1. Summary of Industry

Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food processing industry accounts for 32% of the country’s total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

According to Inc42, the Indian agricultural sector is predicted to increase to US\$ 24 billion by 2025. As per First Advance Estimates for FY23 (Kharif only), total foodgrain production in the country is estimated at 149.92 million tonnes. Rapid population expansion in India is the main factor driving the industry. The rising income levels in rural and urban areas, which have contributed to an increase in the demand for agricultural products across the nation, provide additional support for this. In accordance with this, the market is being stimulated by the growing adoption of cutting-edge techniques including blockchain, artificial intelligence (AI), geographic information systems (GIS), drones, and remote sensing technologies, as well as the release of various e-farming applications.

We are into the business of supplying the goods on B2B basis. Our customer list comprises of three companies out of which two are under same management/ group. We get our major business from these two group companies and any adverse decision taken by the management may hamper our business. We do not generally have firm commitment long-term supply agreements with them and instead rely on purchase orders issued by them from time to time that set out the commercial terms, delivery conditions and the indicative volumes to be procured from us. We are totally dependent on the schedules of requirement of our customers for actual supply. These schedules may be amended or cancelled prior to delivery, and should such amendment or cancellation take place, we may be unable to seek compensation for any surplus products that we manufacture that are unpurchased. As our customers do not typically give these schedules to us until a short time before the products are required from us, we do not hold a significant order book at any time, making it difficult for us to forecast revenue, production volume or sales.

Our customers have high standards for product quality and delivery schedules. Any failure to meet their expectations could result in the cancellation or non-renewal of our supply agreements with them. Also, purchase orders are typically subject to conditions such as ensuring that all products delivered to the customers have been inspected and are safe for use. Customers may set off any payment obligations, require indemnification for themselves or their affiliates or change their outsourcing strategy by undertaking in-house any of which may have an adverse effect on our business and results of operations as 2/3 major customers are under same management.

We cannot assure you that we will be able to maintain historic levels of business and / or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders or expand our customer base on a regular basis or at all may adversely affect our business, revenues, cash flows and operations. Customers may set-off any payment obligation, require indemnification for themselves or their affiliates or change their sourcing strategy by generating in-house, any of may have an adverse effect on our business and results of operations as 2 out of 3 major customers are under same management

4. *Our Company do not own premises where the registered office of the company and godown is situated.*

Our Registered office of the company situated at A-1103 Mondeal Heights Nr. Panchratna Party Plot, S.G Highway Ahmedabad -380 015, Gujarat, India. Our registered office is taken on rent by Mr. Hiteshkumar Gaurishankar Patel from Ms. Reena Manoj Shah to the Company vide Leave and Licence agreement dated 28th June, 2022 for a period of three years from 01st July, 2022. However, if the agreement is terminated by the Company before expiry of 12 months from 01st July, 2022, security deposit shall be returned after deducting the unpaid outgoing by the owner. Terminated by either of the parties or upon expiry of the said agreement or increase in rent or any non-compliance, we may have to vacate the office and re-locate to another premises or agree to pay the extra amount for using the same premises. Also, the premises located at Survey No 10, At – Kabodari, Himatnagar-Dhansura Highway, Ta- Talod, Dist- Sabarkantha- 383305, is owned by Shri Hiteshkumar G Patel who has further constructed three distinct and segregated premises for commercial use and identified as Godown No. 1, 2 and 3.

Godown No. 1 has been leased to M/s Acoustic Eco Foods Limited, Godown No 2 has been leased to M/s Celtis Commodities Limited and Godown No. 3 to M/s Appleton Cereals Limited. There is distinct segregation between all the three facilities, and all the companies operate from their specific premises. There is no cost sharing between them. Further increase in rent structure will lead to increase of our expenditure which in turn will lead to decrease of revenue and increase operational cost.

5. *Our operations are largely dependent on the few suppliers for our raw materials such as Paddy, wheat, legumes and pulses and we have no agreement with them.*

Our Company is into the business of processing of Basmati rice and based on the requirements received from its customers, Company also processes Non-Basmati Rice, Wheat and Dal.

Our Company sources raw materials in the form of paddy, wheat, legumes and pulses etc. for various kinds of traditional Basmati rice and all kinds of Basmati and Non-Basmati Rice and Wheat from the markets of West Bengal, Uttar Pradesh, Punjab, Rajasthan and Haryana. In the same manner we are dependent upon Madhya Pradesh, Rajasthan and Gujarat for supply of Pulses (Toor, Chana, Urad, Moong etc) and Legumes (Desi Chana, Kathol, Masoor etc). Our Company has few suppliers from these regions and do not have any agreement for commitment of supplies of raw materials as the same is not feasible. The percentage of purchases made from our top 5 suppliers in the FY 21, FY 22 and FY 23 are 68.58%, 92.25% and 100% respectively. The entire supply chain has been developed and nurtured by the Management over the years and this ensures supply of best quality food grains to our Company. Our Company is highly selective of the traditional Basmati rice and all kinds of Basmati and Non-Basmati Rice, Wheat and Dal, it sources, and constantly endeavours to improve upon its quality. The Patel family which belongs to our Promoter has been in this line of activity since last 2 (two) decades, has

developed strong business relations with the suppliers and customers which is based on mutual trust and loyalty developed over the long-standing relationships.

