with effect from November 01, 2016, ("the Appointed Date") subject to obtaining necessary approvals of National Company Law Tribunal (NCLT) at Mumbai and Bangalore. The said Scheme received the approval of the National Company Law Tribunal (NCLT) at Mumbai and Bangalore and other statutory and regulatory authorities on March 21, 2018 and has become effective from April 1, 2018. The merger is accounted as per the 'Pooling of Interest' method as prescribed in the Scheme. Further since this is a common control transaction, the financial statements in respect of prior periods have been restated from the earliest period presented.

7 Merger of Genext Hardware & Parks Private Limited (refer note 42)

The Board of Directors at their meeting held on January 5, 2017, had approved the merger proposal and approved the "Scheme of Arrangement" to merge the Hotel Undertaking and the Retail Undertaking at Bengaluru from Genext under Section 230 to 232 of the Companies Act, 2013, with effect from November 1, 2016, ("the Appointed Date") subject to obtaining necessary approvals of the Shareholders, Honourable High Court of Karnataka at Bangalore and Honourable High Court of Bombay and other statutory and regulatory authorities. The Scheme has become effective from October 1, 2017 and has been given effect to from the appointed date (in line with the accounting treatment prescribed in the Scheme).

8 Deferred tax

Previous GAAP requires deferred tax to be recognised with reference to the income statement approach. Ind AS 12 requires entities to determine deferred taxes with reference to the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base. The application of Ind AS 12 approach has resulted in recognition of deferred tax related adjustments in relation to certain items such as fair valuation of land, indexation benefit on land, indexation benefit on investment property, fair value of investments which were not required to be considered under the income statement approach.

Further, under the previous GAAP, deferred tax asset on carry forward business losses and unabsorbed depreciation was recognised only on existence of virtual certainty of taxable profits. The application of Ind AS 12 approach has resulted in recognition of deferred tax assets in case of reasonable certainty. The deferred tax impact of all Ind AS adjustments (as applicable) has also been considered.

B) Investment property

As per the requirements of Ind AS 40, the company has reclassified land and building held with the intention to earn rental income as Investment property and Investment Property under construction.

The above reclassification adjustments do not have any impact on the reconciliations given above.

(V) Reconciliation of Equity as at April 1, 2013

As specified in the Guidance Note, the equity balance computed under Proforma Standalone Ind AS financial information for the year ended March 31, 2016 (i.e. equity under Indian GAAP as at April 1, 2015, 2014 and 2013 adjusted for impact of Ind AS 101 items and after considering profit or loss for the years ended March 31, 2016, 2015 and 2014 with adjusted impact due to Ind AS principles applied on proforma basis) and equity balance computed in opening Ind AS Balance sheet as at transition date (i.e. April 1, 2016), prepared for filing under Companies Act, 2013, differs due to restatement adjustments made as at April 1, 2015, 2014 and 2013. Changes in accounting policies:

Except for the changes below, the Company has consistently applied the accounting policies to all periods presented in these standalone financial information.

The Company has adopted Ind AS 115 *Revenue from Contracts with Customers* ("Ind AS 115") with a date of initial application of April 1, 2018. As a result, the Company has changed its accounting policy for revenue recognition as detailed below.

The Company has applied Ind AS 115 using the cumulative effect method. The details of the significant changes and qualitative impact of changes are set out below:

A. Real Estate development

The Company accounted for its sale of residential flats in their real estate projects on a percentage completion basis as prescribed under the Guidance note for Accounting for Real Estate Transactions. Under Ind AS 115, the Company recognises the revenue from sale of residential projects at a point in time, i.e. when all the risks and rewards associated are transferred to the customer. Accordingly the Company has reversed the cumulative revenue recognised on sale of residential flats in the opening reserve as on April 1, 2018.

A. Reconciliation between balances without adoption of Ind AS 115 and as reported

Ind AS 8 requires an entity to reconcile equity and total comprehensive income for the reported period.

Notes to Adjustments

1. Adjustments for audit qualification: None

2. Material regrouping

Appropriate adjustments have been made in the Restated Standalone Financial Information, wherever required, by a reclassification of the corresponding items of income, expenses, assets, liabilities and cash flows in order to bring them in line with the groupings as per the audited Standalone Interim Ind AS Financial Statements of the Company as at and for the period ended September 30, 2018, prepared in accordance with Division II Ind AS Schedule III of the Companies Act, 2013 ('the Act') and the requirements of the Securities and Exchange Board of India (Issue of Capital & Disclosure Requirements) Regulations, 2009 (as amended). Accordingly, the Company has presented the Restated Standalone Financial Information as at and for the years ended March 31, 2018, March 31, 2017, March 31, 2016, March 31, 2015 and March 31, 2014 following the requirements of Schedule III of the Act.

3. Material restatement adjustments

(a) Export benefit entitlements written off

The Company recognises income in respect of duty credit entitlement arising from export sales under the "Served from India Scheme" of the Government of India in the year of exports, provided there is no significant uncertainty regarding the entitlement and availment of the credit and the amount thereof. Export credit entitlement can be utilised within a specified benefit period, by way of adjustment against duties payable on purchase of capital equipments, spare parts and consumables. Unutilised export entitlement is written off in the year in which the time period of utilisation of such licenses expires. The Company had written off export entitlement receivable during the year ended March 31, 2014 on expiry of the utilisation period. For the purpose of these restated financial information, the Company has appropriately adjusted this in the year in which the duty credit entitlement was first recognised. Adjustments related to financial years prior to March 31, 2014 have been adjusted against the opening balance of the retained earnings as per restated financial information as at April 1, 2013.

(b) Adjustments due to change in status of residential project at Bengaluru

In view of Hindustan Aeronautics Limited (HAL's) raising an objection with regards to the permissible height and pursuant to the interim order passed by the Hon. Karnataka High Court ('the Court') in the petition filed by the Company, in respect of the Company's residential project at Bengaluru during the year 2013-14, the Company suspended and limited the vertical construction of all wings up to a particular height, pending outcome of the matter.

Further, pending the outcome of the proceedings and a final closure of the matter, the Company had decided to suspend revenue recognition based on the percentage completion method and has also been derecognising profits on cancellation of flats previously sold. Pursuant to a subsequent order passed by the Court for conduct of an Aeronautical Study by the Airports Authority of India [AAI], AAI conducted the required Aeronautical Study and filed its report in January 2015, confirming that the full height of the then completed building-wings does not adversely affect aircraft operations. HAL has filed objections to the Aeronautical Study Report of AAI, and the matter is currently sub-judice.

Since the litigation has prolonged and is yet to be concluded, the Company explored the option of restructuring the construction plan in consultation with the relevant stakeholders to achieve a mutually beneficial solution. Consequently, during the year ended March 31, 2018, without prejudice to its rights and remedies under law and keeping the commercial considerations in perspective, the Board of Directors of the Holding Company, decided that the Company should proactively consider re-commencement of construction upto permissible limit and engage with the buyers above 10th floor for evaluating possible options. Accordingly, the Company has reassessed the estimated cost of completion of the project upto the 10th floor as per the aforementioned plan and has recorded the following adjustments as exceptional items during the year ended March 31, 2018:

i) Provision towards impairment of super structure of Rs 350 million and expected cost of alteration of super structure of Rs 250 million have been adjusted during the year ended March 31, 2014, being the year in which the litigation had initiated.

ii) Provision for cost of mitigation program compensation of Rs 555 million for expected cancellations for flats above 10th floor, net of compensation already provided for has been adjusted to the respective year to which interest cost relates. Adjustments related to financial years prior to March 31, 2014 have been adjusted against the opening balance of the retained earnings as per restated standalone financial information as at April 1, 2013.

iii) Impact of revised estimated cost of completion of the project on the net realisable value of inventory resulting in write down of Rs 25 million has been adjusted during the year ended March 31, 2014, being the year in which the litigation had initiated.

The auditors' reports for the years ended March 31, 2017 and March 31, 2016 included an Emphasis of Matters paragraph in respect of the amounts related to the residential project at Bengaluru (inventories aggregating to Rs 2,659.87 million and Rs 2,533.02 million and trade receivables of Rs 9.12 million and Rs 6.77 million as at March 31, 2017 and March 31, 2016 respectively). The Company has made necessary adjustments to inventories and trade receivables in these Restated Standalone Summary Financial Information as per the aforementioned plan.

Annexure V: Basis of preparation and Significant Accounting Policies

1. Basis of preparation and presentation

The Restated Consolidated Summary Statement of Assets and Liabilities of the Group as at September 30, 2018, March 31, 2018 and March 31, 2017 and the Restated Consolidated Summary Statement of Profit and Loss (including Other Comprehensive Income), the Restated Consolidated Summary Statement of Changes in Equity and the Restated Consolidated Summary Statement of Cash flows for the period/years ended September 30, 2018, March 31, 2018 and March 31, 2017 and Restated Other Consolidated Financial Information (together referred as 'Restated Consolidated Financial Information') has been prepared under Indian Accounting Standards ('Ind AS') notified under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015.

For all periods up to and including the year ended March 31, 2017, the Group prepared its audited consolidated financial information in accordance with accounting standards notified under Section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 ("Indian GAAP"). The consolidated financial statements for the year ended March 31, 2018 are the Group's first Ind AS financial statements. The date of transition to Ind AS is April 1, 2016.

The Group has elected to present all the five years including the period ended on September 30, 2018 in accordance with Ind AS/ Proforma Ind AS, instead of Indian GAAP. The Restated Consolidated Financial Information for the years ended March 31, 2016, 2015 and 2014 has been prepared on Proforma basis (i.e. "Proforma Consolidated Ind AS financial information") in accordance with requirements of SEBI Circular SEBI/HO/CFD/DIL/CIR/P/2016/47 dated March 31, 2016 ("SEBI Circular") and Guidance note on Reports in Company Prospectuses issued by Institute of Chartered Accountants of India (ICAI). For the purpose of Proforma Ind AS consolidated financial information for the years ended March 31, 2016, 2015 and 2014, the Group has followed the same accounting policy and accounting policy choices (both mandatory exceptions and optional exemptions availed as per Ind AS 101) as initially adopted on transition date i.e. April 1, 2016. Accordingly, suitable restatement adjustments (both re-measurements and reclassifications) in the accounting heads are made to the Proforma Ind AS Consolidated financial information as of and for the years ended March 31, 2016, 2015 and 2014. The basis of preparation for specific items where exemptions have been applied are as follows:

- (a) **Property, Plant and Equipment (PPE):** As permitted by Ind AS 101, the Group has elected to fair value land as at the date of transition to Ind AS (April 1, 2016) and use that fair value as its deemed cost at that date with the resultant impact being accounted for in the reserves.

For the purpose of Proforma Ind AS Consolidated Financial Information for the years ended March 31, 2016, March 31, 2015 and March 31, 2014, the same has been accounted in accordance with the Guidance Note on Reports in Company Prospectus (Revised 2016). The fair value as on transition date is basis the land parcels and subsequent capitalisations made to the cost of land (for purchase of additional FSI) till such date (i.e. April 1, 2016). For the purpose of pushback of such fair value, proportionate fair value of such additions made is calculated based on the ratio of cost (adjusted for inflation) incurred for purchase of such additions to the total cost of such land. The fair value of such additions has been considered in their respective years of purchase by the Group.

- (b) All other items of PPE have been measured as per the requirements of Ind AS 16 retrospectively

Chalet Hotels Limited

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies ***(continued)***

Basis of preparation and presentation *(Continued)*

- (c) **Intangible assets and Investment Properties-** As permitted by Ind AS 101, the Group has elected to continue with the carrying value of all of its Intangible assets and investment properties recognised as at April 1, 2016 measured as per the previous Indian GAAP and use that carrying value as the deemed cost. For the purpose of Proforma Ind AS Consolidated Financial Information for the years ended March 31, 2016, March 31, 2015 and March 31, 2014, the Group has provided the depreciation based on the estimated useful life of respective years.
- (d) Ind AS 103 Business Combinations has not been applied to business combinations, which are considered businesses under Ind AS that occurred before 1 April 2016. Pursuant to this exemption, goodwill arising from business combination has been stated at the carrying amount under previous GAAP. Use of this exemption means that the Indian GAAP carrying amounts of assets and liabilities, that are required to be recognised under Ind AS, is their deemed cost at the date of the acquisition after considering specific adjustments as required by Para C4 of Appendix C of Ind AS 101. For the purpose of Proforma Ind AS Consolidated Financial Information for the year ended March 31, 2016, March 31, 2015 and March 31, 2014, the Group has continued with the existing exemption on the date of transition (i.e. April 1, 2016) and no retrospective assessment/ adjustments have been made except as those required by Para C4 of Appendix C of Ind AS 101.
- (e) **Scheme of arrangement - Hotel and Retail Undertaking (refer note 41):**

The Board of Directors at their meeting held on 26 October 2013 had approved the merger proposal and approved the "Scheme of Arrangement" to demerge the Hotel Undertaking and the Retail Undertaking (together referred to as 'Demerged Undertaking') at Bengaluru from a subsidiary company, namely Magna Warehousing & Distribution Private Limited ('MWDPL') under Section 391 read with Section 394 of the Companies Act, 1956, with effect from 1 April 2013, ("the Appointed Date") subject to obtaining necessary approvals of the Shareholders, Honourable High Court of Karnataka at Bangalore and Honourable High Court of Bombay and other statutory and regulatory authorities. The Scheme has become effective from 11 September 2015.

The effect of the above scheme of demerger was given in the consolidated statutory accounts in the financial year ended March 31, 2015 when the said scheme has received all the requisite approvals with effect from Appointed Date. However for the purpose of restated Proforma Ind AS Consolidated Financial Information, the effect of the above scheme has been given in the consolidated financial information on the Appointed Date (1 April 2013). These Restated Proforma Ind AS Consolidated Financial Information have been compiled by the Group from the Audited Consolidated Financial Statements and:

- material amounts relating to adjustments for previous years in arriving at profit/loss of the years to which they relate, have been appropriately adjusted,
- adjustments for reclassification of the corresponding items of income, expenses, assets and liabilities, in order to bring them in line with the groupings as per the audited Consolidated financial statements of the Group as at and for the period ended ended September 30, 2018 prepared under Ind AS and the requirements of the SEBI Regulations, and

(f) Other material restated adjustments (continued)

- the resultant tax impact on above adjustments has been appropriately adjusted in deferred taxes in the respective years to which they relate.

The Restated Consolidated Summary Financial Information has been prepared on a historical cost basis, except for the following:

- certain financial assets and liabilities (including derivative instruments) that are measured at fair value (refer- Accounting policy regarding financials instruments);
- assets held for sale – measured at lower of cost or fair value less cost to sell;
- defined benefit plans – plan assets measured at fair value less present value of defined benefit obligation; and
- land at fair value on transition date

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

A. Functional and presentation currency

The Restated Consolidated Summary Financial Information is presented in Indian rupees, which is the Group's functional currency. All amounts have been rounded off to the nearest million with two decimals, unless otherwise indicated.

B. Use of estimates and judgements

While preparing the Restated Consolidated Summary Financial Information in conformity with Ind AS, the management has made certain estimates and assumptions that require subjective and complex judgments. These judgments affect the application of accounting policies and the reported amount of assets, liabilities, income and expenses, disclosure of contingent liabilities at the restated consolidated summary statement of assets and liabilities date and the reported amount of income and expenses for the reporting period. Future events rarely develop exactly as forecasted and the best estimates require adjustments, as actual results may differ from these estimates under different assumptions or conditions.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Judgement, estimates and assumptions are required in particular for:

- Determination of the estimated useful lives

Useful lives of property, plant and equipment and investment property are based on the life prescribed in Schedule II of the Act. In cases, where the useful lives are different from that prescribed in Schedule II and in case of intangible assets, they are estimated by management based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers' warranties and maintenance support.

(continued)

Basis of preparation and presentation (continued)

- **Recognition and measurement of defined benefit obligations**
The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation, actuarial rates and life expectancy. The discount rate is determined by reference to market yields at the end of the reporting period on government bonds. The period to maturity of the underlying bonds correspond to the probable maturity of the post-employment benefit obligations. Due to complexities involved in the valuation and its long term nature, defined benefit obligation is sensitive to changes in these assumptions. All assumptions are reviewed at each reporting period.
- **Recognition of deferred tax assets**
Deferred tax assets and liabilities are recognised for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilised business loss and depreciation carry-forwards and tax credits. Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilised.
- **Recognition and measurement of other provisions**
The recognition and measurement of other provisions are based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the closing date. The actual outflow of resources at a future date may therefore, vary from the amount included in other provisions.
- **Discounting of long-term financial assets / liabilities**
All financial assets / liabilities are required to be measured at fair value on initial recognition. In case of financial liabilities/assets which are required to subsequently be measured at amortised cost, interest is accrued using the effective interest method.
- **Determining whether an arrangement contains a lease**
At inception of an arrangement, the Group determines whether the arrangement is or contains a lease.

