#### SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

Over the last decade, India has witnessed a substantial increase in terms of awareness about fire safety and security. The rapidly expanding IT and retail markets across the country have significantly contributed towards the growth of the fire & safety equipment sector, and this trend is likely to continue over the coming years. As large refineries, petrochemical complexes, biotechnology ventures, pharmaceutical, automobile, steel, oil & gas exploration projects need to comply with various mandatory safety regulation, these segments has been contributing hugely to the growth of the country's fire & safety market. However, the market potential is still largely untapped due to lack of awareness, stringent regulations and a common perception of fire safety equipment being perceived as an unproductive outlay. A separate fire safety act for each state is yet to come into effect, due to which ground level monitoring is still not rigorous.

According to "India Fire and Safety Equipment Market by Type, By End User, Competition Forecast & Opportunities, 2011 – 2021", fire & safety equipment market in India is projected to grow at a CAGR of over 8% during 2016 - 2021 on account of increasing industrialization, commercialization and urbanization. In 2015, firefighting equipment segment was the largest segment in the country's fire & safety equipment market. The segment grabbed a share of more than 60% in 2015 and is likely to be driven by increasing government focus towards industrialization, infrastructural development and commercial construction. The industrial sector is expected to hold the largest share in the country's fire and safety equipment market through 2021. Western Region dominates fire & safety equipment market in India, driven by increasing demand from refineries, petrochemical, city gas distribution and gas based power plants in the region. We benefit from our relationship with our Promoter and our success depends upon the continuing services of our Promoter and executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoter and executive Directors have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoter and executive Directors. If our Promoters and executive directors unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacements, and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoter and executive Directors, along with the key managerial personnel, have over the years built relations with various customers and other persons who form part of our stakeholders and are connected with us. Majority of these work orders may require us to comply with the code of conduct and rules and regulations prescribed by our clients, which may increase our compliance costs. We may be unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls. Further any disruptions to our businesses as a result of actions outside of our control, could significantly impact the continued performance of our obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In the event that we are unable to meet the prescribed obligations, we may also be required to pay compensation or liquidated damages to our clients on the terms set out in our contracts. In certain instances, we may also be required to bear consequential liability. Certain work order may also require us to provide indemnities to our clients with respect of any negligent act or omission by or misconduct of our employees. In the event there is an in increase in claims against us for which we are not insured, our business, financial condition and results of operations may be affected.

11. An inability to effectively manage project execution may lead to project delays which may affect our business and results of operations.

Our business is dependent on our ability to effectively manage the execution of our projects. An inability to effectively manage our operations, including ineffective or inefficient project management procedures could increase our costs and expenses, result in project delays and thereby affect our profitability.

The effectiveness of our project management processes and our ability to execute projects in a timely manner may be affected by various factors including delay by the third parties who are forming part of overall project execution which may lead to delay in execution of project awarded to us. Additionally, in some projects, in case of delay due to our fault or because of defective work done by us, clients have the right to rectify the defective work, or engage a third party to complete the work and deduct additional costs or charges incurred for completion of the work from the project price payable to us. Such factors would have an effect on our results of operations and financial condition.

#### 12. We are dependent on third parties for the supply of services and finished goods.

Our business is significantly affected by the availability, cost and quality of the materials and bought out items. The prices and supply of materials and bought out items depend on factors not under our control, including domestic and international general economic conditions, competition, availability of quality suppliers, production levels, transportation costs and import duties. We majorly require finished goods for our operations and maintenance and we depend on third party for supply of such goods used in particular contracts. Any delay in supply of goods effect our projected completion of work and ultimately affect our business.

#### 13. Our projects are exposed to various implementation and other risks and uncertainties.

The operation and maintenance, installation and commissioning of our projects involves various implementation risks including construction delays, delay or disruption in supply of raw materials, unanticipated cost increases, force majeure events, cost overruns or disputes with our counter-parties.