Our business operations are highly dependent on our suppliers and the loss of any of our suppliers may adversely affect our procurement ability and ultimately affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our suppliers, we have not entered into long terms agreements with our suppliers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our suppliers. It is not practically feasible to bind the suppliers in legal agreements. However, these constituents have been dealing with the management since a very long times without any challenges. However, there is an element of risk which the company identifies it and constantly endeavours to mitigate.

6. *Our business is working capital intensive and insufficient cash flows or inability to borrow funds to meet our working capital requirements may materially and adversely affect our business and operations.*

Our business requires significant amount of working capital primarily due to the fact that it involves of high capital, and huge investment and modern processing plants are capital intensive. Our Company sources raw materials in the form of paddy, wheat, legumes and pulses etc. for various kinds of traditional Basmati rice and all kinds of Basmati and Non-Basmati Rice and Wheat from the markets of West Bengal, Uttar Pradesh, Punjab, Rajasthan and Haryana. In the same manner we are dependent upon Madhya Pradesh, Rajasthan and Gujarat for supply of Pulses (Toor, Chana, Urad, Moong etc) and Legumes (Desi Chana, Kathol, Masoor etc). Our Company has few suppliers from these regions and do not have any agreement for commitment of supplies of raw materials as the same is not feasible. The entire supply chain has been developed and nurtured by the Management over the years and this ensures supply of best quality food grains to our Company.

We purchase most of our paddy only during specific period, normally between November and January, and paddy must be aged for 12 to 18 months to ensure its premium quality. As a result of the high inventory turnover we are required to maintain a sufficient stock of raw material in the form of paddy, legumes at all times in order to meet the production requirement thus increasing our storage and working capital requirement. Consequently, there may be situations where the total fund falls short to fulfil our commitments, hence we may need to incur additional indebtedness in the future or utilize cash flows from operation and other activities to satisfy our working capital needs. If we experience insufficient cash flows or are unable to borrow funds on a timely basis, or, at all, to meet our working capital and other requirements, it could materially and adversely affect our business and results of operations.

We have incurred debt primarily to fund our working capital expenditure requirements, and, as we pursue our growth plan, we expect that we will have to raise additional funds by incurring further indebtedness or issuing additional equity to meet our planned capital expenditures. If we decide to incur more debt, our interest payment obligations will increase, and we may be subject to additional conditions from lenders, which could place restrictions on how we operate our business and result in reduced cash flows. If we decide to issue equity, the ownership interest of our existing shareholders would be diluted. There can be no assurance that we will be able to raise adequate financing on acceptable terms. However, our failure to obtain sufficient financing or maintaining our existing credit facilities could adversely affect our cash flow and financial condition and result in the delay or abandonment of our development plans.

7. *The procurement of our raw material is subject to seasonal factors. Consequently, our inability to accurately forecast demand for our products, may have an adverse effect on our business, results of operations, cash flows and financial condition.*

Our raw material in the form of paddy, wheat, legumes and pulses etc. is an agricultural product and cultivation of the raw material is seasonal. Our Company sources raw materials in the form of paddy, wheat, legumes and pulses etc. for various kinds of traditional Basmati rice and all kinds of Basmati and Non-Basmati Rice and Wheat from the markets of West Bengal, Uttar Pradesh, Punjab, Rajasthan and Haryana. In the same manner we are dependent upon Madhya Pradesh, Rajasthan and Gujarat for supply of Pulses (Toor, Chana, Urad, Moong etc) and Legumes (Desi Chana, Kathol, Masoor etc). Our Company has few suppliers from these regions and do not have any agreement for commitment of supplies of raw materials as the same is not feasible. The entire supply chain has been developed and nurtured by the Management over the years and this ensures supply of best quality food grains to our Company.

The raw materials are harvested during the different months in a year. On account of seasonality of the raw material forecast for the demand for the finished goods and procurement of raw material for production is very important. Any misjudgement in the procurement of Raw Material will result in to either out of stock raw material at competitive price or surplus in stock which will block the working capital funds in turn affect the business, result of operations, cash flow and financial conditions.

8. *The continuing effect of the COVID-19 pandemic on our business growth and operations is highly uncertain and cannot be predicted.*

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the current situation as everyone is eager to move past the COVID-19 pandemic, but the Omicron wave showed the virus is still both highly contagious and unpredictable. Even though most governments have said that they are done with lockdowns, there is still a fear that a new variant could usher in a return of travel restrictions. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Any continued spread of COVID-19 and efforts to contain the virus could reduce the availability and productivity of our employees as well.

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected minimally. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. The buoyant agro commodities sector got a shot in the arm, as demands constantly increased. Our impetus on basic cereals and were in immediate proximity with the end users. Profitability was not a concern at that time. It opened new avenues and shed light on the humane aspects of the business.

