INTERNAL RISK FACTORS

A. Business Risks/Company Specific Risk

1. Our business will suffer if we fail to anticipate and develop new services and enhance existing services in order to keep pace with rapid changes in technology and the industries on which we focus.

The Digital Transformation Solutions & Services market is characterized by rapid technological changes, evolving industry standards, changing client preferences, and new service introductions that could result in technology obsolescence. Our future success will depend on our ability to anticipate these advances, enhance our existing offerings or develop new service offerings to meet client needs, in each case, in a timely manner. We may not be successful in anticipating or responding to these advances on a timely basis, or at all. If we do respond, the services or technologies we develop may not be successful in the marketplace. We may also be unsuccessful in stimulating customer demand for new and upgraded services, or seamlessly managing new service introductions or transitions. Our failure to address the demands of the rapidly evolving IT environment, particularly with respect to emerging technologies, and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition. In addition, our success also depends on our ability to proactively manage our portfolio of technology alliances.

Additionally, during the regular course of operating our business, we may adjust our future plans as a result of our research, experience, technology evolution and market demand. Accepting unforeseen business opportunities may also result in a business model change. We cannot guarantee that any adjustment in our future plans will become successful or be more successful than our current business model. A shift in our plans may result in the use of other technologies. Other technologies may in the future prove to be more efficient and/or economical to us than our current technologies. We cannot guarantee that any change in technology will become successful or be more successful than our current technology.

2. We intend to utilize a portion of the Net Proceeds as identified in the section titled “Objects of the Offer” in this Draft Red Herring Prospectus, towards expansion of business

We intend to utilize a portion of the Net Proceeds for funding our business expansion. This includes investments to strengthen our subsidiaries for Sales, Pre-Sales & Project Management capacity, and Sales & Marketing Operations with Pre Sales & Project Management Capabilities across EMEA & APAC. For further details refer “Objects of the Offer” on page 78. Expansion of business will also include increase in the development centre capacity in India to accommodate an expansion of up to 150 member team and for hardware, and requisite software licenses costs.

As on the date of filing this Draft Red Herring Prospectus, we have not entered into any definitive agreements to execute our expansion plans. The estimates are based solely on management estimates of the amounts to be utilized towards such investments. The investments have not been appraised by any bank or financial institution.

This is based on current conditions and is subject to change in light of changes in external circumstances, costs, other financial conditions or business strategies. Our management will have broad discretion on the deployment of the Net Proceeds. We are yet to place orders for such expenditure.

Further, as the deployment of the Net Proceeds will be at the discretion of our Company and we cannot assure you that we will be able to monitor and report the deployment of the net proceeds in a manner similar to that of monitoring agency. As per the SEBI ICDR Regulations, we do not have a requirement to appoint a monitoring agency. We may have to revise our expenditure and funding requirements as a result of variations in costs, estimates, quotations or other external factors, which may not be within the control of our management. Any revision or variation in the deployment of Offer proceeds will be made after complying with the SEBI regulations and applicable provisions of Companies act, 2013.

3. We propose to utilize part of the Net Proceeds towards the acquisition of businesses in similar or complementary areas for which the targets have not yet been identified.

We propose to utilize our Net Proceeds towards the acquisition of businesses in similar or complementary areas. Targets of acquisition are not yet finalized. We shall comply with the provisions of Companies Act, 2013 and SEBI ICDR Regulations with respect to utilization of Offer proceeds. As on date of filing this Draft Red Herring Prospectus, we have not entered into any definitive agreements towards such Acquisitions. The estimates are based solely on management estimates of the amounts to be utilizing towards an acquisitions and other relevant considerations. The actual deployment of funds will depend on a number of factors, including the timing, nature, size and number of strategic initiatives undertaken, as well as general factors affecting our results of operations, financial conditions and access to capital. In the interim, the Net Proceeds proposed to be utilized towards this object shall be deposited only in the scheduled commercial banks included in the Second Schedule of the Reserve Bank of India Act, 1934. For further details in relation to this object, please see section titled “*Objects of the Offer*” on page 78 of this Draft Red Herring Prospectus.

4. Our investments in human capital and technology may not yield the intended results

We invest in and intend to continue investing in human capital to enhance our technical capabilities, particularly with a view to enter into new areas. Our focus areas currently include developing integrated digital transformation frameworks based on Microsoft Business Applications & the Microsoft Stack, for the industries of our focus. We engage in developing intellectual property combining industry knowledge with our technical expertise. Our choice of focus areas and investments in technology and human capital are based on the management’s perception of the industry. We cannot assure you that such investments will yield the intended results. Inability of our Company to achieve intended results from its investments in technology and human capital may adversely impact our cash flows and results of operations.

5. Any inability to license or incorporate software and technology from Microsoft in our solutions may adversely impact our business, financial position, results of operations and cash flows.

Our success depends to a great extent on the Microsoft technology that we use in our solutions & services. We have partnered with Microsoft for accessing Microsoft content, information, sales tools, documentation, branding materials such as logos, and resources, Microsoft offers, incentives, campaigns, funds, programs and Microsoft software, services, products, and technologies. Any disruption in our partnership model with Microsoft may impact our ability to develop new services and/or our profitability.

6. Our pricing structures do not accurately anticipate the cost and complexity of performing our work and if we are unable to manage costs successfully, then certain of our contracts could be or become unprofitable.

We negotiate pricing terms with our clients utilizing a range of pricing structures and conditions. Depending on the particular contract, we may use time-and-materials pricing, pursuant to which we typically invoice on a

monthly basis for the services that we provide to our clients. We also enter into fixed-price arrangements, pursuant to which we provide a defined scope of work over a fixed timeline for a capped fee. In certain instances, we enter into time-and-materials pricing arrangements, but with the inclusion of fixed-price elements for certain specified services.

Our ability to improve or maintain our profitability is dependent on managing our costs successfully. Our cost management strategies include maintaining appropriate alignment between the demand for our services and our resource capacity, optimizing the costs of service delivery through deployment of tools, and effectively leveraging our sales & marketing, General and Administrative costs. We also have to manage additional costs to replace or upgrade our solutions in the event our clients are not satisfied in relation thereto and believe we have failed to properly understand their needs and develop solutions accordingly. Our pricing structure is highly dependent on our internal forecasts and the potential demand for our services by our clients. This might often be based on limited data and could be inaccurate. Although we use software engineering processes and rely on our past project experiences to reduce the risks associated with estimating, planning and performing fixed-price projects, we bear the risks of cost overruns, completion delays and wage inflation in connection with these projects. There is no guarantee that these, or other cost- management efforts, will be successful, that our efficiency will be enhanced, or that we will achieve desired levels of profitability.