#### In particular:

- delays in receiving drawings from third-parties or any inaccuracy in such drawings;
- we may encounter unforeseen construction problems, disputes with workers, force majeure events and unanticipated costs due to defective plans and specifications;
- unforeseen increases in or failures to properly estimate the cost of raw materials, components, equipment, labor or the inability to timely obtain them;

- > project modifications creating unanticipated costs or delays;
- delays or productivity issues caused by weather conditions;
- we may be subject to risk of equipment failure or industrial accidents that may cause injury and loss of life, and severe damage to and destruction of property and equipment;
- we may experience adverse changes in market demand or prices for the services that our projects are expected to provide and
- > other unanticipated circumstances or cost increases.

Our contracts are mostly on the basis of a fixed price or a lump sum for the project as a whole, which may not always include escalation clauses covering any increased costs we may incur. We may suffer significant cost overruns or even losses in these projects due to unanticipated cost increases resulted from a number of factors such as changes in assumptions underlying our contracts, unavailability or unanticipated increases in the cost of construction materials, fuel, labour and equipment, changes in applicable taxation structures or the scope of work, disruptions of the supply of raw

materials due to factors beyond our control, unforeseen design or engineering challenges, inaccurate drawings or technical information provided by clients, severe weather conditions or force majeure events. These risks tend to be exacerbated for longer-term contracts because there is increased risk that the circumstances under which we based our original cost estimates or project schedules will change with a resulting increase in costs. We may have to bear risks associated with any increase in actual costs for our services/products exceeding the agreed work. If any of these risks materialize, they could adversely affect our profitability, which may in turn have an adverse effect on our overall results of operation.

14. We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.

The industry, in which we are operating, is highly and increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

15. Our Company does not have exact and similar and comparable listed peer which is involved in the same line of business for a direct comparison of performance and therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.

Although, investment in the industry in which we operate has been encouraged, there can be no assurance that this will continue. We may expand geographically and may not gain acceptance or be able to take advantage of any expansion opportunities outside our current markets. This may place us at a competitive disadvantage and limit our growth opportunities. We may face additional risks if we undertake operations in other geographic areas in which we do not possess the same level of familiarity as competitors. If we undertake operations in different geographical locations than those currently is; we may be affected by various factors, including but not limited to:

and maintain; as a result, such skilled personnel are often in short supply. Our ability to compete effectively depends on our ability to attract new employees and to retain and motivate our existing employees. We may be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires. If we do not succeed in attracting well-qualified employees or retaining or motivating existing employees, our business and prospects for growth could be adversely affected.

Though we have not faced any such problem in the past, we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock- outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

# 25. We have not identified any alternate source of raising the funds required for our 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. Our Promoter and promoter group will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoter and promoter group could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations. For further details, refer "Dividend Policy" on page no. 120 of this Draft Prospectus.

## GLOBAL ECONOMIC OUTLOOK

Global activity is estimated to have contracted 4.3 percent in 2020 as a result of COVID-19, making it the fourth most severe global recession of the past 150 years, exceeded only by the first World War, the Great Depression, and the Second World War. Given the unprecedented nature of the pandemic, prospects for the global economy are uncertain, and several growth outcomes are possible. In the baseline forecast, global growth is expected at 4 percent in 2021, and is projected to with the probability of markedly worse-than expected outcomes being nearly five times higher than the historical average.

The collapse in global activity in 2020 is estimated to have been slightly less severe than previously expected, mainly due to shallower contractions in major advanced economies and a more solid recovery in China. Economic disruptions in many other EMDEs were worse than expected, however, resulting in a predominance of downgrades, including for large economies such as Argentina, India, Mexico, and Thailand. Forecasts for activity in 2021 have also been revised down in the majority of both advanced economies and EMDEs, resulting in a downgrade to global growth.