At inception or on reassessment of an arrangement that contains a lease, the Group separates payments and other consideration required by the arrangement into those for the lease and those for other elements on the basis of their relative fair values. If the Group concludes for a finance lease that it is impracticable to separate the payments reliably, then an asset and a liability are recognised at an amount equal to the fair value of the underlying asset; subsequently, the liability is reduced as payments are made and an imputed finance cost on the liability is recognised using the Group's incremental borrowing rate. And in case of operating lease, treat all payments under the arrangement as lease payments.

- **Fair value of financial instruments**

Derivatives are carried at fair value. Derivatives includes foreign currency forward contracts. Fair value of foreign currency forward contracts are determined using the fair value reports provided by respective bankers.

Further information about the assumptions made in measuring fair values is included in the following notes:

- Note J – impairment test of non-financial assets: key assumptions underlying recoverable amounts; and
- Note L – determining the fair value less costs to sell of the assets classified as held for sale on the basis of significant unobservable inputs.

C. Measurement of fair values

The Group's accounting policies and disclosures require the measurement of fair values for, both financial and non-financial assets and liabilities.

The Group has an established control framework with respect to the measurement of fair values. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. The management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of a financial asset or a financial liability, the Group uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- *Level 1:* quoted prices (unadjusted) in active markets for identical assets or liabilities.
- *Level 2:* inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- *Level 3:* inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

2. Basis of consolidation

Subsidiaries:

The restated consolidated summary financial information incorporate the financial statements of the Company and entities controlled by the Company. Subsidiaries are all entities over which the holding company has control.

The Company controls an investee when the Company has power over the investee, is exposed to, or has rights to, variable returns from its involvement with the investee and has the ability to affect those returns through its power to direct the relevant activities of the investee. Subsidiaries are fully consolidated from the when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary.

The acquisition method of accounting is used to account for business combinations by the Group. The Group combines the financial statements of the Holding company and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intra-group transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the Restated Consolidated Summary Statement of Profit and Loss, Restated Consolidated Summary Statement of Changes in Equity and Restated Consolidated Summary Statement of Assets and Liabilities respectively.

In the restated consolidated summary financial information, 'Goodwill' represents the excess of the cost to the Holding company of its investment in the subsidiaries over its share of equity, at the respective dates on which the investments are made. Alternatively, where the share of equity as on the date of investment is in excess of cost of investment, it is recognised as 'Capital Reserve' in the consolidated financial statements.

Annexure V: Basis of preparation and Significant Accounting Policies ***(continued)***

2. Basis of consolidation *(continued)*

Associates:

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decision of the investee, but is not control or joint control over those policies.

The Group's investment in its associate are accounted for using the equity method, except when the investment, or a portion thereof, is classified as held for sale, in which case it is accounted for in accordance with Ind AS 105. Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of the profit or loss and other comprehensive income of the associate since the acquisition date. Distributions received from an associate reduce the carrying amount of the investment. When the Group's share of losses of an associate exceeds the Group's interest in that associate, the Group discontinues recognising its share of further losses.

Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

Goodwill relating to the associates is included in the carrying amount of the investment and is not tested for impairment individually. The restated consolidated summary statement of profit and loss reflects the Group's share of the results of operations of the associates. Any change in other comprehensive income of those investees is presented as part of the Group's other comprehensive income. In addition, when there has been a change recognised directly in the equity of the associates, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associated are eliminated to the extent of the interest in the associate.

Group discontinues the use of the equity method from the date when the investment ceases to be an associate, or when the investment is classified as held for sale. When the Group retains an interest in the former associate and the retained interest is a financial asset, the Group measures the retained interest at fair value at that date and the fair value is regarded as its fair value on initial recognition in accordance with Ind AS 109. The difference between the carrying amount of the associate at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate is included in the determination of the gain or loss on disposal of the associate. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that associate on the same basis as would be required if that associate had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognised in other comprehensive income by that associate would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when the equity method is discontinued.

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies *(continued)*

Basis of preparation and presentation *(continued)*

2. Basis of consolidation *(continued)*

When the Group reduces its ownership interest in an associate or a joint venture but the Group continues to use the equity method, the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

The aggregate of the Group's share of profit and loss of an associate is shown on the face of the restated consolidated summary statement of profit and loss outside operating profit and represents profit and loss after tax of the associate. The financial statements of the associate are prepared for the same reporting period as of the Group. After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associates. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associates and its carrying value, and recognises the loss as 'Share of profit of an associate' in the restated consolidated summary statement of profit and loss.

3. Current and non-current classification

The Schedule III to the Act requires assets and liabilities to be classified as either current or non-current.

An asset is classified as current when it satisfies any of the following criteria:

- (a) it is expected to be realised in, or is intended for sale or consumption in, the entity's normal operating cycle;
- (b) it is held primarily for the purpose of being traded;
- (c) it is expected to be realised within twelve months after the balance sheet date; or
- (d) it is cash or a cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the balance sheet date.

All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria:

- (a) it is expected to be settled in, the entity's normal operating cycle;
- (b) it is held primarily for the purpose of being traded;
- (c) it is due to be settled within twelve months after the balance sheet date; or
- (d) the Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the balance sheet date.

All other liabilities are classified as non-current.

3. Current and non-current classification *(continued)*

Operating cycle

Operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents.

Based on the nature of services and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Group has ascertained its operating cycle as 12 months for the purpose of current – non-current classification of assets and liabilities.

4. Significant accounting policies

A. Business combination

As part of its transition to Ind AS, the Group has elected to apply the relevant Ind AS, viz. Ind AS 103, Business combinations, to only those business combinations that occurred on or after the transition date i.e. April 1, 2016.

The Group has accounted merger schemes in a manner prescribed by the High Court orders. The book values of the assets, liabilities and reserves of the Transferor Company have been recorded and the identity of the reserves has been maintained. The excess of book value of the net assets and reserves of the Transferor Company taken over, over the face value of the shares issued by the transferee Company has been debited to the Goodwill as per the Scheme. Any goodwill that arises is tested annually for impairment.

Transaction costs are expensed as incurred, except to the extent related to the issue of debt or equity securities. The consideration transferred does not include amounts related to the settlement of pre-existing relationships with the acquiree. Such amounts are recognised in the restated consolidated summary statement of profit and loss.

Common control

Business combinations involving entities that are ultimately controlled by the same parties before and after the business combination are considered as Common control entities. Common control transactions are accounted using pooling of interest method. The financial statements in respect of prior periods have been restated from the period that the Transferor Company became a subsidiary of the Transferee Company where the assets and liabilities of the transferee are recorded at their existing carrying values, the identity of reserves of the transferee company is preserved.

B. Revenue

i. Real estate development and sale

Revenue from real estate activity is recognised to the extent that it is probable that the economic benefits will flow to the Group, all significant risks and rewards of ownership are transferred to the customers and it is not unreasonable to expect ultimate collection and no significant uncertainty exists regarding the amount of consideration.

Chalet Hotels Limited

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies

(continued)

Significant accounting policies *(continued)*

Revenue from real estate development activity is recognised at a point in time when significant risks and rewards are transferred to the Customer i.e. when the control of the residential flat is transferred to the Customer.

Cost of construction/development includes all costs directly related to the Project and other expenditure as identified by the management which are reasonably allocable to the project.

Unbilled revenue from Real Estate represents revenue recognised over and above amount due as per payment plans agreed with the customers. Progress billings which exceed the costs and recognised profits to date on projects under construction are disclosed as advance received from customers under other current liabilities. Any billed amount that has not been collected is disclosed under trade receivables.

ii. Hospitality business

Revenue is measured at the fair value of the consideration received or receivable. Revenue comprises sale of rooms, food, beverages, smokes and allied services relating to hotel operations. Revenue is recognised upon rendering of the service, provided pervasive evidence of an arrangement exists, tariff / rates are fixed or are determinable and collectability is reasonably certain.

Revenue recognised is net of indirect taxes, returns and discounts.

iii. Rental income

Revenues from property leased out under an operating lease are recognised over the tenure of the lease / service agreement on a straight line basis over the term of the lease, except where the rentals are structured to increase in line with expected general inflation, and except where there is uncertainty of ultimate collection.

iv. Income from other services

Maintenance income is recognised as and when related expenses are incurred.
Income from ancillary services are recognised as and when the services are rendered.

v. Dividend income

Dividend income is recognised only when the right to receive the same is established, it is probable that the economic benefits associated with the dividend will flow to the Group, and the amount of dividend can be measured reliably.

Chalet Hotels Limited

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies (continued)

Significant accounting policies (continued)

vi. Interest income

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR), which is the rate that discounts the estimated future cash payments or receipts through the expected life of the financial instruments or a shorter period, where appropriate, to the net carrying amount of the financial assets on initial recognition. Interest income is included in other income in the Restated Consolidated statement of profit or loss.

C. Foreign Currency

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in profit or loss.

Foreign exchange differences regarded as an adjustment to borrowing costs are presented in the restated consolidated summary statement of profit and loss, within finance costs. All other foreign exchange gains and losses are presented in the restated consolidated summary statement of profit and loss on a net basis within other gains / (losses).

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of transactions. Non-monetary items that are measured at fair value in a foreign currency shall be translated using the exchange rates at the date when the fair value was measured.

D. Employee benefits

i. Short-term employee benefits

All employee benefits payable wholly within twelve months of rendering services are classified as short-term employee benefits. Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Short-term benefits such as salaries, wages, short-term compensation absences, etc., are determined on an undiscounted basis and recognised in the period in which the employee renders the related service.

ii. Post-employment benefits

Defined contribution plans

Obligations for contributions to defined contribution plans such as Provident Fund and Family pension maintained with Regional Provident Fund Office are expensed as the related service is provided.

Chalet Hotels Limited

Defined benefit plans

The following post – employment benefit plans are covered under the defined benefit plans:

- **Gratuity Fund**

The Group provides for gratuity, a defined benefit retirement plan covering eligible employees. The Gratuity Plan provides a lump-sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment with the Group. The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus the Group's defined benefit plans.

When the calculation results in a potential asset for the Group, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the Restated Consolidated Summary Statement of changes in equity and in the Restated Consolidated Summary Statement of Assets and Liabilities.

iii. Terminal Benefits:

All terminal benefits are recognised as an expense in the period in which they are incurred.

iv. Employee stock option expense

The grant date fair value of equity settled share-based payment awards granted to employees is recognised as an employee expense, with a corresponding increase in equity, over the period that the employees unconditionally become entitled to the awards. The amount recognised as expense is based on the estimate of the number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the number of awards that do meet the related service and non-market vesting conditions at the vesting date.

E. Income-tax

Income-tax expense comprises current and deferred tax. It is recognised in net profit in the restated consolidated statement of profit or loss except to the extent that it relates to items recognised directly in equity or in the OCI.

i. Current tax

Current tax is the amount of tax payable (recoverable) in respect of the taxable profit / (tax loss) for the year determined in accordance with the provisions of the Income-tax Act, 1961. Taxable profit differs from 'profit before tax' as reported in the Restated Consolidated Summary Statement of Profit and Loss because of items of income or expenses that are taxable or deductible in other years & items that are never taxable

Significant accounting policies *(continued)*

or deductible. Current income tax for current and prior periods is recognised at the amount expected to be paid to or recovered from the tax authorities, using tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Current tax assets and liabilities are offset only if, the Group:

- a) has a legally enforceable right to set off the recognised amounts; and
- a) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

ii. Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss; and
- temporary differences related to investments in subsidiaries and associates to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves. Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Taxes relating to items recognised directly in equity or OCI is recognised in equity or OCI and not in the Restated Consolidated Summary Statement of profit and loss.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if:

- a) the entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on the same taxable entity.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted and depreciated for as separate items (major components) of property, plant and equipment. Any gain or loss on disposal of an item of property, plant and equipment is recognised in the Restated Consolidated Summary Statement of Profit and Loss.

Properties in the course of construction for production, supply or administration purposes are carried at cost, less any impairment loss recognised. Cost includes professional fees and, for qualifying assets borrowing costs capitalised in accordance with the group's accounting policy. ii. Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group.

iii. Transition to Ind AS

For transition to Ind AS, the Group has elected to apply Ind AS 16 retrospectively to its property, plant and equipment along with selective fair valuation of few assets (Freehold land at Powai and Sahar in Mumbai and Westin at Hyderabad are measured at fair value as deemed cost) and use that carrying value as its deemed cost. Freehold land is measured at fair value as per Ind AS 113 with the resultant impact being accounted for in the reserves. The fair value of the Group's freehold land parcels as at April 1, 2016 have been arrived at on the basis of a valuation carried out by an independent registered appraiser not related to the Group with appropriate qualifications and relevant experience in the valuation of properties at relevant locations. The fair value was determined based on a combination of Discounted Cash Flow method and Residual method. The fair value of such freehold land has been pushed back to the earliest of reporting period in the restated financial statements in accordance with the Guidance Note on Reports in Company Prospectuses (Revised 2016).

H. Borrowing costs

Borrowing costs are interest and other costs (including exchange differences relating to foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs) incurred in connection with the borrowing of funds. Borrowing costs directly attributable to acquisition or construction of a qualifying asset which necessarily take a substantial period of time to get ready for their intended use or sale are capitalised as part of the cost of that asset until such time as the assets are substantially ready for their intended use or sale. Other borrowing costs are recognised as an expense in the period in which they are incurred.

I. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The management committee assesses the financial performance and position of the group, and makes strategic decisions. It is identified as being the chief operating decision maker for the Group. Refer note 49 for segment information presented.

J. Intangible assets

Recognition and measurement

Intangible assets comprises of trademarks and computer software and are measured at cost less any accumulated amortisation and accumulated impairment loss, if any.

Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates.

Transition to Ind AS

On transition of Ind AS, the Group has elected to continue with the carrying value of all of its intangible assets recognised as at 1 April 2016, measured as per the previous GAAP, and use that carrying value as the deemed cost of such intangible assets.

Amortisation

Amortisation is calculated over the cost of the asset, or other amount substituted for cost, less its residual value. Amortisation is recognised in the Restated Consolidated Statement of profit or loss on a straight-line basis over the estimated useful lives of intangible assets, from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

Intangible assets are amortised on straight-line method over estimated useful life of 3 years, which in management's view represents the economic useful life of these assets.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate prospectively.

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognised for such excess amount. The impairment loss is recognised as an expense in the Restated consolidated summary statement of profit and loss, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset.

Goodwill on business combination is not amortised but it is tested for impairment annually or more frequently if events or changes in circumstances indicate that it might be impaired.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognised for an asset (other than a revalued asset) in earlier accounting periods which no longer exists or may have decreased, such reversal of impairment loss is recognised in the Restated consolidated summary statement of profit and loss, to the extent the amount was previously charged to the Restated consolidated summary statement of profit and loss. In case of revalued assets, such reversal is not recognised.

K. Investment property and investment property under construction

(a) Recognition and measurement

Investment property is property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Upon initial recognition, an investment property is measured at cost. Subsequent to initial

recognition, investment property is measured at cost less accumulated depreciation and accumulated impairment losses, if any.

On transition to Ind AS, the Group has elected to continue with the carrying value of all of its investment property recognised as at 1 April 2016, measured as per the previous GAAP and use that carrying value as the deemed cost of such investment property.

Investment property and investment property under construction represents the cost incurred in respect of areas retail block and commercial office space. Property under construction is accounted for as investment property under construction until construction or development is complete.

Direct expenses like cost of land, including related transaction costs, site labour cost, material used for project construction, project management consultancy, costs for moving the plant and machinery to the site and general expenses incurred specifically for the respective project like insurance, design and technical assistance, and construction overheads are taken as the cost of the project.

Investment properties are carried individually at cost less accumulated depreciation and impairment, if any. Investment properties under construction are carried individually at cost less impairment, if any. Impairment of investment property is determined in accordance with the policy stated for impairment of assets.

(b) Depreciation

Depreciation on investment property has been provided pro rata for the period of use by the Straight Line Method. The useful lives of Investment Property is estimated by management and the same is as prescribed in Schedule II to the Act, except in respect of the following categories of assets, where the life of these assets differs from Schedule II.

Any gain or loss on disposal of an investment property is recognised in Restated Consolidated summary statement of profit and loss.

The fair values of investment property are disclosed in the notes. Fair values are determined by an independent valuer who holds a recognised and relevant professional qualification and has recent experience in the location and category of the investment property being valued.