9. *Pricing pressure from our customers may adversely affect our gross margin, profitability and ability to increase our prices, which may in turn have a material adverse effect on our results of operations and financial condition.*

Our Company is into the business of processing of Basmati rice and based on the requirements received from its customers, Company also processes Non-Basmati Rice, Wheat and Dal. We have in the past experienced and may continue to experience pressure from our customers to reduce our prices, which may affect our profit margins going forward. In addition, as any price reduction is the result of negotiations and factors that may be beyond our control, we, like other manufacturers, must be able to reduce operating costs and increase operating efficiencies in order to maintain profitability. As our business is capital intensive, requiring us to maintain a large, fixed cost base, our profitability is dependent, in part, on our ability to spread fixed costs over higher sales volume. However, we may not be able to spread such fixed costs effectively as our customers generally negotiate for larger discounts in price as the volume of their orders increases. If we are unable to offset customer price reductions in the future through improved operating efficiencies, new manufacturing processes, sourcing alternatives and other cost reduction initiatives, our results of operations and financial condition may be materially adversely affected.

10. *We propose to utilize the Net Proceeds for purposes identified in the section titled "Objects of the Issue" in this Draft Prospectus. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders" approval.*

We intend to use Net Proceeds towards meeting the funding of the working capital requirements of the Company and General corporate purposes. We intend to deploy the Net Proceeds in financial year 2023-24 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled —Objects of the Issue beginning on page 58 of the Draft Prospectus. The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled 'Objects of the Issue' beginning on page 58 of this Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorize to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoter and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

11. *Inability to expand and effectively manage our distribution network adversely affect business and its operation. There may be potential conflicts of interest if our Promoters, Promoters' Group or Directors are involved in same business activities that compete with or are in the same line of activity as our business operations.*

Our Group Company are involved in similar line of Business that is being carried out by our Company. Also, our Company has entered into various transactions with our Group Companies and will continue to do in future. For detailed information for our transaction with group Company please refer to Restated financial Statement beginning on page no. 115

respectively of this Draft Prospectus. Further, we have not entered into any non-compete agreement with our said entity. We cannot assure you that our Promoters, Promoter's Group or Directors who have common interest in said entities may not favour the interest of the said entity. Any such present and future conflicts could have a material effect on our reputation, business, results of operations and financial condition which may affect our profitability and results of operations.

12. *Our Company has availed certain unsecured loans which may be recalled at any time.*

Our Company has availed certain unsecured loans of which an amount of ₹ 221.30 lakhs is outstanding as on March 31, 2023, which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see "Financial Indebtedness" on page 116 of this Draft Prospectus.

13. *We do not have any patent with respect to our manufacturing processes as on date.*

Our rights may not prevent our competitors from developing, using or commercializing products that are functionally equivalent or similar to our products. The process of seeking patent protection can be lengthy and expensive. Further, our patent applications may fail to result in patents being issued, and our future patents may be insufficient to provide us with meaningful protection or a commercial advantage.

14. *We may be subject to financial and reputational risks due to product quality and liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.*

Our products may contain quality issues or undetected errors or defects, especially when first introduced, resulting from the design or manufacture of the product or raw materials used in the product. While we test for quality on a sample basis, we cannot assure you that all products would meet the quality standards. Such quality issues can expose us to product liability claims or require us to replace such products, in the event that our products fail to meet the required quality standards, or are alleged to cause harm to customers. Further, if any of the products sold by us fail to comply with quality standards, it may result in customer dissatisfaction, which may have an adverse effect on our business, sales and results of operations.

Additionally, we face the risk of legal proceedings and product liability claims being brought against us by our Customers for various reasons including for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims, regardless of whether we are responsible for any alleged defects.

15. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

Our Company is engaged in business of manufacturing which attracts tax liability such as Income tax, and professional tax as per the applicable provisions of Law. Any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

16. *We may be unsuccessful in implementing innovation or technological advancement to our existing capabilities, which could adversely affect our business, results of operations and cash flows.*

Our future growth depends on our ability to continue to develop and commercialize innovative, viable and sustainable new automotive systems in a timely and cost-effective manner. The company is totally based on automatic machine and systems. The automotive industry is characterized by rapid and frequent advancements in technology and changes in market demand can often render existing technologies and equipment obsolete and could require substantial new capital expenditures or subject us to write-offs. Due to the long lead times associated with development for many of the technologically advanced automotive systems and components, as well as the competitive advantage that can come from being the initial developer of a new product, it is important that we maintain a sufficiently large portfolio of systems and components to market on a timely basis. If we are unable to bring the required technology or advancement into implementation it would make our pace in the market slow, our growth strategy may not be successful, and our business would be adversely affected.

17. *Any failure to adapt to industry trends and evolving technologies to meet our customers' demands may materially adversely affect our business and results of operations.*

Changes in consumers' preferences, regulatory or industry requirements, or competitive technologies may render certain of our products obsolete or less attractive.

We could also face competition for potential future revenue streams if our competitors are able to commercialise certain innovations before we can do so. We may have to procure a license for the technology, which may not be available on reasonable terms, if at all, and may significantly increase our operating expenses or may require us to restrict our business activities in one or more respects. As a result, we may also be required to develop alternative non-infringing technology, which could require significant effort and expense. If we fail to develop sufficient revenue streams covered by adequately robust intellectual property rights, we could lose market share and revenues to competitors. Any of these developments, alone or in combination, may have a material adverse effect on our business, results of operations and financial condition.