If we do not accurately estimate the resources required, costs and timing for completing contracts, future rates of wage inflation and currency exchange rates, or if we fail to complete our contractual obligations within the contracted timeframe, our contracts could prove unprofitable for us or yield lower profit margins than anticipated. There is a risk that we will underprice our contracts, fail to accurately estimate the costs of performing the work or fail to accurately assess the risks associated with potential contracts. In particular, any increased or unexpected costs, or wide fluctuations compared to our original estimates or delays, or unexpected risks we encounter in connection with the performance of this work, including those caused by factors outside of our control, could make these contracts less profitable or unprofitable, which could adversely impact our profit margin.

7. Intense competition in the market for technology services could affect our pricing, which could reduce our share of business from clients and decrease our revenues and profitability.

We operate in a competitive industry that experiences rapid technological developments, and changes in customer requirements. Our competitors include the big four Global System Integrators, in addition to some mid-sized, and several smaller local competitors in the various geographic markets in which we operate.

We may face competition from companies that grow in size or scope as the result of strategic mergers or acquisitions, which may result in larger competitors with significant resources that benefit from economies of scale and scope. Such events could have a variety of negative effects on our competitive position and our financial results, including reducing our revenue, increasing our costs, and lowering our gross margin percentage.

If our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to Offer services similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and client needs, our competitors may be more successful at selling their services. If we are unable to provide our clients with superior services and solutions at competitive prices or successfully market those services to current and prospective clients, our business, results of operations and financial condition may suffer. Further, a client may choose to use its own internal resources rather than engage an outside firm to perform the types of services we provide. We cannot be certain that we will be able to sustain our current levels of profitability or growth in the face of competitive pressures, including competition for skilled technology professionals and pricing pressure from competitors employing an on-site/ offshore business model.

We may face competition in countries where we currently operate, as well as in countries in which we expect to

expand our operations and may have limited or no experience. Some of our competitors have significantly greater financial, technical and marketing resources, generate greater revenues, have more extensive existing client relationships and technology partners and have greater international brand recognition than we do. Competing successfully against these competitors will be challenging, and may lose opportunities to these competitors. There is a risk that increased competition could put downward pressure on the prices we can charge for our services and on our operating margins. Additionally, we believe that our ability to compete also depends in part on factors outside of our control, such as the price at which our competitors offer comparable services, and the extent of our competitors' responsiveness to their clients' needs.

8. Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business.

Since we provide services to clients across geographies such as USA, Canada, Australia, Switzerland, Singapore etc. we are subject to numerous, and sometimes conflicting, legal requirements on matters as diverse as import/export controls, content requirements, trade restrictions, the environment (including electronic waste), tariffs, taxation, sanctions, government affairs, anti-corruption, whistle blowing, internal and disclosure control obligations, data protection and privacy and labour relations and certain regulatory requirements that are specific to our clients' industries. Non-compliance with these regulations in the conduct of our business could result in fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business and have an adverse impact on our reputation. Gaps in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and/or criminal prosecution, unfavourable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient to defend us and preserve our rights. We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees, partners or other related individuals.

We may be subject to risks relating to compliance with a variety of national and local laws, including multiple tax regimes, labour laws, and employee health, safety, wages and benefits laws. We may, from time to time, be subject to litigation or administrative actions resulting from claims against us by current or former employees individually or as part of class actions, including claims of wrongful terminations, discrimination, misclassification or other violations of labour law or other alleged conduct. We may also, from time to time, be subject to litigation resulting from claims against us by third parties, including claims of breach of non-compete and confidentiality provisions of our employees' former employment agreements with such third parties or claims of breach by us of their intellectual property rights. Our failure to comply with applicable regulatory requirements could have a material adverse effect on our business, financial condition and results of operations.

9. Failure to offer customer support in a timely and effective manner may adversely affect our relationships with our customers.

From time to time, our customers require our customer support team to assist them in using our services, help them in resolving post-deployment issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our customers effectively, it could adversely affect our ability to retain existing customers and could prevent prospective customers from adopting our services. We may be unable to respond quickly enough to accommodate short-term increases in demand for customer support. We also may be unable to modify the nature, scope and delivery of our customer support to compete with changes in the support services provided by our competitors. Increased demand for customer support, without corresponding revenue, could increase costs and adversely affect our business, results of operations and financial condition.

Our sales are highly dependent on our business reputation and on positive recommendations from our customers. Any failure to maintain high-quality customer support, or a market perception that we do not maintain high-quality customer support, could adversely affect our reputation, business, results of operations and financial

condition.

10. We are subject to risks associated with expansion into new markets.

Expansion into new markets, including in India and overseas, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions.

The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets.

By expanding into new markets, we could be subject to additional risks associated with establishing and conducting operations, including: compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in

- laws, regulations and practices and their interpretation; local preferences and service requirements;
- fluctuations in foreign currency exchange rates;
- inability to effectively enforce contractual or legal rights and adverse tax consequences;
- differing accounting standards and interpretations;
- stringent as well as differing labour and other regulations;
- differing domestic and foreign customs, tariffs and taxes;
- exposure to expropriation or other government actions; and
- political, economic and social instability.

Our Company intends to expand into existing markets. For further details, please refer to section titled “*Objects of the Offer*” beginning on page 78 of this Draft Red Herring Prospectus. By expanding, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

11. If our services do not effectively inter-operate with our users existing or future IT infrastructures, installations could be delayed or cancelled, which would harm our business.

Our services must effectively inter-operate with our customer’s existing or future IT infrastructures, which often have different specifications, and may be based on different platforms, deploy products/services from multiple vendors, use various devices, and contain multiple generations of products/services that have been added over time. If we find errors in the existing software and defects in the hardware used in our user’s infrastructure or problematic or incompatible network configurations or settings, we may have to modify our software so that our services can effectively inter-operate with our customer’s infrastructure and business processes. In addition, to stay competitive within certain markets or to comply with new statutory or regulatory requirements, we may be required to make software modifications in future releases of our offerings. These issues could result in longer sales cycles for our services which may adversely affect our business, financial condition, results of operations and cash flows.