L. Assets held for sale

Non-current assets are classified as held for sale if it is highly probable that their carrying amount will be recovered primarily through sale rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Group is committed to a sale plan involving disposal of an investment, or a portion of an investment, in an associate, the investment or the portion of the investment that will be disposed of is classified as held for sale when the criteria described above are met, and the Group discontinues the use of the equity method in relation to the portion that is classified as held for sale. Any retained portion of an investment in an associate that has not been classified as held for sale continues to be accounted for using the equity method. The Group discontinues the use of the equity method at the time of disposal when the disposal results in the Group losing Significant influence over the associate or joint venture.

After the disposal takes place, the Group accounts for any retained interest in the associate in accordance with Ind AS 109 unless the retained interest continues to be an associate, in which case the Group uses the equity method (see the accounting policy regarding investments in associates above).

Such assets are generally measured at the lower of their carrying amount and fair value less costs to sell. Losses on initial classification as held for sale and subsequent gains and losses on remeasurement are recognised in Restated Consolidated summary statement of profit and loss. Refer Note 17.

M. Financial Instruments

1. Financial assets

(a) Recognition and initial measurement

Trade receivable are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Group becomes a party to the contractual provisions of the instrument.

A financial asset is initially measured at fair value plus, for an item not at Fair Value through Profit and Loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

(b) Classification and subsequent measurement

The Group classifies its financial assets into a) financial assets measured at amortised cost, and b) financial assets measured at fair value through profit or loss (FVTPL). Management determines the classification of its financial assets at the time of initial recognition or, where applicable, at the time of reclassification.

Chalet Hotels Limited

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies ***(continued)***

Significant accounting policies *(continued)*

(i) Financial assets measured at amortised costs

A financial asset is classified at amortised costs if it is held within a business model whose objective is to a) hold financial asset in order to collect contractual cash flows and b) the contractual terms of the financial asset give rise on specific dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using effective interest rate method (EIR). Amortised cost is arrived at after taking into consideration any discount on fees or costs that are an integral part of the EIR. The amortisation of such interests forms part of finance income in the restated consolidated summary statement of profit and loss. Any impairment loss arising from these assets are recognised in the restated consolidated summary statement of profit and loss.

(ii) Financial assets measured at fair value through profit and loss (FVTPL)

This is a residual category for classification. Any asset which do not meet the criteria for classification as at amortised cost, is classified as FVTPL. Financial assets at fair value through profit or loss are measured at fair value, and changes therein are recognised in the restated consolidated statement of profit or loss.

(iii) Financial assets measured at fair value through other comprehensive income (FVOCI)

- Debt investments at FVOCI: These assets are subsequently measured at fair value. Interest income under the effective interest method, foreign exchange gains and losses and impairment are recognised in restated consolidated summary statement of profit and loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to restated consolidated summary statement of profit and loss.

- Equity investments at FVOCI: These assets are subsequently measured at fair value. Dividends are recognised as income in Restated consolidated summary statement of profit and loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to Restated consolidated summary statement of profit and loss.

(c) Derecognition

The Group derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Group is recognised as a separate asset and associated liability for any amounts it may have to pay.

Chalet Hotels Limited

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies ***(continued)***

Significant accounting policies *(continued)*

(d) Impairment of financial assets

In accordance with Ind-AS 109, the Group applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, and bank balance.

b) Trade receivables- The Group follows 'simplified approach' for recognition of impairment loss allowance on trade receivables which do not contain a significant financing component. The application of simplified approach does not require the Group to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

2. Financial liabilities

(a) Recognition, measurement and classification

Financial liabilities are classified as either held at a) fair value through profit or loss, or b) at amortised cost. Management determines the classification of its financial liabilities at the time of initial recognition or, where applicable, at the time of reclassification. The classification is done in accordance with the substance of the contractual arrangement and the definition of a financial liability and an equity instruments. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities at amortised cost includes loan and borrowings, interest free security deposit, interest accrued but not due on borrowings, Retention money payable, trade and other payables. Such financial liabilities are recognised initially at fair value minus any directly attributable transaction costs. Subsequent to initial recognition these financial liabilities are measured at amortised cost using the effective interest method.

The Group's financial liabilities at fair value through profit or loss includes derivative financial instruments.

(b) Financial guarantee contracts

The Group on a case to case basis elects to account for financial guarantee contracts as a financial instruments or as an insurance contracts as specified in Ind AS 109 on Financial Instruments and Ind AS 104 on Insurance contracts. The Group has regarded all its financial guarantee contracts as insurance contracts. At the end of each reporting period, the Group performs a liability adequacy test, (i.e. it assesses the likelihood of a pay-out based on current undiscounted estimates of future cash flows), and any deficiency is recognised in restated consolidated summary statement of profit and loss.

(c) Derecognition

The Group derecognises financial liabilities when its contractual obligations are discharged or cancelled or have expired.

(formerly known as Chalet Hotels Private Limited)

3. Offsetting of financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount presented in the restated consolidated summary statement of financial position when, and only when, the Group has legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

4. Derivative financial instruments

The Group uses derivative financial instruments, such as foreign exchange forward contracts, interest rate swaps and currency options to manage its exposure to interest rate and foreign exchange risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured to their fair value. The resulting gain/loss is recognised in Restated consolidated summary statement of profit and loss immediately at the end of each reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. The Group does not designate the derivative instrument as a hedging instrument.

N. Provisions, contingent liabilities and contingent assets

Provisions are recognised when there is a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognised as finance cost.

O. Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases. In determining whether an arrangement is, or contains a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset, even if that right is not explicitly specified in the arrangement.

i. Lease payments

Payments made under operating leases are recognised in the Restated consolidated summary statement of profit and loss on a straight line basis over the term of the lease unless such payments are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increase, such increases are recognised in the years in which such benefits accrue.

(formerly known as Chalet Hotels Private Limited)

Annexure V: Basis of preparation and Significant Accounting Policies ***(continued)***

Significant accounting policies *(continued)*

ii. Lease assets

Assets held by the Group under leases that transfer to the Group substantially all of the risks and rewards of ownership are classified as finance leases. The leased assets are measured initially at an amount equal to the lower of their fair value and the present value of the minimum lease payments. The corresponding liability to the lessor is included in the restated consolidated summary statement of assets and liabilities. Subsequent to initial recognition, the assets are accounted for in accordance with the accounting policy applicable to that asset.

Assets held under other leases are classified as operating leases and are not recognised in the Group's restated consolidated statement of financial position.

P. Cash and cash equivalents

Cash and cash equivalent in the Restated consolidated summary statement of assets and liabilities comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

Q. Government Grants

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in Restated consolidated summary statement of profit and loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the Restated consolidated summary statement of assets and liabilities and transferred to Restated consolidated summary statement of profit and loss on a systematic and rational basis over the useful lives of the related assets.

R. Earnings Per Share ("EPS")

The basic Earnings Per Share ("EPS") is computed by dividing the net profit / (loss) after tax for the year attributable to the equity shareholders by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, net profit/(loss) after tax for the year attributable to the equity shareholders and the weighted average number of equity shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

S. Earnings before interest and depreciation and amortisation (“adjusted EBITDA”)

The Group presents adjusted EBITDA in the restated consolidated summary statement of profit and loss; this is not specifically required by Ind AS 1. The terms adjusted EBITDA are not defined in Ind AS. Ind AS complaint Schedule III allows companies to present Line items, sub-line items and sub-totals shall be presented as an addition or substitution on the face of the financial statements when such presentation is relevant to an understanding of the Group’s financial position or performance or to cater to industry/sector-specific disclosure requirements or when required for compliance with the amendments to the Companies Act or under the Indian Accounting Standards.

Measurement of adjusted EBITDA

Accordingly, the Group has elected to present earnings before interest, tax, depreciation and amortisation (adjusted EBITDA) before exceptional items, as a separate line item on the face of the Restated Consolidated Summary Statement of Profit and Loss. The Group measures adjusted EBITDA before exceptional items, on the basis of profit/ (loss) from continuing operations including other income. In its measurement, the Group does not include exceptional items, depreciation and amortisation expense, finance costs, share of profit from associate and tax expense.

The Company has made the necessary amendments in the Restated Consolidated Financial Information.

Government Grants:

Appendix A of Ind AS 115, *Revenue from Contracts with Customers*, defines 'Revenue' as income arising in the course of an entity's ordinary activities. As per paragraph 3 of Ind AS 20, *Accounting for Government Grants and Disclosure of Government Assistance*, 'government grants' are assistance by government in the form of transfers of resources to an entity in return for past or future compliance with certain conditions relating to the operating activities of the entity. They exclude those forms of government assistance which cannot reasonably have a value placed upon them and transactions with government which cannot be distinguished from the normal trading transactions of the entity. The export incentive is in the nature of government grant and does not fall within the scope of Ind AS 115, as it is not revenue arising from contract with customer. Such export incentives are benefits given by the government to incentivise companies to export more products. In accordance with above, while recognising the income arising from SEIS scheme, the Company has applied the provisions of Ind AS 20. The presentation of such incentives is made in accordance with the relevant provisions of Ind AS 20 and Schedule III to the Companies Act, 2013.

Notes:

- Pursuant to the Companies Act, 2013 being effective from April 1, 2014, the Group has revised the depreciation rates on investment property based on the management estimate of the useful lives of the assets, which are lower than or in accordance with Part 'C' of Schedule II of the Act. Consequently, depreciation charged for the period April 1, 2014 to March 31, 2015 is higher by Rs 9.04 million due to change in estimated useful life of certain assets wherein the opening carrying value as at April 1, 2014 is depreciated over the balance useful life.
- The Group has reviewed and revised the estimated economic useful lives of its investment property in accordance with the useful lives specified in Schedule II of the Companies Act, 2013 in accordance with an internal evaluation which is more representative of the useful lives of its investment property during the year ended March 31, 2018. Consequently, the depreciation expense for the year ended March 31, 2018 is lower by Rs. 52.14 million. The change in estimated useful lives has effect of reduction in depreciation charge in future periods.

ii. Valuation technique and significant unobservable inputs

Valuation technique

The fair value of investment property has been determined by external, independent property valuers / management, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued.

The fair value measurement for all of the investment property has been categorised as a Level 3 fair value based on the inputs to the valuation technique used.

The Group follows discounted cash flows technique. The valuation model considers the present value of net cash flows to be generated from the property, taking into account the expected rental growth rate, vacant periods, occupancy rate, lease incentive costs such as rent-free periods and other costs not paid by tenants. The expected net cash flows are discounted using risk-adjusted discount rates. Among other factors, the discount rate estimation considers the quality of a building and its location (prime vs secondary), tenant credit quality and lease terms. The land of Commercial Complex, Bengaluru - I is valued by residual method.

Note 5 Goodwill

(Rs. in million)

Impairment testing for cash generating unit (CGU) containing goodwill

For the purpose of impairment testing, goodwill is allocated to the Group's operating segments which represent the lowest level within the Group at which goodwill is monitored for internal management purposes. The aggregate carrying amounts of goodwill allocated to each cash generating unit are as follows:

Particulars	September 30, 2018	March 31, 2018	March 31, 2017	March 31, 2016 Proforma	March 31, 2015 Proforma	March 31, 2014 Proforma

Total	226.11	226.11	226.11	36.58	36.68	36.68

Goodwill for Commercial complex at Bengaluru pertains to acquisition of 40% stake in Magna Warehousing and Distribution Private Limited in the financial year ended March 31, 2014. The same represents excess of consideration paid (Rs. 47.11 million) over book value of proportionate net assets acquired (Rs.10.53 million). The Group has chosen not to restate past business combinations in line with exemptions available under Ind AS 101 "First Time Adoption of Ind AS" (refer note 54) and accordingly, the carrying value of goodwill under the previous GAAP has been continued to be reflected under Ind AS without any adjustment.

The recoverable amount is based on a value-in-use calculation using the discounted cash flow method.

Value in use has been determined by discounting the future cash flows generated from the continuing use of the unit. The calculation of the value in use is based on the following key assumptions:

The table below shows the key assumptions used in the value in use calculations of :

A. Hotel

Particulars (in %)	September 30, 2018	March 31, 2018	March 31, 2017	March 31, 2016 Proforma	March 31, 2015 Proforma	March 31, 2014 Proforma

C. Commercial complex at Bengaluru

Particulars (in %)	September 30, 2018	March 31, 2018	March 31, 2017	March 31, 2016 Proforma	March 31, 2015 Proforma	March 31, 2014 Proforma
Discount rate	12.00%	9.59%	9.13%	9.55%	9.83%	10.82%
Terminal value growth rate	7.27%	8.50%	8.50%	8.50%	8.50%	8.50%

Discount rate

The discount rate is a pre tax measure based on the rate of 10 year government bonds issued by the Government of India, adjusted for a risk premium to reflect both the increased risk of investing in equities generally and the systematic risk of the specific CGU.

Terminal value growth rate

Terminal value growth rate used for the purpose of calculation of terminal value has been determined based on the long-term compound annual growth rate in EBITDA.

The above assumptions are reviewed annually as part of management's budgeting and strategic planning cycles. These estimates may differ from actual results. The values assigned to each of the key assumptions reflect the Management's past experience as their assessment of future trends, and are consistent with external / internal sources of information.

Based on the above assumptions and analysis, no impairment was identified for any of the CGU as at September 30, 2018, March 31, 2018, March 31, 2017, March 31, 2016, March 31, 2015 and March 31, 2014 as the recoverable value of the CGU exceeded the carrying value.

With regard to the assessment of value in use, no reasonably possible change in any of the above key assumptions would cause the carrying amount of the CGUs to exceed their recoverable amount.

In December 2005, the Group had purchased the entire building comprising of the hotel and apartments therein, together with a demarcated portion of the leasehold rights to land at Vashi (Navi Mumbai) from K. Raheja Corp Private Limited (reflected under prepayment and others above). The Group has been operating the Four Points By Sheraton Hotel at the said premises. Two Public Interest Litigations challenging the allotment of land by CIDCO to K. Raheja Corp Private Limited had been filed in FY 2003-04. During the financial year 2014-15, the Honourable High Court at Bombay ordered K. Raheja Corp Private Limited to demolish the structure and hand back the land to CIDCO. K Raheja Corp Private Limited has filed a special leave petition against the order in the Supreme Court. The Supreme Court on January 22, 2015 directed the maintenance of a status quo. Pending the outcome of proceedings and a final closure of the matter no adjustments have been made in the Restated Consolidated financial information. The balance of prepaid lease rental in relation to such leasehold land as at September 30, 2018 is Rs. 53.92 million (March 31, 2018: Rs. 54.52 million, March 31, 2017: Rs. 55.71 million, March 31, 2016: Rs. 56.91 million, March 31, 2015: Rs. 58.11 million, March 31, 2014: Rs. 59.30 million).

The Company's weighted average tax rates for period/years ended September 30, 2018, March 31, 2018, 2017, 2016, 2015 and 2014 were 30.51%, (47.08%), (61.08%), 32.24%, 10.24% and 21.35%, respectively.

The effective tax rate is primarily lower on account of indexation benefit recognised on land and unquoted equity shares. Further unabsorbed tax losses have been utilised during some years to reduce the current tax expense.

The Group offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

Significant management judgement is required in determining provision for income tax, deferred income tax assets and liabilities and recoverability of deferred income tax assets. The recoverability of deferred income tax assets is based on estimates of taxable income and the period over which deferred income tax assets will be recovered. Any changes in future taxable income would impact the recoverability of deferred tax assets.

Deferred tax assets for the carry forward of unused tax losses are recognised to the extent that it is probable that future taxable profits will be available against which the unused tax losses can be utilised. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Group recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets – unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

The Group has recognised deferred tax asset to the extent that the same will be recoverable using the estimated future taxable income based on the approved business plans and budgets of the Group. The Group has generated taxable income for the financial year ended March 31, 2018 and has adjusted the carry forward losses partially. The Group is expected to continue generating taxable income going forward. The business losses can be carried forward for a period of 8 years as per the tax regulations and the Group expects to recover the losses.

The Retail block at Sahar, Mumbai will become operational during the financial year ended March 31, 2019 and is expected to generate profits for the Group. Further, the Group has merged the hotel and retail undertaking from Genext Hardware & Parks Private Limited for which the Scheme was filed in the financial year ended March 31, 2017. The said Scheme received the approval of the National Company Law Tribunal (NCLT) at Mumbai and Bangalore and other statutory and regulatory authorities and became effective from October 1, 2017.