The forecast for global growth depends on the weighting methodology being used. Advanced economies account for 60 percent of global activity according to the market exchange rate weights used in the baseline projections. In contrast, these economies only account for 40 percent of global activity when using purchasing power parity (PPP) weights—a methodology that places greater weight on faster-growing EMDEs. Since advanced economies generally suffered deeper recessions and are forecast to have slower recoveries than EMDEs—especially China, which is rebounding particularly strongly—the profile for global activity is weaker when using market exchange rate weights compared to PPP weights. As a result, global GDP is estimated to have contracted 3.7 percent in 2020 and is forecast to expand 4.3 percent in 2021 using PPP weights— slightly higher than the projections using market exchange rates.

The baseline outlook assumes that pandemic control measures are able to reduce the daily number of infections in the first half of 2021. Moreover, the deployment of effective vaccines, which has begun in some countries, is envisioned to gather pace in early 2021 in advanced economies and major EMDEs, with widespread vaccination achieved by late 2021. The process for other EMDEs and for LICs is expected to take place with a lag of two to four quarters, respectively, partly reflecting distribution impediments. Vaccine deployment is assumed to moderate further in 2022, to 3.8 percent. Even by 2022, global GDP is forecast to be 4.4 percent below pre-pandemic projections, with the gap in EMDEs nearly twice as large as in advanced economies, highlighting the massive economic costs inflicted by COVID-19. Risks to this outlook are tilted to the downside, bolster a recovery in consumer and business confidence and buttress financial market sentiment. As a result, consumption is expected to continue to strengthen and investment to recover. Macroeconomic policy is assumed to remain accommodative during the forecast horizon, with continued support from monetary policy and deficits remaining wide despite some fiscal tightening.

## INDIAN ECONOMY GROWTH

With the country and world reeling under the impact of the coronavirus pandemic, the Indian economy is expected to grow at -10.3 % (i.e., a contraction) in 2020 as per the International Monetary Fund (IMF). Global growth is projected to be -4.4% (i.e., a contraction in output of 4.4%) for this year, the IMF said with the release of its World Economic Outlook October 2020 report titled, "A Long and Difficult Ascent". ## KEY DEMOGRAPHIC ASPECTS

India is the second most populous country in the world and is expected to see its population grow at the rate of 1.14% over the next five years. The urban population as a percentage of India's total population is estimated to increase from the current 32.8%, in 2017 to 35% by 2020, thereby increasing the number of people that access premium facilities. The middle class population in India has doubled from 300 million to 600 million between 2004 and 2012, according to World Economic Forum, and is likely to overtake that of US and China by 2027. India's urban population has increased from 27.8% of total population (per census 2001) to 31.2% of the total population (per Census 2011). Estimates by PwC indicate that by 2020, the average age of an Indian will be 29 years, compared with average age of 37 and 48 years, respectively, for China and Japan. This young population will help constitute a large working population, with an estimated 64% of India's population to be in the working age population by the fiscal year 2021.

## ROAD AHEAD

Services sector growth is governed by domestic and global factors. The Indian facilities management market is expected to grow at 17% CAGR between 2015 and 2020 and surpass the US\$ 19 billion mark supported by booming real estate, retail, and hospitality sectors.

## INDIA FIRE AND SAFETY EQUIPMENT MARKET FORECAST AND OPPORTUNITIES

Over the last decade, India has witnessed a substantial increase in terms of awareness about fire safety and security. The rapidly expanding IT and retail markets across the country have significantly contributed towards the growth of the fire & safety equipment sector, and this trend is likely to continue over the coming years. As large refineries, petrochemical complexes, biotechnology ventures, pharmaceutical, automobile, steel, oil & gas exploration projects need to comply with various mandatory safety regulation, these segments has been contributing hugely to the growth of the country's fire & safety market. However, the market potential is still largely untapped due to lack of awareness, stringent regulations and a common perception of fire safety equipment being perceived as an unproductive outlay. A separate fire safety act for each state is yet to come into effect, due to which ground level monitoring is still not rigorous.