12. We may be liable to our clients for damages caused by system failures, disclosure of confidential information or data security breaches, which could harm our reputation and cause us to lose clients.

Many of our contracts involve contracts that are critical to the operations of our clients’ businesses and provide benefits to our clients that may be difficult to quantify. Any failure in a client’s system could result in a claim for substantial damages against us, regardless of our responsibility for such failure. In addition, we often have access to, or are required to collect and store, confidential client data. We face a number of threats to our data

centres and networks such as unauthorized access, security breaches and other system disruptions. It is critical to our business that our infrastructure remains secure and is perceived by customers to be secure.

We seek to rely on encryption and authentication technology licensed from third parties to provide the security and authentication necessary to effect secure online transmission of confidential client information. Despite our security measures, advances in computer capabilities, new discoveries in the field of cryptography or other events or developments may result in a compromise or breach of the algorithms that we use to protect sensitive customer transaction data. Breaches of our security measures or the accidental loss, inadvertent disclosure or unapproved dissemination of confidential customer data could expose us, our customers or the individuals affected to a risk of loss or misuse of this information, or cause interruptions in our operations. We may be required to expend significant capital and other resources to protect against such security breaches, to alleviate problems caused by or to investigate such breaches, all of which could subject us to liability, damage our reputation and diminish the value of our brand name.

Although we attempt to limit our contractual liability for consequential damages in rendering our services, many of our client agreements do not limit our potential liability for breaches of confidentiality and we cannot be assured that such limitations on liability will be enforceable in all cases, or that they will otherwise protect us from liability for damages. Moreover, if any person, including any of our employees or former employees or subcontractors, penetrates our network security or misappropriates sensitive data, we could be subject to significant liability from our clients or from our clients' customers for breaching contractual confidentiality provisions or privacy laws. Unauthorised disclosure of sensitive or confidential client and customer data, whether through breach of our computer systems, systems failure, loss or theft of assets containing confidential information or otherwise, could render us liable to our clients for damages, damage our reputation and cause us to lose clients.

A successful assertion of one or more large claims against us could adversely affect our revenues and results of operations. We may also be liable to our clients for damages or termination of contract if we are unable to address disruption in services to them with adequate business continuity plans and/or for non-compliance with our clients' information security policies and procedures.

Further, our Company is yet to apply for the registration of word “All E Technologies”, ‘Alletec’ or the logo in relation to its business as on the date of filing of this Draft Red Herring Prospectus. It may be possible that the trademark registration continues to not be applied for or applied but not approved or use of similar/ same name by third parties, may cause the validity or scope of the application to be challenged. In such situations, the Company may not have a strong recourse to legal proceedings to protect its trademark which could have an adverse effect on our business and/or reputation. In such a scenario, we may also be required to invest significant resources in developing new brands or logos, which could materially and adversely affect our business, financial condition, results of operations and prospects.

28. We do not own the Registered office and other office premises. Any dispute in relation to lease of our premises may have an adverse effect on our business and results of operations.

We do not own the registered office and other office premises from which we operate. The said offices are taken on lease or license and in case of non-renewal or termination of such deed or renewal on such terms and conditions that are unfavourable to our Company, we may suffer disruption in our operations which may adversely affect our financial conditions. For further details regarding our properties, please refer to the Section titled “Our Business” on page 97 of this Draft Red Herring Prospectus. Any disputes arising in future may affect our business relations and our results of operations.

Any failure to renew the said agreement could force us to procure new premises, including substantial time and cost of relocation or procure new premises. In addition, we may not be able to identify satisfactory new premises or may have to incur substantial additional costs towards those premises. Any of the aforesaid could have an adverse effect on our business, results of operation and financial condition.

29. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

30. Our insurance coverage may not adequately protect us against certain operating hazards and this may have a material adverse effect on our business.

We have taken insurance cover in respect of our assets & leased premises, Employee Health & Life, General Liability, Business Package, E&O Liability, and Cyber Risk which may not be adequate enough for covering the entire future unforeseen liabilities. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time by the insurers. To the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our business operations and cash flows may be affected. For details on Insurance cover, please see “Insurance” the chapter titled “Our Business” beginning on page 97 of this Draft Red Herring Prospectus.

We are also subject to the labour laws like depositing of contributions with Provident Fund, ESIC, etc. Though, we have deposited the required returns and paid taxes thereon under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of our Company.

32. Our Promoters will continue to retain significant control in the Company after the Offer, which will enable them to influence the outcome of matters submitted to shareholders for approval. Our Promoters may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

After completion of the Offer, our Promoters will hold 1,00,87,872 of the equity shares capital of the Company and continue to retain a significant control of the Company. As a result, our Promoters and our Promoter Group will have the ability to control our business, including matters relating to sale of all, or a substantial portion of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as our Promoters continue to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. Our Promoters may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

33. Delay in filing of certain forms under Companies Act with Registrar of Companies (RoC).

In the past, there have been certain instances of delays in filing statutory forms as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC. Further, there have been instances of non-filings of statutory forms with RoC as per the reporting requirements laid down under the Companies Act 1956 and Companies Act, 2013

No show-cause notice in respect to the above has been received by our Company till date and except as stated in this Draft Red Herring Prospectus, no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

34. Reliance has been placed on declarations furnished by Directors for the details of their profiles included in this Draft Red Herring Prospectus:

Our Directors have been unable to trace copies of certain documents pertaining to their educational qualifications and Experiences. While we have taken the requisite steps to obtain the relevant supporting documentation, we may not be able to procure all the relevant supporting documentation. Accordingly, our Company and the BRLM have placed reliance on the declarations furnished by Directors, to disclose such details in this Draft Red Herring Prospectus and neither we, nor the BRLM have been able to independently verify these details in the absence of primary documentary evidence. Further, there can be no assurances that they will be able to trace the relevant documents pertaining to the educational qualifications in the future, at all. Therefore, we cannot assure you that all or any of the information relating to their educational qualifications included in

“Our Management” on the beginning page 131 is accurate.

35. Third party industry and statistical data in this Draft Red Herring Prospectus may be incomplete, incorrect or unreliable.

We have not independently verified data from industry and other publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

36. Our Company will not receive any proceeds from the Offer for Sale by the Selling Shareholder

The Offer consists of the Fresh Issue by our Company and an Offer for Sale by the Selling Shareholder. The entire proceeds of the Offer for Sale will be transferred to the Selling Shareholder and will not result in any creation of value for us or in respect of your investment in our Company. For further details, see “Objects of the Offer” and “Capital Structure” on pages 78 and 61, respectively

B. Risk related to this Offer and our Equity Shares

37. Any future Offer of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors’ shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

38. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The amount of our future dividend payments, if any, will depend upon our Company’s future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

39. There is no guarantee that the Equity Shares issued pursuant to this Offer will be listed on the NSE Emerge in a timely manner.