Further, the Group had incurred losses in relation to the residential project at Bengaluru pursuant to litigation which arose during the financial year ended March 31, 2014. During the financial year ended March 31, 2018, without prejudice to its rights and remedies under law and keeping the commercial considerations in perspective, the Board of Directors of the Group, decided that the Group should proactively consider re-commencement of construction upto the minimum permissible limits and engage with the buyers above the 10th floor for evaluating possible options. Consequently, the Group has made a provision for estimated losses on such cancellations pertaining to all flats above 10 floors and had recognised the same during the financial year ended March 31, 2018 (refer note 36 of Annexure VI). Such costs have been pushed back for the purpose of restated consolidated summary financial statements (refer Annexure VII). Further, the Group does not expect any further material losses to be incurred in relation to the said project.

Accordingly, the Group, has recognised deferred tax asset on the carried forward business losses after considering the relevant facts and circumstances during each financial year to the extent that the Group had convincing evidence based on its business plans and budgets to the extent that the deferred tax asset will be realised. Consequently, the Group has recognised a deferred tax asset of Rs. 1,053.91 million as at September 30, 2018 (March 31, 2018: Rs. 856.32 million, March 31, 2017: Rs. 865.20 million, March 31, 2016: Rs. 519.12 million, March 31, 2015: Rs. 116.21 million, March 31, 2014: Rs.114.13 million) on the carried forward losses of the Group.

Bengaluru residential project

During the year 2013-14, Hindustan Aeronautics Limited (HAL) had raised an objection with regard to the permissible height of buildings of the Group's Bengaluru residential project. Pursuant to an interim order passed by the Karnataka High Court, in the petition filed by the Group, the Group had suspended construction activity at the Project and sale of flats.

Pending the outcome of the proceedings and a final closure of the matter, the Group suspended revenue recognition based on the percentage completion method after financial year ended March 31, 2014. Further, in case of cancellations subsequent to March 31, 2014, the Group reversed the revenue and derecognised margins in the respective year of cancellation. The Group also recompensed flat owners, in accordance with mitigation plans framed by the Group on account of the delay in completion of the project.

During the year ended March 31, 2018, without prejudice to its rights and remedies under law and keeping the commercial considerations in perspective, the Board of Directors of the Group, decided that the Group should proactively consider re-commencement of construction up to the minimum permissible limit and engage with the buyers above the 10th floor for evaluating possible options. Accordingly, the Group has reassessed the estimated cost of completion of the project up to the 10th floor as per the aforementioned plan and has recognised a provision towards the following:

- cost of alteration of superstructure

- estimated cost in relation to potential cancellations.

Further, cost of actual cancellations (where applicable) has also been provided for and included in the provision referred to above.

Note

During the year 2013-14, Hindustan Aeronautics Limited (HAL) had raised an objection with regard to the permissible height of buildings of the Group's Bengaluru Residential Project ("Project"). Pursuant to an interim order passed by the Karnataka High Court, in the petition filed by the Group, the Group had suspended construction activity at the Project and sale of flats.

Pending the outcome of the proceedings and a final closure of the matter, the Group suspended revenue recognition based on the percentage completion method after financial year ended March 31, 2014. Further, in case of cancellations subsequent to March 31, 2014, the Group reversed the revenue and derecognised margins in the respective year of cancellation. The Group also recompensed flat owners, in accordance with mitigation plans framed by the Group on account of the delay in completion of the Project.

During the year ended March 31, 2018, without prejudice to its rights and remedies under law and keeping the commercial considerations in perspective, the Board of Directors of the Group, decided that the Group should proactively consider re-commencement of construction upto the permissible limits and engage with the buyers above the 10th floor for evaluating possible options. Accordingly, the Group has reassessed the estimated cost of completion of the Project up to the 10th floor as per the aforementioned plan and has recorded the following adjustments as exceptional items as at March 31, 2018:

- Provision towards impairment of super structure of Rs 350.89 million and expected cost of alteration of super structure of Rs 250 million
- Provision for cost of mitigation program compensation and related expenses of Rs 420.63 million in relation to potential cancellations referred to in above, net of compensation already provided for; and
- Impact of revised estimated cost of completion of the project on the net realisable value of inventory resulting in write down of Rs 93.74 million.
- In the event all the buyers of flats above 10th floor decide to exercise exit option, the Group has to refund Rs 944.07 million which is presently being accounted as an advance from customers.

Construction of and sales in the Project have been suspended due to an on-going litigation relating to the Project. Parties who have booked flats in the Project, are paid compensation for delay in delivery of their respective units and those who seek to cancel their bookings are repaid the advances / deposits made by them together with interest thereon, leading to considerable cash out flows for the Group.

Subsequent to March 31, 2018, the Promoter-Directors of the Company have agreed to provide funds to the Company either by themselves or through their Nominees, to meet its cash flow requirements for the Project to the extent of Rs. 2000 million by way of subscription to '0%' Non-Cumulative Redeemable Preference Shares of the Company, for which a Subscription Agreement has been executed by them.

The proceeds of issue of Preference Shares will be deposited in a separate Designated Bank Account of the Company and will be utilised for meeting future cash outflows of the Project. The redemption of Preference Shares shall be not later than one month prior to completion of 20 years from the date of allotment, or earlier, out of surplus from the Project, subject to applicable law/s.

For the purpose of the restated financial statements, the cost of alteration, write off of the superstructure and provision for impairment loss of inventory are reflected in the year in which the litigation had been initiated i.e. the financial year 2013-14. The impact of interest cost net off goodwill compensation and reversal of margins may be reflected in the year to which the impact relates to.

The above sensitivity analysis have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the reporting date. In practice, generally it does not occur. When we change one variable, it affects to others. In calculating the sensitivity, project unit credit method at the end of the reporting period has been applied.

Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

8 Expected contributions to gratuity fund for the year ended March 31, 2019 is Rs 6.37 million.

9 The expected future cash flows as at each reporting date were as follows:

(ii) Valuation techniques used to determine fair value

Specific valuation techniques used to value financial instruments include :

- the fair value of certain unlisted equity shares are determined based on the income approach or the comparable market approach.
 - the fair value for the currency swap is determined using forward exchange rate for balance maturity
 - the fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves
 - the fair value of the forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date.
 - the fair value preference shares and the remaining financial instruments is determined using discounted cash flow analysis. The valuation model considers the present value of expected receipt/payment discounted using appropriate discounting rates.
- The investments included in level 3 of the fair value hierarchy have been valued using the discounted cashflow technique to arrive at the fair value.

(B) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers, cash and cash equivalents and other bank balances, derivatives and investment securities. The carrying amounts of financial assets represent the maximum credit exposure.

(a) Trade receivables from customers

The Group does not have any significant credit exposure in relation to revenue generated from the hospitality business. For other segments, the Group has established a credit policy under which each new customer is analysed individually for creditworthiness before entering into a contract. Sale limits are established for each customer, reviewed regularly and any sales exceeding those limits require approval from the appropriate authorities. There are no significant concentrations of credit risk within the Group.

Impairment

The ageing of trade and other receivables that were not impaired was as follows.

(C) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

(D) Market risk

Market risk is the risk that the changes in market prices such as foreign exchange rates, interest rates and equity prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Group uses derivative to manage market risk.

(E) Currency risk

The Group is exposed to currency risk on account of its operating and financing activities. The functional currency of the Group is Indian Rupee. The exchange rate between the Indian rupee and foreign currencies has changed substantially in recent periods and may continue to fluctuate substantially in the future. Consequently, the Group uses derivative instruments, i.e, foreign exchange forward contracts to mitigate the risk of changes in foreign currency exchange rates in respect of recognized liabilities. The Group enters into foreign currency forward contracts which are not intended for trading or speculative purposes but for hedge purposes to establish the amount of reporting currency required or available at the settlement date of certain payables.

Sensitivity analysis

A reasonably possible strengthening (weakening) of the Indian Rupee against all other foreign currencies at September 30, would have affected the measurement of financial instruments denominated in a foreign currency and affected profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

(F) Interest rate risk

Interest rate risk can be either fair value interest rate risk or cash flow interest rate risk. Fair value interest rate risk is the risk of changes in fair values of fixed interest bearing financial assets or borrowings because of fluctuations in the interest rates, if such assets/borrowings are measured at fair value through profit or loss. Cash flow interest rate risk is the risk that the future cash flows of floating interest bearing borrowings will fluctuate because of fluctuations in the interest rates.

The Group adopts a policy to hedge the interest rate movement in order to mitigate the risk with regards to floating rate linked loans based on the market outlook on interest rates. This is achieved partly by entering into fixed rate instruments and partly by borrowing at a floating rate and using interest rate swaps as hedges of the variability in cash flows attributable to interest rate risk.

Particulars of outstanding interest rate swaps as at

Fair value sensitivity analysis for fixed-rate instruments

The Group's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk as defined in Ind AS 107 *Financial Instruments: Disclosures*, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

Cash flow sensitivity analysis for variable-rate instruments

A reasonably possible change of 100 basis points in interest rates at the reporting date would have increased (decreased) profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant. In cases where the related interest rate risk is capitalised to fixed assets, the impact indicated below may affect the Group's income statement over the remaining life of the related fixed assets.

Capital management

The Group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Management monitors the return on capital as well as the level of dividends to ordinary shareholders.

The Group monitors capital using a ratio of ‘adjusted net debt’ to ‘adjusted equity’. For this purpose, adjusted net debt is defined as total borrowings, comprising interest-bearing loans and borrowings, less cash and cash equivalents and bank deposits. Adjusted equity comprises all components of equity.

The Group's adjusted net debt to equity ratio are as follows:

The Chief Operating Decision Maker ("CODM") evaluates the Company's performance and allocates resources based on an analysis of various performance indicators by operating segments. The CODM reviews revenue and gross profit as the performance indicator for all of the operating segments, and does not review the total assets and liabilities of an operating segment.

(b) Following are reportable segments

The restated consolidated financial information for the years ended March 31, 2016, 2015 and 2014 has been prepared on Proforma basis (i.e. "Proforma Ind AS financial information") in accordance with requirements of SEBI Circular SEBI/HO/CFD/DIL/CIR/P/2016/47 dated March 31, 2016 ("SEBI Circular") and Guidance note on reports in company prospectuses issued by ICAI. For the purpose of Proforma Ind AS financial information for the year ended March 31, 2016, 2015 and 2014, the Group has followed the same accounting policy and accounting policy choices (both mandatory exceptions and optional exemptions availed as per Ind AS 101) as initially adopted on transition date i.e. April 1, 2016. Accordingly, suitable restatement adjustments (both re-measurements and reclassifications) in the accounting heads are made to the Proforma Ind AS financial information as of and for the years ended March 31, 2016, 2015, and 2014 following accounting policies and accounting policy choices (both mandatory exceptions and optional exemptions) consistent with that used at the date of transition to Ind AS (i.e. April 1, 2016).

In addition to the adjustments carried herein, the Group has also made material restatement adjustments as required by the SEBI Circular and the Guidance note on reports in company prospectuses (refer Annexure VII). Together these constitute the restated consolidated summary financial information.

Exemptions applied

Ind AS 101 allows first-time adopters certain exemptions from the retrospective application of certain requirements under Ind AS. The Company has applied the following exemptions:

1 **Business combination**

The Group has applied the exemption as provided in Ind AS 101 in relation to Ind AS 103, "Business Combinations" for business combinations consummated prior to the date of transition (April 1, 2016). Pursuant to this exemption, goodwill arising from business combination has been stated at the carrying amount under previous GAAP. Accordingly, Ind AS 103 has been applied prospectively to business combinations occurring after its transition date.

Further, in accordance with Guidance Note on Reports in Company Prospectuses (Revised 2016), the Group has adopted the same accounting policy choice for preparing the restated Proforma Ind AS financial statements as adopted initially at the transition date. Accordingly, business combinations that have occurred between April 1, 2013 and March 31, 2016 have not been restated as per Ind AS 103 Business Combinations.

2 **Property, plant and equipment**

On the date of transition the Group has chosen to reflect the fair value of all freehold land as of April 1, 2016 as their respective deemed cost. All other items of property, plant and equipment have been measured as per the requirements of Ind AS 16 "Property, Plant and Equipment" retrospectively.

3 **Intangible assets and Investment property**

As permitted by IND AS 101, the Group has elected to continue with the carrying values under previous GAAP as 'deemed cost' at April 1, 2016 for all the items of intangible assets and investment property. For the purpose of Proforma Ind AS financial information for the year ended March 31, 2016, 2015 and 2014, the Group has provided the depreciation based on the estimated useful life of respective years.

4 **Classification and measurement of financial assets and financial liabilities**

Ind AS 101 requires an entity to assess classification of financial assets and financial liabilities on the basis of facts and circumstances existing as on the date of transition. Further, the standard permits measurement of financial assets and financial liabilities accounted at amortised cost based on facts and circumstances existing at the date of transition if retrospective application is impracticable. Accordingly, the Group has determined the classification of financial assets and financial liabilities based on facts and circumstances that exist on the date of transition. Measurement of the financial assets and financial liabilities accounted at amortised cost has been done retrospectively except where the same is impracticable.

5 **Estimates**

On assessment of the estimates made under the Previous GAAP financial statements, the Company has concluded that there is no necessity to revise the estimates under Ind AS, as there is no objective evidence of an error in those estimates. However, estimates that were required under Ind AS but not required under Previous GAAP are made by the Company for the relevant reporting dates reflecting conditions existing as at that date.

Annexure VI - Notes to the Restated Consolidated Summary Financial Information (Continued)

Note 54

First Time Adoption of Ind AS (Continued)

A. Reconciliation between previous GAAP and Ind AS (Continued)

(IV) Notes to First time adoption:

The Group has followed the same accounting policy choice as initially adopted on transition date i.e. April 1, 2016 while preparing Proforma Restated Consolidated Summary Financial Information for the years ended March 31, 2016, March 31, 2015 and March 31, 2014 and as at April 1, 2013. Accordingly, suitable restatement adjustments are made to the consolidated retained earnings as at March 31, 2016, March 31, 2015, March 31, 2014 and April 1, 2013.

1 Fair valuation of land treated as deemed cost

On the date of transition the Group has chosen to reflect the fair value of all freehold land as of April 1, 2016 as their respective deemed cost. All other items of property, plant and equipment have been measured as per the requirements of Ind AS 16 "Property, Plant and Equipment" retrospectively. The impact of both these adjustments has been considered through retained earnings and corresponding assets/liabilities, as appropriate. The fair value has been determined with reference to residual value approach which also involves determining the business value of the respective hotel building. The fair value so determined is categorised as Level 3 in accordance with the requirements of Ind AS 113. The key unobservable inputs used for determination of the fair value referred to above includes the rate used for discounting (12.10%) and growth rate (5%).

The fair value of land taken as deemed cost on transition date has been pushed back for restated consolidated financial statements as per the Guidance note on Reports in Company Prospectus (revised 2016) issued by the Institute of Chartered Accountants of India. The fair value as on transition date is basis the land parcels and subsequent capitalisations made to the cost of land (for purchase of additional FSI) till such date (i.e. April 1, 2016). For the purpose of pushback of such fair value, proportionate fair value of such additions made is calculated based on the ratio of cost (adjusted for inflation) incurred for purchase of such additions to the total cost of such land. The fair value of such additions has been considered in their respective years of purchase by the company.

2 Accounting for transaction costs on borrowings as per effective interest method

Under previous GAAP, directly attributable transaction costs were charged to the Consolidated Statement of Profit and Loss or capitalised as part of property, plant and equipment in the year of disbursement of the loan. As per the requirements of Ind AS, the Group has measured the borrowings at amortised cost (including the directly attributable transaction costs) based on the effective interest rate of the borrowings. Accordingly, suitable restatement adjustments have been made in the Restated Consolidated Summary Statement of Profit and Loss and Property, plant and equipment.

3 Fair value movement of FVTPL investments

Under previous GAAP, non-current investments were carried at cost less provision for diminution (other than temporary). Under Ind AS, investment in equity shares (other than subsidiaries and associates) are measured at fair value, with fair value changes being routed through the Consolidated Summary Statement of Profit and Loss.

4 Investment in preference shares measured at amortised cost

Under previous GAAP, non-current investments in preference shares were carried at cost less provision for diminution (other than temporary). Under Ind AS, investment in 0.001% non-cumulative redeemable preference shares of Genext Hardware & Parks Private Limited are measured at amortised cost as per Ind AS 109. Accordingly, suitable restatement adjustments have been made in the Restated Consolidated Summary Statement of Profit and Loss and Investment in preference shares.

5 Accounting of EPCG Scheme as a government grant, including depreciation impact

The Group under the EPCG Scheme has received grants from the Government in form of waiver of import duty on purchase of capital goods. These, however are conditional on the Group achieving specified future export obligations.

