SECTION III – RISK FACTORS

An investment in Equity Shares involves a high degree of risk. Potential investors should carefully consider all the information in the Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors; and additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows and financial condition. If any or some combination of the following risks, or other risks that are not currently known or believed to be adverse, actually occur, our business, results of operations and financial condition could suffer, the trading price of, and the value of your investment in, our Equity Shares could decline and you may lose all or part of your investment. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider as immaterial to our operations. In order to obtain a complete understanding of our Company and our business, prospective investors should read this section in conjunction with “Our Business”, “Industry Overview”, ‘Management Discussion and Analysis of Financial Position and Results of Operations’ and “Financial Information” beginning on pages 123, 94, 185, and 182 respectively, of this Red Herring Prospectus, as well as the other financial and statistical information contained in this Red Herring Prospectus.

Potential investors should consult their tax, financial and legal advisors about the particular consequences of investing in the Issue. Unless specified or quantified in the relevant risk factors below, we are unable to quantify the financial or other impact of any of the risks described in this section. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment, which may differ in certain respects from that of other countries. This Red Herring Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. For details, please see “Forward Looking Statements” on page 19 of this Red Herring Prospectus.

MATERIALITY

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively;
3. Some events may not be material individually but may be found material collectively;
4. Some events may not be material at present but may be having material impact in future.

The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISK FACTORS

A. Business Related

- 1. Our business from retail outlet is concentrated in the National Capital Region (NCR) only. As of September 30, 2024, revenue from National Capital Region (NCR) constitute ₹ 506.63 Lakhs i.e. 16.61% of our revenue for September 30, 2024. Any adverse impact in this region may adversely affect our business, results of operations and financial condition.**

While we have a diversified geographical presence, our portfolio has historically been concentrated in National Capital Region (NCR), India. We started our retail outlet business operations in Delhi and have gradually expanded to Uttar Pradesh, Haryana, Punjab, Uttarakhand, Madhya Pradesh, Bihar and Rajasthan. For further information see “Our Business” on page 123 of this Red Herring Prospectus.

Revenue from projects undertaken in the state of National Capital Region (NCR) for the past three financial years is mentioned in the table below:

Particulars	For the period ended Sept 30, 2024	(₹ in lakhs, except percentage) For the Financials year ended		
		FY 2024	FY 2023	FY 2022
Total Revenue from operation*	3,050.10	4,277.44	2,569.45	1,651.89
Revenue from National Capital Region (NCR)**	506.63	920.21	335.28	202.37
% of Total Revenue	16.61%	12.25%	13.05%	21.51%

*Total revenue from operation include online sale as well as sale offline sales.

** Revenue from National Capital Region (NCR) includes sale from retail outlets only.

- 2. Our proposed expansion plans relating to the opening of new stores are subject to the risk of unanticipated delays in implementation and cost overruns.**

Our capital expenditure plans in relation to the proposed setting up of new stores are subject to the potential risks and uncertainties that these activities typically face, including cost overruns or delays. Problems that could adversely affect our expansion plans include labour shortages, increased costs of equipment or manpower, delays in completion, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory and other regulatory approvals, increase in other expenses, and other external factors which may not be within the control of our management. There can be no assurance that the proposed expansions will be completed as planned or on schedule, and if they are not completed in a timely manner, or at all, our budgeted costs may be insufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover such activities, we may not be able to achieve the intended economic benefits of such capital expenditure, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. There can be no assurance that we will be able to complete the aforementioned expansion and additions in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition. For further information, see “Objects of the Offer” on page 22 of this Red Herring Prospectus.

- 3. Our business requires significant working capital, necessitating substantial financing. If we are unable to secure additional debt or equity financing on favourable terms, it may lead to increased interest costs, restrictive covenants, or equity dilution, adversely impacting our financial performance, operations, and the market price of our Equity Shares.**

Our business operations, particularly the management of inventory, demand significant working capital, necessitating reliance on various sources of financing. As of September 30, 2024, our short-term borrowings amounted to ₹ 2,320.92 lakhs. To support ongoing growth and operational needs, we may need to raise additional debt in the future. However, acquiring more debt financing could lead to increased interest costs and introduce further restrictions through covenants in our credit agreements, limiting our operational flexibility. Alternatively, raising additional equity financing could dilute our earnings per Equity Share, reduce shareholders' ownership, and potentially pressure the market price of our Equity Shares.

Over the past years, our revenue from operations has experienced significant growth, as highlighted in the following table:

(₹ in lakhs, except percentage)

Particulars	2021-22 Audited	2022-23 Audited	2023-24 Audited	September 30, 2024 Audited	2024-25 Estimates
Revenue from operations (₹ in Lakhs)	1,651.89	2,569.45	4,277.44	3,050.10	7,847.12
Growth in revenue (%)	14.05	55.55	66.47	43*	83.45
Net working capital (₹ in Lakhs)	1,558.93	1,760.73	3,788.22	5,188.44	6,058.83
Working capital turnover ratio (in times)	1.03	1.55	1.54	1.36*	1.59

*Annualized

Despite these encouraging trends, our business remains heavily reliant on working capital financing to support this growth. The increase in working capital requirements, from ₹1,558.93 lakhs in FY 2021-22 to an estimated ₹6,058.83 lakhs in FY 2024-25, further emphasizes the need for diverse funding sources.

The objects of this Issue include funding the working capital requirements of our Company, based on management estimates and assumptions. For more information on these estimates and assumptions, please refer to the “Objects of the Issue” section on page 72 of the Red Herring Prospectus.

Our working capital requirements may also be impacted by factors beyond our control, including force majeure events, delayed or defaulted payments from clients, and limited availability of funding from banks or financial institutions. Consequently, our actual working capital requirements may differ from current estimates, and investors should not place undue reliance on such projections.

Any failure to meet debt obligations or adhere to restrictive covenants could result in the termination of credit facilities, trigger cross-default provisions, and severely affect our operations and financial performance. We cannot guarantee that we will secure additional financing on favourable terms or within the necessary timeframe. The inability to renew or secure financing could adversely impact our planned capital expenditures, operations, financial health, and overall business stability.

4. *There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing of returns and deposit of statutory dues with the taxation and other statutory authorities.*

In the past, our company has at very few instances, delayed in filing returns for GST, EPF, ESIC and deposit of such statutory dues, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues. Although the late filing fees levied are small, if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no show-cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financial positions of our Company and our directors may be affected. For further details see “Financial Information” beginning on page 182 of this Red Herring Prospectus.

5. *Our Company has delayed in complying with certain statutory provisions under various laws. Such delayed compliance /lapses may attract certain penalties.*

Our Company is required to make filings under various rules and regulations as applicable under the applicable provisions of the Companies Act, 2013 which is usually done within the prescribed time period by the Company. However in some instances delay has occurred in filing RoC filings like DPT-3 (return of acceptance of deposit) for FY 2019-20, ADT-1 (auditors appointment) for FY 2019-20, AOC-4 (annual filing) for FY 2021-22, ADT-1 (auditors appointment) for FY 2023-24 and INC-27 (conversion from Private Limited to Limited company).

Due to delays in filings pursuant to non-functionality of MCA, our Company had, on some occasions, paid the requisite late fees. No show cause notice in respect of the above has been received by the Company till date, however any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent. Any delay / non-compliance in the past or future may render us liable to statutory penalties / actions.

6. *Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.*

Currently, we fund our working capital requirements in the ordinary course of our business through bank finances and internal accruals. The details of our Company’s working capital requirement based on Restated Standalone Financials for FY 2022, FY 2023, FY 2024 and FY 2025 (Projected) are as follows:

7. *We may not be able to collect receivables due from our clients, in a timely manner, or at all, which may adversely affect our business, financial condition, results of operations and cash flows.*

As collection from debtors are subject to some risk and as of September 30, 2024, ₹ 3,597.98 lakhs are total trade receivables and ₹ 1,110.84 lakhs out of total trade receivables had been outstanding for a period exceeding six months. We have also created a provision for doubtful debts for ₹ 62.64 lakhs out of these debtors. We hereby included the above risk factor as precautionary measure because we cannot guarantee collection of our receivables in time or at all which may have an adverse effect on our cash flows, business, results of operations and financial condition.

8. *Our inability to collect receivables and default in payment from our customers could result in the reduction of our profits and affect our cash flows.*

Our operations involve extending credit for extended periods of time to our customers and distributors in respect of our services, and consequently, we face the risk of non-receipt of these outstanding amounts in a timely manner or at all, particularly in the absence of long-term arrangements with customers and distributors. Our credit terms vary from 45 days to 90 days for our customers and distributors. While our customers typically provide us with their commitments, we cannot guarantee that our customers and distributors will not default on their payments. Our inability to collect receivables from our customers and distributors in a timely manner or at all in future, could adversely affect our working capital cycle and cash flows

Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our customers and agents, and as a result could cause customers and distributors to delay payments to us, request modifications to their payment arrangements, that could increase our receivables or affect our working capital requirements, or default on their payment obligations to us. An increase in bad debts or in defaults by our customers and distributors may compel us to utilize greater amounts of our operating working capital and result in increased interest costs, thereby adversely affecting our results of operations and cash flows.

9. *In the past Company had delayed in the EPF and GST returns. This may adversely affect the financial performance and regulatory compliance of the company.*

The Company's past delays in GST returns indicate a failure to meet regulatory compliance obligations. Such non- Compliance can have serious consequences, including penalties, fines, legal actions, and reputational damage. The delays in GST can result in

interest liabilities, penal charges, and strained relationships with client.

Potential legal disputes. Additionally, late filing of GST returns may attract penalties and disrupt the Company's cash flow, hindering its ability to meet financial obligations and impacting liquidity. The impact of past delays extends beyond financial implications. Regulatory authorities may increase scrutiny on the Company's operations due to non-compliance with EPF and GST requirements, leading to audits, investigations, and potential legal actions. This can divert management's attention from core business activities and cause operational disruptions.

Moreover, the Company's reputation among stakeholders, including employees, investors, suppliers, and customers, may be compromised due to persistent delays in EPF payments and GST returns. Negative publicity and loss of trust can have long-term consequences, affecting business relationships and the Company's growth prospects.

It is important for prospective investors to consider the potential risks and consequences associated with the delay in EPF payments and GST returns while evaluating the investment opportunity. The company shall implement robust systems.

10. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

Any shortfall in raising / meeting the same could adversely affect our growth plans, operations, and financial performance. As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Issue. We meet our capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. However, the Company will alternatively arrange fund from Banks or financial institutions through loans, and increased credit terms from Creditors will support the Business.

11. Our Directors and Promoters are not involved and may in the future, be involved in certain legal proceedings, which, if determined adversely, may adversely affect our business and financial condition.

Our Directors and Promoters may in the future be, implicated in lawsuits in the ordinary course of our business, including lawsuits and arbitrations involving compensation for loss due to various reasons including tax matters, civil disputes, labour and service matters, statutory notices, regulatory petitions, consumer cases and other matters. Any Litigation or arbitration could result in substantial costs and a diversion of effort by us and/or subject us to significant liabilities to third parties. In addition, our Directors and Promoters are subject to risks of litigation including public interest litigation, contract, employment related, personal injury and property damage. Our Company cannot provide any assurance that these legal proceedings will be decided in their favour. Any adverse decision may have a significant effect on our business including the financial condition of our Company, delay in implementation of our current or future project and results of operations. There can be no assurance that the results of such legal proceedings will not materially harm our business, reputation or standing in the marketplace or that our Company will be able to recover any losses incurred from third parties, regardless of whether our Company is at fault or not. There can be no assurance that losses relating to litigation or arbitration will be covered by insurance, that any such losses would not have a material adverse effect on the results of our operations or financial condition, or that provisions made for litigation and arbitration related losses would be sufficient to cover our ultimate loss or expenditure. Details of outstanding proceedings that have been initiated against our Company, our Promoters, our Group Companies and our Directors are set forth in the Chapter titled "Outstanding Litigation and Material Developments" starting from page 198 of this Red Herring Prospectus.

12. Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

We have in the course of our business entered into, and will continue to enter into, several transactions with our related parties. For further information, see "Financial Statements – Note -31 "Related Party Disclosures" on page 182 of this Red Herring Prospectus. We cannot assure you that we will receive similar terms in our related party transactions in the future. While we confirm that all such related party transactions that we have entered into in last three fiscals years are legitimate business transactions conducted on an arms' length basis, in compliance with the requirements stipulated in Companies Act, 2013, and relevant Accounting Standards and other statutory compliances, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Any further transactions with our related parties could involve conflicts of interest.

While we have not had any conflict of interest in relation to our equity shareholders in the past, we cannot assure you that such conflicts will not arise in the future. Further, we cannot assure you that such transactions, individually or in the aggregate, will not have any adverse effect on our business and financial results, including because of potential conflicts of interest or otherwise. For details, please refer "**Financial Statements – Note 31 - Related Party Disclosures**" on page 182 of the Red Herring Prospectus.

13. We face intense competition in our businesses, which may limit our growth and prospects. Our Company faces significant competition from other companies.

We compete on the basis of a number of factors, including execution, depth of service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than our business;
- Greater brand recognition among consumers;
- More diversified operations which allow profits from certain operations to support others with lower profitability. These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

14. Our high levels of trade receivables from extending credit to customers, particularly within the past six months, could negatively impact our liquidity and profitability if customers delay or default on payments, despite our credit management efforts.

Our company's high levels of trade receivables, particularly within the past six months, arise from industry-specific supply chain delays, extended payment cycles for key accounts, and seasonal sales patterns. In the fashion retail industry, supply chain challenges such as supplier lead times, sales returns, and reconciliations create a gap of 30 to 45 days between invoice generation and receipt of goods by customers. Additionally, a significant portion of our revenue is generated in the last quarter of the financial year, which coincides with the launch of the summer season and ongoing reconciliations for winter inventory. While these factors contribute to a temporary increase in trade receivables, they also reflect our strategic decision to attract and retain key clients by offering extended payment terms of 45 to 90 days.

Despite our credit management efforts, we face the risk of delayed or defaulted payments from customers and distributors, particularly in the absence of long-term arrangements. Our inability to collect receivables in a timely manner, or at all, could reduce our profitability and adversely impact our working capital and cash flows. Macroeconomic conditions or financial difficulties among our customers, including insolvency or bankruptcy, may further exacerbate these risks, leading to requests for modified payment terms, increased receivables, or defaults. If such risks materialize, we may be required to increase provisions for bad debts, resulting in higher working capital requirements, increased interest costs, and adverse effects on our financial performance and liquidity.

There can be no assurance that we will be able to fully mitigate these risks, and any deterioration in the timely collection of receivables could materially affect our financial health and ability to execute our business strategy.

15. We are dependent upon the experience and skill of our management team (including promoters) and a number of KMPs and senior management personnel. If we are unable to attract or retain such qualified personnel, this could adversely affect our business, results of operations and financial condition.

We are dependent on a highly qualified, experienced and capable management team (including promoters) for design and execution of our projects. Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled professionals. The loss of the services of our key personnel or our inability to recruit or train sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects. Further, if we are unable to hire additional qualified personnel or retain them, our ability to expand our business may be impacted. As we intend to continue to expand our operations and develop new projects, we will be required to continue to attract and retain experienced personnel. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting suitable employees. There can be no assurance that our competitors will not offer better compensation incentives and other perquisites to such skilled personnel.

