Managing Director's Message–Q4 & FY21

Commenting on the results, Mr. Makarand Pradhan, MD, Total Transport Systems Ltd. said:

The market continues to face challenges from the ongoing pandemic as the second wave hampered business operations during the first quarter. However, we are confident to sustain through and recover soon from this. As for our financial performance for the quarter ended 30th June 2021, revenue grew 42.01% YoY to Rs. 102.71 crores, while EBITDA and PAT increased 185.36% and 144.75% to Rs. 3.91 crores and Rs. 2.43 crores, respectively. The pandemic has brought to light the essence of logistics for delivering essential and utmost important products and services during such times of crisis.

While FCL movements were restricted during the quarter, congestion and space cut led to increased liner freight levels, leading to higher top line and profit margins. Moreover, higher freight rates coupled with economies of scale from higher volumes helped improve margins.

Our diversified network of partners gives us a strong foothold in the domestic logistics industry. Our collaborations with various companies worldwide have also enabled us to maintain resilience in these cautious and testing times. We continue to focus on better growth prospects and sustainable profitability. Our recent migration to the NSE main board is also giving us better visibility and reach into the investor community.

I would like to thank the entire team of TTSL for their untiring efforts, hard work, sincerity and dedication. Also, I would like to thank our valued Stakeholders, whose support and faith in our Company has given us the determination and ambition to set and achieve higher benchmarks.

Impact of COVID – 19

- COVID-19 pandemic posed unprecedented challenges across the world. Entire industries and businesses were impacted, and TTSL has been no exception to it.
- Due to lock down and subsequent restrictions on movement, the entire logistics industry faced financial distress.
- As a result, there will be a major impact of Covid on turnover and profitability. Closure of economic activity has led to disruptions in the supply chain.

- While almost all operating sites were under lockdown mode during the national lockdown phase, the units catering to essential commodities across Fast Moving Consumer Goods were operational. Accordingly, the Company continued to service these

- Company has ensured all the safety and sanitization measures across our service locations and are following increased protocols to ensure all involved are safe and secure.
- Company is gradually ramping up capacities across business verticals, on daily basis.
- Company has robust systems in place and all its locations are well networked.
- Even during the lockdown with combination of critical staff working from respective locations and all others working from home, all reporting systems worked seamlessly without any disruption.
- Company has taken appropriate measures to ensure requisite liquidity and there is no significant concern

Q1 FY22 vs Q1 FY21

- Q1 FY21 was uncertain due to which restrictions of FCL movements. In Q1 FY22 congestion and space cut resulted in increased liner freight, increase in freight levels and margins – restarted FCL bookings. This resulted in higher growth in revenue and profit margins
- Increase in EBITDA margin mainly due to optimization of operating costs due to higher volumes and increase in freight rates

FY21 vs FY20 -

- Special FCL export shipment not handled during this year and COVID-19 impact in the year led to decline in revenues from operations
- Ripple effect of pandemic and lockdown on industry resulted in shortage of inventories, space and increase in transport and detention cost - congestions at various ports have added on cost of shipments in first half. This led to decrease in EBITDA