Under previous GAAP, the Group recognised its property, plant and equipment at the net cost i.e. the import duty was excluded from the cost of the property, plant and equipment and adjusted directly with the export benefits. Under Ind AS, the Group has recognised the value of import duty waiver as part of the cost of the property, plant and equipment with the corresponding impact to deferred grant. The deferred grant is recognised in Restated Consolidated Summary Statement of Profit and Loss on fulfilment of the respective export obligation.

6 Scheme of arrangement - hotel and retail undertaking (refer note 41)

The Board of Directors at their meeting held on October 26, 2013 had approved the merger proposal and approved the "Scheme of Arrangement" to demerge the Hotel Undertaking and the Retail Undertaking (together referred to as 'Demerged Undertaking') at Bengaluru from a subsidiary company, namely Magna Warehousing & Distribution Private Limited under Section 391 read with Section 394 of the Companies Act, 1956, with effect from April 1, 2013, ("the Appointed Date") subject to obtaining necessary approvals of the Shareholders, Honourable High Court of Karnataka at Bangalore and Honourable High Court of Bombay and other statutory and regulatory authorities. The Scheme has become effective from September 11, 2015 and has been given effect to from the appointed date (in line with the accounting treatment prescribed in the Scheme).

The effect of the above scheme of demerger under previous GAAP was given in the consolidated statutory accounts in the financial year ended March 31, 2015 when the scheme had received all the requisite approvals with effect from Appointed Date. However for the purpose of restated proforma Ind AS financial information, the effect of the above scheme has been given in the consolidated financial information on the Appointed Date (April 1, 2013).

7 Merger of Genext Hardware & Parks Private Limited (refer note 41)

The Board of Directors at their meeting held on January 5, 2017, had approved the merger proposal and approved the "Scheme of Arrangement" to merge the Hotel Undertaking and the Retail Undertaking at Bengaluru from Genext under Section 230 to 232 of the Companies Act, 2013, with effect from November 1, 2016, ("the Appointed Date") subject to obtaining necessary approvals of the Shareholders, Honourable High Court of Karnataka at Bangalore and Honourable High Court of Bombay and other statutory and regulatory authorities. The Scheme has become effective from October 1, 2017 and has been given effect to from the appointed date (in line with the accounting treatment prescribed in the Scheme).

8 Adjustment for profit on sale of subsidiary

The Group had earlier recognised unrealised profit on disposal of the related subsidiary through retained earnings. Such unrealised profit, under Ind AS, has been recognised through the statement of profit and loss.

9 Deferred tax

Previous GAAP requires deferred tax to be recognised with reference to the income statement approach. Ind AS 12 requires entities to determine deferred taxes with reference to the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base. The application of Ind AS 12 approach has resulted in recognition of deferred tax related adjustments in relation to certain items such as fair valuation of land, indexation benefit on land, indexation benefit on investment property, fair value of investments which were not required to be considered under the income statement approach.

Further, under the previous GAAP, deferred tax asset on carry forward business losses and unabsorbed depreciation was recognised only on existence of virtual certainty of taxable profits. The application of Ind AS 12 approach has resulted in recognition of deferred tax assets in case of reasonable certainty. The deferred tax impact of all Ind AS adjustments (as applicable) has also been considered.

(V) Reconciliation of retained earnings as at April 1, 2013

As specified in the Guidance Note, the equity balance computed under Proforma Consolidated Ind AS financial information for the year ended March 31, 2016 (i.e. equity under Indian GAAP as at April 1, 2015, 2014 and 2013 adjusted for impact of Ind AS 101 items and after considering profit or loss for the years ended March 31, 2016, 2015 and 2014 with adjusted impact due to Ind AS principles applied on proforma basis) and equity balance computed in opening Consolidated Ind AS Balance sheet as at transition date (i.e. April 1, 2016), prepared for filing under Companies Act, 2013, differs due to restatement adjustments made as at April 1, 2015, 2014 and 2013. Accordingly, the closing equity balance as at March 31, 2016 of the Proforma Consolidated Ind AS financial information has not been carried forward to the opening Consolidated Ind AS Balance sheet as at transition date already adopted for reporting under Companies Act, 2013. Disclosure on transition to Ind AS 115

Changes in accounting policies:

Except for the changes below, the Group has consistently applied the accounting policies to all periods presented in these Restated Consolidated Summary Financial Information.

The Group has adopted Ind AS 115 *Revenue from Contracts with Customers* ("Ind AS 115") with a date of initial application of April 1, 2018. As a result, the group has changed its accounting policy for revenue recognition as detailed below.

A. Real Estate development

The Group accounted for its sale of residential flats in their real estate projects on a percentage completion basis as prescribed under the Guidance note for Accounting for Real Estate Transactions issued by the ICAI. Under Ind AS 115, the Group recognises the revenue from its sale of residential projects at a point in time, i.e. when control of the flats is transferred to the customer and the Group satisfies the performance obligation. Accordingly, the Group has reversed the cumulative revenue recognised on sale of residential flats in the opening reserve as on April 1, 2018.

Further for the purpose of preparation of restated financial information, the Group has retrospectively adopted Ind AS 115 and restated prior years.

Accordingly, the Group has presented the Restated Consolidated Financial Information as at and for the years ended March 31, 2018, March 31, 2017, March 31, 2016, March 31, 2015 and March 31, 2014 following the requirements of Schedule III of the Act.

3. Material restatement adjustments

(a) Export benefit entitlements written off

The Group recognises income in respect of duty credit entitlement arising from export sales under the "Served from India Scheme" of the Government of India in the year of exports, provided there is no significant uncertainty regarding the entitlement and availment of the credit and the amount thereof. Export credit entitlement can be utilised within a specified benefit period, by way of adjustment against duties payable on purchase of capital equipments, spare parts and consumables. Unutilised export entitlement is written off in the year in which the time period of utilisation of such licenses expires. The Group had written off export entitlement receivable during the year ended March 31, 2014 on expiry of the utilisation period.

For the purpose of these restated consolidated financial information, the Group has appropriately adjusted this in the year in which the duty credit entitlement was first recognised. (b) Adjustments due to change in status of residential project at Bengaluru

In view of Hindustan Aeronautical Limited (HAL's) raising an objection with regards to the permissible height and pursuant to the interim order passed by the Honourable Karnataka High Court ('the Court') in the petition filed by the Group, in respect of the Group's residential project at Bengaluru during the year 2013-14, the Group suspended and limited the vertical construction of all wings up to a particular height, pending outcome of the matter.

Further, pending the outcome of the proceedings and a final closure of the matter, the Group had decided to suspend revenue recognition based on the percentage completion method and has also been derecognising profits on cancellation of flats previously sold. Pursuant to a subsequent order passed by the Court for conduct of an Aeronautical Study by the Airports Authority of India [AAI], AAI conducted the required Aeronautical Study and filed its report in January 2015, confirming that the full height of the then completed building-wings does not adversely affect aircraft operations. HAL has filed objections to the Aeronautical Study Report of AAI, and the matter is currently sub-judice.

Since the litigation has prolonged and is yet to be concluded, the Group explored the option of restructuring the construction plan in consultation with the relevant stakeholders to achieve a mutually beneficial solution. Consequently, during the year ended March 31, 2018, without prejudice to its rights and remedies under law and keeping the commercial considerations in perspective, the Board of Directors of the Holding Company, decided that the Group should proactively consider re-commencement of construction upto the permissible limit and engage with the buyers above the 10th floor for evaluating possible options. Accordingly, the Group has reassessed the estimated cost of completion of the project upto the 10th floor as per the aforementioned plan and has recorded the following adjustments as exceptional items during the year ended March 31, 2018:

i) the provision towards impairment of super structure of Rs. 350.89 million and the expected cost of alteration of super structure of Rs. 250 million during the year ended March 31, 2014, being the year in which the litigation had initiated.

iii) Impact of revised estimated cost of completion of the project on the net realisable value of inventory resulting in write down of Rs 25.76 million has been adjusted during the year ended March 31, 2014, being the year in which the litigation had initiated.

The Group has made necessary adjustments to inventories and trade receivables in these Restated Consolidated Summary Financial Information as per the aforementioned plan.

The auditors' reports for the year ended March 31, 2014 included an Emphasis of Matters paragraph in respect of the residential project at Bengaluru for which the Group had not recognized profits during the year on flats sold above 40 meters, derecognized profits on sales of previous years that have been cancelled during the year, the Group had recompensed flat owners, in accordance with mitigation plan, with payments on account of the delay in completion of the project and additionally provision for estimated loss on account of cancellation in the subsequent year was been made in the accounts. Overview

We are an owner, developer and asset manager of high-end hotels in key metro cities in India. Our hotel platform comprises five operating hotels, including a hotel with a co-located serviced residence, located in the Mumbai Metropolitan Region, Hyderabad and Bengaluru, representing 2,328 keys, as of September 30, 2018. Our hotels are branded with globally recognized hospitality brands and are in the luxury-upper upscale and upscale hotel segments, according to the Horwath Report. Our hotel platform emphasizes strategic locations, efficient design and development, appropriate positioning in hotel segments together with branding and operational tie-ups with leading hospitality companies. We use our experience to actively manage the hotel assets to drive performance. In addition, we have developed commercial and retail spaces, in close proximity to certain of our hotels.

We have developed our hotels at strategic locations generally with high barriers-to-entry and in high density business districts of their respective metro cities, according to the Horwath Report. We generally develop our hotels on large land parcels, allowing us to situate a greater number of rooms, as well as provide a wide range of amenities, such as, fine dining and specialty restaurants, large banquet and outdoor spaces. We endeavour to build our hotels to superior standards targeting the luxury-upper upscale and upscale hotel segments at an efficient gross built up area and development cost per key.

We believe we have a competitive advantage in key metro cities due to, the significant time outlay required to build and establish a profitable hotel or commercial project, our early mover advantage in large, mixed-use developments in specific micro-markets and availability of unutilized land at certain of our hotel properties to further expand our operations, among others.

We seek to brand our hotels with leading global hospitality brands, which we believe are well matched to the location, size, target customer base and intended hotel segment of our hotel properties. This allows us to save on the time and cost required to build, develop and maintain our 'own hotel brand'. Our hotels are currently branded with global brands such as JW Marriott, Westin, Marriott, Marriott Executive Apartments, Renaissance and Four

Points by Sheraton which are held by Marriott Hotels India Private Limited and its affiliates (collectively “**Marriott**”). We also determine, by detailed financial and operational analysis, whether hotel operations should be undertaken directly by us or by engaging third party hotel operators. Currently, our hotel at Vashi, Navi Mumbai, is operated by us under a license agreement with Marriott, and four of our hotels, including our serviced residence, are operated pursuant to hotel operation and related agreements with Marriott.

We follow an active asset management model for our hotels operated by third parties, pursuant to which we closely monitor, and exercise regular oversight over, the performance of our hotel properties. Among other things, we discuss and agree on budgeting and operational and financial targets, review performance reports, engage with the hotel management team at each hotel by conducting detailed monthly performance review meetings and provide regular inputs on cost saving initiatives and potential improvements. We believe that our active asset management model, the premium location of our hotels, our large room inventory and large function spaces, together with our relationship with international hospitality brands, has allowed our hotels to achieve competitive financial and operational parameters. For example most of our hotels have higher ADR, occupancies and RevPAR compared to the average of other hotels in their respective micro-markets and hotel segments, for the financial year 2018, according to the Horwath Report. See “**Industry Overview**” on page 133.

We are part of K. Raheja Corp group which is a leading business group in India and we believe that we derive significant benefit from the confidence that consumers, lenders, hospitality partners, vendors and others place in the group. The companies forming part of the K. Raheja Corp group (“**K. Raheja Companies**”) have extensive experience in developing large scale real estate, hospitality and commercial projects resulting in a strong understanding of industry and market trends, which we leverage to identify suitable locations and opportunities. We further leverage the experience and relationships of these companies with construction companies, architects and designers, to develop, refurbish and maintain hotels at optimal cost and quality.

Our Promoters include Mr. Ravi C. Raheja and Mr. Neel C. Raheja, who have been instrumental in the growth of our business and actively advise us on finance, corporate strategy and planning as well as our hotel and retail businesses. We have a strong management team with significant industry experience. Our Managing Director and CEO, Mr. Sanjay Sethi has three decades of experience in the hospitality industry and our Executive Director and CFO, Mr. Rajeev Newar, has over 26 years of experience in various industries. Our Key Management Personnel and senior management include qualified professionals and industry experts with significant experience across various industries and functions including finance, legal, projects and design, asset management, hospitality.

Significant Factors Affecting our Results of Operations

Our results of operations and financial condition are affected by a number of important factors including:

Competition

We operate in a highly competitive industry and our success is dependent on our ability to compete on various factors such as attractiveness and quality of our offerings, quality of accommodation, food and beverage, location, service levels, and amenities, together with the brand reputation of our brand licensors. We may also have to compete with any new hotel properties that commence operation in the markets in which we operate or intend to commence operations. Our engagement with our hotel operators and brand licensors to enhance guest experiences and drive guest satisfaction is critical to compete and outperform other hotels in our markets. In addition, our ability to capture the expected growth in tourism and the hotel industry, and respond to the consequent competition in the hotel industry, will be critical to our results of operations in the future. See “*Risk Factors – Internal Risk Factors - The hotel industry is intensely competitive and our inability to compete effectively may adversely affect our business, results of operations and financial condition.*” on page 31.

Seasonality and Cyclicity of Business

The hospitality industry is seasonal in nature. The periods during which our properties experience higher revenues vary from property to property, depending principally upon location and the guest base served. Our revenues are higher during the second half of each financial year as compared to first half of the financial year. Seasonality affects leisure travel and the MICE segment (meetings, incentives, conferences and events); however, business travel is generally more consistent throughout the year. Seasonality can be expected to cause quarterly fluctuations in our revenue, profit margins and earnings.

The hospitality industry is cyclical and demand generally follows, on a lagged basis, key macroeconomic indicators. There is a history of increases and decreases in demand for hotel rooms, in occupancy levels and in

room rates realized by hotels through economic cycles. The combination of changes in economic conditions and in the supply of hotel rooms can result in significant volatility in results of hotel properties. The costs of running a hotel tend to be more fixed than variable. These expenses include employee costs, utilities and insurance. When demand for our hotels decreases, due to high operating leverage the resulting decline in our revenues can have an adverse effect on our net cash flow, margins and profits. This effect can be especially pronounced during periods of economic contraction or slow economic growth. Similarly in conditions of economic upturns, when the demand for hotel rooms increases, due to high operating leverage, our net cash flow, margins and profits may increase disproportionately to the increase in revenues. See *“Risk Factors – Internal Risk Factors - Our business is subject to seasonal and cyclical variations that could result in fluctuations in our results of operations.”* on page 25.

Changes in Consumer Demand

Economic growth drives business and leisure travel as well as conferences, banquets and events which impact the success of our operations. In addition, the hotel industry and the demand for rooms is also affected by travel advisories, worldwide health concerns, geo-political developments, natural disasters in the region and inflation. Declines in consumer demand due to adverse general economic conditions, risks affecting or reducing travel patterns, lower consumer confidence and adverse political conditions can lower the revenues and profitability of our hotels. Further, adverse general economic conditions may negatively impact the demand for, and occupancies in, our commercial and retail projects. As a result, changes in consumer demand can subject and have subjected our revenues to significant volatility. See *“Risk Factors – Internal Risk Factors - A slowdown in economic growth in India could have an adverse effect on our business, results of operations and financial condition”* on page 18.

Relationship with Hotel Operators and Leading Hospitality Brands

Our hotel at Vashi, Navi Mumbai, is operated by us under a license agreement with Marriott, and four of our hotels, including our serviced residence, are operated pursuant to hotel operation and related agreements with Marriott. We utilize the brands of our hotel operators and brand licensor to operate and market our hotels. Our hotels are generally obliged to pay periodic management fees, royalty fees, fees for technical services and reimbursements for advertising, marketing, promotion, sales and software, among others. These payments to hotel operators and our brand licensor are based on a fixed percentage of the gross revenue of the hotel, as well as a portion of gross operational profits, subject to certain exclusions and adjustments including periodic increments, together with reimbursements for costs incurred and certain per-transaction service charges. In aggregate, payments including reimbursements, made to Marriott ranged from 8% to 12% of each of our hotel's total operating revenue, for the six months ended September 30, 2018 and financial years 2018 and 2017.

Further, the hotel operation contracts for our hotel, including out serviced residence, at Powai, Mumbai will be due for renewal in March 2020, and for our hotel at Mindspace, Hyderabad will be due for renewal in December 2021. We may seek to rebrand or reflag our properties by using alternate brands at our hotels or renegotiate terms of our existing hotel operation contracts. In the event we are unable to execute agreements on favorable terms our business, financial condition and results of operations may be adversely affected. See *“Our Business – Description of Our Business – Our Hotel Business”* and *“Risk Factors – Internal Risk Factors - We have entered into hotel operation and related agreements with Marriott to receive operation and marketing services in relation to our hotels. If our hotel operators decide to terminate or not renew any agreement with us, our business, financial condition and results of operations may be adversely affected.”* on pages 157 and 19, respectively.