Further, as on the date of this Red Herring Prospectus, we do not have keyman insurance policies. In the event that we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, results of operations and financial condition may be adversely affected.

For further information, please see “*Our Management*” on page 156 of this Red Herring Prospectus.

16. *We operate in an extremely competitive industry and failure to successfully compete could result in loss of one or more of our significant customers and may adversely affect our business.*

The cloth trading sector is competitive and highly fragmented. We compete against various fashion, trading and branded companies. Thus, we operate in a very competitive environment. Our competition varies depending on the size, nature and design of the clothes and on the geographical region in which the population need to cater. For further information concerning our competitors in specific industry and project segments, please see “*Industry Overview*” on page 94 of this Red Herring Prospectus.

We may be unable to compete with larger branded companies, as many of them may have greater financial resources, economies of scale and operating efficiencies. If we are unable to capture bigger market share or compete with larger competitors, we may be unable to sustain or increase, our volume of order intake and our results of operations may be materially adversely affected.

17. *Our insurance coverage may not be adequate to protect us against certain losses and this may have a material adverse effect on our business.*

Our Company has obtained insurance coverage in respect of certain risks i.e vehicle, machineries, equipment and warehouse insurance. For further details in relation to our Insurance, please refer to the section titled – Insurance in the chapter titled “*Our Business*” beginning on page 123 of this Red Herring Prospectus. This insurance policy are renewed periodically to ensure that the coverage is adequate, however, such insurance policies do not cover all risks. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject- matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. For further details, please refer chapter titled “*Our Business*” beginning on page 123 of this Red Herring Prospectus.

18. *If we are unable to effectively manage or expand our retail network and operations or pursue our growth strategy, our new stores as well as our existing stores may not achieve our expected level of profitability which may adversely affect our business prospects, financial condition and results of operations.*

Our ability to achieve desired profitability and sustain business growth is significantly dependent on the effective management of our existing retail operations and the successful execution of our expansion strategy. If we fail to efficiently oversee our current stores or expand our retail network as planned, new and existing stores may not meet expected profitability targets. This could adversely impact our financial performance, business prospects, and overall results of operations. Challenges such as operational inefficiencies, misjudged market entries, high capital expenditures, inconsistent customer experiences, and intensified competition could further exacerbate these risks. Consequently, our financial health and growth trajectory may be adversely affected.

19. *We cannot assure you that we will be able to successfully execute our growth strategies, which could affect our business prospects, results of operations and financial condition.*

As part of our growth strategy, we propose to expand our existing business as well as diversify into sectors, other than kids clothing that we are primarily engaged in currently. Our growth strategies could place significant demand on our management and our administrative, technological, operational and financial infrastructure. As a result, we may be unable to maintain the quality of our products as our business grows. Our growth strategies are dependent on various circumstances, including business developments, new business(es), investment opportunities or unforeseen contingencies. We could also encounter difficulties and delays in executing our growth strategies due to a number of factors, including, without limitation, delays in project execution resulting in significant time and cost overruns, delays or failure in receiving government and regulatory approvals, unavailability of human and capital resources, delayed payments or non-payments by clients, failure to correctly identify market trends, increase in cost of raw material, fuel, labour etc. or any other risks that we may or may not have foreseen. There can be no assurance that we will be able to execute our growth strategy on time and within the estimated costs, or that we will meet the expectations of our clients.

In the instances where we have ventured in sectors other than kids clothing, we cannot assure you that we will be successful or continue to obtain new projects in such sectors. In order to manage growth effectively, we must implement and improve operational systems, procedures and controls on a timely basis, which, as we grow and diversify, we may not be able to implement, manage or execute efficiently and in a timely manner or at all, which could result in delays, increased costs and diminished quality and may adversely affect our results of operations and our reputation. In addition, if we raise additional funds for our growth through incurrence of debt, our interest and debt repayment obligations will increase, and we may be subject to additional covenants, which could limit our ability to access cash flow from operations and/or other means of financing. Further, our management may also

change its view on the desirability of current strategies, and any resultant change in our strategies could put significant strain on our resources.

Due to our limited experience in undertaking certain types of projects or offering certain services, our entry into new business segments or new geographical areas may not be successful, which could hamper our growth and damage our reputation. We may be unable to compete effectively for projects in these segments or areas or execute the awarded projects efficiently. Further, our new business or projects may turn out to be mutually disruptive and may cause an interruption to our business as a result.

20. *We require various statutory and regulatory permits and approvals in the ordinary course of our business, and our failure to obtain, renew or maintain them in a timely manner may adversely affect our operations.*

We require certain statutory and regulatory approvals, licenses, registrations and permissions for our business and operations. For details of the key laws and regulations applicable to us, see “*Key Industry Regulations and Policies*” on page 138 of this Red Herring Prospectus. We may need to apply for further approvals in the future including renewal of approvals that may expire from time to time. There can be no assurance that the relevant authorities will issue such permits or approvals in the time frame anticipated by us or at all.

Failure by us to renew, maintain or obtain the required permits or approvals at the requisite time may result in the interruption of our operations and may have an adverse effect on our business, financial condition and results of operations. Further, we cannot assure that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, may impede our operations. For further details, see “*Government and Other Key Approvals*” on page 201 of this Red Herring Prospectus.

21. *We are subject to risks arising from interest rate fluctuations, which could reduce the profitability of our projects and adversely affect our business, financial condition and results of operations.*

Interest rates for borrowings have been volatile in India in recent periods. Our operations are funded to a significant extent by debt and increases in interest rate and a consequent increase in the cost of servicing such debt may have an adverse effect on our results of operations and financial condition. Changes in prevailing interest rates affect our interest expense in respect of our borrowings and our interest income in respect of our interest on short term deposits with banks. Our current debt facilities carry interest at variable rates as well as fixed rates. Although we may in the future engage in interest rate hedging transactions or exercise any right available to us under our financing arrangements to terminate the existing debt financing arrangement on the respective reset dates and enter into new financing arrangements, there can be no assurance that we will be able to do so on commercially reasonable terms or that these agreements, if entered into, will protect us adequately against interest rate risks. Further, if such arrangements do not protect us adequately against interest rate risks, they would result in higher costs.

22. *Any failure to maintain quality control systems for our services could have a material adverse effect on our business, reputation, results of operations and financial condition.*

The quality and timely delivery of the products we provided is critical to our success. Maintaining consistent service quality and timely delivery depends significantly on the effectiveness of the quality control systems, policies and guidelines that our suppliers have in place, which in turn depends on a number of factors, including the design of the quality control systems and employee implementation and compliance with those quality control systems. There can be no assurance that the quality control systems that our suppliers have in place will prove to be effective. Any significant failure or deterioration of these quality control systems could have a material adverse effect on our business, reputation, results of operations and financial condition and can cause negative publicity that can affect our brand. If such cases are determined against us, there could be an adverse effect on our reputation, business, results of operations and financial condition.

23. *We do not own registered office, corporate office, warehouse and retail outlets which are currently in use by our Company.*

Our registered office, corporate office, warehouse and retail outlets is rented, vide different lease deeds. In the event, the permission to use and/or lease agreement under which we occupy the premises mentioned in this RHP or certain terms and conditions that are unfavourable to us are imposed on us in relation to the said premises, or if we are otherwise unable to occupy such premises, we may suffer a disruption in our operations, which could have an adverse effect on our business and financial results.

For more details of registered office, corporate office, warehouse and retail outlets, refer properties in “*Our Business*” page 123.

24. *There are certain outstanding legal proceedings pending against our Company and Directors. Any adverse outcome in any of*

these proceedings may adversely affect our profitability and reputation and may have an adverse effect on our results of operations and financial condition.

Our Company and Directors are currently involved in certain tax proceedings in India which are pending at different levels of adjudication before the concerned authority/ forum. We cannot assure you that these tax proceedings will be decided in favour of our Company and Directors, as the case may be. Any adverse decision in such proceedings may render us liable to penalties and may have a material adverse effect on our reputation, business, financial condition and results of operations. Additionally, during the course of our business we are subject to risk of litigation in relation to contractual obligations, employment and labour law related, personal injury and property damage, etc.

A classification of these outstanding litigations is given in the following table:

25. *Our Promoters have provided guarantees for loans availed by us, and in the event the same is enforced against our Promoters, it could adversely affect our Promoters’ ability to manage the affairs of our Company.*

Our Promoters have given guarantees in relation to certain borrowings availed by our Company. In the event of default on such borrowings, these guarantees may be invoked by our lenders thereby adversely affecting our Promoters’ ability to manage the affairs of our Company and this, in turn, could adversely affect our business, prospects, financial condition and results of operations. Further, if any of these guarantees are revoked by our Promoters, our lenders may require alternate securities or guarantees and may seek early repayment or terminate such facilities. Any such event could adversely affect our financial condition and results of operations. For further details in relation to the personal guarantees provided by our corporate Promoter, see “*History and Certain Corporate Matters – Guarantees given by our Promoter*” on page 148 of this Red Herring Prospectus.

26. *Our Company has not declared any dividends in the three financial years preceding the date of this Red Herring Prospectus. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

Our Company has not paid any dividend on its Equity Shares during the last three Fiscals. The amount of future dividend payments, if any, will depend upon a number of factors, including our future earnings, financial condition, cash flows, working capital requirements, contractual obligations, applicable Indian legal restrictions and capital expenditures.

Our business model involves substantial upfront (or periodic) payments to statutory authorities towards bids awarded to us and some capital expenditure and the recovery of the same (specially for long term contracts) is spread over a number of years. There is no assurance that we would have sufficient profitability and cash flow to pay dividends to the Shareholders.

In addition, our ability to pay dividends may be impacted by a number of factors, including restrictive covenants under the loan or financing agreements our Company may enter into to finance our fund requirements for our business activities. There can be no assurance that our Board will decide to declare dividends in the foreseeable future or if we will be able to pay dividends in the future. For additional details relating to our dividend policy, see “Dividend Policy” on page 181 of this Red Herring Prospectus.

27. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Our business is highly dependent on economic and market conditions in India. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short term and long term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our services may decline.

28. *The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or lead manager or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.*

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 72 of this Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or lead manager or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business strategies, development and other plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and result of operations. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control.

29. *Major fraud, lapses of internal control or system failures could adversely impact the Company’s business.*

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company’s operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

There can be no assurance that such report is complete, and any reliance on such information for making an investment decision in the Offer is subject to inherent risks.*

Pursuant to being engaged by us, D&B prepared a report titled “Industry report on Readymade Garments with focus on Kidwear in India” dated August, 2024. 31. *Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.*

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organization.

In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our services;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems. You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

32. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

33. *We are subject to restrictive covenants under our financing agreements that could limit the flexibility we have to manage our business.*

There are restrictive covenants in the financing agreements that we have entered into, including, but not limited to, requirements that we obtain the prior approval of, or provide notice to, our lenders in connection with certain activities.

Our financing arrangements are secured by our current assets. Many of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities and entering into certain transactions.

Any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of one or more of our credit facilities, acceleration of amounts due under such facilities and cross-defaults under certain of our other financing agreements, any of which may adversely affect our ability to conduct our business and have an adverse effect on our financial condition and results of operations.

34. *Our inability to identify and understand evolving industry trends and consumer preferences, and to provide new services to meet our customers’ demands may adversely affect our business.*

Changes in consumer preferences and industry requirements may render certain of our services less attractive. Our ability to anticipate to successfully develop and introduce new and enhanced services to create new or address yet unidentified needs among our current and potential customers in a timely manner, is a significant factor in our ability to remain competitive. However, there can be no assurance that we will be able to secure the necessary knowledge, through our own research and development or through technical assistance, that will allow us to continue to develop our product portfolio or that we will be able to respond to industry trends by developing and offering products. We may also be required to make investments in research and development, which may strain our resources and may not provide results that can be monetized. If we are unable to obtain such knowledge in a timely manner, or at all, we may be unable to effectively implement our strategies, and our business and results of operations may be adversely affected.

To compete successfully, we may need to increase the diversity and sophistication of our product portfolio, which may require substantial capital expenditure. In developing such services, we may need to make investments in our research and analysis team. If we exceed our budgeted capital expenditure and cannot meet the additional capital requirements through operating cash flows and planned financing, we may have to delay our projects which could make us less competitive and lead to customer loss.

If we do not continue to distinguish our products through distinctive design, and to continue to build and strengthen our brand recognition, we could lose market share and our revenues and earnings could decline.

35. *After the completion of the Issue, our Promoters will continue to collectively hold substantial shareholding in our Company.*

As on the date of this Red Herring Prospectus, our Promoters held 87.54 % of the share capital of our Company, for details of their shareholding pre and post Issue, see the chapter titled “*Capital Structure*” beginning on page 60 of this Red Herring Prospectus. After the completion of the Issue, our Promoters will continue to collectively hold substantial shareholding in our Company. Upon listing of the Equity Shares on recognized stock exchanges, our Promoters shall continue to exercise significant influence over our business policies and affairs and all matters requiring Shareholders’ approval, including the composition of our Board, the adoption of amendments to our certificate of incorporation, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these stockholders. The interests of the Promoters as our controlling shareholder could conflict with our interests or the interests of its other shareholders. We cannot assure that the Promoters will act to resolve any conflicts of interest in our favour and any such conflict may adversely affect our ability to execute our business strategy or to operate our business. For further details in relation to the interests of our Promoters in the Company, please see the section titled “*Our Promoters and Promoter Group*”, “*Our Management*” and “*Financial Information*” beginning on pages 172, 156 and 182 respectively of this Red Herring Prospectus.

36. *Certain Promoters and Directors are interested in our Company’s performance in addition to their remuneration and reimbursement of expenses.*

Certain of our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses and such interests are to the extent of their shareholding in our Company, their rights to nominate directors on our Board pursuant to such shareholding and interest received against a loan extended to us, amongst others. We cannot assure that our Promoters and Directors will exercise their rights to the benefit and best interest of our Company. As shareholders of our Company, our Promoters or Directors may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For further information on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see the chapter titled “*Our Management*”, “*Our Promoters and Promoter Group*” and “*Financial Information*” beginning on pages 156, 172 and 182 respectively of this Red Herring Prospectus.

37. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements.

The risks we face in connection with acquisitions may include integration of product and service offerings, and marketing functions and the diversion of management’s time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments

could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

B Issue Related

38. There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

39. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager have appointed Prabhat Financial Services Limited as Designated Market maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance Industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

40. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares is ₹ [●]. This price is being based on numerous factors. For further information, please refer to the section titled "Basis of the Issue Price" beginning on page 82 of this Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following;

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

41. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the objects of the Issue as has been stated in the section "Objects of the Issue" beginning on page 72 of this Red Herring Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

EXTERNAL RISK FACTORS

42. Changing laws, rules and regulations in India could lead to new compliance requirements that are uncertain.

The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new and additional compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose

onerous requirements. For instance, the GoI has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, we are yet to determine the impact of all or some such laws on our business and operations, which may restrict our ability to grow our business in the future and increase our expenses.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations, financial condition and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our businesses in the future.