- 18. *There have been instances of delays of certain forms which were required to be filed as per the reporting Requirements under the Companies Act, 2013 to RoC. Further, there have also been instances where our Company has inadvertently filed incorrect information with the RoC in its statutory filings.***

In the past, there have been certain instances of delays in filing statutory forms, such as Form ADT-1, MGT-7 and AOC-4 XBRL as per the reporting requirements Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fees as specified by RoC. Our Company has also filed Form MGT-14 under Companies Fresh Start Scheme, 2020 ("CFSS Scheme"). Our company has inadvertently specified in the resignation of Auditor as firm in place of individual in the form ADT-3 for financial year 2021. We have not been issued any notice for any of the above mentioned details but in future we may get tracked for these discrepancies. Therefore, we cannot confirm that no action from authorities would be taken against the Company pursuant to the above explained instances which may adversely affect our business and financial operations.

- 19. *We depend on third parties for marketing and negative image of theirs may have a material adverse effect on our business.***

We are dependent on third party for market building through marketing of our products and provide help in building our network with vast no. of business clients. When a business outsources marketing activities to a third party, it may lose control over the messaging, branding, and overall marketing strategy. This can result in a mismatch between the business's values and the marketing messages being conveyed, which can damage the business's reputation. Third-party marketers may require access to the business's customer data, which can create data security risks. If the third-party marketer mishandles this data or experiences a data breach, it can result in significant financial and reputational damage to the business. They may not have the same level of expertise or commitment to quality as the business itself. This can result in low-quality marketing campaigns that fail to resonate with customers or even damage the business's reputation. Third-party marketing activities can sometimes run afoul of legal regulations, such as those related to spam email or telemarketing. If the third-party marketer engages in illegal marketing activities, the business can be held liable for any resulting legal issues or penalties. Outsourcing marketing activities to a third party can be expensive, and businesses may not always receive the return on investment they expect. Additionally, if the third-party marketer is not transparent about their fees or charges unexpected fees, it can result in financial strain for the business.

- 20. *Information relating to production capacity included in this Draft Prospectus is based on various assumptions and estimates and capacity utilisation may vary.***

Information relating to the installed capacity and capacity utilisation included in this Draft Prospectus are based on various assumptions and estimates of our management that have been taken into account by the chartered engineer Mukesh Shah (M-0231074) in the calculation of our installed capacity and capacity utilisation. Future capacity utilisation rates may vary significantly from the estimated production capacities of our manufacturing facilities and historical capacity utilization rates. In addition, capacity utilisation is calculated differently in different countries, industries and for the different kinds of products we manufacture. Undue reliance should therefore not be placed on our historical installed capacity and capacity utilisation for our existing manufacturing facilities included in this Draft Prospectus. Please refer chapter titled as "Our Business" on page 70.

- 21. *We depend on our senior management team and other personnel with technical expertise, and if we are unable to recruit and retain qualified and skilled personnel, our business and our ability to operate or grow our business may be adversely affected.***

Our success depends to a large extent on the continued services of our senior management team and other personnel with technical expertise. In an event they no longer work for us, there is no assurance that we will be able to find suitable replacements for such Key Managerial Personnel in a timely manner or at all and implement a smooth transition of responsibilities to any newly appointed management personnel. The market for qualified professionals is competitive and we may not continue to be successful in our efforts to attract and retain qualified people. We may therefore need to increase compensation and other benefits in order to attract and retain personnel in the future, which may adversely affect our results of operations.

We are a technology driven company with significant focus and investment in our in-house engineering capabilities. Our future success, amongst other factors, will depend upon our ability to continue to attract and retain qualified personnel,

particularly engineers and other associates with critical expertise, know-how and skills that are capable of helping us develop technologically advanced systems and components and support key customers and products. The specialised skills we require in our industry are difficult and time-consuming to acquire and, as a result, are in short supply. We require a long period of time to hire and train replacement personnel when we lose skilled employees. Our inability to hire, train and retain a sufficient number of qualified employees could delay our ability to bring new products or services to the market and impair the success of our operations. This could have an adverse effect on our business and results of operations.

Our success also depends, in part, on key customer relationships forged by our senior management team. If we were to lose these members of the senior management, we cannot assure you that we will be able to continue to maintain key customer relationships or renew them, which could adversely affect our business, financial condition, results of operations and cash flows.

22. *A decline in the financial condition and results of operations of our customers could have a material adverse effect on our business, results of operations and cash flows.*

The financial condition and results of operations of our customers is affected by the sales of their products to their respective customers, which may be impacted by several factors, including general economic conditions and the COVID-19 pandemic. Any material weakening of the sales of our material customers could directly impact our business due to the potential postponement or cancellation of their planned purchases or the potential delay of their designs of new platforms.

23. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “Objects of the Issue” beginning on page 58 of the Draft Prospectus.

24. *Our estimates of production volumes may not correspond to the actual demand for our products.*

We estimate our production volumes based on close customer dialogue, purchase orders, historical production volumes by our customers, our experience and general economic and market conditions. However, we are unable to assure that the demand for our products will develop in line with our estimates. The actual demand for our products for a few of our customers has varied significantly from their estimated sales volumes in the past. There is no assurance that we will be able to plan our production schedules to meet the actual requirements. In addition, regardless of the accuracy of such indicators, factors outside our control may require revision of our estimates. If we over-estimate the volume of products we expect to sell, we will have excess production capacity which may reduce operational efficiency and the margins on the products sold. If we underestimate the volume of products we need to produce at any of our manufacturing facilities, or fail to order a sufficient volume of supplies and input materials from our third-party suppliers, we may be unable to meet customer orders, which may affect our reputation or lead to a discontinuation of future orders from customers. In some cases, our customers have required a rapid increase in production, which placed an excessive burden on our resources and caused a material increase in costs.