Cost of land, third party contractors and construction materials

We are developing three additional hotel projects which are expected to have 588 keys and two retail and office projects representing approximately 1.12 million square feet of leasable area. We intend to grow our portfolio through both organic and inorganic means. In our efforts to grow organically we face risks with regards to acquisition of the appropriate land and the development costs.

Land: The growth of our business is dependent on the availability of vacant land in areas where we intend to develop projects and cost thereof. Any change in regulations relating to land use including recent and proposed changes in land regulations which could increase or decrease the FSI available to us in our existing projects could have an impact on the growth of our business and operations.

Third Party Contractors and Development Costs: We utilize third parties for the design, construction and periodic maintenance and repairs of our hotel properties and projects. We engage international and domestic architects and third-party contractors, generally under fixed price contracts. Our development costs largely comprises of cost of various third-party agencies which include contractors, designers, architects, surveyors, engineers, consultants

and project management team. The progress and quality of construction of the hotel properties and projects we develop depends on the availability and skill of our contractors and consultants, as well as contingencies affecting them, including labour and industrial actions. Our cost of development and periodic maintenance and repairs is affected by price fluctuations in raw materials (in particular cement and steel), bricks and glass, electrical accessories, plumbing materials, tiles and paints, lifts and escalators. We oversee the progress and quality of construction to ensure that the costs are under budgetary control. However, any unreasonable cost escalation due to shortage, supply limitations or circumstances beyond our control, could adversely impact the cost and time taken for development and resultantly our return on investment.

See “Risk Factors – Internal Risk Factors – We are exposed to risks associated with the development of our hotel properties and commercial and retail projects. Delays in the constructions of new buildings or improvements on our properties may have an adverse effect on our business, results of operations and financial condition.” on page 26.

Government Regulations and Policies

Our business is subject to significant governmental regulation, particularly in relation to the development of our projects. Regulations applicable during development include standards regarding land acquisition, the ratio of built-up area to land area, land usage, water supply, sewage disposal systems, electricity supply, environmental suitability and size of the project. Approval of development plans is conditioned on, among other things, completion of the acquisition of the site and compliance with relevant conditions. Approvals must be obtained at both the national and local levels, and our results of operations are expected to continue to be affected by the nature and extent of the regulation of our business.

Further, government regulations and policies of India, can also impact the demand for, expenses related to and availability of our hotel services and rooms. We are also subject to regulations, which are periodically amended, including relating to the sale and service of food, alcoholic and non-alcoholic beverages and hosting of events and weddings at our hotel properties. These regulations and policies can be extensive and any amendments thereto would require adequate time for implementation. Further, the regulatory and policy environment in which we operate is evolving and subject to change. For example, the Government of India implemented a comprehensive national goods and services tax (“GST”) regime with effect from July 1, 2017 that combines multiple taxes and levies by the Central and State Governments into a unified tax structure. Generally, the GST rate applicable on room rates at all our hotels ranges between 18% to 28% of the declared room rate. For further details see, “Risk Factors – Internal Risk Factors – We are subject to extensive government regulation with respect to safety, health, environmental, real estate, excise and labour laws. Any non-compliance with, or changes in, regulations applicable to us may adversely affect our business, results of operations and financial condition”.

Basis of measurement

The Restated Consolidated Summary Financial Information has been prepared on a historical cost basis, except for the following:

- certain financial assets and liabilities (including derivative instruments) that are measured at fair value (refer- Accounting policy regarding financials instruments);
- assets held for sale – measured at fair value less cost to sell;
- defined benefit plans – plan assets measured at fair value less present value of defined benefit obligation; and
- land at fair value on transition date.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Significant accounting policies

Business combination

As part of its transition to Ind AS, we have elected to apply the relevant Ind AS standard, Ind AS 103, Business combinations, to only those business combinations that occurred on or after the transition date i.e. April 1, 2016.

We have accounted merger schemes in a manner prescribed by the High Court or the National Company Law Tribunal orders. The book values of the assets, liabilities and reserves of the transferor company have been recorded and the identity of the reserves has been maintained. The excess of book value of the net assets and reserves of the transferor company taken over, over the face value of the shares issued by the transferee company has been debited to the goodwill as per the scheme. Any goodwill that arises is tested annually for impairment. Transaction costs are expensed as incurred, except to the extent related to the issue of debt or equity securities. The consideration transferred does not include amounts related to the settlement of pre-existing relationships with the acquiree. Such amounts are recognised in the restated consolidated summary statement of profit and loss.

Common control

Business combinations involving entities that are ultimately controlled by the same parties before and after the business combination are considered as common control entities. Common control transactions are accounted using pooling of interest method. The financial statements in respect of prior periods have been restated from the period that the transferor company became a subsidiary of the transferee company where the assets and liabilities of the transferee are recorded at their existing carrying values, the identity of reserves of the transferee company is preserved.

Revenue

Real estate development and sale

Revenue from real estate activity is recognised to the extent that it is probable that the economic benefits will flow to us, all significant risks and rewards of ownership are transferred to the customers and it is not unreasonable to expect ultimate collection and no significant uncertainty exists regarding the amount of consideration.

Revenue from real estate development activity is recognised at a point in time when significant risks and rewards are transferred to the customer, such as when the control of the residential flat is transferred to the customer.

Cost of construction/development includes all costs directly related to the project and other expenditure as identified by the management which are reasonably allocable to the project.

Unbilled revenue from real estate represents revenue recognised over and above the amount due as per the payment plans agreed with the customers. Progress billings which exceed the costs and recognised profits to date on projects under construction are disclosed as advance received from customers under other current liabilities. Any billed amount that has not been collected is disclosed under trade receivables.

Hospitality business

Revenue is measured at the fair value of the consideration received or receivable. Revenue comprises sale of rooms, food, beverages, smokes and allied services relating to hotel operations. Revenue is recognised upon rendering of the service, provided pervasive evidence of an arrangement exists, tariff or rates are fixed or are determinable and collectability is reasonably certain. Revenue recognised is net of indirect taxes, returns and discounts.

Rental income

Revenues from property leased out under an operating lease are recognised over the tenure of the lease or service agreement on a straight line basis over the term of the lease, except where the rentals are structured to increase in line with expected general inflation, and except where there is uncertainty of ultimate collection.

Income from other services

Maintenance income is recognised as and when related expenses are incurred. Income from ancillary services are recognised as and when the services are rendered.

Dividend income

Dividend income is recognised only when the right to receive the same is established, it is probable that the economic benefits associated with the dividend will flow to us, and the amount of dividend can be measured reliably.

Interest income

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (“**EIR**”), which is the rate that discounts the estimated future cash payments or receipts through the expected life of the financial instruments or a shorter period, where appropriate, to the net carrying amount of the financial assets on initial recognition. Interest income is included in other income in the restated consolidated statement of profit or loss.

Foreign currency

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in profit or loss. Foreign exchange differences regarded as an adjustment to borrowing costs are presented in the restated consolidated summary statement of profit and loss, within finance costs. All other foreign exchange gains and losses are presented in the restated consolidated summary statement of profit and loss on a net basis within other gains / (losses). Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of transactions. Non-monetary items that are measured at fair value in a foreign currency shall be translated using the exchange rates at the date when the fair value was measured.

Employee benefits

Short-term employee benefits

All employee benefits payable wholly within twelve months of rendering services are classified as short-term

employee benefits. Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if we have a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Short-term benefits such as salaries, wages, short-term compensation absences, etc., are determined on an undiscounted basis and recognised in the period in which the employee renders the related service.

Post-employment benefits

Defined contribution plans

Obligations for contributions to defined contribution plans such as provident fund and family pension maintained with regional provident fund office are expensed as the related service is provided.

Defined benefit plans

The following post-employment benefit plans are covered under the defined benefit plans:

- **Gratuity Fund**

We provide for gratuity, a defined benefit retirement plan covering eligible employees. The gratuity plan provides a lump-sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment with us. The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus of our defined benefit plans. When the calculation results in a potential asset for us, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the Restated Consolidated Summary Statement of changes in equity and in the Restated Consolidated Summary Statement of Assets and Liabilities.

Other long-term employee benefits

Liability toward long-term compensated absences is provided for on the basis of an actuarial valuation, using the projected unit credit method, as at the date of the balance sheet. Actuarial gains / losses comprising of experience adjustments and the effects of changes in actuarial assumptions are immediately recognised in the Restated Consolidated Summary Statement of Profit and Loss.

Terminal Benefits

All terminal benefits are recognised as an expense in the period in which they are incurred.

Income-tax

Income-tax expense comprises current and deferred tax. It is recognised in net profit in the restated consolidated statement of profit or loss except to the extent that it relates to items recognised directly in equity or in the OCI.

Current tax

Current tax is the amount of tax payable (recoverable) in respect of the taxable profit / (tax loss) for the year determined in accordance with the provisions of the Income-tax Act, 1961. Taxable profit differs from 'profit before tax' as reported in the Restated Consolidated Summary Statement of Profit and Loss because of items of income or expenses that are taxable or deductible in other years & items that are never taxable or deductible. Current income tax for current and prior periods is recognised at the amount expected to be paid to or recovered from the tax authorities, using tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Current tax assets and liabilities are offset only if, we:

- have a legally enforceable right to set off the recognised amounts; and
- intend either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss; and
- temporary differences related to investments in subsidiaries and associates to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Inventories

Hospitality

Stocks of stores, food and beverages and operating supplies (crocery, cutlery, glassware and linen) are carried at the lower of cost and net realizable value. Cost of inventories comprises of all costs of purchase and other costs incurred in bringing the inventories to their present condition and location. Cost is arrived at by the weighted average cost method.

Stocks of stores and spares and operating supplies (crocery, cutlery, glassware and linen) once issued to the operating departments are considered as consumed and expensed to the Restated Consolidated Summary Statement of Profit and Loss.

Real Estate Development (Residential Flats)

Property is valued at lower of cost and net realizable value. Cost comprises of land, development rights, materials, services, and other expenses attributable to the projects. Costs of construction / development (including cost of land) incurred is charged to the Restated Consolidated Summary Statement of Profit and Loss proportionate to area sold and the balance cost is carried over under inventories as part of property under development.

Cost of construction material (including unutilised project materials) at site is computed by the weighted moving average method and carried at lower of cost and Net Realizable value.

Property, plant and equipment

Recognition and measurement

Property, plant and equipment are stated at cost less accumulated depreciation / amortisation and impairment losses, if any except for freehold land which is not depreciated. Cost comprises of purchase price and any attributable cost such as duties, freight, borrowing costs, erection and commissioning expenses incurred in bringing the asset to its working condition for its intended use. If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted and depreciated for as separate items (major components) of property, plant and equipment. Any gain or loss on disposal of an item of property, plant and equipment is recognised in the Restated Consolidated Summary Statement of Profit and Loss.

Properties in the course of construction for production, supply or administration purposes are carried at cost, less any impairment loss recognised. Cost includes professional fees and, for qualifying assets borrowing costs capitalised in accordance with the group's accounting policy. Such properties are classified to the appropriate categories of Property, Plant & Equipment when completed and are ready for intended use. Depreciation on these

assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to us.

Transition to Ind AS

For transition to Ind AS, we have elected to apply Ind AS 16 retrospectively to its property, plant and equipment along with selective fair valuation of few assets (Freehold land at Powai and Sahar in Mumbai and our hotel at Hyderabad are measured at fair value as deemed cost) and use that carrying value as its deemed cost. While measuring the property, plant and equipment in accordance with Ind AS, we have elected to measure certain items of property, plant and equipment at the date of transition to Ind AS at their fair values and use that fair values as their deemed cost.

Depreciation

Depreciation is provided using the straight line method as per the useful life of the assets estimated by the management.

Depreciation on addition or deletion of fixed asset made during the year is provided on pro-rata basis from or up to the date of each addition or deletion. The useful lives of assets estimated by management is same as prescribed in Schedule II to the Act, except in respect of the following categories of assets, where the life is different than that of Schedule II to the Act.

Building interiors and accessories comprise of the interiors of the hotel building which will undergo renovation, are depreciated on a straight line method basis over a period of 10 years, which in our management's view represents the useful life of such assets. Building constructed on leasehold land are amortised from the date of commencement of commercial operations over the balance lease period. Leasehold Improvements are depreciated over the primary period of lease. Temporary structures and assets costing ₹ 5,000 or less are depreciated at 100% in the year of capitalization.

Freehold land is measured at fair value as per Ind AS 113 with the resultant impact being accounted for in the reserves. The fair value of our freehold land parcels as at April 1, 2016 have been arrived at on the basis of a valuation carried out by an independent registered appraiser not related to us with appropriate qualifications and relevant experience in the valuation of properties at relevant locations. The fair value was determined based on a combination of discounted cash flow method and residual method. The fair value of such freehold land has been

pushed back to the earliest of reporting period in the restated summary financial information in accordance with the Guidance Note on Reports in Company Prospectuses (Revised 2016).

Borrowing costs

Borrowing costs are interest and other costs (including exchange differences relating to foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs) incurred in connection with the borrowing of funds. Borrowing costs directly attributable to acquisition or construction of a qualifying asset which necessarily take a substantial period of time to get ready for their intended use or sale are capitalised as part of the cost of that asset until such time as the assets are substantially ready for their intended use or sale. Other borrowing costs are recognised as an expense in the period in which they are incurred.

Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The management committee assesses our financial performance and position, and makes strategic decisions. It is identified as being the chief operating decision maker for our Company. Refer note 49 for segment information presented.

Intangible assets

Recognition and measurement

Intangible assets comprises of trademarks and computer software and are measured at cost less any accumulated amortisation and accumulated impairment loss, if any.

Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates.

Transition to Ind AS

On transition of Ind AS, our Company has elected to continue with the carrying value of all of our intangible assets recognised as at April 1, 2016, measured as per the previous GAAP, and use that carrying value as the deemed cost of such intangible assets.

Amortisation

Amortisation is calculated over the cost of the asset, or other amount substituted for cost less its residual value. Amortisation is recognised in the Restated Consolidated Statement of profit or loss on a straight-line basis over the estimated useful lives of intangible assets, from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

Intangible assets are amortised on straight-line method over estimated useful life of three years, which in management's view represents the economic useful life of these assets.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate prospectively.

Intangible assets (continued)

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognised for such excess amount. The impairment loss is recognised as an expense in the Restated consolidated summary statement of profit and loss, unless the asset is carried at revalued amount, in which case any impairment loss of

the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset.

Goodwill on business combination is not amortised but it is tested for impairment annually or more frequently if events or changes in circumstances indicate that it might be impaired.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognised for an asset (other than a revalued asset) in earlier accounting periods which no longer exists or may have decreased, such reversal of impairment loss is recognised in the Restated consolidated summary statement of profit and loss, to the extent the amount was previously charged to the Restated consolidated summary statement of profit and loss. In case of revalued assets, such reversal is not recognised.

Investment property and investment property under construction

(a) Recognition and measurement

Investment property is property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Upon initial recognition, an investment property is measured at cost. Subsequent to initial recognition, investment property is measured at cost less accumulated depreciation and accumulated impairment losses, if any.

On transition to Ind AS, our Company has elected to continue with the carrying value of all of our investment property recognised as at 1 April 2016, measured as per the previous GAAP and use that carrying value as the deemed cost of such investment property.

Investment property and investment property under construction represents the cost incurred in respect of areas retail block and commercial office space. Property under construction is accounted for as investment property under construction until construction or development is complete.

Direct expenses like cost of land, including related transaction costs, site labour cost, material used for project construction, project management consultancy, costs for moving the plant and machinery to the site and general expenses incurred specifically for the respective project like insurance, design and technical assistance, and construction overheads are taken as the cost of the project.

Investment properties are carried individually at cost less accumulated depreciation and impairment, if any. Investment properties under construction are carried individually at cost less impairment, if any. Impairment of investment property is determined in accordance with the policy stated for impairment of assets.

(b) Depreciation

Depreciation on investment property has been provided pro rata for the period of use by the Straight Line Method. The useful lives of Investment Property is estimated by management and the same is as prescribed in Schedule II to the Act, except in respect of the following categories of assets, where the life of these assets differs from Schedule II.

Any gain or loss on disposal of an investment property is recognised in Restated Consolidated summary statement of profit and loss.

The fair values of investment property are disclosed in the notes. Fair values are determined by an independent valuer who holds a recognised and relevant professional qualification and has recent experience in the location and category of the investment property being valued.