43. *The occurrence of natural or man-made disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect the financial markets and our business.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19 and man-made disasters, including acts of war such as Russia's invasion of Ukraine, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

44. *A downgrade in ratings of India and other jurisdictions in which we operate may affect the trading price of the Equity Shares.*

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. Any further adverse revisions to credit ratings for India and other jurisdictions we operate in, by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available. Further, a downgrading of India's credit ratings may occur, for example, upon change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favorable terms and consequently adversely affect our business and financial performance and the price of the Equity Shares.

45. *We may be affected by competition laws in India, the adverse application or interpretation of which could adversely affect our business.*

The Competition Act, 2002 ("Competition Act") seeks to prevent business practices that have an appreciable adverse effect on competition in the relevant market in India. Under the Competition Act, any arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition in India is void and attracts substantial monetary penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment or provision of services, shares the market or source of production or provision of services in any manner by way of allocation of geographical area, type of goods or services or number of consumers in the relevant market or in any other similar

way or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an appreciable adverse effect on competition.

The Competition Act also prohibits abuse of a dominant position by any enterprise. If it is proved that the contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be also guilty of the contravention and may be punished. On March 4, 2011, the GoI notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by, the Competition Commission of India, or CCI. Additionally, on May 11, 2011, the CCI issued the Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition Act aims to, among other things, prohibit all agreements and transactions, including agreements between vertical trading partners i.e. entities at different stages or levels of the production chain in different markets, which may have an appreciable adverse effect on competition in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. We may also be subject to queries from the CCI pursuant to complaints by consumers or any third persons, which could be made without any or adequate basis given our market presence. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside of India if such agreement, conduct or combination has an appreciable adverse effect on competition in India. However, the effect of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage.

46. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

47. Malpractices by some players in the industry affect overall performance of emerging Companies.

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

48. Significant portion of our revenue is derived from business in India and a decrease in economic growth in India could cause our business to suffer.

We derive significant portion of our revenue from operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

49. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows

50. You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

51. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the EMERGE Platform of NSE in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the EMERGE Platform of NSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

52. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

53. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months may be subject to long term capital gains tax in India at the specified rates depending on certain factors, such as STT is paid, the quantum of gains and any available treaty exemptions. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the sellers resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

The Government of India has recently announced the union budget for Fiscal 2023, pursuant to which the Finance Act may undergo various amendments. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have an adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

For instance, the Supreme Court of India has in a decision clarified the components of basic wages which need to be considered by companies while making provident fund payments, which resulted in an increase in the provident fund payments to be made by companies. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

Our Company cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our Company's business, financial condition, results of operations and cash flows.

54. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

55. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting the Application.*

Pursuant to the SEBI (ICDR) Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting the Application. Retail Individual Investors can revise their Applications during the Issue Period and withdraw their Application until Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within six Working Days from the Issue Closing Date, events affecting the Applicant's decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, cash flows, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Applicants' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

56. *Foreign investors are subject to foreign investment restrictions under Indian laws that may limit our ability to attract foreign investors, which may have a material adverse impact on the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. For further details, please refer to the section titled '*Restrictions on Foreign Ownership of Indian Securities*' beginning on page 247 of this Red Herring Prospectus. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

The working capital details for the period ended September 30, 2024 and source of funding has been certified by our statutory auditor, M/s NKGMS & Associates, Chartered Accountants pursuant to their certificate dated November 23, 2024.

These projections have been estimated considering the Company's plan to open 20 new EBOs in Fiscal 2025 (11 of which are already operational as on date of filing the offer document) and enhanced business in online and other segments envisaged due to availability of the funds from the proposed IPO. The revenue for the year ended March 31, 2024 is ₹ 4,277.44 Lakhs and half year ended September 30, 2024 is ₹ 3,050.10 Lakhs. Historically, the Company has grown at a revenue CAGR of 37.32% in the past 3 financial years. The Company plans on expanding their presence in the Business/Direct to customer (B2C/D2C) segment through these EBOs.

BASIS OF ESTIMATION

The incremental working capital requirements are based on the business plan approved by the board of directors in the board meeting held on July 29, 2024. Assumption for future working capital requirements:

Particulars	(Holding period No. of Days)				
	Fiscal 2022 (Restated)	Fiscal 2023 (Restated)	Fiscal 2024 (Restated)	Sept 30, 2024* (Restated)	Fiscal 2025 (Projected)
Inventories	242	180	138	151	140
Trade Receivables	240	209	198	191	148
Trade Payables	167	227	113	36	70

*Annualized

Rationale for existing working capital requirement for past three years

The revenue majorly comprised of offline sales through distributors, key accounts etc. and online selling through various marketplaces in the FY 2022 and FY 2023, where the cash conversion cycle (i.e., the time between the acquisition of resources for processing and their realization) was comparatively higher than the life cycle of B2C/D2C segment which the Company is executing in FY 2024 and onwards.

The Company was in a scaling phase and had opened 2, 4, and 3 new Exclusive Brand Outlets (EBOs) in FY 2022, FY 2023, and FY 2024, respectively, bringing the total to 14 EBOs as of March 31, 2024. Till September 30, 2024, the Company opened an additional 5 EBOs, continuing its rapid expansion.

The Company started shifting its focus from the B2B segment which involved selling its products through distributors, key accounts and other channels such as private labeling for other B2C/D2C fashion brands. This is because the B2B segment required higher inventory levels and resulted in a lower debtor turnover ratio ⁽¹⁾. During this period, payables were managed based on company's liquidity.

With the increased emphasis on the B2C/D2C segment, including direct sales at EBOs and through the Company's website, benefits such as lower inventory levels and a higher debtor turnover ratio ⁽¹⁾ were realized, driven by a higher proportion of cash customers. As a result, the Company's liquidity improved, and the payables holding period decreased significantly, from 227 days in Fiscal 2023 to 113 days in Fiscal 2024.

⁽¹⁾ Debtor turnover ratio is a measure of how quickly a company collects its receivables from its customers.

Particulars	(Amount in ₹ Lakhs)			
	FY2022	FY2023	FY2024	Sep 30, 2024
Current Assets	2,090.55	2,703.66	4,266.74	6,322.82
Current Liabilities	531.62	942.93	478.52	1,134.38
Total Working Capital Requirement (A-B)	1,558.95	1,760.73	3,788.22	5,188.44
Incremental Working Capital requirement	172.45	201.80	2,027.49	1,400.22
Revenue from operations	1,651.89	2,569.45	4,277.44	6,100.20*

*Annualized

Based on the data provided, the Company's revenue from operations increased from ₹ 1,651.89 lakhs in FY 2022 to ₹ 4,277.44 lakhs in FY 2024, representing a compound annual growth rate (CAGR) of 37.32%. Correspondingly, the total working capital requirement also rose, growing from ₹ 1,558.95 lakhs in FY 2022 to ₹ 3,788.22 lakhs in FY 2024, with a CAGR of 34.44%.

The increase in working capital was largely aligned with the growth in revenue. The incremental working capital requirement was ₹ 172.45 lakhs in FY 2022, ₹ 201.80 lakhs in FY 2023, and significantly higher at ₹ 2,027.49 lakhs in FY 2024. This growth reflects the Company's need to support increased business operations and maintain adequate liquidity amidst expanding operations.

Justification for incremental working capital requirement in FY 2025

This anticipated growth is driven by the Company's aggressive expansion plans and strategic marketing initiatives. To support this growth and achieve the projected revenue levels, the Company estimates a need for a total working capital of ₹ 6,058.83 lakhs, which includes an incremental working capital requirement of ₹ 2,270.61 lakhs.

Despite the increased business activity, the Company's total operating cycle is expected to remain stable. This stability is due to a decrease in the receivables holding period, from 198 days in FY 2024 to an estimated 148 days in FY 2025, which is offset by a decrease in the payables holding period, from 113 days in FY 2024 to an estimated 70 days in FY 2025. The inventory holding period is projected to remain approximately the same as in FY 2024, indicating effective inventory management in line with the expected business expansion.

Additionally, the Company plans to increase advances to suppliers as a strategic move to secure favorable terms and ensure a steady supply of raw materials. This increase is justified by the need to support the Company's rapid growth and maintain consistent production levels. By providing suppliers with advance payments, the Company aims to lock in critical inputs at favorable prices, mitigate risks associated with supply chain disruptions, and enhance relationships with key suppliers.

We propose to establish such stores in key areas of the Tier-1 cities including malls and shopping complex located in high-density regions.

The table below sets forth the total estimated costs per store for such location:

(Amount in ₹ Lakhs)

Set out below is a brief description of the total estimated cost to be incurred for establishing a New Store:

Costs	Particulars

Depending on the format of the New Store some or all the above may be applicable.
Security deposit costs	We propose to establish the New Stores on leased premises, for which we will be required to pay a security deposit to the landlord, as part of the rental and lease arrangement for each store premises

Methodology for computation

The size of our stores varies across regions and is dependent on various factors such as availability of suitable locations, addressable market, lease rentals and competition within a given region or across regions.

While we have identified the broad regions where the New Stores will be opened, we have not identified the exact locations for opening the New Stores, as the same depends on various factors, including inter alia, residential development in a specific locality, rental prices for the proposed New Stores in a specific locality, target audience. However, we have narrowed down a few locations based on which fit-out costs and security deposits have been estimated. Our estimated costs for opening of the New Stores are therefore based on (i) valid and existing quotations dated July, 2024 received from the below mentioned vendors on a per square feet basis, for the purposes of fit-out costs, (ii) average of the costs incurred by us historically towards store inventory at the time of setting up new stores under each of the Formats in Fiscal 2022, Fiscal 2023 and Fiscal 2024 (including taxes), for the purposes of inventory costs; and (iii) average security deposit costs for the locations based on historical data and current market trends.

A detailed breakdown of these estimated costs, and the methodology for computation, is as follows:

Fit-out costs

A detailed break-down of the estimated capital expenditure for the components involved in the fit-out costs is as follows:

Notes:

(1) Excluding applicable GST

(2) Pursuant to their quotations dated July 16, 2024

(3) We have assumed an area of 1,200 sq. ft. for each of the 9 stores, i.e., total area of 10,800 sq. ft. for calculating cost per sq. ft.

Notes:

- We have considered the above quotations for the budgetary estimate purpose and have not placed orders for them.
- The actual cost of procurement and actual supplier/dealer may vary.
- We are not acquiring any second-hand equipment.
- All quotations received from the vendors mentioned above are valid till 6 months from the date of quotation. However, we have not entered into any definitive agreements with any of these vendors and there can be no assurance that the same vendors would be engaged to eventually supply the equipment's or at the same costs.
- The equipment models and quantity to be purchased are based on the present estimates of our management. The Management shall have the flexibility to revise such estimates (including but not limited to change of vendor or any modification/addition/deletion of equipment's) at the time of actual placement of the order. In such case, the Management can utilize the surplus of proceeds, if any, arising at the time of actual placement of the order, to meet the cost of such other equipment's or utilities as required. Furthermore, if any surplus / deficit of the proceeds for meeting the total cost of equipment shall be used / adjusted in General Corporate Purposes, subject to limit of 25% of the amount raised by our Company through this Issue.
- The quotations relied upon by us in arriving at the above cost are valid for a specific period of time and may lapse after the expiry of the said period. Consequent upon which, there could be a possible escalation in the cost of equipment proposed to be acquired by us at the actual time of purchase, resulting in increase in the estimated cost. Further, cost will be escalated on account of freight expenses, installation charges, packaging & forwarding, etc. Such cost escalation would be met out of our internal accruals.

Security Deposit costs

We typically acquire the premises for our stores on a leasehold basis, pursuant to various lease agreements which are entered into between our Company and the landlords of such premises. Such lease agreements typically require us to furnish, depending on the location of the store, an interest free security deposit to the respective lessors.

We propose to acquire the premises for all proposed New Stores on a leasehold basis. The average security deposit payable ranges from three to six months of the respective monthly lease amount.

The deposits paid for some of our stores in malls are as follows:

Particulars	Opening date	Carpet area (in sq. ft.)	For Lease (₹ in lakhs)	Maintenance (₹ in lakhs)	Total (₹ in lakhs)	Total (per sq. ft.)
Airia Mall, Gurugram	Oct 30, 2022	904	5,96,640	86,784	6,83,424	756
The Great India Palace Mall, Noida	Dec 13, 2022	880	7,39,200	1,84,800	9,24,000	1050
Crown Interiorz Mall, Faridabad	Dec 24, 2022	600	4,42,560	-	4,42,560	738
Gaur City Mall, Ghaziabad	Jun 12, 2023	980	7,05,600	1,76,400	8,82,000	900
Mall of Dehradun	Jul 17, 2024	1,051	14,75,609	2,40,181	17,15,790	1633

Based on the above data and current market trend, we have estimated that security deposit costs vary between ₹ 9 lakhs to ₹ 12 lakhs for a location with approximately 1,200 sq. ft. of area. Therefore, we have considered an average cost of ₹ 94.50 lakhs, i.e., ₹ 10.50 lakhs for each of the 9 stores which translates to 875 per sq. ft.

Inventory costs

Inventory costs include, inter alia, costs for procuring stock and product portfolios for sale in our stores, and applicable taxes. Inventory in each of stores consists of, inter alia, kids apparels, footwear, accessories, hard goods etc. The inventory will be supplied to the branch/store by our Company for display and sale in each of the New Stores, basis a purchase order raised by the respective store prior to the opening of the New Store.

The total average estimated inventory cost per store is based on the average of the cost incurred towards store inventory at the time of setting up new stores under each of the Formats in Fiscal 2022, Fiscal 2023, and Fiscal 2024. We have considered the same under the working capital object.

Government approvals

In relation to this proposed Object, we are required to obtain certain approvals and/or licenses, which are routine in nature, from certain governmental or local authorities, which include registration of our stores under the shops and establishments legislations of the states where they are located, wherever applicable and trade licenses from respective municipal authorities of areas, where our New Stores will operate. We will apply for such approvals, as applicable, in the ordinary course and in accordance with applicable laws. India’s economy showed resilience with GDP growing at estimated 7.6% in FY 2024. The GDP growth in FY 2024 represents a return to pre pandemic era growth path. Even amidst geopolitical uncertainties, particularly those affecting global energy and commodity markets, India continues to remain one of the fastest growing economies in the world.

Countries considered include - Largest Developed Economies and BRICS (Brazil, Russia, India, China, and South)

Countries have been arranged in descending order of GDP growth in 2023).

There are few factors aiding India’s economic recovery – notably its resilience to external shocks and rebound in private consumption. This rebound in private consumption is bringing back the focus on improvements in domestic demand, which together with revival in export demand is a precursor to higher industrial activity. Already the capacity utilization rates in Indian manufacturing sector are recovering as industries have stepped up their production volumes. As this momentum sustains, the country may enter a new capex cycle. The universal vaccination program by the Government has played a big part in reinstating confidence among the population, in turn helped to revive private consumption.