25. *Our Company does not have any registered IPR, however we might unintentionally infringe upon the intellectual property rights of others, any misappropriation of which could harm our competitive position*

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty as to whether we are infringing on any existing third-party intellectual property rights. We may therefore be susceptible to claims from third parties asserting infringement and other related claims. If claims or actions are asserted against us, we may be required to obtain a licence, modify our existing technology or cease the use of such technology and design a new non-infringing technology. Such licences or design modifications can be extremely costly. Furthermore, necessary licences may not be available to us on satisfactory terms, if at all. In addition, we may decide to settle a claim or action against us, the settlement of which could be costly. We may also be liable for any past infringement. Any of the foregoing could adversely affect our business and results of operations.

In certain cases, our customers share their intellectual property rights in the course of the product development process that we carry out for them. If our customers intellectual property rights are misappropriated by our employees in violation of any applicable confidentiality agreements, our customers may seek damages and compensation from us. This could have an adverse effect on our business, results of operations and damage our reputation and relationships with our customers.

26. *Any shutdown of our manufacturing facilities may have an adverse effect on our business, results of operations and financial condition.*

Our manufacturing facilities are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, industrial accident, labour disputes, natural disasters, epidemics or pandemics, such as the COVID-19 pandemic, and the need to comply with the directives of relevant government authorities. The assembly lines of our customers rely significantly on the timely delivery of our components and our ability to provide an uninterrupted supply of our products is critical to our business. Our customer relationships, business and results of operations may be adversely affected by any disruption of operations of our product lines, including as a result of any of the factors mentioned above. Any shutdown or operational failure of our manufacturing facilities may also result in a reduction in the capacity utilisation levels at our manufacturing facilities, which may have an adverse effect on our results of operations.

27. *We cannot assure payment of dividends on the Equity Shares in the future.*

Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flows, capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and subsequent approval of Shareholders and will depend on factors that our Board of Directors and Shareholders deem relevant, including among others, our future earnings, financial condition, cash flows, capital requirements, capital expenditures, business prospects and restrictive covenants under our financing arrangements. We may decide to retain all of our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on the Equity Shares. We cannot assure you that we will be able to pay dividends at any point in the future. For further information, please refer the chapter titled “Dividend Policy” on page 110.

28. *Within the parameters as mentioned in the chapter titled “Objects of this Issue” of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use substantial portion of the Net Issue Proceeds towards meeting the working capital requirement. We intend to deploy the Net Issue Proceeds based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Issue” on page 58 of the Draft Prospectus. The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in chapter titled “Objects of the Issue” on page 58 of the Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue, subject to approval from Shareholders of the Company. Our Board of Directors will monitor the proceeds of this Issue

29. *The requirements of being a publicly listed company may strain our resources.*

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

30. *There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.*

The utilization of issue proceeds is entirely at the discretion of the issuer/management. As per SEBI (ICDR) Regulations, 2018, appointment of monitoring agency is required only if Issue size exceeds ₹ 10,000 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the Companies Act, 2013 the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

31. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.*

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the automobile industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

32. Our Company had negative cash flows from certain activity in recent fiscals. Sustained negative cash flow could impact our growth and business

Sustained negative cash flows could adversely impact our business, financial condition and results of operations. The detailed break up of cash flows is summarized in below table and our Company has reported negative cash flow from operating activity, financing activity and also investing activity in the financial years is as mentioned below, which could affect our business and growth.

(₹ In Lakhs)

Particulars	For year ended on March 31, 2023	For year ended on March 31, 2022	For year ended on March 31, 2021
Net Cash Generated from Financing Activities	(683.17)	(68.88)	743.44
Net Cash from Operating Activities	682.51	102.67	(722.06)
Net Cash from Investing Activity	-	(45.89)	(8.00)

Cash flow of a company is a key indicator to show the extent of cash generated from financing activities to use the finance as leverage to raise the business. Finance cost charged for the finance facility taken as borrowing form unsecured and secured loan is more than the proceeds from equity shares. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations. For further, details please refer to the section titled “*Restated Financial Statements*” and chapter titled “*Management's Discussion and Analysis of Financial Conditions and Results of Operations*” beginning on page no. 115 and page no. 145 respectively, of this Draft Prospectus.

33. We have in past entered into related party transactions and we may continue to do so in the future.

As of March 31, 2023, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled “*Restated Financial Information*” at page 115 of the Draft Prospectus.

We cannot assure you that we will be able to maintain the terms of such transactions or in the event that we enter future transactions with related parties, that the terms of the transactions will be favourable to us. Additionally, while it is our belief that all our related party transactions have been conducted on an arm's-length basis, we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. We may also enter related party transactions in the future, which could involve conflicts of interest, although going forward, all related party transactions that we may enter will be subject to audit committee or board or shareholder approval, as applicable, as under the Companies Act, 2013 and the SEBI (LODR) Regulations. As such, we can provide no assurance that these transactions will not adversely affect our business, results of operation, cash flows and financial condition.