According to "India Fire and Safety Equipment Market by Type, By End User, Competition Forecast & Opportunities, 2011 – 2021", fire & safety equipment market in India is projected to grow at a CAGR of over 8% during 2016 - 2021 on account of increasing industrialization, commercialization and urbanization. In 2015, firefighting equipment segment was the largest segment in the country's fire & safety equipment market. The segment grabbed a share of more than 60% in 2015 and is likely to be driven by increasing government focus towards industrialization, infrastructural development and commercial construction. The industrial sector is expected to hold the largest share in the country's fire and safety equipment market through 2021. Western Region dominates fire & safety equipment market in India, driven by increasing demand from refineries, petrochemical, city gas distribution and gas based power plants in the region. # 2. Operation and Maintenance/ Installation of GLF/Airfield Lighting System, Supply of Electrical and GLF Spares

This airfield Lights like (Run Way End Lights (REL – Red and Green) enables the pilots to identify to stop the flights as runway is ending, Centre Line lights (White and Red) to enables the pilots to identify to take off the flights. Operation and Maintenance/Installation GLF/Airfiled Lighting System (Precision Approach Path Indicator –PAPI Lights, RWY Edge Lights, Approach Lights, Taxiway Edge Lights, Landing T, Wind Sock Signage etc. on operation area, Runway, Taxiway, Apron etc. Installation of Hi-Mast Lights, Obstruction Lights, Approach Road Lights and street Lights. We also supply electrical and GLF spares as per requirements of AAI.

# 3. Perimeter Lighting Work

Every perimeter lighting application is unique. Whether you are lighting the perimeter of a power station, a prison, or an airport, there are general standards and recommended practices for using the correct lighting solution and the best design approach for sites with typical characteristics.

Absorption filters allow the required light colour to pass through the filter and absorb the light with the other colours. When a lamp such as an airfield lighting tungsten filament globe is used with glass absorption filters, the amount of coloured light that passes through the different colour filters is: » red 15% » green 15% » yellow 35% » blue 5%. It is clear from the list above that a great deal of energy is lost in the process of producing a coloured light using white light.

Perimeter Lighting work by our company on relocation of perimeter pole from existing location to new location. It includes excavation of existing pole from ground, relocating and fixing the existing pole to new location etc. as required and making good the same as per the site conditions.

#### 4. FIRE EXTINGUISHERS SYSTEM

# Application/How does it work:-

Fire extinguishers identify as red colour cylinders, seen generally at the doors. Fire Extinguishers come of a variety of types, sizes and for different applications.

#### **Operate:**

One can best, operate a Fire Extinguishers, by using the PASS principle:

- 1) **P: PULL** the pin form the handle.
- 2) **A: AIM** the nozzle at the base of the fire.
- 3) **S: SQUEEZE** the handle, and don't let go.
- 4) **S: SWEEP** the nozzle from side to side.

## Type:

Water Type Dry Chemical type CO2 type Foam Type Wet Chemical Type

# 5. FIRE HYDRANT SYSTEM

# Application/How does it work:

Fire Fighting Hydrant Systems are the most commonly used systems, in many residential and industrial projects. Fire Hydrant Systems are very strong and can be used from medium to large sized fires. Fire Hydrant Systems have a long range. Since the Fire Hydrant System is spread out, the fire hydrant can attack fire from different angles. This entire systems requires low maintenance and virtually, does not leak water. Besides this, Fire Hydrant Systems have a long life. The pump has the work, to continuously filling all the pipes connected with water under pressure. The pressure is nearly 7 bar to 10 bar.