Realizing the need to impart external stimuli, the Government stepped up its spending on infrastructure projects which in turn had a positive impact on economic growth. The capital expenditure of central government increased by 37.4% increase in capital expenditure (budget estimates), to the tune of Rs 10 trillion in the Union Budget 2023-2024. The announcement also included 30% increase in financial assistance to states at Rs 1.3 trillion for capex. The improvement was accentuated further as the Interim Budget

¹ European Commission

2024-2025 announced an 11.1% increase in the capital expenditure outlay at Rs 11.11trillion, constituting 3.4% of the GDP. This has provided the much-needed confidence to private sector, and in turn attracted private investment.

On the lending side, the financial health of major banks has witnessed an improvement which has helped in improving the credit supply. With capacity utilization improving, there would be demand for credit from corporate sector to fund the next round of expansion plans. Banking industry is well poised to address that demand. Underlining the improving credit scenario is the credit growth to micro, small and medium enterprise (MSME) sector as the credit outstanding to the MSME sector by scheduled commercial banks in the financial year FY 2023 grew by 12.3% to Rs 22.6 trillion compared to FY 2022. The extended Emergency Credit Linked Guarantee Scheme (ECLGS) by the Union Government has played a major role in improving this credit supply.

As per the second advance estimates 2023-24, India’s GDP in FY 2024 grew by 7.6% compared to 7.0% in the previous fiscal on the back of solid performances in manufacturing, mining, and construction sectors. The year-on-year increase in growth rate is also partly due to by a strong growth in investment demand led by public capital expenditure.

Sectoral Contribution to GVA and annual growth trend

Source: Ministry of Statistics & Programme Implementation (MOSPI)

Sectoral analysis of GVA reveals industrial sector recovered sharply registering 9% y-o-y increase in FY 2024 against 2.1% in the previous fiscal. In the industrial sector, growth across major economic activity such as mining, manufacturing, construction sector rose significantly and it registered a growth of 8.1%, 8.5% and 10. 7% in FY 2024 against a growth of 1.9%, -2.20%, and 9.44% in FY 2023, respectively. Utilities sector observed a marginal moderation in y-o-y growth to 7.5% against a 10% in the previous years. Talking about the services sectors performance, with major relaxation in covid restriction, progress on covid vaccination and living with virus attitude, business in service sector gradually returned to normalcy in FY 2023. Economic recovery was supported by the service sector as individual mobility returned to pre-pandemic level. The trade, hotel, transport, communication, and broadcasting segment continued to strengthen and grow by 10% in FY 2023 against 9% in the previous year. However, second advance estimates for FY 2024 reveal a decelerated growth in the largest component of the GDP, i.e., the service sector. In FY 2024, the sector registered a growth of 7.5%, as compared to the 10% growth recorded in FY 2023. This slowdown is primarily attributed to a pronounced

deceleration in the Trade, Hotel, Transport, Communication, and Broadcasting services. The growth rate in this subsector nearly halved, decreasing from 12% in FY 2023 to 6.5% in FY 2024. This slowdown is influenced by the normalization of the base effect and potentially some dilution in discretionary demand. Financial services, real estate and professional services sector recorded 8.21% y-o-y growth against 9.05% y-o-y growth in the previous year, while public administration and defence services sector recorded 7.75% yearly increase against 8.92% increase in the previous year.

Index of Industrial Production

Industrial sector performance as measured by IIP index exhibited mild improvement in FY 2024 by growing at 5.8% (against 5.2% in FY 2023). Manufacturing index, with 77.6% weightage in overall index, grew by 5.5% in FY 2024 against 4.7% in FY 2023 while mining sector index too grew exhibited healthy improvement by growing at 7.5% against 5.8% in the previous years. Electricity sector Index witnessed improvement of 7.15% against 8.9% y-o-y growth in FY 2023.

Sources: MOSPI

As per the use-based classification, excluding capital good and primary good, other segment observed healthy y-o-y growth against the previous year. Infrastructure / construction goods followed by intermediate goods were the bright spot while consumer non-durable and consumer durable both observed sharp growth over the previous year. However, the mild growth in IIP indicates towards challenging operating business climate as global headwinds, high inflation, and monetary tightening cumulatively impacted the broader industrial sector performance.

Expansion in Service Sector

Services sector is a major contributor to the country’s overall economic growth. Since 2012, its contribution to India’s GVA has increased from 49% to nearly 55% currently (in FY 2024) as per Second Advance estimates. While excluding 8.2% decline in FY 2021, the services sector GVA has observed average 8.2% growth between growth between FY 2013-24 and it has exhibited robust

8.8% average increase in the post pandemic period (FY 2022-24). The expansion of the service sector has spurred the development of multiple industries, including IT, healthcare, tourism, transport, and finance, among others.

Source: Ministry of Statistics & Programme Implementation (MOSPI)

India's HSBC Services Purchasing Managers' Index, an important indicator to track service sector performance, increased to 61.4 in May 2024 from 60.8 in the previous month. Since August 2021, the services sector has consistently remained above the threshold of 50, which distinguishes growth from contraction.

Investment & Consumption Scenario

Other major indicators such as Gross fixed capital formation (GFCF), a measure of investments, gained strength during FY 2024 as it grew by 10% on y-o-y basis against 7% yearly growth in the previous fiscal, while GFCF to GDP ratio measured all time high settled higher at 34%.

Sources: MOSPI

Private Final Expenditure (PFCE) a realistic proxy to gauge household spending, observed decelerated and registered 3.1% y-o-y growth in FY 2024 which is less than half of the previous year indicating sustained weakness in consumer spending.

Inflation Scenario

The inflation rate based on Wholesale Price Index (WPI) exhibited rose to 1.3% in the month of April 2024 on the back of steady growth in the prices of primary article which grew by 5% in April 2024 on y-o-y bases. Increasing prices of food articles and energy prices contributed to increasing inflation.

Source: CMIE Economic Outlook

Retail inflation rate (as measured by Consumer Price Index) eased to 4.83% in April 2024 as compared to 4.85% in March 2024. The CPI inflation for rural and urban for the month of April 2024 was 5.43% and 4.11% against 5.51% and 4.14% respectively in March 2024. Retail inflation moderated during FY 2024 after the peak of 7.4% in July 2023 and it fluctuated between 4.85%-6.83%.

CPI measured below 6% tolerance limit of the central bank since September 2023. As a part of anti-inflationary measure, the RBI has hiked the repo rate by 250 bps since May 2022 to current 6.5% while it has been holding the rate at 6.5% since 8 Feb 2023.

India’s Economic Growth Outlook

Looking ahead to 2024, India's projected GDP growth of 6.8% in 2024 stands out as the fastest among major emerging markets, significantly outpacing China's 4.6% and Brazil's 2.2%. This robust growth trajectory is expected to sustain at 6.5% annually from 2025 to 2029, reflecting strong economic fundamentals and continued momentum.

This decent growth momentum in near term (2024) is accompanied by a slowdown in inflation, as well as various other factors in the medium to long term that will support the economy. These include enhancements in physical infrastructure, advancements in digital and payment technology, improvements in the ease of doing business and a higher quality of fiscal expenditure to foster sustained growth.

On the demand side, improving employment conditions and moderating inflation are expected to stimulate household consumption. Further, the investment cycle is gaining traction, propelled by sustained government capital expenditure, increased capacity utilisation and rising credit flow. Additionally, there are positive signs of improvement in net external demand, as reflected in the narrowing merchandise trade deficit. Despite the supply disruptions, exports clocked positive y-o-y growth in December 2023 and January 2024.

From uplifting the underprivileged to energizing the nation's infrastructure development, the Government has outlined its vision to propel India's advancement and achieve a 'Viksit Bharat' by 2047 in the interim budget announced on 1st Feb 2024. Noteworthy positives in the budget include achieving a lower-than-targeted fiscal deficit for FY24 and setting a lower-than expected fiscal deficit target for FY25, proposing dedicated commodity corridors and port connectivity corridors, providing long-term financing at low or nil interest rates to the private sector to step up R&D in the sunrise sectors.

Achieving a reduced fiscal deficit of 5.8% in FY24 and projecting a lower than-anticipated fiscal deficit of 5.1% are positive credit outcomes for India. This showcases the country's capability to pursue a high-growth trajectory while adhering to the fiscal glide path. There has been a significant boost to capital expenditure for two consecutive years; capital expenditure – which is budgeted at 3.4% of GDP (INR 11.1 trillion/USD 134 bn) for 2024/25 – is at a 21-year high (3.3% of GDP in 2023/24). The enhancement of port connectivity, coupled with the establishment of dedicated commodity corridors (energy, mineral and cement), is poised to enhance manufacturing competitiveness. This strategic move aims to fulfil India's export targets and reduce logistics costs.

However, headwinds to external demand emanate from recession in key exporting partners - the UK and Germany (which collectively account for over 5% of India's export portfolio) - and the spiralling effect it will have on other European countries. Supply disruptions posed by the conflict in the Red Sea, leading to rerouting of shipments through Africa, are impacting sectors exposed to exports to Europe, running on thin margins, especially small businesses. Although headline inflation moderated to 5.1% in January 2024, a three-month low, volatility in crude prices and uncertainties about food inflation are likely to keep the central bank cautious in the near term.

India's optimistic economic outlook is underpinned by its demographic dividend, which brings a substantial workforce that boosts labor participation and productivity. The burgeoning middle class and urbanization contribute to increased domestic consumption, driven by rising incomes and purchasing power. Extensive investments in infrastructure, encompassing roads, railways, ports, and digital connectivity, are enhancing productivity and efficiency, with government initiatives like the Smart Cities Mission and PM Gati Shakti creating a conducive growth environment. This digital transformation, catalyzed by initiatives such as Digital India, is fostering a tech-driven economy marked by enhanced internet penetration, digital payments, and e-governance, thereby fueling growth in sectors like fintech, e-commerce, and digital services. The push to position India as a global manufacturing hub through Make in India and PLI schemes is further boosting industrial output, exports, and domestic production capabilities. Compared to other major emerging markets facing demographic and economic challenges, India's combination of demographic strengths, policy reforms, and strategic initiatives positions it as a standout performer and a significant driver of global economic growth in the foreseeable future.

Overview of Textile & Apparel Industry

The textile and apparel market in India is one of the oldest industries in the country, with a rich heritage that spans centuries. Overall, the industry contributes around 2% to the country's GDP and accounts for 7% of industrial output in value terms. With a 4% share of the global textile and apparel trade, the sector is vital for India's export economy, making up 10.33% of the country's overall export basket during 2021-22. This sector is broadly divided into several segments including fibre and yarn, processed fabrics, garments, and technical textiles. The garment sector is divided into ready-made garments and customized tailoring. However, the industry is facing a significant downturn, exacerbated by sluggish domestic market conditions. Manufacturers are seeing lower-than-expected sales as consumer spending increasingly favors food items, consumer electronics like mobiles and iPads, and vehicles over garments. This shift in consumer preferences is particularly challenging for overall garment market. The spinning sector is struggling with high under-utilization due to reduced yarn imports from China and sluggish buying from weavers and knitters. The combined effect of reduced exports and lacklustre local consumption has compounded the industry's challenges. In response, initiatives such as the Production Linked Incentive (PLI) and PM Mitra schemes aim to attract investments in man-made fibres and technical textiles, to reduce import dependence over time. Despite these setbacks, segments like the athleisure and sportswear market, have shown robust growth, doubling sales over the past two years. Additionally, the kid's wear segment has benefited from the increasing demand driven by the growing child population. However, the reliance on imported man-made fibres, particularly spandex fabrics from China, Vietnam, and Taiwan, continues to pose challenges.

Textile mills are also experiencing margin pressures, even as cotton prices stabilize around a two-year low. Adding to these difficulties, the industry is grappling with a significant rise in freight costs, up by 40% due to disruptions in the Red Sea region. This unexpected increase in transportation expenses raises concerns about its impact on operational costs and product pricing, particularly for the cost-sensitive ready-made garment market.

The Indian textile and apparel market size was estimated to be approximately USD 165 billion in 2023, with the domestic market accounting for USD 125 billion and exports contributing USD 40 billion. This growth is driven by increasing domestic demand, favourable government policies, and the rising preference for sustainable and ethically produced textiles, positioning India as a key player in the global textile industry.

Readymade Garment Industry in India

The ready-made garment (RMG) industry in India is a vital sector that significantly contributes to the country's economy. India is one of the largest consumers and producers of cotton, with the highest acreage of 12.5 million hectares, accounting for 38% of the global area under cotton cultivation. A substantial portion of its textile production is dedicated to the RMG sector. Key manufacturing states such as Andhra Pradesh, Telangana, Haryana, Jharkhand, and Gujarat play a pivotal role in this sector. Manufacturers focus on innovative designs, high-quality fabrics, and affordability to cater to evolving consumer preferences, including the rapidly growing kid's wear market.

India is a major player in the global textile and apparel market, being the second-largest producer of man-made fibre (MMF) after China and the third-largest exporter of textiles and apparel. In 2021-22, textiles and apparel, including handicrafts, accounted for 10.5% of India's total merchandise exports, with key markets in the USA, EU-27, and the UK. The RMG industry is a significant contributor to this success, and within this industry, the kid's wear segment is driven by rising disposable incomes, a growing child population, and increasing urbanization. Despite some fluctuations due to broader market factors, the kid's wear market continues to expand and evolve, reflecting the dynamic nature of India's textile and apparel industry.

Increasing fashion awareness and the desire to keep up with trends have fuelled demand. Additionally, the expansion of online retail platforms has facilitated easier access to a wide range of apparel options, further boosting market growth. This consistent upward trend highlights the robust potential and expanding nature of the apparel industry.

India's readymade garment sector continues to exhibit robust growth within the country's textile industry. The sector remains a significant contributor, driven majorly by domestic demand including kid’s wear. However, the sector faces challenges, including stiff competition from countries such as Bangladesh and Vietnam, as well as susceptibility to global economic fluctuations. To support growth, the Indian government has implemented initiatives aimed at promoting exports, upgrading technological capabilities, and fostering sustainable manufacturing practices. There is also a growing focus on integrating digital technologies to adapt to changing retail dynamics, particularly with the rise of e-commerce platforms in the market. the RMG industry, with a significant focus on the kid's wear segment, continues to be a vital and growing component of India's textile industry, driven by strong domestic demand and strategic government support.

Export Demand Scenario

In 2022-23, textiles and apparel accounted for 8.0% of India's total exports, with the country holding a 5% share of the global trade in these products. Despite significant logistics challenges, India achieved record-high exports of textiles and apparel, including handicrafts, totaling USD 35.58 billion in FY23.

This policy continues to attract leading international retailers to source their garment and home textiles from India, enhancing interest from new export markets.

Growth Forecast

In 2023, the Indian textile industry faced significant challenges, including fluctuating cotton prices, declining demand, under-utilized capacity, and stiff competition from imported fabrics and garments from China and Bangladesh. Gurudas Aras, an independent director and strategic advisor, highlighted these issues and suggested measures for recovery in 2024. Major global markets, such as the US and EU, saw sharp declines in apparel imports, impacting Indian exporters. For instance, US apparel imports dropped by 21% to USD 6.5 billion in October 2023, and EU imports fell by 20% to USD 7.2 billion.