We have applied to NSE to use its name as the Stock Exchange in this offer document for listing our shares on the NSE- Emerge. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the NSE- Emerge. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

40. The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.

The Offer Price of the Equity Shares will be determined by our Company and selling shareholder in consultation with the BRLM and will be based on numerous factors. For further information, see the section titled “Basis for Offer Price” on page 84 of this Draft Red Herring Prospectus. The Offer Price may not be indicative of the

market price for the Equity Shares after the Offer. The market price of the Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. There can be no assurances that investors who are allotted Equity Shares through the Offer will be able to resell their Equity Shares at or above the Offer Price.

EXTERNAL RISK FACTORS

41. The determination of the Price Band is based on various factors and assumptions, and the Offer Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer.

The determination of Price Band is based on various factors/ assumptions, and will be determined by our Company and the Selling Shareholder in consultation with the Book Running Lead Manager. Furthermore, the Offer Price of the Equity Shares will be determined by our Company and the Selling Shareholder, in consultation with the Book Running Lead Manager through the book building process prescribed under the SEBI ICDR Regulations.

The Offer Price will be based on numerous factors, as described under “Basis for Offer Price” beginning on page 84 and may not be indicative of the market price for our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company’s performance. As a result of these factors, we cannot assure you that investors will be able to resell their Equity Shares at or above the Offer Price.

42. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Bidders are not permitted to withdraw their Bids after the Bid/Offer Closing Date

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. RIIs can revise or withdraw their Bids during the Bid/Offer Period. While our Company is required to complete Allotment pursuant to the Offer within such period as may be prescribed under applicable law, events affecting the Bidders’ decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, financial condition and results of operations may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of our Equity Shares even if such events occur, and such events limit the Bidders’ ability to sell our Equity Shares Allotted pursuant to the Offer or cause the trading price of our Equity Shares to decline on listing. QIBs and Non-Institutional Bidders will not be able to withdraw or lower their bids following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or otherwise, between the dates of submission of their Bids and Allotment

43. The occurrence of natural or man-made disasters or outbreak of global pandemics, could adversely affect our results of operations, cash flows and financial condition

Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business. The occurrence of natural disasters, including prolonged spells of abnormal rainfall, cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, infectious disease outbreaks and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could

adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

44. Political instability or changes in the Government could adversely affect economic conditions in India generally

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally.

45. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

46. Economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

47. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

48. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

49. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax ("STT") is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

The actual deployment of funds towards investment in Subsidiaries will depend on a number of factors, including the timing, nature, size and number of initiatives undertaken, as well as general factors affecting our results of operation, financial condition and access to capital. Further, the intended investment is based on estimates and the decisions of the management. In order to leverage the market opportunities, our Company may also explore opportunities to set up new subsidiaries in new geographies. Expansion of business being the most crucial factor for the growth of the company, all avenues organic/ inorganic will be explored and thoughtfully executed.

Speed of growth is always vital to leveraging opportunities to their fullest. The fields of Digital Transformation, Business Applications, Data & AI have been rapidly changing and growing in the recent past. General IT Market Overview

The IT services market is expected to register a CAGR of about 10.36 % during the forecast period, 2022-2027. Globally, the increased IT spending, coupled with the widespread adoption of software-as-a-service and increased cloud-based offerings, indicates the demand for IT services in the industry. With an improved IT infrastructure, threats related to data (data breaches) are also on the rise. This demands advanced security solutions over traditional ones. With this trend gaining traction in the market, companies have started to invest their resources in enhancing their advanced security offerings.

Trends like 5G, Blockchain, AR, and AI, are likely to have an impact on the offerings of IT services. With 5G technology on its way, it is likely to ensure that the companies may set up networks on their premises. The digital transformation is expected to enable either setting up new networks as per local frequencies or upgrading existing networks on LTE. This requires the creation of real-time IT locations to facilitate the automation and autonomy of complex systems.

Data-driven analysis, supported by technology, is driving strategic decisions globally. Moreover, the amount of data generated worldwide is increasing tremendously. According to Seagate Technology PLC, the volume of data created globally is expected to increase to 47 zettabytes and 163 zettabytes in 2020 and 2025, respectively, from 12 zettabytes in 2015. To optimally utilize these data reserves, IT service providers must develop smart IT services and platforms to analyse the data for extraction and analysis.

IT cloud services are witnessing growth due to the massive cloud deployments across the end-user industries. For instance, the US market houses the headquarters for the leading global cloud providers, where the country has a huge share of cloud storage. The amount of data being generated in the country has led to a significant driver of cloud adoption.

The usage of AI technology is also extending its application across the areas of the manufacturing and design sector, thereby fueling the market demand during the forecast period.

Indian Economy:

GDP growth and Outlook

According to the provisional estimates released by the National Statistical Office (NSO) on May 31, 2022, India's real gross domestic product (GDP) growth in 2021-22 was 8.7 per cent. This works out to 1.5 per cent above the pre-pandemic level (2019-20). In Q4:2021-22, real GDP growth decelerated to 4.1 per cent from 5.4 per cent in Q3, dragged down mainly by weakness in private consumption on the back of the Omicron wave.

The tense global geopolitical situation and the consequent elevated commodity prices impart considerable uncertainty to the domestic inflation outlook. The recovery in domestic economic activity is gathering strength.

the real GDP growth projection for 2022-23 is retained at 7.2 per cent with Q1 at 16.2 per cent; Q2 at 6.2 per cent; Q3 at 4.1 per cent; and Q4 at 4.0 per cent, with risks broadly balanced.