# **Equipment/Items Used:-**

- > Fire Hydrant Pump
- > Control Panel to operate fire pumps
- Mild Steel/Galvanized Iron Pipes with heavy duty class
- > Pressure Switch
  - Pressure gauges
- Butterfly Valves
- Non Return Valves
- ➤ Ball Valves
- > Hydrant Valves
- ➤ Hose Pipes
- > Branch Pipes
- ➤ Hose Cabinets
- ➤ Hose Reel
- > Four way fire brigade inlet
- > Two way fire brigade inlet

#### 6. FIRE SPRINKLER SYSTEM

#### Application/How does it work:

The "Sprinkler" is a heat sensing device. Sprinkler Systems are of various types, temperature ranges and designs. The heat sensing element (of the Sprinkler) is pointed to the floor or to the area most prone to fire. The other end of the Sprinkler is connected to a network of pipes storing water under high pressure. Usually from 7bar to 10bar.

When there is a fire, near a Sprinkler; whose temperature is higher than the temperature rated value of the, heat sensing element in the Sprinkler. The bulb present inside the Sprinkler, or the heat sensing device bursts and water now flows through the Sprinkler Systems under pressure directly on to the fire affected area.

All of this is automated and happens, within 3mins, of the fire being detected. In this way Fire Protection Sprinkler System is an automatic, Fire Detection and Extinguishing System. However, Fire Sprinkler Systems was originally meant for Fire Suppression only. Fire Sprinkler Systems are so designed to, be completely automated. This is their major advantage above all other systems. They do not require human intervention of any kind. The basic concept, is that fire will suppressed, at an infant stage. This will stop it from spreading. This is especially more advantages, if it is a residential project. As the Fire Protection System fights the fire, residents can be evacuated from the building. Hence, the chances of any person getting injured or killed because of fire, are very slim. Sprinkler System for Fire Fighting is a very effective method to suppress fire or the spread of fire.

# **Equipment/Items to be Used:-**

- > Control Panel to operate fire pumps
- Mild Steel/Galvanized Iron Pipes with heavy duty class
- Pressure Switch
- Pressure gauges

#### 7. FIRE DETECTION SYSTEM

#### Application/How does it work:-

Fire Detection System in India or Fire Alarm Systems (FAS) are an early warning system for industrial or residential complexes. A Fire Alarm System is a passive system, meaning it does not stop the fire from spreading. It means that the Fire Alarm System does not actively fight the fire. The main function of a Fire Alarm System is to give an early warning, that the fire has taken place in the factory or residential complex. This means that, the people in proximity to that area have an early warning to evacuate the building. However the fire will continue to burn, unless if an active system like Fire Hydrant System or Fire Sprinkler System is engaged.

The second function of the Fire Alarm System is to, alert the responsible authorities. Here the authorities may be the local Fire Department or the Emergency Action team.

The third function is to support the Fire Brigade, when they enter the building on fire. A Fire Alarm System also provides necessary emergency lighting, so that the Fire Team can navigate through the smoke and the dust.

There are two types of Fire Alarm Systems, based on the detection of location of fire:

- 1. Addressable Fire Alarm Systems
- 2. Non- Addressable Fire Alarm Systems

# **Equipment/Items to be Used:-**

- > Addressable Fire Alarm Panel
- Conventional (Non Addressable) Fire Alarm Panel
- Repeater Panel
- Smoke Detector
- ➤ Heat Detector
- ➤ Multi-criteria (Smoke + Heat) Detector
- Manual Call Point
- Hooter
- Response Indicator
- > Cables

The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Retail Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later ("UPI Phase II"), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. However, due to the outbreak of COVID-19 pandemic, UPI Phase II has been further extended by SEBI until further notice, by its circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020. Thereafter, the final reduced timeline of T+3 days may be made effective using the UPI Mechanism for applications by Retail Individual Investors ("UPI Phase III"), as may be prescribed by SEBI. #### RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP"), has issued consolidated FDI Policy Circular of 2017 ("FDI Policy 2017"), which is effective from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The Reserve Bank of India ("RBI") also issues Master Circular on Foreign Investment in India every year. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by Reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionalites (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any 'fit and proper/due diligence' requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company.