The global garment industry is contracting, with predictions of a continued decline in US garment imports by 25% to 30%. This trend is exacerbated by major US retailers reducing imports and maintaining minimal stock levels. Bangladesh's strategic import of cheap raw materials from China and its tax-exempt status as a least developed country have further strained Indian exports, which stagnated at around USD 16.5 billion, while Bangladesh's exports surged past USD 44 billion.

The market is characterized by a diverse range of products, catering to different age groups, styles, and price points. Modern parents, who are becoming increasingly affluent and fashion-conscious, are showing a growing demand for trendy outfits that not only mirror their aspirations but also reflect the unique personalities of their children. This shift is noticeable across various shopping areas, from the traditional lanes of Old Delhi to the bustling malls of Mumbai. Social media and images of celebrity kids in designer wear are shaping parents' purchasing decisions, with homegrown brands such as Gini & Jony competing against global giants such as H&M and Zara Kids. Eco-conscious parents are driving the demand for sustainable and organic clothing, while gender-neutral fashion is gaining traction, challenging traditional norms. However, the unorganized sector continues to offer budget-friendly alternatives, posing competition to branded players, and the industry struggles with the critical issue of sizing

standardization. Overall, the kids wear sector in India reflects the nation's evolving aspirations and values, balancing tradition with progress through diverse fashion choices, from ethnic wear to western styles, and sustainable fabrics to personalized designs, showcasing the dynamic changes in the country.

This market includes clothing tailored to the needs of various age groups—newborns, infants, toddlers, and kids—across segments such as casual wear, active wear, formal wear, and ethnic wear. In India, rising disposable incomes and the increasing influence of fashion trends have transformed parents into fashion-conscious consumers. Unlike in the past, when children's clothing was primarily functional, contemporary Indian parents now seek stylish, comprehensive outfits for their children. This shift has led to the emergence of numerous domestic and international brands, offering a diverse and stylish selection of children's clothing. The market has become highly competitive, with companies investing in marketing strategies and product innovation to stay ahead.

Current Market Scenario

The Indian kidswear market is experiencing a remarkable rebound post-pandemic, reflecting a dynamic recovery fueled by a young and rapidly growing population. The market's size surged from USD 15.20 billion in FY 2020 to USD 20.01 billion in FY 2023, marking a substantial growth of nearly 32% over three years. This robust increase highlights not only the sector's resilience but also its potential for continued expansion.

Several interconnected factors contribute to this impressive growth. Firstly, India's demographic profile with a significant proportion of young families and a high birth rate creates a steady and consistent demand for children's clothing. This demographic trend ensures a continuous market for kidswear, driven by both necessity and evolving consumer preferences.

Rising disposable incomes across urban and semi-urban areas have empowered families to spend more on premium and branded kidswear. As economic conditions improve, parents are increasingly willing to invest in high-quality and fashionable clothing for their children. This trend is further supported by the growing fashion awareness among children, influenced by media exposure, social media, and celebrity endorsements. Children today are more attuned to fashion trends and are influenced by global styles, driving demand for trendy and stylish apparel.

Urbanization has also contributed to the growth of the kidswear market. As more families move to urban areas, there is a shift towards convenience and ready-to-wear garments, which align with busy lifestyles and the preference for modern shopping experiences. This urban shift has led to an increased demand for fashionable, easy-to-maintain clothing that fits the fast-paced city life.

The market's expansion is also supported by the growing presence of both online and offline retail channels. E-commerce platforms and D2C brands have revolutionized the way parents shop for kidswear, offering a wide variety of options, competitive pricing, and convenient shopping experiences. This shift towards online shopping, combined with the growth of brick-and-mortar stores in key urban centers, has broadened access to diverse and high-quality kidswear.

Looking ahead, the Indian kidswear market is poised for continued growth. As disposable incomes rise and fashion trends evolve, demand for high-quality, trendy kidswear is expected to sustain its upward trajectory. The sector's recovery from the challenges of the Covid-19 pandemic is solidifying, with promising prospects for sustained success and innovation in the coming years.

Demand Drivers

Domestic Demand Scenario

The demand for kidswear in India is driven by a combination of demographic, economic, and cultural factors. A young and growing population ensures a steady and consistent demand for children's apparel, while rising disposable incomes allow families to spend more on quality and branded clothing. The influence of global fashion trends, amplified by media exposure and social media, has heightened fashion awareness among children, increasing the demand for trendy and stylish outfits. Urbanization has led to a preference for ready-to-wear garments that offer convenience and modernity. Additionally, the expansion of e-commerce and organized retail has made a wide range of kidswear more accessible, catering to the diverse needs of Indian consumers. These factors collectively contribute to the robust growth and dynamic nature of the kidswear market in India.

Rising Disposable Incomes and Working Parents:

The burgeoning middle class in India is a significant driver of growth for the readymade kidswear market. Industry reports predict a remarkable growth trajectory for this demographic segment, with the middle class expected to reach a massive 547 million by 2025. This translates to a massive pool of families with more disposable income at their disposal. This newfound financial flexibility has a profound impact on consumer spending patterns, particularly when it comes to their children.

Shifting Priorities and Evolving Needs

Previously, a significant portion of household income was allocated to fulfilling basic needs like food and shelter. However, with rising disposable income, families now have more freedom for discretionary spending. This shift in financial priorities translates to increased investment in their children's well-being, including their clothing. Gone are the days when functionality was the sole consideration. Parents are now seeking a balance between comfort, quality, and style when it comes to their children's wardrobes. This evolution in consumer preferences marks a notable departure from the past, reflecting broader societal changes and aspirations for a better quality of life.

The Rise of Brand Consciousness

The growing middle class is not just spending more but also becoming increasingly brand-conscious. Exposure to media and advertising has fueled a desire for branded clothing that is not only fashionable but also perceived as superior in quality and durability. This shift aligns perfectly with the rise of readymade kidswear brands offering a wider variety of styles and designs compared to traditional stitched clothes. As a result, brands that cater to the evolving tastes and preferences of this demographic are seeing substantial growth. The trend towards brand consciousness also indicates a broader cultural shift towards consumerism and the importance of social status and image, particularly in urban and semi-urban areas.

Beyond Functionality: The Value of Quality and Style

Previously, children's clothing might have been viewed as purely functional, with the primary concern being practicality and affordability. However, with rising disposable income, parents are placing a higher value on quality and style. They are more willing to invest in well-made garments that last longer and offer better comfort for their active children. Additionally, the desire to see their children dressed in trendy and fashionable clothes is a growing trend. This opens doors for brands that can offer a unique blend of comfort, quality, and style that resonates with the aspirations of this growing middle class. The focus on quality and style also reflects a broader shift towards a more consumer-driven economy, where product differentiation and brand value play critical roles in purchasing decisions.

A Win-Win Situation

The rise of the Indian middle class creates a win-win situation for both families and the kidswear industry. Families have the means to invest in the well-being of their children, while the kidswear industry experiences a surge in demand for its products. This trend is expected to continue in the coming years, creating a vibrant and dynamic market for readymade kidswear in India. The industry's growth is further supported by advancements in retail infrastructure, including the proliferation of organized retail formats and the rapid expansion of e-commerce platforms, which make branded kidswear more accessible to a wider audience. In conclusion, the burgeoning middle class is a pivotal factor driving the expansion of the readymade kidswear market in India. As disposable incomes rise and consumer preferences evolve, the demand for high-quality, stylish, and branded kidswear is set to grow exponentially, offering significant opportunities for both established players and new entrants in the market.

Young Population: A Continuously Replenishing Demand

India's young population, with a significant portion (31%) below the age of 14, presents a unique advantage for the readymade kidswear market. This vast youth segment translates to a constantly replenishing demand for clothes, driven by several factors:

Rapid Growth Spurt

Children grow at a phenomenal pace, especially in their early years. This rapid growth cycle translates to frequent wardrobe updates. Clothes purchased last season might no longer fit by the next, necessitating parents to constantly replenish their child's wardrobe. This ongoing need for new clothes creates a steady demand for the kidswear market.

Seasonal Variations

In addition to growth spurts, seasonal changes also influence clothing needs. Summer calls for light and airy fabrics, while winter necessitates warmer garments. This seasonal requirement necessitates multiple wardrobe changes throughout the year, further driving demand for readymade kidswear.

Evolving Fashion Trends

The fashion industry is constantly evolving, and kidswear is no exception. New trends emerge each season, enticing parents to update their child's wardrobe with the latest styles. This desire to keep kids looking fashionable creates a dynamic market where fresh and trendy collections are in high demand.

Multiple Occasions

Kidswear caters to various occasions beyond everyday wear. Special events like birthdays, festivals, and school functions necessitate specific clothing choices. This creates a demand for occasion-specific wear, such as ethnic wear for festivals or party dresses for special events. Readymade garments offer a convenient and diverse range of options to suit these varied needs.

Increased Social Awareness

With growing social media influence, children are becoming more aware of fashion trends and brand consciousness at a younger age. This can lead to them requesting specific styles or brands, further fueling the demand for trendy and diverse kidswear options. In essence, India's young population is a double-edged sword for the kidswear market. It guarantees a constantly replenishing customer base due to rapid growth and evolving needs. At the same time, it necessitates a dynamic and responsive industry that can cater to the ever-changing demands of fashion-conscious parents and their growing children. Brands that can effectively navigate these dynamics will be well-positioned to capitalize on this ever-evolving market.

Increasing Urbanization: Exposure to Trends and Brand Consciousness

India's urbanization rate is accelerating, with projections suggesting that 40% of the population will reside in urban areas by 2030². This shift towards urban living exposes families to diverse lifestyles and fashion trends. Urban families tend to be more brand-conscious and have a greater preference for readymade garments compared to traditional stitched clothes. This is due to factors like convenience, wider variety, and access to established brands in urban centers.

Exposure to Trends

Urban living exposes families to a wider range of media and social influences. This constant exposure to fashion trends, often through social media and advertising, creates a desire for trendy and stylish clothing for their children. Urban families are more likely to keep up with the latest fashion trends compared to their rural counterparts. Branded kidswear companies that cater to these trends with innovative designs and seasonal collections will find favor with this audience.

Brand Consciousness

Urbanization fosters a more brand-conscious consumer base. Easy access to shopping malls, branded stores, and online retailers exposes families to a diverse range of brands. This not only increases brand awareness but also influences purchase decisions. Parents in urban areas are more likely to associate specific brands with quality, design, and social status, making them more receptive to branded kidswear.

Convenience Factor

The fast-paced lifestyle of urban living often leaves parents with limited time. Readymade garments offer a convenient and time-saving solution compared to traditional methods of stitching clothes at home. Urban families are more likely to embrace the convenience of readymade options, especially when coupled with the wider variety and consistent quality offered by established brands.

Nuclear Families and Working Parents

The rise of nuclear families and dual-income households is a prominent feature of urban life. With both parents working, there's less time and energy available for traditional practices like stitching clothes. Readymade garments cater to this need, offering a readily available and diverse selection of clothing options.

Shifting Priorities

Urban families often have higher disposable incomes compared to their rural counterparts. This allows them to prioritize factors beyond just basic functionality when it comes to their children's clothes. Comfort, design, and brand value become more important considerations, creating a market for premium and well-established kidswear brands that cater to these evolving needs. In conclusion, urbanization is a significant driver of the branded kidswear market in India. It exposes families to new trends, fosters brand consciousness, and creates a need for convenient and stylish clothing options. Brands that can effectively tap into these dynamics by offering trendy designs, high-quality materials, and convenient shopping experiences will be well-positioned to thrive in this growing urban market.

The E-commerce Boom: Transforming Kidswear Shopping in India

The e-commerce boom has revolutionized kidswear shopping. Online platforms offer a vast selection, convenience, and competitive pricing. This caters to busy parents who appreciate the ease of shopping from home and the ability to compare prices across brands. Some of the ways by which online platforms are revolutionizing the market:

Convenience at Your Fingertips

Online shopping eliminates the need for time-consuming trips to physical stores. Busy parents can browse, compare, and purchase kidswear from the comfort of their homes, even during late hours or nap times. This flexibility is a major advantage, especially for parents with tight schedules.

Vast Selection and Global Reach

Online platforms offer a seemingly endless selection of kidswear brands, styles, and sizes. This surpasses the limitations of physical stores, allowing parents to access a wider variety of options, including international brands that might not be readily available in their local markets.

Competitive Pricing and Deals

Online retailers often offer competitive pricing and attractive deals to attract customers. This allows parents to compare prices across different brands and stores, potentially saving money on their purchases. Additionally, online platforms frequently host discount sales and offer coupon codes, further enhancing affordability.

Detailed Product Information and Reviews

Online platforms provide detailed information about products, including size charts, material descriptions, and high-resolution images. This allows parents to make informed decisions without physically examining the clothes. Additionally, customer reviews offer valuable insights into product quality, fit, and overall user experience.

Easy Returns and Exchange Policy

Most online retailers offer hassle-free return and exchange policies, addressing a major concern for parents buying clothes for children who grow rapidly. This flexibility allows them to exchange clothes for a different size or return them altogether if they are not satisfied with the purchase.

Time-Saving Features

Online shopping platforms offer features like filters and sorting options that help parents narrow down their search based on specific criteria like size, brand, price, and color. This saves them time and ensures they find exactly what they're looking for quickly and efficiently.

In conclusion, online shopping has become an indispensable tool for busy parents in India. The convenience, vast selection, competitive pricing, and time-saving features offered by online platforms are revolutionizing the kidswear market. As e-commerce continues to grow, online platforms are poised to play an even more significant role in shaping the future of kidswear shopping in India.

Increasing Organized Retail in the Kidswear Market

The emergence of organized retail and brand proliferation has significantly transformed the kidswear market in India. Traditionally, a large portion of kids' clothing was bought from local markets and small retailers. However, the advent of organized retail formats, including malls and branded stores, has revolutionized the shopping experience for consumers.

Curated and Consistent Selection:

Organized retail offers a more curated and consistent selection of products, providing better quality assurance and enhanced customer service. Malls and branded stores present a wide variety of kidswear options, making shopping more convenient and reliable.

Consumer Preferences

According to the industry reports, 47% of respondents prefer visiting malls or stores to try on clothes before purchasing, indicating a strong inclination towards in-store experiences. This preference underscores the importance of physical retail spaces in the kidswear market.

Hybrid Shopping Approach

While in-store shopping remains popular, 40% of households adopt a hybrid approach, balancing their clothing purchases between physical stores and online platforms. This trend highlights the growing importance of e-commerce while maintaining the relevance of traditional retail.

Trends in Retails

Varieties of products with different price points are available due to the proliferation of both domestic and international brands in the kids retail market. Brands such as Gini & Jony, First Cry and international have established a strong presence, offering a mix of affordability, quality, and style. This brand-centric approach aligns with the growing consumer awareness and preference for products that offer value beyond mere aesthetics.