Our Growth Strategies:

Our business growth will come primarily from the following 5 pillars:

1. **Accelerated growth of Microsoft Business Applications suite globally:** The Dynamics 365 and Power Platform solutions have been growing at a pace faster than competition in most parts of the world. This trend is getting further strengthened as Microsoft keeps enriching the product lines – with new technology, functionality, and collaboration features – at an increasing pace.
2. **International Geographies:** Nearly 45% of the Company’s service revenue is currently from international customers. Besides working on strengthening the Sales & Marketing in America and Australia, we are also working on developing business in the relatively less tapped geographies of Africa, and have already started generating business.
3. **Inorganic Growth:** We are working to identify right sized businesses in the US, Europe and Australia to speed up growth. With the power of the Indian operations at their back, these acquisitions will become significantly more competitive in their markets.
4. **Growth in BI | ML | Data & AI:** The Business Intelligence & Machine Learning, together with Data & Artificial Intelligence revenue segments will experience significant growth. The traditional custom development projects are also rapidly shifting to low-code/ no-code platforms, and we are in a position to leverage this shift. Our existing base of customers brings to us the opportunity to move quickly.
5. **Managed Services & Security Solutions:** The managed services revenue has been steadily growing. The Microsoft Security solutions, comprising - identity and access management, threat protection, information protection, and cloud security are also poised to grow in the next couple of years. These offerings fall adjacent to the current offerings of our Company.

Strategy for Customer Acquisition and Brand Building

Customer acquisition and brand building are core business functions, and a number of strategies are used to strengthen them.

1. **Strengthening sales team:** We have business development personnel based in a few geographies, and we continue to strive to strengthen our team. Besides primary presence in Delhi NCR and Bangalore, we engage in active sales in most other parts of India. We also have a senior business development person based in the US to head the sales function in that region. We are currently working to position a dedicated salesperson in Africa and in Australia.
2. **Sales Associates:** We have signed up sales partnerships with select companies in Canada, USA and Africa. These have been in place for a few years and are mature. Four of these partnerships are active and keep yielding results at regular intervals. We explore partnership opportunities for the geographies of our interest, particularly if we don’t have a direct presence in the region.
3. **Microsoft relationship:** By virtue of us being amongst the most prominent partners for Microsoft Business Applications we maintain close relationships with the Microsoft Sales & Marketing teams in India, USA and

Africa. This results in Microsoft working closely with us and sharing with us leads & opportunities. Teams on both sides engage together to win business.

4. **Customer references:** This has perhaps been our most effective sales channel. Given the significant customer base we have, and the high customer satisfaction, our customers refer to us opportunities from time to time. The closure rate for these references is very high.
5. **Digital Marketing:** We have a dedicated digital marketing team that works constantly on various aspects of Digital Marketing, including SEO. Members of the delivery team, senior consultants and management members regularly create meaningful content to help the digital marketing team. The content includes articles, blogs and videos. We also run digital ad campaigns from time to time on popular platforms like LinkedIn and Google. The digital marketing initiatives result in several incoming leads. This is an area that we try to constantly strengthen.
6. **Marketing:** The marketing function works very closely with the Microsoft marketing team to conduct webinars, round tables and workshops. We work to establish industry connections and participate in their events; even being a sponsor in some of them. We also participate in various Microsoft events that bring significant networking opportunities. By virtue of us being members of the Microsoft Business Applications Inner Circle we get to participate in some exclusive events.
7. **Microsoft Master VAR:** Our Company is the exclusive Microsoft Dynamics Master VAR in India. Under the program we have built a channel of ~ 50 Sales Affiliates in India, and a few in other countries. The Sales Affiliates identify opportunities for Microsoft Dynamics in their territories and we support them to close the deals. The customers buy product licenses directly from us, and the Affiliate provides the implementation and support services. Some cross sell opportunities emerge from these customers.
8. **Partner to Partner Opportunities:** We work with a select set of large international Microsoft partners – helping them with the building & maintenance of their products, as well as with their project deliveries. Some of these relationships have been going on for a couple of years, and we constantly work to nurture more such relationships.

Our Business Cycle

On the business applications side, our two primary types of customer engagements are – Implementations and Support.

Here is the typical cycle of new customer acquisition stages/ activities:

Lead Generation
• We get leads from diverse sources. The most important sources are: Incoming leads through our website or as a result of our digital campaigns, customer references, Inside Sales, Partner network, and Microsoft.
Lead Qualification
• Our Inside Sales teams connects with the lead and qualifies it on BANT (Budget, Authority, Needs, and Timeline) criteria. Qualified leads are assigned to Sales Team, who do further qualification before accepting the lead as an opportunity.
Pre-sales Engagement
• Further conversations are carried out with different people in the customer's organization to enhance understanding of the business, and their business needs.
Solution Demo
• In most cases the customer is given a solution demo based on our understanding of the customer business and pain areas. In some cases, particularly if the opportunity is sizable, several demos have to be done. Sometimes, the Microsoft team also participates in these demos. Demo discussions help in clarifying scope.
Proposal
• Project proposals are prepared after demo conversations, and the proposal is presented to the customer.
Negotiations & Contracting
• Most of our proposals include License and Service components. Microsoft may be involved sometimes for finalizing the product pricing.
Licensing & License Fee
• Licensing is done either on the CSP model directly by us, or under an Enterprise Agreement through a Microsoft LAR. License fee terms under CSP are consumption based. We invoice the customer periodically (monthly/ quarterly). For EA, Microsoft pays to us the sales margin/ incentive
Project Execution/ Delivery
• Most Solution Implementation projects are executed using Hybrid Agile methodology. Support projects could either be dedicated support, or on basis of tickets raised.

Our Project Execution Methodology

- We adopt Hybrid Agile methodology for implementation projects
- As the first step the customer is trained on the standard Dynamics product + Our product/ solution
- User Stories are identified in consultation with the key users from customer side
- The project is broken into multiple sprints of approximately 4 weeks duration each
- Sprints are run in a sequence – detailing the user stories, solution configuration, customization, testing, acceptance
- Integration & System Testing is carried out once all the sprints are completed
- User Acceptance Testing is carried out after System Testing
- Deployment & Go Live is done after UAT sign-off
- Maintenance and Support after Go-Live

Competition

In India, we face competition at 2 levels:

1. Competition from competing products from Salesforce, Oracle and SAP
2. Competition from the Global System Integrators like PWC, KPMG and EY

While the market does have several other small and mid-sized solution providers, they do not present any significant competition for us.

In the USA and Canada market we primarily face competition from the well-established local mid-sized solution providers.

In Africa (other than South Africa) where we have started proactively building sales & marketing, we are currently facing competition from local system integrators and Dynamics partners. This is also the case in most other geographies like Europe, Middle East and APAC.