34. *Unfavourable weather may lead to non-availability and high cost of Paddy and other raw materials which could adversely affect our growth plans and business.*

Our Company is into the business of processing of Basmati rice and also based on the requirements received from the customers, our Company also processes Non-Basmati Rice, Wheat and Dal. The availability and cost of Basmati and non-basmati paddy and other raw materials are subject to weather conditions and market factors that are outside our control. We rely on farmers on most of our supply paddy and other raw materials, from which we eventually process into basmati and non-basmati rice, wheat and Dal. We mainly procure the paddy in November to January time period but at times of requirement we also procure aged paddy from stockist at a higher rate. This rate may vary and at peak times it is approximately 15%-20% higher than peak season prices as estimated by our management. However, the paddy purchased is processed throughout the year. Following processing, there is a long period before the basmati rice is ready for sale. This is a unique feature of the basmati rice processing industry, where the quality of basmati rice being processed improves with age. Due to the higher market price of aged basmati rice, a significant amount of time passes between when we purchase basmati paddy and sell finished basmati rice. Basmati rice paddy is generally sold by the farmers in six months after it is harvested.

Further, we rely on historic prices of basmati rice in determining the price and quantity of basmati paddy for purchase and the costs of storage, production and transportation of basmati paddy and basmati rice. As such, if the price of basmati rice falls during the time it is held for ageing, we may not be able to recover our investment in the basmati paddy and processing operations, which could adversely affect our financial condition.

The Basmati paddy procured in off- season is only approximately 10% of the total inventory of Basmati paddy and non-basmati paddy is 20% of the total non-basmati rice paddy. The procurement is done only after the paddy fields are properly surveyed by the procurement team and samples are tested before purchasing the same.

Further, any change in consumption patterns of basmati rice or any reduction in demand for basmati rice processed by us could also adversely affect our operations and profitability.

EXTERNAL RISK FACTORS

1. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST.

2. *Any downturn in the macroeconomic environment in India would adversely affect our business, financial condition, results of operations and cash flows*

Our revenue from sale of products, respectively, was from customers in India. Therefore, any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operations and cash flows. The Indian economy could be adversely affected by various factors, such as the impact of COVID-19 pandemic or other pandemics, epidemics, political and regulatory changes, including adverse changes in the Government's liberalisation policies, social disturbances, religious or communal tensions, terrorist attacks and other acts of violence or war, natural calamities, volatility in interest rates, volatility in commodity and energy prices, a loss of investor confidence in other emerging market economies and any worldwide financial instability. In addition, an increase in India's trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could increase interest rates and adversely affect liquidity, which could adversely affect the Indian economy and thereby adversely affect our business, financial condition, results of operations and cash flows.

3. *Financial instability in other countries may cause increased volatility in Indian financial markets and, directly or indirectly, adversely affect the Indian economy and our business, financial condition, results of operations and cash flows.*

The Indian financial markets and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and emerging economies in Asia. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian financial markets. Although economic conditions vary across markets, a loss of investor confidence in one emerging market may cause increased volatility in

other emerging markets, including the Indian financial markets. Therefore, financial instability in other countries may cause increased volatility in Indian financial markets and, directly or indirectly, have an adverse effect on the Indian economy and our business, financial condition, results of operations and cash flows.

4. *Political instability, changes in economic policy, changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business, financial condition and results of operations.*

Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalisation could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. For further details of the laws currently applicable to us, please refer the chapter titled “Key Industrial Regulations and Policies” on page no. 86.

There can be no assurance that the Government of India will not implement new regulations and policies that would require us to obtain approvals and licences from the Government of India and other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

In addition, unfavourable changes in, or interpretations of, (or the promulgation of) existing or new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may require management time and other resources, and any failure to comply may adversely affect our business and results of operations. Uncertainty in the applicability, interpretation or implementation of any amendment to, or changes in, governing laws, regulations or policies, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming and costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, it could increase our tax payments (prospectively or retrospectively) and/ or subject us to penalties. As a result, any such changes or interpretations could have an adverse effect on our business, financial condition and results of operations.

5. *Terrorist attacks, civil disturbances and regional conflicts involving India may have an adverse effect on our business, results of operations and the price of the Equity Shares.*

India has, from time to time, experienced social and civil unrest within the country and hostilities with neighboring countries. There have been continuing tensions between India and Pakistan over the states of Jammu and Kashmir. In the past there were armed conflicts over parts of Kashmir. Isolated troop conflicts and terrorist attacks continue to take place in these regions. In addition, in June 2020, a confrontation occurred between Indian and Chinese military forces. These hostilities and tensions could lead to political or economic instability in India, which may have an adverse effect on our business, results of operations and the price of the Equity Shares. In addition, any further hostilities and tensions could result in investors attaching a higher risk premium to shares of Indian companies, which could have an adverse effect on the price of the Equity Shares.