Assets held for sale

Non-current assets are classified as held for sale if it is highly probable that their carrying amount will be recovered primarily through sale rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When our Company is committed to a sale plan involving disposal of an investment, or a portion of an investment, in an associate, the investment or the portion of the investment that will be disposed of is classified as held for sale when the criteria described above are met, and our Company discontinues the use of the equity method in relation to the portion that is classified as held for sale. Any retained portion of an investment in an associate that has not been classified as held for sale continues to be accounted for using the equity method. We discontinue the use of the equity method at the time of disposal when the disposal results in our Company losing Significant influence over the associate or joint venture.

After the disposal takes place, we accounts for any retained interest in the associate in accordance with Ind AS 109 unless the retained interest continues to be an associate, in which case we use the equity method (see the accounting policy regarding investments in associates above).

Such assets are generally measured at the lower of their carrying amount and fair value less costs to sell. Losses on initial classification as held for sale and subsequent gains and losses on remeasurement are recognised in Restated Consolidated summary statement of profit and loss. Refer Note 17.

Financial Instruments

1. Financial Assets

a) Recognition and initial measurement

Trade receivable are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when our Company becomes a party to the contractual provisions of the instrument.

A financial asset is initially measured at fair value plus, for an item not at fair value through profit and loss (“FVTPL”), transaction costs that are directly attributable to its acquisition or issue.

b) Classification and subsequent measurement

We classify our financial assets into a) financial assets measured at amortised cost, and b) financial assets measured at FVTPL. Management determines the classification of its financial assets at the time of initial recognition or, where applicable, at the time of reclassification.

i. Financial assets measured at amortised costs

A financial asset is classified at amortised costs if it is held within a business model whose objective is to a) hold financial asset in order to collect contractual cash flows

and b) the contractual terms of the financial asset give rise on specific dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using effective interest rate method (“**EIR**”). Amortised cost is arrived at after taking into consideration any discount on fees or costs that are an integral part of the EIR. The amortisation of such interests forms part of finance income in the restated consolidated summary statement of profit and loss. Any impairment loss arising from these assets are recognised in the restated consolidated summary statement of profit and loss.

ii. Financial assets measured at fair value through profit and loss

This is a residual category for classification. Any asset which do not meet the criteria for classification as at amortised cost, is classified as FVTPL. Financial assets at fair value through profit or loss are measured at fair value, and changes therein are recognised in the restated consolidated statement of profit or loss.

iii. Financial assets measured at fair value through other comprehensive income

Debt investments at FVOCI: These assets are subsequently measured at fair value. Interest income under the effective interest method, foreign exchange gains and losses and impairment are recognised in restated consolidated summary statement of profit and loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to restated consolidated summary statement of profit and loss.

Equity investments at FVOCI: These assets are subsequently measured at fair value. Dividends are recognised as income in Restated consolidated summary statement of profit and loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to Restated consolidated summary statement of profit and loss.

c) Derecognition

Our Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Group is recognised as a separate asset and associated liability for any amounts it may have to pay.

d) Impairment of financial assets

In accordance with Ind-AS 109, our Company applies expected credit loss (“**ECL**”) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- i. Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, and bank balance.
- ii. Trade receivables- Our Company follows ‘simplified approach’ for recognition of impairment loss allowance on trade receivables which do not contain a significant financing component.

The application of simplified approach does not require us to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

2. *Financial Liabilities*

a) Recognition, measurement and classification

Financial liabilities are classified as either held at a) fair value through profit or loss, or b) at amortised cost. Management determines the classification of its financial liabilities at the time of initial recognition or, where applicable, at the time of reclassification. The classification is done in accordance with the substance of the contractual arrangement and the definition of a financial liability and an equity instruments.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Our Company's financial liabilities at amortised cost includes loan and borrowings, interest free security deposit, interest accrued but not due on borrowings, Retention money payable, trade and other payables. Such financial liabilities are recognised initially at fair value minus any directly attributable transaction costs. Subsequent to initial recognition these financial liabilities are measured at amortised cost using the effective interest method.

Our Company's financial liabilities at fair value through profit or loss includes derivative financial instruments.

b) Financial guarantee contracts

Our Company on a case to case basis elects to account for financial guarantee contracts as a financial instruments or as an insurance contracts as specified in Ind AS 109 on Financial Instruments and Ind AS 104 on Insurance contracts. Our Company has regarded all our financial guarantee contracts as insurance contracts. At the end of each reporting period, our Company performs a liability adequacy test, (i.e. it assesses the likelihood of a pay-out based on current undiscounted estimates of future cash flows), and any deficiency is recognised in restated consolidated summary statement of profit and loss.

c) Derecognition

Our Company derecognises financial liabilities when its contractual obligations are discharged or cancelled or have expired.

Offsetting of financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount presented in the restated consolidated summary statement of financial position when, and only when, our Company has a legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Derivative financial instruments

Our Company uses derivative financial instruments, such as foreign exchange forward contracts, interest rate swaps and currency options to manage our exposure to interest rate and foreign exchange risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured to their fair value. The resulting gain/loss is recognised in the Restated Consolidated Summary Statement of Profit and Loss immediately at the end of each reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Our Company does not designate the derivative instrument as a hedging instrument.

Provisions, contingent liabilities and contingent assets

Provisions are recognised when there is a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognised as finance cost.

Cash and cash equivalents

Cash and cash equivalent in the Restated Consolidated Summary Statement of Assets And Liabilities comprise

cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

Adjusted EBITDA before Exceptional Items

We present Adjusted EBITDA before Exceptional Items in the restated summary statement of profit and loss; this is not specifically required by Ind AS 1. The terms EBITDA and Adjusted EBITDA before Exceptional Items are not defined in Ind AS. Ind AS complaint Schedule III allows companies to present line items, sub-line items and sub-totals shall be presented as an addition or substitution on the face of the financial statements when such presentation is relevant to an understanding of their financial position or performance or to cater to industry or sector-specific disclosure requirements or when required for compliance with the amendments to the Companies Act or under the Indian Accounting Standards.

Measurement of Adjusted EBITDA before Exceptional Items

Accordingly, we have elected to present Adjusted EBITDA before Exceptional Items as a separate line item on the face of the restated summary statement of profit and loss. We measure Adjusted EBITDA before Exceptional Items on the basis of profit/ (loss) from continuing operations including other income. In our measurement, we do not include exceptional items, depreciation and amortisation expense, finance costs, share of profit from associate and tax expense.

Usefulness for certain Non GAAP items

Adjusted EBITDA before Exceptional Items

Adjusted EBITDA before Exceptional Items is included as supplemental disclosure because we believe it is a useful indicator of our operating performance. Derivations of EBITDA are well-recognized performance measurements that are frequently used by companies, investors, securities analysts and other interested parties in comparing the operating performance of companies in our industry. We also believe Adjusted EBITDA before Exceptional Items is useful for evaluating performance of our senior management team.

Average Cost of Indebtedness

The Average Cost of Indebtedness is helpful in understanding the overall interest rate being paid by a company for various types of debt financing. This measure gives investors an idea of a company's risk level compared to others because riskier companies generally have a higher cost of debt.

The table below sets out the manner of calculation for our Average Cost of Indebtedness:

Six months ended September 30, 2018

Our results of operations for the six months ended September 30, 2018 were particularly affected by the following factors:

- our finance costs were ₹ 1,398.74 million or 28.14% of our Total Income for the six months ended September 30, 2018, while our finance costs were ₹ 2,119.21 million or 22.80% of our Total Income for the financial year 2018. Off-Balance Sheet Commitments and Arrangements

Quantitative and Qualitative Analysis of Market Risks

Credit risk

Credit risk is the risk of financial loss to us if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from our receivables from customers, cash and cash equivalents and other bank balances, derivatives and investment securities. The carrying amounts of financial assets represent the maximum credit exposure.

Trade receivables from customers

We do not have any significant credit exposure in relation to revenue generated from the hospitality business. For our other segments, we have established a credit policy under which each new customer is analyzed individually for creditworthiness before entering into a contract. Sale limits are established for each customer, reviewed regularly and any sales exceeding those limits require approval from the appropriate authorities. There are no significant concentrations of credit risk.

Currency risk

We are exposed to currency risk on account of our operating and financing activities. Our functional currency is

Indian Rupee. The exchange rate between the Indian rupee and foreign currencies has changed substantially in recent periods and may continue to fluctuate substantially in the future. We have availed external commercial borrowings (excluding interest accrued) of USD 74.06 million as of September 30, 2018, which also exposes us to currency risk. Consequently, we use derivative instruments, such as foreign exchange forward contracts to mitigate the risk of changes in foreign currency exchange rates in respect of recognized liabilities. We enter into foreign currency forward contracts which are not intended for trading or speculative purposes but for hedge purposes to establish the amount of reporting currency required or available at the settlement date of certain payables.

Liquidity risk

Liquidity risk is the risk that we will encounter difficulty in meeting the obligations associated with our financial liabilities that are settled by delivering cash or another financial asset. Our approach to managing liquidity is to ensure, as far as possible, that we will have sufficient liquidity to meet our liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to our reputation.

Market risk

Market risk is the risk that the changes in market prices such as foreign exchange rates, interest rates and equity prices will affect our income or the value of our holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return. We use derivatives to manage market risk.

Certain Exceptional Items

We own a property situated at Koramangala Industrial Layout, Bengaluru, where we are constructing a residential complex. The completion of the residential complex is stalled on account of the revocation of certain approvals by Hindustan Aeronautical Limited. We have filed a writ petition before the Karnataka High Court in relation to the cancellation of the approvals and the construction and further sale of residential apartments at this property, among others. Pending the outcome of the proceedings and a final closure of the matter, we suspended revenue recognition based on the percentage completion method and have also been derecognizing profits on cancellation of flats previously sold. The accounting impact has been reflected under exceptional items. See ***“Our residential project at Koramangala, Bengaluru is the subject matter of a litigation with Hindustan Aeronautics Limited. Any adverse order in relation to this litigation may adversely affect our ability to complete the project, and our business, results of operations and reputation”*** on page 21 and see ***“Outstanding Litigation and Other Material Developments”*** on page 619.

Known Trends or Uncertainties

Our business has been subject, and we expect it to continue to be subject, to significant economic changes arising from the trends identified above in ***“Factors Affecting our Results of Operations”*** and the uncertainties described in ***“Risk Factors”*** on page 18. To our knowledge, except as discussed in this Red Herring Prospectus, there are no known trends or uncertainties that have or had or are expected to have a material adverse impact on revenues or income of our Company from continuing operations.

Future Relationship between Cost and Revenue

Other than as described in ***“Risk Factors”***, ***“Our Business”*** and ***“Management’s Discussion and Analysis of Financial Condition and Results of Operations”*** on pages 18, 152 and 585, respectively, to our knowledge there are no known factors that may adversely affect our business prospects, results of operations and financial condition.

Related Party Transactions

We have entered into various transactions with related parties, including for the purposes of acquisition of land by sub-lease; provision of goods and services; non-exclusive and limited license use of trademarks; use and occupation of licensed premises; provision of support services; and provision of repairs and maintenance services. As of September 30, 2018, our Company has given loans to our Group Company, Immense Properties Private Limited, Imperial Serviced Offices & Property Management Private Limited, Nakshtra Logistics Private Limited, Pramaan Properties Private Limited and certain of our Promoters (Ivory Properties and Hotels Private Limited, Ivory Property Trust and K. Raheja Private Limited) and Loan to Directors aggregating to ₹ 2,107.53 million. These entities have indicated their intention to repay such loans within 15 days from the receipt of the net proceeds

from the Offer by the Company and the Selling Shareholders. See “**Summary Financial Information – Restated Standalone Statement of Related Party Transactions and Balances**” beginning on page 258.

We cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Such related party transactions may potentially involve conflicts of interest. For details on our related party transactions, see “**Related Party Transactions**” on page 255.

Competitive Conditions

We operate in a competitive environment. See “**Our Business**”, “**Industry Overview**” and “**Risk Factors**” on pages 152, 133 and 18, respectively for further information on our industry and competition.

Seasonality of Business

The hotel and hospitality industry in India is subject to seasonal variations. The periods during which our hotel properties experience higher revenues vary from property to property, depending principally upon location and the guests served. Our revenues are generally higher during the second half of each financial year as compared to first half of the financial year. Seasonality affects leisure travel and the MICE sector (meetings, incentives, conferences and events) including weddings. According to the Horwath Report, the winter months are preferred for travel in India, for leisure, MICE events, management or business travel and more recently for destination weddings. Further, inbound foreign leisure travel varies more with climatic factors, such that it mainly occurs between October and March and to a lesser extent (with lower visitor profile and travel budgets) during the summer and monsoon seasons, as per the Horwath Report. This seasonality can be expected to cause quarterly fluctuations in our revenue, profit margins and net earnings. Further, the timing of opening of newly constructed hotels and the timing of any hotel acquisitions or dispositions may cause a variation of revenue and earnings from quarter to quarter. Further, the hospitality industry is subject to weekly variations. While business travel is high during the weekdays, leisure travel is picking up during weekends encouraged by greater affordability, changing attitudes towards lifestyle, and improved road and air connectivity.

Further, the hospitality industry is cyclical and demand generally follows, on a lagged basis, key macroeconomic indicators. The combination of changes in economic conditions and in the supply of hotel rooms, including periods of excess supply, can result in significant volatility in results for owners and managers of hotel properties. The costs of running a hotel tend to be more fixed than variable. As a result, in an environment of declining revenues the rate of decline in profits can be higher than the rate of decline in revenues. As a result of such seasonal fluctuations, our room rates, sales and results of operations of a given half of the financial year may not be reliable indicators of the sales or results of operations of the other half of the financial year or of our future performance. See “**Risk Factors – Internal Risk Factors - Our business is subject to seasonal and cyclical variations that could result in fluctuations in our results of operations.**” on page 225.

New Products or Business Segments

Other than as disclosed in this section and in “**Our Business**” on page 152, there are no new products or business segments that have or are expected to have a material impact on our business prospects, results of operations or financial condition.

Significant developments subsequent to September 30, 2018

Except as set out in this Red Herring Prospectus, to our knowledge, no circumstances have arisen since the date of the last financial statements as disclosed in this Red Herring Prospectus which materially or adversely affect or are likely to affect, our operations or profitability, or the value of our assets or our ability to pay our material liabilities within the next 12 months.

I. LITIGATION INVOLVING OUR COMPANY

A. Outstanding criminal proceedings involving our Company

Litigation against our Company

1. Maria Ninitte Noronha (“**Complainant**”) lodged a first information report dated November 6, 2007 (“**FIR**”) against Prashant Gerald Nazereth, partner of Pebbledrops Events, on the grounds of forgery, cheating and dishonestly inducing delivery of property. Pebbledrops Events, acting on behalf of Actis Biologics entered into a group sales agreement dated June 8, 2007 (amended on October 15, 2007) with one of our hotels, Renaissance Mumbai Convention Centre Hotel for utilizing the hotel facilities and rooms and received ₹ 1 million from Prashant Gerald Nazereth as advance consideration. Thereafter, our hotel received a notice dated October 12, 2007 from the Complainant claiming that the advance consideration amount paid to our hotel by Pebbledrops Events was fraudulently obtained by Prashant Gerald Nazereth from her and further demanding for it to be refunded. In pursuance of the FIR, a final report dated April 21, 2008 was prepared by the police and was filed with the Additional Chief Metropolitan Magistrate, Bandra (“**Metropolitan Court**”) wherein our Company was named as an accused. As called upon by the investigating officer, our Company deposited ₹ 1 million with the Bandra police station pending conclusion of the trial. Subsequently, the Complainant filed an application in

February 2008 before the Metropolitan Court for withdrawing the amount deposited by us with the Bandra police station to which we have filed our reply dated March 26, 2008, denying the claim of the Complainant to the deposited amount and stating that we are legally entitled to the same. The matter is currently pending before the Metropolitan Court.