Our Competitive Advantages

When competing with other solutions from SAP and Oracle, our biggest advantage comes from the strength of the full 'Microsoft Stack'. While solutions from SAP, Oracle, Salesforce provide customers only specific point solutions e.g. ERP | CRM, the full Microsoft stack brings to customers 'everything' that they need today and are likely to need over their years of growth. The Microsoft stack (depicted in this chapter under "Microsoft Platform for Digital Transformation" of this Draft Red Herring Prospectus) provides integrated and collaborative applications that are best of breed solutions and address the needs of all stakeholders of any business.

So, the Competitive Advantages come from:

- The full Microsoft Stack strength
- Our focus on Microsoft Business Applications – ERP, CRM, Power Platform
- Experience of over 2 decades, spanning over ~ 750 customers. This is the highest number of Business Applications customers acquired by any partner from India.
- International experience of customers from over 30 countries
- Diverse industry experience – Manufacturing, Services, ecommerce, BFSI, Travel, EPC, Retail
- IP of several industry specific products and productivity tools
- One of the largest pool of resources; ~ 300 people
- Strong brand, high market reputation – both as a solution provider, and as an employer. Current

AmbitionBox rating of 4.4 and Glassdoor rating of 4.1 on 5 point scale.

- Many customers retained for more than 10 years. Several employees in the organization for more than 10 years
- Significant emphasis on Training and Development
- Strong relationship with Microsoft

Collaborations

Our most important business collaboration is with Microsoft. This collaboration is not just in India, but also in several other parts of the world, including – USA, Africa, and the Microsoft Development Center Copenhagen (MDCC). We are a Gold Partner for Business Applications – pitching our solutions and services on the base of Microsoft Business Applications. We are a CSP Tier 1 Partner – providing cloud solutions. And we work with the Engineering team in MDCC on the products.

We also have collaboration relationships with some of the Microsoft partners globally. Our relationship with Microsoft is the primary enabler of these relationships.

Locations/ Offices

We have been servicing international customers since inception. The Indian operations included 5 locations – Delhi/ Noida, Kolkata, Chennai, Mumbai and Bangalore – where we had physical office spaces. As the Covid restrictions prolonged and 100% workforce shifted to work-from-home model, the physical offices in the locations of Kolkata, Chennai, Bangalore and Mumbai remained completely unused for a long time, and were finally given up.

A significant number of employees shifted back to their hometowns and have been fully operational from there. The Covid restrictions and the recent talent war have also resulted in hiring new talent from diverse locations. Our current workforce is spread all over the country – from Kashmir to Kerala, and from Rajasthan to Bengal. While our primary physical office in Noida is all set to welcome people back, the future of work is undoubtedly going to be hybrid. This is also giving more flexibility to our hiring decisions, improving Employee Satisfaction, and keeping operational costs under better control.

The Covid restrictions and the wide acceptance of WFH has also resulted in more international prospects opening up to the idea of off-shoring.

KEY INDUSTRY REGULATIONS AND POLICIES

The following description is a summary of certain sector specific laws and regulations in India, which are applicable to us. The information detailed in this section has been obtained from publications available in the public domain. The regulations and their descriptions set out below may not be exhaustive and are only intended to provide general information to the bidders and are neither designed nor intended to substitute for professional legal advice. Judicial and administrative interpretations are subject to modification or clarification by subsequent legislative, judicial or administrative decisions.

1. Industry specific legislations

a) *The Information Technology Act, 2000 (the "IT Act") and the rules made thereunder*

The IT Act seeks to (i) provide legal recognition to transactions carried out by various means of electronic data interchange involving alternatives to paper-based methods of communication and storage of information, (ii) facilitate electronic filing of documents and (iii) create a mechanism for the authentication of electronic documentation through digital signatures. The IT Act has extraterritorial jurisdiction over any offence or contravention under the IT Act committed outside India by any person, irrespective of their nationality, if the act or conduct constituting the offence or contravention involves a computer, computer system or computer network located in India. Additionally, the IT Act empowers the Government of India to direct any of its agencies to intercept, monitor or decrypt any information in the interest of sovereignty, integrity, defense and security of India, among other things. The Information Technology (Procedure and Safeguards for Blocking for Access of Information by Public) Rules, 2009 specifically permit the Government of India to block access of any information generated, transmitted, received, stored or hosted in any computer resource by the public, the reasons for which are required to be recorded by it in writing.

The IT Act facilitates electronic commerce by recognizing contracts concluded through electronic means, protects intermediaries in respect of third-party information liability and creates liability for failure to protect sensitive personal data. The IT Act also prescribes civil and criminal liability including fines and imprisonment for computer related offences including those relating to unauthorized access to computer systems, tampering with or unauthorised manipulation of any computer, computer system or computer network and, damaging computer systems and creates liability for negligence in dealing with or handling any sensitive personal data or information in a computer resource and in maintaining reasonable security practices and procedures in relation thereto.

The IT Act empowers the Government of India to formulate rules with respect to reasonable security practices and procedures and sensitive personal data. In exercise of this power, the Department of Information Technology, Ministry of Electronics and Information Technology, Government of India ("DoIT"), in April 2011, notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 ("**IT Security Rules**") which prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate. The IT Security Rules require every such body corporate to provide a privacy policy for handling and dealing with personal information, including sensitive personal data, ensuring security of all personal data collected by it and publishing such policy on its website. The IT Security Rules further require that all such personal data be used solely for the purposes for which it was collected and any third party disclosure of such data is made with the prior consent of the information provider, unless contractually agreed upon between them or where such disclosure is mandated by law.

The DoIT also notified the Information Technology (Intermediaries Guidelines) Rules, 2011 ("**IT Intermediary Rules**") requiring intermediaries receiving, storing, transmitting or providing any service with respect to electronic messages to not knowingly host, publish, transmit, select or modify any information prohibited under these IT Intermediaries Rules and to disable hosting, publishing, transmission, selection or modification of such information once they become aware of it.

b) The Indian Stamp Act, 1899 ("Stamp Act")

Stamp duty in relation to certain specified categories of instruments as specified under Entry 91 of the list, is governed by the provisions of the Indian Stamp Act, 1899 which is enacted by the Central Government. All others instruments are required to be stamped, as per the rates prescribed by the respective State Governments. Stamp duty is required to be paid on all the documents that are registered and as stated above the percentage of stamp duty payable varies from one State to another. Certain State in India have enacted their own legislation in relation to stamp duty while the other State have adopted and amended the Stamp Act, as per the rates applicable in the State. On such instruments stamp duty is payable at the rates specified in Schedule I of the Stamp Act. Instruments chargeable to duty under the Stamp Act which are not duly stamped are incapable of being admitted in court as evidence of the transaction contained therein. The Stamp Act also provides for impounding of instruments which are not sufficiently stamped or not stamped at all. Unstamped and deficiently stamped instruments can be impounded by the authority and validated by payment of penalty. The amount of penalty payable on such instruments may vary from State to State

c) The Foreign Trade (Development and Regulation) Act, 1992 ("FTA") and the rules framed thereunder