Dominance of Western and Comfort Clothing Over Ethnic and Traditional

The Indian kidswear market has seen a significant shift towards Western and comfort clothing, overshadowing the demand for traditional and ethnic wear. This trend reflects broader societal changes and evolving consumer preferences, driven by various cultural and economic factors. As globalization and urbanization continue to shape the Indian lifestyle, the clothing choices for children are increasingly influenced by Western fashion trends, media exposure, and the conveniences offered by modern retail and e-commerce platforms. This shift is not just a superficial change in clothing styles but also signifies deeper transformations in lifestyle, values, and aspirations among Indian families.

Global Fashion Influence

The increasing exposure to Western fashion trends through digital platforms, social media, and international brands has significantly influenced the clothing choices for Indian children. Parents and children are more inclined towards adopting global fashion styles, which are often perceived as trendier and more modern.

Versatility and Convenience

Western clothing, such as T-shirts, shirts, jeans, and dresses, offers greater versatility and convenience compared to ethnic wear. These garments are easy to wear, maintain, and are suitable for a wide range of occasions, from casual outings to semi-formal events. This practicality makes Western clothing a preferred choice for everyday use.

Adaptability to Weather Conditions

These garments are suitable for various weather conditions across India, making them a practical choice for parents looking to dress their children comfortably throughout the year.

Urbanization and Lifestyle Changes

Rapid urbanization and changing lifestyles have contributed to the dominance of Western clothing. As more families move to urban areas, there is a growing preference for readymade, comfortable, and stylish outfits that align with the fast-paced city life. This shift has led to a decline in the regular use of traditional attire, which is often reserved for special occasions.

Media and Celebrity Influence

Media and celebrities play a crucial role in shaping fashion trends. The portrayal of Western clothing in movies, TV shows, and advertisements influences children's fashion preferences. Parents often seek to replicate the trendy looks seen on popular media figures, further driving the demand for Western apparel.

While traditional and ethnic wear remains important for cultural and religious occasions, the day-to-day dominance of Western and conform clothing in the Indian kidswear market is undeniable. This trend is expected to continue as urbanization progresses and global fashion influences persist.

Export demand Scenario

The export scenario for India's readymade kidswear market paints a picture of steady growth with promising potential. While domestic demand is surging, international markets are taking notice of the value proposition Indian manufacturers offer. The export demand for readymade kidswear from India has exhibited a gradual rise over the four fiscal years provided. It jumped from USD 7.4 Bn in FY 2021 to USD 9.6 Bn in FY 2023, showcasing a positive trajectory. A slight dip is observed in FY 2024 (USD 9.2 Bn).

compared to the peak in FY 2023. This could be due to various global economic factors or temporary fluctuations in international demand. However, the overall trend indicates space for further growth in the export market.

Indian readymade kidswear finds a ready market in several key regions around the world. The United States, Europe (particularly Germany, the United Kingdom, and France), and the Middle East are major destinations for Indian exports. These regions share a common thread: a high demand for quality and affordable kidswear. This demand perfectly aligns with the strengths of Indian manufacturers. They can offer high-quality garments at competitive prices due to factors like a skilled workforce and readily available raw materials. This value proposition makes Indian kidswear an attractive option for international buyers in these regions, solidifying India's position as a prominent player in the global kidswear export market.

Competitive Production Costs

India's cost-effectiveness is a major driver of its success in the global kidswear export market. A large pool of skilled yet affordable labor keeps production costs low compared to competitors. Furthermore, India's status as a major producer of cotton and other natural fibers used in kidswear eliminates dependence on expensive imports of raw materials. This easy access to a skilled workforce and readily available materials allows Indian manufacturers to offer high-quality kidswear at attractive prices, making them a compelling choice for international buyers.

Skilled Workforce and High-Quality Standards

India's well-established textile and garment industry boasts a significant advantage: a large pool of skilled workers. This experienced workforce translates to efficient production processes, minimizing wasted materials and maximizing output. Furthermore, these skilled workers are adept at meeting the stringent quality standards demanded by international markets. This ensures that Indian-made kidswear meets global benchmarks for safety, durability, and construction. This combination of efficiency and quality control allows Indian manufacturers to deliver high-quality garments at competitive prices, solidifying their position in the global kidswear export market.

Government Support for Exporters:

The Indian government plays a crucial role in supporting the growth of kidswear exports. Initiatives like duty drawbacks offer partial or full refunds on customs duties paid for imported materials used in export garments. This directly reduces production costs for manufacturers, making their products more competitive in the international market. Additionally, the government has established dedicated textile parks. These parks provide essential infrastructure, resources, and streamlined processes specifically designed to support garment manufacturers. By reducing costs and simplifying export procedures, these government initiatives create a favourable environment that empowers Indian kidswear manufacturers to compete effectively on the global stage.

Growth Forecast

Projections indicate a robust growth trajectory for the kids wear sector, with an anticipated faster expansion rate compared to the overall apparel market, at a CAGR of 4.4% between FY 2023 and 2030 reaching to USD 27.06 Billion. The kidswear market is undergoing a significant transformation, driven by a confluence of factors. Its rapid expansion, outpacing the broader apparel industry, is a testament to the increasing disposable incomes, changing lifestyle trends, and growing emphasis on children's fashion.

Source: Industry Articles, D&B Research Estimates

Within the kids wear segment, western wear holds a majority share, currently accounting for 88% of the market, and is expected to maintain this share while growing at an 8.7% CAGR between FY 2023 and FY 2030. The pronounced preference for western wear within the segment is a reflection of the global influence on children's fashion. This trend is likely to persist, propelled by the media's portrayal of western styles and the aspiration of parents to provide their children with trendy outfits.

The burgeoning organized retail sector in kidswear signifies a paradigm shift in consumer behavior. Parents are increasingly opting for branded products, drawn to the assurance of quality, design, and safety standards associated with established brands. Moreover, the convenience and organized shopping experience offered by these retail formats are major contributing factors. As the organized sector expands, it is likely to exert significant pressure on the unorganized players, leading to a more competitive landscape. The projected CAGR of 12.6% for the organized segment between FY 2023 and 2025 presents substantial growth opportunities for retailers and brands. Expanding their retail footprint, introducing innovative product lines, and leveraging digital platforms will be key strategies to capitalize on this growth. Additionally, there's potential for niche players to cater to specific segments, such as eco-friendly or premium kidswear, to carve out a distinct market position.

Regulatory Landscape

The textile industry has consistently received significant government focus due to its positive impact on employment and the substantial foreign exchange it generates through exports. This special attention is evident through the introduction and amendment of various acts, policies, and schemes over time. These measures were implemented to foster the growth of a robust manufacturing infrastructure and encourage the export of textile products.

The government also initiated schemes such as Amended Technology Upgradation Fund Scheme (ATUFS), Scheme for Integrated Textile Parks (SITP), Integrated Skill Development Scheme (ISDS), supply of power and energy at subsidized rates, setting up Integrated Textile Parks, sops on export, and benefits under scheme of Fund for Regeneration of Traditional Industries (Khadi, village and coir industries).

ATUF Scheme

The "Amended Technology Upgradation Fund Scheme (ATUFS)" was introduced to replace the existing Revised Restructured Technology Upgradation Fund Scheme (RR-TUFS). The Ministry of Textiles implemented Amended Technology Upgradation Fund Scheme (ATUFS) with effect from 13.01.2016, for a period of seven years. To incentivize production the government is implementing this scheme with an outlay of INR 178.22 billion during 2016-2022 and it is expected to attract investment of INR 1 trillion and generate 35.62 lakhs employment in the textile sector by 2022.

The Ministry of Textiles (MoT) may introduce a new programme to replace the Amended Technology Upgradation Fund (ATUF) scheme, which was set to expire on March 31, 2022. The new scheme, likely to be Textile Technology Development scheme, will come with an outlay of about Rs. 16,600 crore for the next five years. MoT has proposed investment and value-addition-linked incentives under this scheme. Incentives for technology transfer in case of joint ventures by foreign manufacturers, and support for research and development and commercialization, are also likely to figure in the planned scheme.

Scheme for Integrated Textile Park (SITP)

The Scheme for Integrated Textile Parks (SITP) was launched in 2005 to encourage private investments and employment generation in textile sector by facilitating excellent infrastructure for common facilities. The facilities included roads, water supply treatment and distribution network, power generation and distribution network, effluent collection treatment and disposal system, design centre, warehouse, first aid centre, etc.

So far, out of the 54 Textiles parks that have been approved across the country, 31 parks have been completed while 23 are at various stages of completion.

Export Promotion Capital Goods (EPCG) scheme

The scheme facilitates the import of capital goods, including equipment for pre-production, production, and post-production, with no duty for specified industries and concessional customs duties ranging from 3% to 11% for most sectors. Certain select industries benefit from full customs duty concessions under this scheme, aimed at enhancing industrial competitiveness through subsidized importation of essential manufacturing equipment. With the help of concessional duty of 3% EPCG Scheme allows the manufacturers import of capital goods at 3% customs duty. The requirements of exports compulsion to be fulfilled are equal to 6 times of duty amount saved on the capital goods imported under EPCG scheme. The export compulsion/ obligation needs to be satisfied in 8 years estimated from Authorization-issue date.

SAMARTH (Scheme for Capacity Building in Textile and Apparel Sector)

This aim is to provide demand-driven, placement-oriented skilling program to incentivize the efforts of the industry in creating jobs. A total of 184 courses aligned with National Skill Qualification Framework (NSQF) have been adopted under the scheme across various textile segments covering traditional sector such as Handloom/ Handicrafts to conventional sector such as Garmenting to advanced sector such as Technical Textiles.

Atmanirbhar Bharat packages

To support economic revival post COVID-19, the government in May 2020 announced first stimulus package. The first economic stimulus of INR 20 trillion was announced on 13th May 2020 and subsequent two more Atmanirbhar Bharat packages of INR 730 billion on 12th October 2020 and INR 2.65 trillion was announced on 12th November 2020, bringing the total stimulus package at INR 29.87 trillion. The domestic textile manufacturing is expected to benefit from the government measure to promote an Atmanirbhar Bharat, or self-reliant India. Various other policy decision such as **Production linked incentive for 13 key sectors including textiles**, changing the definition of MSMEs and encouraging the scope for private participation have been introduced as a part of Atmanirbhar Bharat package which will have a favorable impact on textile manufacturing companies too.

Mega Textile Parks

The Government in Union Budget 2022-23 had announced a plan to set up 7 mega textile parks, under the PM MITRA (PM-Mega Integrated Textile Region and Apparel) scheme. The scheme comes with a total budgetary outlay of INR 4,445 Crore, however, the initial allocation in the Budget 2023-24 is only Rs 200 crore. These parks will be set up by 2026-27 and are expected to generate 20 lakh employment opportunities. As per the Government notification, the proposed seven parks are set to come up in Tamil Nadu, Telangana, Gujarat, Karnataka, Madhya Pradesh, Uttar Pradesh and Maharashtra and will help in creating world-class industrial infrastructure that would attract large scale investment including foreign direct investment (FDI) and encourage innovation and job creation within the sector. Each of these parks will be having facilitates to create an integrated textile manufacturing value chain from spinning, weaving to garment manufacturing.

For a greenfield project, the Government of India would provide a development capital support of 30% of the project cost (with a cap of INR 500 Crore). For a brownfield project, the capital cost of 30% would be on the project cost incurred to set up additional infrastructure & facilities (with a upper cap of INR 200 Crore). In addition to this development capital support, the PM MITRA scheme also has a competitiveness incentive support (CIS) of INR 300 Crore to each of the parks. These parks would be developed by a special purpose vehicle (SPV) which would be owned by the state government (state where the respective park would come up) and the Government of India.

Production Linked Incentive (PLI) Scheme

The Government launched the Textile PLI (Production Linked Incentive) Scheme 2.0 as a part of the Atmanirbhar Bharat Abhiyan (Self-Reliant India Campaign) to boost the country's textile manufacturing sector and make it globally competitive. The scheme has a financial outlay of INR 10,683 Crore and would run from FY 2025 – 29 period. The objective is to attract investment into 40 MMF apparel products, 14 MMF fabric products and 10 types of technical textiles. The scheme has two parts, each with its own distinct eligibility criteria and incentive structure. In both the parts, incentive rate would be tied to the annual incremental revenue during FY 2025-30 period.

Competitive Landscape

The children's apparel market in India is rapidly growing, driven by increasing disposable incomes and the influence of global culture. There is a notable shift towards branded clothing, with children becoming more independent consumers influenced by media and peers. Brands such as Gini and Jony are responding with colorful collections, while partnerships with entertainment giants are introducing beloved characters into clothing lines. Retail expansion and a shift towards fashionable, yet affordable clothing underscore the industry's efforts to capitalize on this expanding market.

The children's wear market in India showcases a variety of brands employing distinct distribution strategies. Brands such as Eteenz and Zero Babywear predominantly rely on Multi-Brand Outlets (MBOs), Large Format Stores (LFS), and online marketplaces. They have limited presence in Exclusive Brand Outlets (EBOs), with a significant portion of their sales stemming from traditional channels such as family stores and local kids' wear shops.

On the other hand, well-established players such as Mothercare, Me n Moms, and Gini & Jony adopt a comprehensive multi-channel approach. They utilize a blend of traditional and modern distribution channels such as LFS, Exclusive Brand Outlets, and E-commerce platforms. This diversified presence across various formats helps these brands to enhance brand visibility, cater to diverse consumer preferences, and maintain an aspirational appeal.

In contrast, newer entrants such as Hopscotch and Ed-a-Mama have embraced a digital-first strategy. Operating exclusively online, these brands have gained traction, especially in the post-COVID-19 era, where online retail has surged. It is anticipated that online channels will play a crucial role, potentially accounting for around 15% of fashion retail sales in India by the fiscal year 2025. This shift underscores the evolving landscape of children's apparel retail, driven by changing consumer behaviors and technological advancements.

Key factors shaping competition in the Indian kidswear market.

Increasing Disposable Income: Rising disposable incomes among Indian households have significantly influenced spending patterns, with parents increasingly willing to invest in premium and fashionable clothing for their children. This trend has spurred demand for higher-quality fabrics, innovative designs, and branded apparel, driving competition among brands to offer superior products that justify higher price points.

Rising Fashion Consciousness: Modern parents are becoming more fashion-conscious, seeking clothing that not only meets functional needs but also reflects current trends and their personal styles. Brands must continuously innovate in terms of designs, colors, patterns, and themes to stay relevant and appealing. This necessitates quick adaptation to changing fashion trends and consumer preferences, intensifying competition.

Brand Reputation and Trust: Established brands with a reputation for reliability, quality, and safety hold a competitive edge in the market. Building and maintaining trust is critical. Brands invest in rigorous quality control measures, sustainable practices, and certifications that assure parents of the safety and durability of their products. Customer loyalty programs and positive word-of-mouth also play crucial roles in brand differentiation and market positioning.

Innovative Designs and Themes: The market rewards brands that offer unique and creative designs that resonate with both parents and children. Brands invest in research and development to introduce innovative fabrics, eco-friendly materials, customizable options, and themed collections (seasonal or character-based themes). This creativity not only attracts consumers but also fosters brand loyalty and differentiation.

Retail Expansion and Omnichannel Presence: The growth of organized retail, including malls, hypermarkets, and e-commerce platforms, has increased accessibility to kids wear products. Brands expand their distribution networks and enhance their online presence to reach a broader audience. Effective omnichannel strategies that integrate physical stores with digital platforms offer convenience and cater to diverse consumer preferences, thereby intensifying competition.