2. Hitesh Nandlal Ramani (“**Complainant**”) lodged a first information report dated December 14, 2015 (“**FIR**”) at the Powai police station, Mumbai against one of our employee of our hotel, Renaissance Mumbai Convention Centre Hotel, and its swimming pool life guard, on the grounds of causing death by negligence and endangering life or personal safety of his daughter. C. Other material outstanding litigation involving our Company

Material outstanding litigation by our Company

1. Our Company has filed a writ petition (“**Writ Petition**”) before the Karnataka High Court at Bengaluru (“**Court**”) regarding the wrongful cancellation of the height NOC dated October 28, 2011 (“**NOC**”) issued by Hindustan Aeronautics Ltd. (“**HAL**”). The NOC was issued for the development of a 17 floor

residential building complex with a height of upto 62 meters on the Company's land at Koramangala Industrial Layout, Bengaluru. HAL is a public sector undertaking in-charge of the HAL aerodrome and is responsible to issue the height NOC for structures around the HAL aerodrome, as per the Notification SO 84(E) dated January 14, 2010. By a letter dated September 15, 2012, HAL first communicated an issue with the height of the project and asked our Company to conduct a re-survey, and thereafter also requested our Company to stop the construction of the project building. Therefore our Company suspended / limited the vertical construction of certain wings forming part of the project in May 2013; and also obtained and filed with HAL, an aeronautical study report dated March 12, 2013 issued by an expert, confirming that the building-wings completed at that point i.e. upto the full permitted height of 17 floors – 62 meters, did not “adversely affect aircraft operations”. A condition for demolition of such part(s) of the structure “which could adversely affect aircraft operations” (“**NOC-Condition**”) is provided for in paragraph 3 of the NOC. Thereafter, numerous communications were exchanged between our Company and HAL, and eventually on August 16, 2013, HAL issued communication to our Company cancelling the NOC issued by it, stating that the site elevation data as furnished by our Company varied from the actual elevation and further that our Company failed to carry out the re-survey as advised. At the time of cancellation of the NOC, five wings with 17 floors had been constructed with a height of upto 62 meters and more than 200 flats therein had been marketed by our Company.

Aggrieved, our Company filed the Writ Petition to (a) challenge the cancellation letter dated August 16, 2013 issued by HAL cancelling the NOC (b) for directing HAL to permit construction up to maximum height which does not adversely affect aircraft operations as may be determined by an aeronautical study to be conducted by AAI/ICAO, and ancillary reliefs (including an amended relief for re-validating the NOC for a further period). The Court also passed an interim order dated October 23, 2013 (the “**Interim Order**”) directing our Company not to modify / alter / renovate / develop the building above 40 meters from ground level, and not to sell or agree to sell or enter into any agreement with third parties in whatsoever manner in respect of any portion of the building above 40 meters. Several customers of our Company, as also certain neighbouring residents, have got themselves impleaded as Respondents in the Writ Petition.

By a subsequent detailed judgement and order dated July 31, 2014 (“**Order**”), the Court directed the aeronautical study to be conducted by Airport Authority of India (“**AAI**”). HAL's writ appeal to challenge the Order was dismissed by the Division Bench of the Court on November 3, 2015 *inter alia* with a direction for expediting the hearing of the writ petition and to decide the matter uninfluenced by the observations in the Order. By a further order dated November 5, 2015, the Court clarified that the aeronautical study was to be carried out in accordance with the notified parameters of HAL Airport and Notification SO 84(E) dated January 14, 2010. Accordingly, AAI conducted the study and filed its report on January 27, 2016, in effect confirming that the full height of the then completed building-wings was permissible as it does not adversely affect aircraft operations. HAL has filed objections to the aeronautical study report of AAI, *inter alia* alleging that it is a unique defence airport carrying out test flying. Our Company has also *inter alia* submitted that it had no motive or any additional area to gain, as the project has sufficient land to absorb and construct the entire FAR sanctioned for 17 floors -62 meters in a horizontal structure of 10 floors - 40 meters. The Writ Petition is currently pending before the High Court of Karnataka.

Further, certain communications were also exchanged between HAL and Bruhat Bengaluru Mahanagara Palike (“**BBMP**”) and our Company between 2013 and 2017, wherein our Company *inter alia* updated BBMP regarding the writ petition and furnished an undertaking to BBMP not to make a further vertical expansion / modification, alteration or development above 40 meters. Our Company *vide* letter dated January 16, 2017 requested BBMP for an extension of the validity period of the building sanction plan for the project.

Our Company had executed Memorandum of Understanding's (“**MOU's**”) with customers for a provisional reservation of a right to purchase various apartments, providing them with an option right. Our Company has also executed and registered agreements for sale with a few customers. The issue in respect of the NOC cancellation by HAL, was informed to the customers on December 21, 2013 and thereafter numerous communications were exchanged with them. Eventually, our Company proposed a mitigation program. In the events that have followed, some customers exited the project, and some customers have continued with the project and are being paid and have accepted the goodwill compensation pursuant to the mitigation program (which has been extended from time to time)., In view of the Real Estate (Regulation and Development) Act, 2016 (“**RERA**”), our Company addressed a communication dated October 10, 2017 to customers relating to the possession date. Eventually, by letter

dated November 18, 2017 the mitigation program was extended up to June 30, 2018 on a without prejudice basis as stated in the communications. Our Company has now by its communication of June 2018, further extended the date of mitigation program upto 31st December 2018. The mitigation period has been further extended to March 31, 2019 by a letter dated December 18, 2018 on a without prejudice basis. As a matter of abundant caution, our Company has also registered the project under RERA on a without prejudice basis. Our Company has filed interim applications dated November 29, 2018 before the Court for removal of certain respondents from the suit and change of its name to 'Chalet Hotels Limited' in the suit. Our Company also filed an application before the Court requesting it to take on record the fact that the Respondent has no objection to the construction of the structure upto 40 meters at Koramangala Industrial Layout, Bengaluru to enable us to apply for a building sanction plan. HAL has filed its objection to this interim application inter alia stating that any alteration or construction of the building will be in violation of the Interim Order, although the said order directs parties not to modify / alter / renovate / develop the building above 40 meters from ground level. The matter is currently pending before the Court.

Our Company has also challenged Section 108A of the Karnataka Municipal Corporation Act, 1976 which provided for the special manner in which property tax will be levied for buildings situated in Bruhat Bangalore Mahanagar Palike area. 11. Ravi C. Raheja, Neel C. Raheja and two others (“**Plaintiffs/CLR**”) filed a civil suit before the Bombay High Court (“**High Court**”) against (1) Gopal L. Raheja, (2) Sandeep G. Raheja, (3) Durga S. Raheja, (4) Sabita R. Narang and (5) Sonali N. Arora (“**Defendants/GLR**”).

The Plaintiffs and the Defendants were the persons primarily involved in the operation and management of the activities and businesses of the group known as K. Raheja Group in certain cities of Western and Southern India. However, certain disputes and differences arose between CLR group and the GLR group that threatened the running of the business of the K. Raheja Group.

After attempts to amicably resolve and finally settle the disputes and differences between the two groups in order to avoid protracting the matter any further, GLR and CLR decided to split/partition entities and assets of the K. Raheja Group between them and accordingly a list indicating division of certain individual assets was executed in May 1995. On April 5, 1996 and November 16, 1996, further written agreements were executed wherein the manner, method and procedure of the division was agreed upon by the parties. Thereafter, on December 9, 1996, GLR and CLR groups made further confirmations to enable the division of certain assets in the agreed manner which was duly completed in respect of a portion of the assets, businesses and entities of the K. Raheja Group. The agreements and writings referred to above i.e. dated May 1995, April 5, 1996, November 16, 1996 and December 9, 1996 are collectively referred to as the “**Family Arrangement Documents**”.

Further, apart from the entities, assets and businesses of the two groups which were divided as above, there are additional properties and entities, the separation and distribution of which remained unresolved due to the differences between the groups. The two groups had agreed to take steps to divide these undivided properties comprising various companies, partnership firms, trusts and also certain properties situated at Mumbai i.e. the “**Mumbai Undivided Entities**” and situated in South India i.e. the “**Southern Undivided Entities**” along with certain other residual properties (collectively referred to as the “**Balance Properties**”). Further, the distribution and ascertainment of the monies payable/receivable did not transpire and certain disputes again arose between GLR and CLR in respect of the division of the Balance Properties, the management of certain entities and other such disputes.

After various correspondences between the two groups over the course of more than two decades to amicably resolve the disputes, the present suit was filed by the Plaintiffs, *inter alia* seeking enforcement/implementation of the family arrangement documents. The Plaintiffs have alleged that the arrangement was only partially implemented and *inter alia* alleged that certain arrangements were

wrongly implemented. The Plaintiffs have further alleged that due to the inactivity in management of the undivided companies, the registrar of companies has struck-off and dissolved certain of these companies. The Plaintiffs have *inter alia* prayed for implementation of the Family Arrangement Documents, restoration of the companies that have been struck-off/dissolved, division of the companies situated in South India in the manner agreed by the parties and also for injunction restraining the Defendants from creating third party interests and/or encumbrances upon the properties that are the subject matter of the family arrangement. The Defendant nos.2 and 3 have filed their written statement on record along with a counter-claim *inter alia* praying for dismissal of the suit filed by the Plaintiffs and to fully implement the Family Arrangement Documents. The matter is pending before the High Court.

The GLR group also filed suits before the High Court pursuant to the family arrangement against Ravi C. Raheja, Neel C. Raheja and others alleging liability/obligation of the Plaintiffs to hand over certain title deeds, documents and papers and other assets belonging to them which are allegedly in the custody of the Plaintiffs and also seeking injunction for handover of the same. These suits are pending before the High Court.

12. Ravi C. Raheja and Neel C. Raheja (“**Petitioners**”) have filed a writ petition before the Karnataka High Court at Bengaluru (“**Court**”) against the Union of India and RoC, Bengaluru (“**Respondents**”) challenging the inclusion of their names in the list released by the RoC on its website in relation to the directors disqualified under the provisions of Section 164(2) the Companies Act, 2013, for the periods ending October 31, 2019 and October 31, 2020. The names of the Petitioners have been included in the aforementioned list in relation to non-filing of financial statements or annual returns for a continuous period of three financial years by K Raheja Hotels and Estates Private Limited. The Petitioners have filed the petition *inter alia* stating that the inclusion of their names in the list was erroneous, arbitrary and illegal, and have submitted the following:

- they had filed an application dated January 7, 2011 before the Company Law Board, Chennai (the “**CLB**”) seeking the direction of the CLB to appoint an appropriate person, as the administrator of K. Raheja Hotels and Estates Private Limited with a view to fulfil the statutory and other compliances of K. Raheja Hotels and Estates Private Limited.
- The CLB through an order dated July 6, 2011 appointed an administrator and through an order dated August 10, 2011 directed the Registrar of Companies, Bengaluru to mark K. Raheja Hotels and Estates Private Limited as ‘**having management dispute**’.

- Through an order dated August 25, 2011, the CLB stated that none of the directors of K. Raheja Hotels and Estates Private Limited could take decision with regard to the affairs of the company without the knowledge and consent of the administrator.
- Further, upon the administrator taking charge of K. Raheja Hotels and Estates Private Limited, the Petitioners through their letters dated February 17, 2014 (which is prior to their incurring any disqualification under the provisions of Companies Act 2013 and also prior to the relevant provisions of the Companies Act 2013 becoming applicable to private companies) addressed to the Registrar of Companies, Bengaluru immediately resigned as directors of K. Raheja Hotels and Estates Private Limited.
- Subsequently, the Registrar of Companies, Bengaluru issued a letter dated February 24, 2014 to K Raheja Hotels and Estates Private Limited stating that until the management dispute is settled or an interim order is received from a Court or Tribunal of competent jurisdiction, the documents filed by K Raheja Hotels and Estates Private Limited and the contesting group of its directors will not be approved or registered or recorded.
- On March 9, 2014 the administrator filed a memo with the CLB informing CLB that the Petitioners have resigned as directors of K. Raheja Hotels and Estates Private Limited through their communications dated February 17, 2014, and have requested the administrator to make necessary changes in all appropriate records and make all necessary statutory filings in this regard.
- The CLB through its order dated October 30, 2014 cancelled the appointment of the administrator and directed K Raheja Hotels and Estates Private Limited to appoint directors representing each group who shall manage the company. The Petitioners filed an appeal against this order before the Karnataka High Court. The Karnataka High Court through an order dated November 7, 2014 stayed the order dated October 31, 2014 of the CLB and stated that there are no directors on the board of K Raheja Hotels and Estates Private Limited and therefore the administrator needs to continue and cannot be discharged and his appointment shall continue till the proceedings before the CLB come to an end. As on date this order continues to be in operation.

In the writ petition, the Petitioners have submitted before the Karnataka High Court that they were not responsible for the affairs of K Raheja Hotels and Estates Private Limited and that they did not take any decisions with regard to the affairs of that company without the knowledge or consent of the administrator. The Petitioners have *inter alia* prayed for deletion of their names from the aforementioned disqualification lists and removal of their names as directors from the records of K Raheja Hotels and Estates Private Limited maintained by the Respondents. The Court has by an interim order dated June 15, 2018 stayed the operation and effect of disqualification of the Petitioners as directors. The matter is pending for final hearing and disposal before the Court. The Court through an order dated August 21, 2018 directed the Respondents to upload the stay order on their official website. The stay order has now been uploaded on the website of the Ministry of Corporate Affairs. The matter is pending before the Court.

5.6 BASIS OF ALLOCATION

- (a) The SEBI ICDR Regulations specify the allocation or Allotment that may be made to various categories of Bidders/Applicants in an Offer depending on compliance with the applicable eligibility conditions. Certain details pertaining to the percentage of Offer size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP / Prospectus. For details in relation to allocation, the Bidder/Applicant may refer to the RHP / Prospectus.
- (b) Under-subscription in any category (except QIB category) is allowed to be met with spill-over from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLM and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- (c) In case of under subscription in the Net Offer, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Net Offer. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/Applicants may refer to the RHP.
- (d) **Illustration of the Book Building and Price Discovery Process**

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the price band. For instance, assume a price band of Rs. 20 to Rs. 24 per share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the equity shares of the issuer at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of equity shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The issuer, in consultation with the book running lead managers, may finalise the Offer Price at or below such cut-off price, i.e., at or below Rs. 22.00. All bids at or above this Offer Price and cut-off bids are valid bids and are considered for allocation in the respective categories.

(e) **Alternate Method of Book Building**

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/Offer Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: OFFER PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Offer Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the application form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

ASBA Applicants may submit an Application Form either in physical form to the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the ASBA Account specified in the Application Form only. The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Offer Opening Date.

In a fixed price Issue, allocation in the net offer to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Bidders/Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Bidders/Applicants other than Retail Individual Investors and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to RHP/Prospectus. No Retail Individual Investor will be allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be

Allotted on a proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Offer (excluding any Offer for Sale of specified securities). However, in case the Offer is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Offer Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Offer Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation in the Retail Category at or above the Offer Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot ("**Maximum RII Allottees**"). The Allotment to the RIIs will then be made in the following manner:

- (a) In the event the number of RIIs who have submitted valid Bids in the Offer is equal to or less than Maximum RII Allottees; (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- (b) In the event the number of RIIs who have submitted valid Bids in the Offer is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Offer Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Offer Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Offer Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Offer Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to the SEBI ICDR Regulations or RHP / Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Offer Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Offer Price. Allotment may be undertaken in the following manner:

- (a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full allotment to the extent of valid Bids received above the Offer Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for allotment to all QIBs as set out at paragraph 7.4(b) below;
- (b) In the second instance, allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Offer Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

- (a) Allocation of Equity Shares to Anchor Investors at the Anchor Investor Offer Price will be at the discretion of the issuer subject to compliance with the following requirements:
- i. not more than 60% of the QIB Category will be allocated to Anchor Investors;
 - ii. one-third of the Anchor Investor Portion shall be reserved for domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the price at which allocation is being done to other Anchor Investors; and
 - iii. allocation to Anchor Investors shall be on a discretionary basis and subject to:
 - a maximum number of two Anchor Investors for allocation up to Rs.10 crores;
 - a minimum number of two Anchor Investors and maximum number of 15 Anchor Investors for allocation of more than Rs. 10 crores and up to Rs. 250 crores, subject to minimum allotment of Rs. 5 crores per such Anchor Investor; and
 - a minimum number of five Anchor Investors and maximum number of 15 Anchor Investors for allocation of more than Rs. 250 crores and an additional 10 Anchor Investors for every additional Rs. 250 crores or part thereof, subject to minimum allotment of Rs. 5 crores per such Anchor Investor.
- (b) A physical book is prepared by the Registrar on the basis of the Bid cum Application Forms received from Anchor Investors. Based on the physical book and at the discretion of the issuer in consultation with the BRLM(s), selected Anchor Investors will be sent a CAN and if required, a revised CAN.
- (c) **In the event that the Offer Price is higher than the Anchor Investor Offer Price:** Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Offer Price and the Anchor Investor Offer Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
- (d) **In the event the Offer Price is lower than the Anchor Investor Offer Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Offer being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- (a) Bidders may be categorized according to the number of Equity Shares applied for;
- (b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- (c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- (d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders

for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;

- (e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid Lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all bidders in such categories may be arrived at after such rounding off; and
- (f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. The balance Equity Shares, if any, remaining after such adjustment may be added to the category comprising Bidders applying for minimum number of Equity Shares.
