Investment Rationale

The internally funded project of new rolling mill will more than double the capacity and also add new light gauge manufacturing possibilities, which will widen our product basket where the margins are higher.

The Company has planned further capacity expansion of 1500 MTPA for pyro and flake powders in Umred through internal accruals.

Star Circlips & Engineering continues to sustain momentum in growth after the COVID-19 Pandemic. Revenue and Margin growth are likely to be sustained/improved in the coming years due to robust demand in the export and domestic markets.

Strong financial track record and stability with almost zero debt in the books.

Large Customer base in diversified industries with strong customer retention, generous market share and tremendous goodwill for brand MMP.