Price Sensitivity and Value Proposition: While quality remains paramount, price sensitivity among Indian consumers necessitates competitive pricing strategies. Brands focus on offering value for money by balancing quality with affordability. Pricing strategies may include periodic discounts, bundle offers, and loyalty programs to attract and retain price-sensitive consumers without compromising brand integrity or profitability.

Market Dynamics: India's children's wear market is influenced by several key factors driving growth. With children aged 0-14 years constituting approximately 26% of the population, there is a substantial demand for clothing catering to this demographic. Additionally, higher disposable incomes and evolving lifestyles are prompting parents to invest more in fashionable, branded apparel for their children. The convenience of online shopping has also reshaped consumer behavior, particularly appealing to busy millennial parents seeking diverse product ranges and competitive pricing from home.

Consumer Behavior Trends: In the children's wear market, consumer buying behavior varies significantly based on the purpose of purchase. Gift-giving traditions during occasions such as birthdays and festivals drive sales, attracting budget-conscious buyers. Conversely, when shopping for their own children, parents prioritize high-quality clothing over price. Coordinated clothing sets are favored for their convenience and cost-efficiency, particularly as gifting options.

Emerging Trends: Theme-based clothing featuring popular cartoons, movies, and TV shows has become integral to the children's wear market, influenced by children's preferences and "pester power." Sustainability is another growing trend, with eco-conscious parents opting for natural fibers such as cotton and linen, avoiding synthetic materials. Gender-neutral fashion is gaining prominence, reflecting a broader societal shift towards inclusivity and individual expression. Luxury and designer children's wear are also on the rise, driven by middle-class aspirations and celebrity influences, while 'mini-me' outfits are increasingly popular, fostering familial bonding through coordinated fashion.

Brand and Marketing Strategies: Premium children's wear brands in India are implementing integrated strategies to enhance consumer experience and ensure sustained growth. These brands prioritize attractive product packaging and design, emphasizing quality and luxury to appeal to discerning parents and children. Simultaneously, effective marketing campaigns leveraging digital platforms, social media, and influencer collaborations are crucial for brand visibility and engagement. By creating compelling content and targeted promotions, these brands enhance brand recall and drive sales, establishing a competitive advantage in the dynamic children's wear market.

Our EBOs are an integral part of our business operations and sales. They constitute a considerably large portion of the sales to our customers for the Financial Year 2023 and 2024. Going forward also, EBOs are central to our growth strategy. We opened our first EBO store in Sarita Vihar, New Delhi on December 01, 2019. In addition to increasing the brand visibility and awareness in each city, our EBOs enable us to provide high quality and standardized experience to our customer helping us achieve our target **#SHOP HAPPINESS**. We aim to identify and assess the most attractive locations for EBOs in order to maximize revenues from our offline footprint. As of November 18, 2024, we have 24 EBOs across 8 states and across 17 cities in India with 17 (70.83%) of our EBOs located on high street and 7 (29.16%) in malls. Our average store size ranges from 530 sq. ft. to 1,760 sq. ft. of area for “Purple United Kids” branded EBO and within each EBO we endeavor to provide a premium experience with personalized attention to each customer. Except as stated under “Our properties” below, all our EBOs are company owned and company operated with 100% of leases in our name. Below is the list of stores added in each FY from the year we started our

For the Financial Years 2022, 2023, 2024 and for the period ended on September 30, 2024 revenue generated from our EBOs amounted to 280.04 lakhs, 409.02 lakhs, 1,244.35 lakhs and 785.38 respectively and represented 16.95%, 15.92%, 29.09% and 25.63% of our total revenue from operations, respectively.

Key accounts and Distributors

A selection of our apparel and footwear products are sold through 14 key accounts and 24 distributors (as of September 30, 2024), including shop-in-shops and multi-brand outlets in prominent fashion retail stores and major retail chains, located in various cities in India as of November 18, 2024. The Key Accounts and the distributors are carefully selected and allow us to expand our customer base by reaching out to the clientele of such Key Accounts and Distributors, which we believe prefers to shop in multi-brand outlets. In addition to the shop-in-shops, we also sell our products to distributors who further sell our products to local and regional retail stores. These points of sale are not included in our overall multi-brand outlet count. For the Financial Year ended September 30, 2024, ₹ 2,130.60 lakhs constituting 69.54% of total sales were generated through this mode (including sales to other distributors).

Online

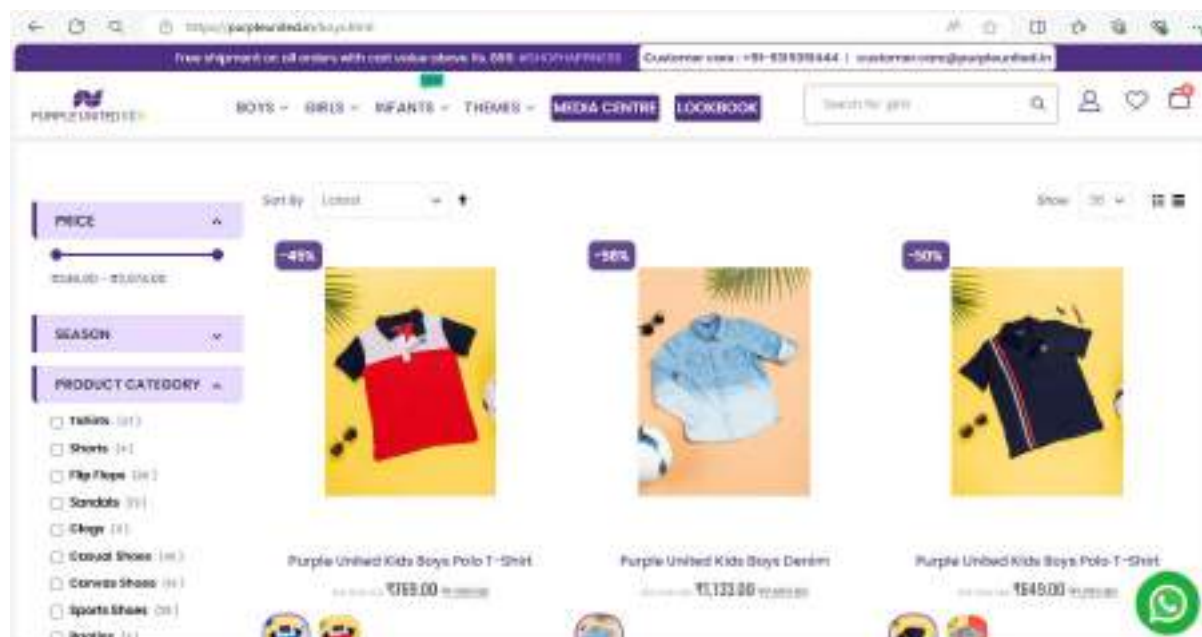

We also sell our products through our own websites, www.purpleunited.in, and through online marketplaces including Myntra, Amazon, Flipkart, FirstCry, Nykaa, Hopscotch and more.

Our online sales happen through various marketplaces operated under two models: outright sales (“OS”) and pure play marketplace (“MP”). In the OS model, we bill online marketplaces in bulk at a fixed rate, allowing for returns up to a predetermined percentage of total billing within a specific period. In the MP model, our inventory is integrated with our warehouse stock, enabling customers to place orders directly on the respective online marketplace websites. We then dispatch these products

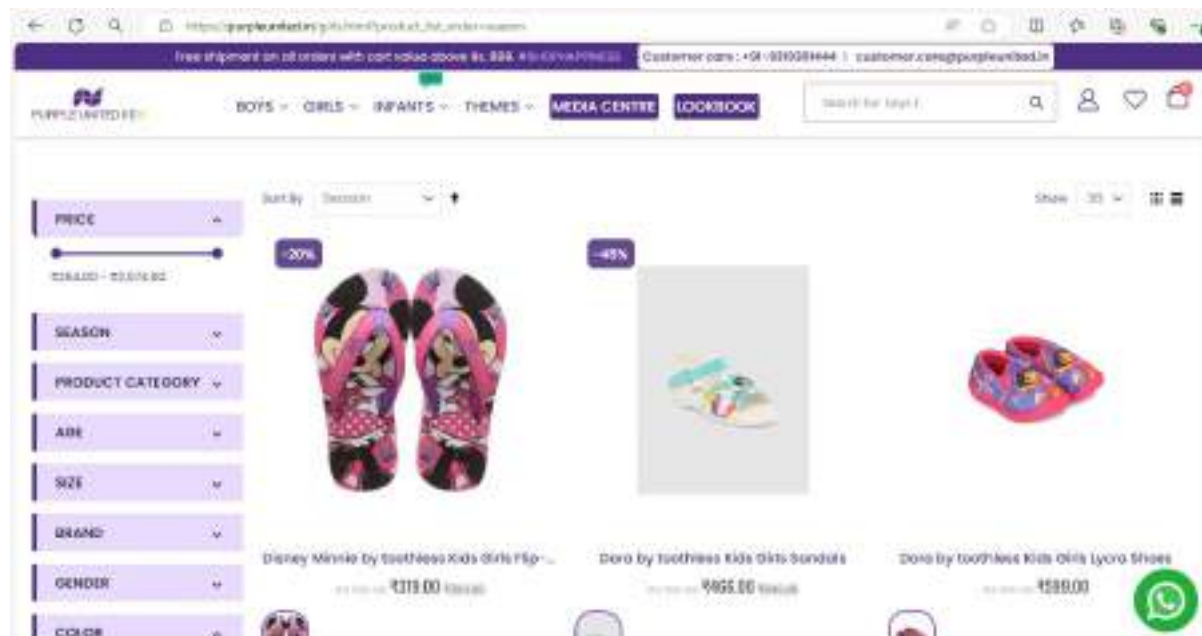

directly from our warehouse to the customers. For our online business, we have taken the services of UNICOMMERCE for our Warehouse Management System (WMS) software.

Our Competitive Strengths

We believe that we possess a few competitive strengths, which will enable us to successfully execute our business strategies, including the following:

- Well-positioned to benefit from the fast-growing market for kid's products.**
 The number of kids in India between the ages of 0 and 14 was 26% of the population. The continued growth in our target population and the on-going shift from the unorganized to the organized market are expected to lead to growth in the kid's apparel market in India. We believe that our focus on this demographic and our firm foothold present us with a significant opportunity to benefit from the fast-growing market for kid's products.
- Extensive product portfolio of quality products delivering a robust value proposition.**
 We offer an extensive product portfolio of garments and footwear for infants, toddlers and older under “Purple United Kids”. We also offer accessories and hard goods, such as strollers, that complement our apparel and footwear. We focus on providing quality products at prices that deliver an attractive value to consumers, and we cover a wide price spectrum. We believe that our extensive portfolio of premium quality fashion products has contributed to our growth and will continue to support the development of brand loyalty among consumers.
- Strong back end with design capabilities, strong focus on 3Fs (fun, fashion and functionality) and control over distribution channels.**
 We have a strong in-house design and merchandising team with the ability to design and develop products across all our categories

keeping in mind the essence of the brand which is “every product ought to adhere to 3Fs.” As of September 30, 2024, our design team consisted of 4 members and our retail team consists of 108 members. We have a robust screening and selection process for all new design samples and every sample is approved after a detailed discussion and survey of the market trends and only if it matches with our vision. Having large number of manufacturers for our apparel and footwear products, over which we retain control over the production process, enables us to maintain product quality standards. We also exercise control over our distribution channels by providing our distributors with marketing, training and supervisory support. Additionally, our staff supervises and carries out sales at our shop-in-shops within Key Accounts.

- **Experienced Promoter and management team.**

We have an experienced management team led by our Promoter, Chairman and Managing Director, Mr. Jatinder Dev Seth, who has more than 25 years of experience in the apparel and footwear industry. We are also led by a highly experienced senior management team with our Promoter, Whole-time Director, Mrs. Bhawna Seth, who is deeply involved in conceptualization, design, product development and retail operations of the Company. Mr. Manish Dev Seth proven track record in the world of designing, coding, analysis, developing, testing, and implementation of software applications. He holds Over 25 years’ experience in Software Design, Development and Project Management, Mrs. Monica Seth is an accomplished professional with a strong educational background and a proven track record in the world of Technology and management. We believe it has proven its ability to identify emerging trends in industry and to identify new locations to promote our business growth..

- **Strong financial performance.**

We have delivered growing total income over the past 3 years despite challenging economic conditions. From FY 2022 to FY 2024, we increased our net sales from 1,651.89 lakhs to 4,277.44 lakhs respectively (a CAGR of 37.32%). We believe that our track record of growth and profitability makes us well positioned to further expand our business.

Our Strategies

Our key strategies are:

- **Continued focus on kid's apparel, footwear and accessories in India and on increasing market share.**

We believe our focus on kids' apparel and footwear continues to drive sales and provides a stable revenue base. To sustain this, we plan to regularly introduce new designs and styles in our existing apparel and footwear categories. Leveraging our brand, we aim to further penetrate the kids' apparel and footwear market by creating new categories such as day wear, evening wear, party wear, and high fashion collections for kids. Additionally, we intend to increase our market share by enhancing our product offerings and providing a wider variety of footwear and accessories that complement our kids' fashion line. Targeting the urban and upper-middle-income segments of the Indian market, we will ensure our products are available where these customers shop, maintaining both affordability and quality to build a loyal customer base.

- **Expand our presence across India and grow sales of our products at existing points of sale.**

To take advantage of the consumer spending growth in India, the growth in the kid's products market segment and on the shift from the unorganized to the organized market, we plan to expand our presence across India by increasing our network of exclusive brand outlets, while continuing to provide an excellent in-store consumer experience. We plan to increase our number of EBOs to approximately 33 in FY 2025. We believe this expansion represents a significant growth opportunity for us. In addition, we aim to focus on increasing our same store sales growth through a combination of advertising campaigns, introducing new products and improving the shopping experience for consumers.

- **Capitalize on the increasing e-commerce penetration in Indian Retail as well as within our category.**

E-commerce has grown substantially in India in recent years, due to wider selection of products, higher discounts, greater convenience for shopping (including doorstep delivery) and payment channels along with an increase in internet penetration and discretionary spending. Identifying these trends, we have made significant investments in our IT Infrastructure and digital capabilities. Through our online platforms including our own website, we generated a revenue of ₹ 145.89 lakhs in the period ended on September 30, 2024 amounting to 4.76% of our total turnover. We intend to capitalize on this position by further increasing sales through our website and online marketplace.