The FTA is the main legislation concerning foreign trade in India. The FTA, read along with Foreign Trade (Regulation) Rules, 1993, provides for the development and regulation of foreign trade by facilitating imports into, and augmenting exports from, India and for matters connected therewith or incidental thereto. As per the provisions of the Act, the Government: (i) may make provisions for facilitating and controlling foreign trade; (ii) may prohibit, restrict and regulate exports and imports, in all or specified cases as well as subject them to exemptions; (iii) is authorized to formulate and announce a foreign trade policy and also amend the same from time to time, by notification in the Official Gazette; (iv) is authorized to appoint a 'Director General of Foreign Trade' for the purposes of the FTA, including formulation and implementation of the foreign trade policy.

Imports and exports are permitted by persons who hold an "Importer-exporter code number" ("IEC") unless specifically exempted. All imports and exports must be carried out in accordance with the applicable laws issued by the Central Government, from time to time. In the event of any contravention of the laws relating to central excise or customs or foreign exchange or any other economic offence under any other law for the time being in force as may be specified by the Central Government by notification in the Official Gazette, or if an export or import has been carried out in a manner gravely prejudicial to the trade relations of India with any foreign country, or to the interests of other persons engaged in imports or exports, or has brought disrepute to the credit or the goods of or services or technology from the country, these instances may result in the suspension and cancellation of the IEC number.

2. Intellectual Property laws

a) The Trademarks Act, 1999 ("Trademarks Act")

In India, trademarks enjoy protection under both statutory and common law and Indian trademark law permits the registration of trademarks for both goods and services. The Trademarks Act governs the statutory protection of trademarks and the prevention of the use of fraudulent marks in India. Under the provisions of the Trademark Act, an application for trademark registration may be made before the Trademark Registry by any person claiming to be the proprietor of a trade mark, whether individual or joint applicants, and can be made on the basis of either actual use or intention to use a trademark in the future.

Once granted, a trademark registration is valid for 10 years unless cancelled, subsequent to which, it can be renewed. If not renewed, the mark lapses and the registration is required to be restored. The Trademarks Act prohibits registration of deceptively similar trademarks and provides for penalties for infringement, falsifying and falsely applying trademarks. Further, pursuant to the notification of the Trademark (Amendment) Act, 2010 simultaneous protection of trademark in India and other countries has been made available to owners of Indian and foreign

trademarks. The Trademark (Amendment) Act, 2010 also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to conform Indian trademark law with international practice.

b) The Patents Act, 1970 ("Patents Act")

The Patents Act recognises both product and process patents and prescribes eligibility criteria for grant of patents, including the requirement that an invention satisfy the requirements of novelty, inventive step and industrial applicability in order for it to avail patent protection. However, the Patents Act also provides that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy such criteria. Application by an Indian resident to any foreign authority in respect of an invention made outside India is prohibited without first making an application for the invention in India. Once granted, a patent remains valid for a period of 20 years from the date of filing of the patent application, subsequent to which it can be renewed.

While the Patents Act prohibits patentability of a 'computer programme' as such, computer programmes in combination with a novel hardware are patentable. Computer programs on their own are excluded from patent protection and are protected as a literary work under the Copyright Act (defined below). In terms of the Patent Act, the patentee holds the exclusive right to prevent third parties from the using, offering for sale, selling or importing for such purposes, the patented product or product obtained directly by a process patented in India.

c) The Copyright Act, 1957 ("Copyright Act")

The Copyright Act governs copyrights subsisting in original literary, dramatic, musical or artistic works, cinematograph films, and sound recordings, including computer programmes, tables and compilations including computer databases. Software, both in source and object code, constitutes a literary work under Indian law and is afforded copyright protection and the owner of such software becomes entitled to protect his works against unauthorised use and misappropriation of the copyrighted work or a substantial part thereof. Any such acts entitle the copyright owner to obtain relief from a court of law including injunction, damages and accounts of profits. Further, copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work and once registered, copyright protection remains valid until expiry of 60 years from the demise of the author.

Reproduction of a copyrighted software for sale or hire or commercial rental, offer for sale or commercial rental, issuing copy(ies) of the computer programme or making an adaptation of the work without consent of the copyright owner amount to infringement of the copyright. However, the Copyright Act prescribes certain fair use exceptions which permit certain acts, which would otherwise be considered copyright infringement.

5. Other Relevant Legislations

a) Shops and Establishments Legislations

Under the provisions of local shops and establishments legislations applicable in the states in which establishments are set up, establishments are required to be registered. Such legislations regulate the working and employment conditions of the workers employed in shops and establishments including commercial establishments and provide for fixation of working hours, rest intervals, overtime, holidays, leave, termination of service, maintenance of shops and establishments and other rights and obligations of the employers and employees. All establishments must be registered under the shops and establishments legislations of the state where they are located. There are penalties prescribed in the form of monetary fine or imprisonment for violation of the legislations, as well as the procedures for appeal in relation to such contravention of the provisions.

b) The Consumer Protection Act, 1986 (the "COPRA")

The COPRA provides for the protection of the interests of consumers and the settlement of consumer disputes. The COPRA sets out a mechanism for consumers to file complaints against, *inter alia*, service providers in cases of deficiencies in services, unfair or restrictive trade practices and excessive pricing. The terms "defect" and "deficiency" are broadly defined and cover any kind of fault, imperfection or shortcoming in the quality, quantity, potency, purity or standard. A three-tier consumer grievance redressal mechanism has been implemented pursuant to the COPRA at the national, state and district levels. If the allegations specified in a complaint about the services provided are proved, the service provider can be directed to *inter alia* remove the deficiencies in the services in question, return to the complainant the charges paid by the complainant and pay compensation, including punitive damages, for any loss or injury suffered by the consumer. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognized in the periods in which the results are known / materialize.</p>