- **Increase market share by capitalizing on the strength of our brand.**

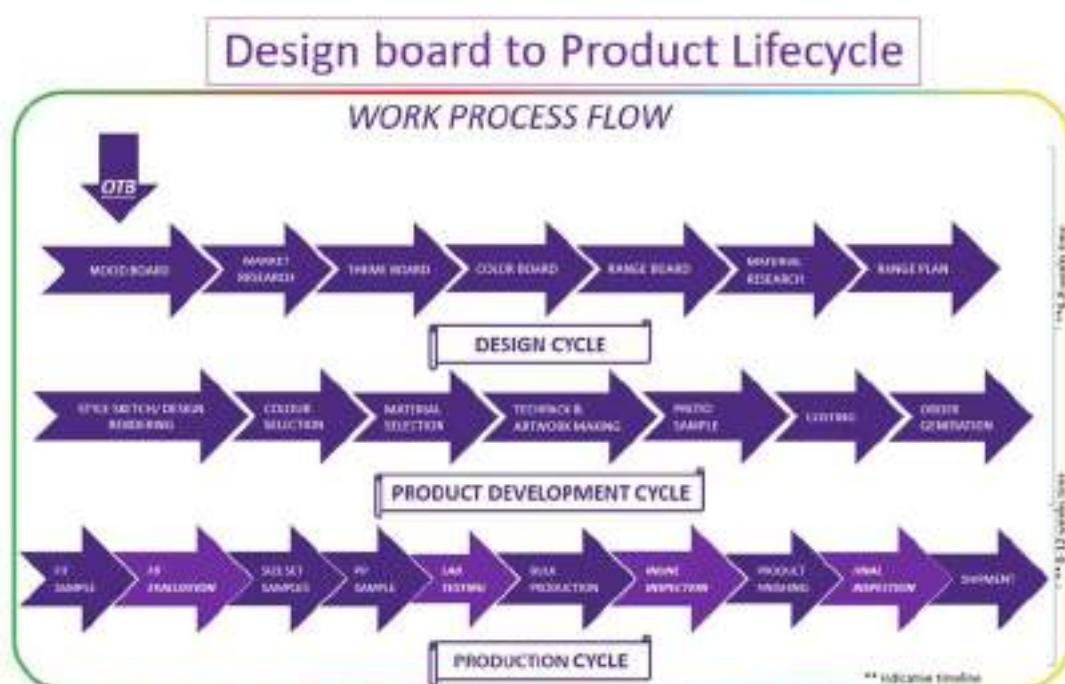

Our ability to develop and evolve our existing brand is key to our success. Our strategy is to continue building brand leadership in core items and categories, such as casual wear and party wear for infants, toddlers, boys and girls in line with global fashion trends, that we believe represent a significant opportunity for our future growth. We intend to accomplish this by offering premium fashion quality products, and further promoting our brand through different forms of marketing and advertising, including our community formation programs, and leveraging our strength with our existing customers and end-consumer base.

Manufacturing, Supply chain and Distribution Network

Our manufacturing process is outsourced which provides an attractive return on capital for our business. We engage our

manufacturers on contract, so as to maintain our low-cost business model and production is allocated on purchase order basis. These manufacturers procure raw material required for such product and get the quality approved by us or procure it through the vendors nominated by us. Upon receiving the sample from the manufacturers, we get the products tested through recognized laboratories and only when such product passes the quality test, is the approval given to the manufacturer. All orders placed by us are based on internal demand projections, carried out over in advance of the estimated delivery date of the final product. The factories provide us with manufacturing services strictly in compliance of our quality standards and requirements. As of March 31, 2024, we have a broad base of factories which manufacture for us, and our selection of factories is purely based on merits.

We also directly procure finished products, such as bags and accessories including hard goods, from third party manufacturers, which also undergo stringent quality checks. After passing these checks, the goods are dispatched to either our EBOs or our other modes of business. All our inventory management processes are also operated through our warehouse where we have system-driven processes with strong analytical capabilities to assist with our inventory management. This includes system-driven distribution and replenishment of inventory and the management of our product portfolio through data-driven forecasting of evolving fashion trends across India. The complete lifecycle of the product at Purple United Kids is as follows:

Product Pricing

We arrive at a pricing point for each of our products through a detailed mechanism that takes into consideration a range of factors, including costs incurred in connection with procurement, production, marketing and other ancillary expenses. We strive to ensure that our products remain aspirational and of premium quality for our customers, which exclusively manage and regulate the prices at which our products are sold.

Quality Control and Quality Assurance

We are committed to maintaining high quality standards throughout our sourcing and distribution cycles and have established quality control measures in various facets of our supply chain, including raw material/ finished product inspections, quality audits and product quality tracking. Our quality control starts from first fit/ proto sample stage. Based on the nature of raw material, we manage the size and fit of the product. To ensure this we make the proto sample (first sample) of correct bulk quality, so that we can close the fitting with the right material in one go.

During production our quality inspector takes a sample of a production lot, which is picked according to the Acceptable Quality Limits (AQL). The samples are randomly inspected for defects according to the standards and procedures.

Our products undergo rigorous lab testing to ensure durability, support, and safety. We place particular emphasis on arch support and stability in our footwear to promote proper foot development and posture, which also helps prevent accidents during kid's

growing years. And for apparels, we focus on reinforced seams which can withstand active play and repeated washings and use durable materials that resist fading and shrinking.

Seasonality and weather conditions

Our business is not seasonal in nature. However, we operate under two season collection:

Summer Collection: For the summer season, our focus is on products made with 100% premium cotton, curated prints with vibrant colours and designs for every occasion. We offer a range of t-shirts, shirts, shorts, skirts, denim, clothing sets, dungarees, rompers, party-wear, trousers, jeggings, lowers and dresses in apparels. We also offer flip-flops, moulds, sandals, slides, shoes, ballerinas etc. under footwear. We also have caps, sling bags, socks, etc. under accessories.

As a result over the years, we have implemented the technology initiatives at front-end and back-end of our operations commensurate with the size of our business. We have invested in information technologies designed to help us better monitor and run our business. We implemented LOGIC ERP system at both the distribution center and exclusive brand outlet levels and are in the process of implementing it across our offices. We use it mainly to record information relating to sales, inventories, finance, production and purchases. The LOGIC ERP system is deployed through a centralized data center located at our corporate office. For our online business, we have taken the services of UNICOMMERCE for our Warehouse Management System (WMS) software.

Competition

The Indian kid's apparel and footwear markets are highly competitive. Competition generally is based upon product quality, brand name recognition, price, product selection, in-store consumer experience, service and location accessibility and convenience. As a result, to remain competitive, we continuously strive to improve our product quality, increase our offering in terms of designs, style and categories and reduce cost of production. At the same time try to improve our operating efficiency and cost of distribution of goods. Also, the focus is on increasing reach to consumer and upgrade the consumer experience by continually standardizing and improving the aesthetics and environment of the stores, maintain high standards of customer service and select prime locations.

We operate in a competitive atmosphere with few organised competitors and large number of unorganised players. We believe that we have the potential to compete effectively in the market with our quality of products. Over the years, we have expanded into premium category of products offering a variety of products for every occasion namely day wear, evening wear and party wear range. 2.1 Summary of significant accounting policies

a) Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The terms of the liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

Purple United Sales Limited

(Formerly Known as Purple United Sales Private Limited)

Notes to restated financial statements as at and for the period ended September 30, 2023

(All amount in Rs. lakhs, unless otherwise stated)

b) Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment in the carrying amounts of assets or liabilities in future periods.

c) Property, Plant and Equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met, directly attributable cost of bringing the asset to its working condition for the intended use and initial estimate of decommissioning, restoring and similar liabilities. Any trade discounts and rebates are deducted in arriving at the purchase price. Such cost includes the cost of replacing part of the plant and equipment. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Items of stores and spares that meet the definition of property, plant and equipment are capitalized at cost and depreciated over their useful life. Otherwise, such items are classified as inventories.

The company adjusts exchange differences arising on translation/ settlement of long-term foreign currency monetary items pertaining to the acquisition of a depreciable asset to the cost of the asset and depreciates the same over the remaining life of the asset. In accordance with MCA circular dated 09 August 2012, exchange differences adjusted to the cost of fixed assets are total differences, arising on long-term foreign currency monetary items pertaining to the acquisition of a depreciable asset, for the period. In other words, the company does not differentiate between exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost and other exchange difference.

Gains or losses arising from derecognition of property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

The company identifies and determines cost of each component/ part of the asset separately, if the component/ part has a cost which is significant to the total cost of the asset and has useful life that is materially different from that of the remaining asset.

Property, plant and equipment held for sale is valued at lower of their carrying amount and net realizable value. Any write-down is recognized in the statement of profit and loss.

d) Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a written down value basis using the rates arrived at, based on the useful lives estimated by the management. The identified components are depreciated separately over their useful lives, the remaining components are depreciated over the life of the principal asset. The company has used the following useful lives to provide depreciation on its property, plant and equipment.

Assets	Useful Life as per Schedule II (years)
Plant and machinery	15
Office equipment	5
Furniture and fixtures	10
Motor Vehicles	8
End user devices	3

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

e) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in an amalgamation in the nature of purchase is their fair value as at the date of amalgamation. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the statement of profit and loss in the year in which the expenditure is incurred.

Intangible assets are amortized on a written down value basis over the estimated useful economic life. The company uses a rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use. If the persuasive evidence exists to the effect that useful life of an intangible asset exceeds ten years, the company amortizes the intangible asset over the best estimate of its useful life. Such intangible assets and intangible assets not yet available for use are tested for impairment annually, either individually or at the cash-generating unit level. All other intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern. Such changes are accounted for in accordance with AS 5 Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

f) Impairment of tangible and intangible assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations, including impairment on inventories, are recognized in the statement of profit and loss. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the company estimates the asset's or cash-generating unit's recoverable amount.

A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit and loss unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase.

g) Borrowing costs

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

h) Inventories

Raw materials, components, stores and spares are valued at lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost of raw materials, components and stores and spares is determined on a First-In-First-Out (FIFO) basis. Stores and spares which do not meet the definition of property, plant and equipment are accounted as inventories.

Work-in-progress and finished goods are valued at lower of cost and net realizable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. Cost is determined on a First-In-First-Out (FIFO) basis.

Traded goods are valued at lower of cost and net realizable value. Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on a First-In-First-Out (FIFO) basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

i) Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. If an investment is acquired, or partly acquired, by the issue of shares or other securities, the acquisition cost is the fair value of the securities issued. If an investment is acquired in exchange for another asset, the acquisition is determined by reference to the fair value of the asset given up or by reference to the fair value of the investment acquired, whichever is more clearly evident.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis.

Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

j) Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Sale of services

Revenues from maintenance contracts are recognized pro-rata over the period of the contract as and when services are rendered. The company collects Goods and Service Tax (GST) and other taxes on behalf of the government and, therefore, these are not economic benefits flowing to the company. Hence, they are excluded from revenue.

Sale of goods

Revenue from sale of goods is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on delivery of the goods. The company collects Goods and Service Tax (GST) and other taxes on behalf of the government and, therefore, these are not economic benefits flowing to the company. Hence, they are excluded from revenue.

Interest

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Interest income is included under the head "other income" in the statement of profit and loss.

k) Government grants and subsidies

Grants and subsidies from the government are recognized when there is reasonable assurance that:

- (i) the company will comply with the conditions attached to them, and
- (ii) the grant/subsidy will be received.

When the grant or subsidy relates to revenue, it is recognized as income on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs, which they are intended to compensate. Where the grant relates to an asset, it is recognized as deferred income and released to income in equal amounts over the expected useful life of the related asset.

Where the company receives non-monetary grants, the asset is accounted for on the basis of its acquisition cost. In case a non-monetary asset is given free of cost, it is recognized at a nominal value.

Government grants of the nature of promoters' contribution are credited to capital reserve and treated as a part of the shareholders' funds.

l) Leases

Where the company is lessee

Finance leases, which effectively transfer to the company substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease term at the lower of the fair value of the leased property and present value of minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized as finance costs in the statement of profit and loss. Lease management fees, legal charges and other initial direct costs of lease are capitalized.

A leased asset is depreciated on a straight-line basis over the useful life of the asset. However, if there is no reasonable certainty that the company will obtain the ownership by the end of the lease term, the capitalized asset is depreciated on a straight-line basis over the shorter of the estimated useful life of the asset or the lease term.

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the statement of profit and loss on a straight-line basis over the lease term.

m) Retirement and other employee benefits

Retirement benefit in the form of provident fund and ESIC is a defined contribution scheme. The company recognizes contribution payable to the provident fund and ESIC scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

The company operates a defined benefit plans for its employees, viz., gratuity. The cost of providing benefits under this plan is determined on the basis of actuarial valuation at each year-end. Separate actuarial valuation is carried out for each plan using the projected unit credit method. Actuarial gains and losses for both defined benefit plans are recognized in full in the period in which they occur in the statement of profit and loss.

n) Income taxes

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the company operates. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Purple United Sales Limited

(Formerly Known as Purple United Sales Private Limited)

Notes to restated financial statements as at and for the period ended September 30, 2024

(All amount in Rs. Lakhs, unless otherwise stated)

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period. However, we have opted for Section 115BAA of the income tax act.

o) Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of Equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of Equity shares outstanding during the period is adjusted for events of bonus issue.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

p) Provisions

A provision is recognized when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

q) Cash & cash equivalents

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank and on hand and short-term investments with an original maturity of three months or less.

r) Contingent liabilities

A contingent liability that is a possible obligation that arises from past event whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future event beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Liquidity and Capital Resources

We operate in a capital-intensive industry and our principal liquidity requirements have been to finance our working capital needs, expenditure on account of opening new stores and our store operating expenses. Our business requires high levels of financing to develop, operate and maintain our stores. To fund these costs, we have historically relied on raising short term and long-term borrowings, including working capital financing, loans from related parties and others and cash generated from operating activities. Our short-term liquidity requirements relate to servicing our borrowings, operating and maintaining our stores and financing working capital requirements. Our long-term liquidity requirements include store security deposits and fit-out costs in stores.

Our primary liquidity requirements have been towards the capital expenditure incurred for opening new stores and our working capital requirements. We have met these requirements from cash flows from operations and borrowings. We expect to meet our working capital requirements for the next 12 months primarily from the cash flows of our business operations and other available financial means. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice.

The issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Bid/Issue Opening Date. - (2) Offshore derivative instruments which have obtained separate FPI registration for ODI and proprietary derivative investments;

- (5) Multiple branches in different jurisdictions of foreign bank registered as FPIs;
- (6) Government and Government related investors registered as Category 1 FPIs; and
- (7) Entities registered as collective investment scheme having multiple share classes.

The Bids belonging to any of the above mentioned seven structures and having same PAN may be collated and identified as a single Bid in the Bidding process. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made.

The Government of India makes policy announcements on FDI through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“**DPIIT**”) issued the FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (“**FDI Circular**”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Circular and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Circular; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI. The RBI and the concerned ministry / department are responsible for granting the approval for foreign investment under the FDI Circular and FEMA.

Up to 100% foreign investment under the automatic route is currently permitted for our Company.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, all investments, subscriptions, purchases or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investor**”) will require prior approval of the GoI as prescribed in the FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the GoI. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.

Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. For further details, please see “*Issue Procedure*” on page 228 of this Red Herring Prospectus.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act of 1933, as amended (“U.S. Securities Act”) or any state securities laws in the United States, and unless so registered, may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and in accordance with applicable state securities laws in the United States.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Bidders. Our Company and the BRLM’s are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Red Herring Prospectus. Bidders are advised to make their independent investigations and ensure that the Bids are not in violation of laws or regulations applicable to them.