Note	Particulars
1.5	Revenue recognition
	Sale of product
	Sales are recognized, net of returns and trade discounts, on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers. Sales exclude Goods and Service Tax. GST is a consumption-based or destination-based tax, which implies that all tax components are levied at the point of supply. Hence, the state that will collect taxes will be decided by the place of consumption.
	Income from services
	The Company recognizes revenue from Software Implementation & support services mostly on time and material basis as and when invoices are raised in accordance with agreement with customers. Revenues from fixed priced contract are recognized when services are rendered and related costs are incurred.
	The management has a policy to raise invoice for the services rendered in the preceding month within 15 days of succeeding month. However for the services provided in the Month of March, invoices are raised in the same month.
1.6	Other Income
	Interest income is accounted on accrual basis. Dividend income is accounted for when the right to receive it is established. Any other income is accounted on receipt basis.
1.7	Property, Plant and Equipment and Depreciation
	Fixed assets, are carried at cost less accumulated depreciation and impairment losses, if any. The cost of fixed assets includes interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use and other incidental expenses incurred up to that date. Exchange differences arising on restatement / settlement of long-term foreign currency borrowings relating to acquisition of depreciable fixed assets are adjusted to the cost of the respective assets and depreciated over the remaining useful life of such assets. Subsequent expenditure relating to fixed assets is capitalized only if such expenditure results in an increase in the future economic benefits from such asset beyond its previously assessed standard of performance. Fixed assets retired from active use and held for sale are stated at the lower of their net book value and net realizable value and are disclosed separately in the Balance Sheet.
	Depreciation has been provided on the written down value over the useful life of the Asset prescribed in Schedule II of Companies Act 2013. Depreciation for the Asset purchased/sold during the period is proportionately charged. The management has a policy of depreciating assets up to 5% of their salvage value.
1.8	Foreign Currency transactions and translations
	Initial recognition
	Transactions in foreign currencies entered by the Company and its integral foreign operations are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction.
	Measurement of foreign currency monetary items at the Balance Sheet date
	Foreign currency monetary items (other than derivative contracts) of the Company and its net investment in non-integral foreign operations outstanding at the Balance Sheet date are restated at the year-end rates. In the case of integral operations, assets and liabilities (other than non-monetary items), are translated at the exchange rate prevailing on the Balance Sheet date. Non-monetary items are carried at historical cost. Revenue and expenses are translated at the average exchange rates prevailing during the year. Exchange differences arising out of these translations are charged to the Statement of Profit and Loss.
	Treatment of exchange differences
	Exchange differences arising on settlement / restatement of short-term foreign currency monetary assets and liabilities of the Company and its integral foreign operations are recognized as income or expense in the Statement of Profit and Loss. The exchange differences on restatement / settlement of loans to non-integral foreign operations that are considered as net investment in such operations are accumulated in a "Foreign currency translation reserve" until disposal / recovery of the net investment.

Note	Particulars
	The exchange differences arising on restatement / settlement of long-term foreign currency monetary items are capitalized as part of the depreciable fixed assets to which the monetary item relates and depreciated over the remaining useful life of such assets or amortized on settlement / over the maturity period of such items if such items do not relate to acquisition of depreciable fixed assets. The unamortized balance is carried in the Balance Sheet as “Foreign currency monetary item translation difference account” net of the tax effect thereon.
1.9	Employee benefits
	Employee benefits includes Provident Fund, Gratuity Fund, Compensated absences (i.e. Leave Encashment), Long Service Awards and Post-Employment Medical Benefits.
	i). Defined contribution plans
	The Company's contribution towards Provident Fund are considered as Defined Contribution Plan and are charged as an expense as they fall due based on the amount of contribution required to be made.
	ii). Defined benefit plans
	For Defined Benefit Plans in the form of Gratuity Fund and Post-Employment Medical Benefits, the cost of providing benefit is determined using the Projected Unit Credit Method, with Actuarial Valuations being carried out at the end of each Balance Sheet Date. Actuarial gains and losses are recognized in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognized immediately to the extent that the benefits are already vested and otherwise is amortized on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognized in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognized past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.
	iii). Share Based Payment - Employee Stock Option Scheme ('ESOP')
	The fair value of options granted under employee stock option plan is recognised as an employee benefits expense with a corresponding increase in Share Option Outstanding Account under Reserve & Surplus. The total amount to be expensed is determined by reference to the fair value of options. The total expense is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At the end of each period, the entity revises its estimates of the number of options that are expected to vest based on the non-market vesting and service conditions. It recognises the impact of the revision to original estimates, if any, in profit or loss, with a corresponding adjustment to equity. Upon exercise of share options, the proceeds received are allocated to share capital up to the par value of the shares issued with any excess being recorded as share premium.
1.10	Investments
	Investments are stated at cost. Investments which are listed on any recognised stock exchange fair value is mentioned for information purpose only.
1.11	Leases
	In respect of Operating lease, Lease rentals are accounted on accrual basis in accordance with the respective lease agreements.
1.12	Earnings per share
	Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive equity shares.
1.13	Borrowing costs.
	Borrowing costs include interest, amortization of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying

Note	Particulars
	assets are charged to the Statement of Profit and Loss over the tenure of the loan. Borrowing costs, allocated to and utilized for qualifying assets, pertaining to the period from commencement of activities relating to construction / development of the qualifying asset up to the date of capitalization of such asset is added to the cost of the assets. Capitalization of borrowing costs is suspended and charged to the Statement of Profit and Loss during extended periods when active development activity on the qualifying assets is interrupted.
1.14	Taxes on income
	Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961. Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognized as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company. Deferred tax is recognized on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognized for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognized only if there is virtual certainty that there will be sufficient future taxable income available to realize such assets. Deferred tax assets are recognized for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realized. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their reliability.
1.15	Provisions and contingencies
	A provision is recognized when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes.
1.16	Current / non-current classification:
	All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set-out in the Act. Deferred tax assets and liabilities are classified as non-current assets and non-current liabilities, as the case may be.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“FDI”) through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2020 (“FDI Policy 2020”), which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy from time to time and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.

The RBI issues Master Directions on Foreign Investment in India and updates the same from time to time. Presently, FDI in India is being governed by Master Directions on Foreign Investment No. RBI/FED/2017-18/60 FED Master Direction No. 11/2017-18 dated January 4, 2018, as updated from time to time by RBI. OCBs may invest in this Issue provided it obtains a prior approval from the RBI. On submission of such approval along with the Application Form, the OCB shall be eligible to be considered for share allocation.