India has witnessed localized terrorist attacks in the recent past, including, among others, the terrorist attacks in Pulwama in 2019, in Pathankot and Uri in 2016, in Mumbai in 2011 and 2008 and in New Delhi in 2011. Any further terrorist attack in India could result in investors attaching a higher risk premium to shares of Indian companies, which could have an adverse effect on the price of the Equity Shares.

6. *If inflation rises in India, increased costs may result in a decrease in our profits.*

Increasing inflation in India could cause the costs of rent, wages, raw materials and other expenses to rise. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, financial condition, results of operations and cash flows.

7. *The occurrence of natural disasters may adversely affect our business, financial condition, results of operations and cash flows.*

The occurrence of natural disasters, including hurricanes, floods, tsunamis, earthquakes, tornadoes, fires and explosions, could damage or destroy one or more of our manufacturing facilities and adversely affect our business, financial condition and results of operations and cash flows.

8. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdiction*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction. Further, our Company's Articles of Association, composition of our Company's Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as a shareholder in an Indian company than as a shareholder of an entity in another country or jurisdiction.

RISKS RELATING TO THE OFFER AND THE EQUITY SHARES

9. *Investors may be subject to Indian taxes arising out of the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realised on the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax ("STT"), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on the seller and/or the purchaser of the Equity Shares and collected by the domestic stock exchange on which the Equity Shares are sold. Further, any capital gains realised on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India as well as STT.

Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident read with the Multilateral Instrument (MLI), if and to the extent applicable, and the seller is entitled to avail benefits thereunder. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020 and, accordingly, such dividends would not be exempt in the hands of the shareholders, both for residents as well as non-residents. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action, including dividends.

Similarly, any business income realised from the transfer of equity shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller. Additionally, in terms of the Finance Act, 2018, which has been notified on March 29, 2018 with effect from April 1, 2018, taxes payable by an assessee on the capital gains arising from transfer of long-term capital assets (introduced as section 112A of the Income-Tax Act, 1961) shall be calculated on such long-term capital gains at the rate of 10%, where the long-term capital gains exceed ₹ 100,000, subject to certain exceptions in case of resident individuals and Hindu Undivided Families.

Further, the Finance Act, 2019 has made various amendments in the taxation laws and clarified that, in the absence of a specific provision under an agreement, the buyer will be liable to pay stamp duty in case of sale of securities through stock exchanges, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis, is specified at 0.015% and on a non-delivery

basis is specified at 0.003% of the consideration amount. These amendments were notified on December 10, 2019 and have come into effect from July 01, 2020.

10. Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by our Promoter or significant shareholders may dilute your shareholding and adversely affect the trading price of the Equity Shares.

After the completion of the Issue, our Promoter and significant shareholders will own, directly and indirectly, approximately [•] % of our outstanding Equity Shares. Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. Except as disclosed in the section titled "*Capital Structure*" beginning on page 50 of this Draft Prospectus, no assurance may be given that our significant shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

11. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.

Under the Companies Act, a company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company may be reduced.

12. You will not be able to immediately sell any of the Equity Shares you purchase in this Issue on the Stock Exchanges.

Under the SEBI (ICDR) Regulations, we are permitted to allot Equity Shares within four (4) Working Days of the Bid/Issue Closing Date. Consequently, the Equity Shares you purchase in the Issue may not be credited to your book or dematerialized account with the Depository Participants until fifth (5) Working Days after the Bid/Issue Closing Date. You can start trading in the Equity Shares only after they have been credited to your dematerialized account and listing and trading permissions are received from the Stock Exchanges.

13. Fluctuations in the exchange rate between the Rupee and other currencies could have an adverse effect on the value of the Equity Shares in those currencies, independent of our results of operations.

The Equity Shares will be quoted in Rupees on the Stock Exchanges. Any dividends in respect of the Equity Shares will be paid in Rupees. Any adverse movement in currency exchange rates during the time it takes to undertake such conversion may reduce the net dividend received by investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares, may reduce the net proceeds received by investors. The exchange rate between the Rupee and other currencies (such as the U.S. dollar, the Euro, the pound sterling, the Hong Kong dollar and the Singapore dollar) has changed substantially in the past and could fluctuate substantially in the future, which may have an adverse effect on the value of the Equity Shares and returns from the Equity Shares in foreign currency terms, independent of our results of operations.

Trade Payables	63	68	58	90

Justification for “Holding Period” levels

The justifications for the holding levels mentioned in the table above are provided below:

Current Assets	
Revenues	<p>The revenue from sale of goods increased from Rs. 11,681.66 Lacs in Fiscal 21 to Rs. 13,403.55 in FY22, Indicating the positive growth trend. In FY23, the revenue further increased to Rs. 13,913.21 Lacs, continuing the upward trajectory. The projected revenue for FY24 is expected to reach Rs.15,304.53 Lacs, showcasing a significant increase compared to the previous fiscal years.</p> <p>Overall, the company has experienced consistent revenue growth over the specified time period, with a positive outlook for the upcoming fiscal year.</p>
Inventories	<p>The company's IHP has fluctuated over the three periods, with Year 2021 having the highest IHP at 86 days and Year 2023 having the lowest IHP at 25 days. This implies that the company took longer to sell its inventory in Year 2021, which could negatively impacted the company's cash flow and liquidity. Conversely, in Year 2023, the company was able to sell its inventory faster, which could have positively affected its cash flow and liquidity.</p> <p>The projected holding period of 17 days, which is lower than the average IHP of the past three years, indicates that the company has taken steps to improve its inventory management. This could include implementing better inventory tracking systems, improving supply chain management, or renegotiating contracts with suppliers. A lower projected holding period suggests that the company will be able to sell its inventory faster, which could have a positive impact on its cash flow and profitability.</p>
Trade receivables	<p>In year 2021, the holding level was 46 days, which increased significantly to 89 days in year 2022. This indicates that the company was facing difficulties in collecting payments from customers during that period.</p> <p>In year 2023, the holding level increased to 128 days, which may indicate that the company has implemented better credit management practices or has been successful in collecting outstanding payments from customers.</p> <p>The projected days estimated for the year 2024 are 139 days, which is slightly higher than the holding level in year 2023. It is important to monitor the actual holding level during the year</p>

SECTION V – ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

Global Economic Overview

The global economy is yet again at a highly uncertain moment, with the cumulative effects of the past three years of adverse shocks—most notably, the COVID-19 pandemic and Russia’s invasion of Ukraine—manifesting in unforeseen ways. Spurred by pent-up demand, lingering supply disruptions, and commodity price spikes, inflation reached multidecade highs last year in many economies, leading central banks to tighten aggressively to bring it back toward their targets and keep inflation expectations anchored.

Although telegraphed by central banks, the rapid rise in interest rates and anticipated slowing of economic activity to put inflation on a downward path have, together with supervisory and regulatory gaps and the materialization of bank-specific risks, contributed to stresses in parts of the financial system, raising financial stability concerns. Banks’ generally strong liquidity and capital positions suggested that they would be able to absorb the effects of monetary policy tightening and adapt smoothly. However, some financial institutions with business models that relied heavily on a continuation of the extremely low nominal interest rates of the past years have come under acute stress, as they have proved either unprepared or unable to adjust to the fast pace of rate rises.

The unexpected failures of two specialized regional banks in the United States in mid-March 2023 and the collapse of confidence in Credit Suisse—a globally significant bank—have roiled financial markets, with bank depositors and investors re-evaluating the safety of their holdings and shifting away from institutions and investments perceived as vulnerable. The loss of confidence in Credit Suisse resulted in a brokered takeover. Broad equity indices across major markets have fallen below their levels prior to the turmoil, but bank equities have come under extreme pressure (Figure 1.1). Despite strong policy actions to support the banking sector and reassure markets, some depositors and investors have become highly sensitive to any news, as they struggle to discern the breadth of vulnerabilities across banks and nonbank financial institutions and their implications for the likely near-term path of the economy. Financial conditions have tightened, which is likely to entail lower lending and activity if they persist.

Prior to recent financial sector ructions, activity in the world economy had shown nascent signs of stabilizing in early 2023 after the adverse shocks of last year (Figure 1.2, panels 1 and 2). Russia’s invasion of Ukraine and the ongoing war caused severe commodity and energy price shocks and trade disruptions, provoking the beginning of a significant reorientation and adjustment across many economies. More contagious COVID-19 strains emerged and spread widely. Outbreaks particularly affected activity in economies in which populations had lower levels of immunity and in which strict lockdowns were implemented, such as in China. Although these developments imperiled the recovery, activity in many economies turned out better than expected in the second half of 2022, typically reflecting stronger-than-anticipated domestic conditions. Labor markets in advanced economies—most notably, the United States—have stayed very strong, with unemployment rates historically low. Even so, confidence remains depressed across all regions compared with where it was at the beginning of 2022, before Russia invaded Ukraine and the resurgence of COVID-19 in the second quarter.

With the recent increase in financial market volatility and multiple indicators pointing in different directions, the fog around the world economic outlook has thickened. Uncertainty is high, and the balance of risks has shifted firmly to the downside so long as the financial sector remains unsettled. The major forces that affected the world in 2022—central banks’ tight monetary stances to allay inflation, limited fiscal buffers to absorb shocks amid historically high debt levels, commodity price spikes and geo-economics fragmentation with Russia’s war in Ukraine, and China’s economic reopening—seem likely to continue into 2023. But these forces are now overlaid by and interacting with new financial stability concerns. A hard landing—particularly for advanced economies—has become a much larger risk. Policymakers may face difficult trade-offs to bring sticky inflation down and maintain growth while also preserving financial stability.

Inflation is declining with Rapid Rates Rises but Elevated amid Financial Sector Stress

Global headline inflation has been declining since mid-2022 at a three-month seasonally adjusted annualized rate (Figure 1.3). A fall in fuel and energy commodity prices, particularly for the United States, euro area, and Latin America, has contributed to this decline. To dampen demand and reduce underlying (core) inflation, the lion's share of central banks around the world have been raising interest rates since 2021, both at a faster pace and in a more synchronous manner than in the previous global monetary tightening episode just before the global financial crisis (Figure 1.4). This more restrictive monetary policy has started to show up in a slowdown in new home construction in many countries. Inflation excluding volatile food and energy prices has been declining at a three month rate— although at a slower pace than headline inflation—in most (though not all) major economies since mid-2022.

Even so, both headline and core inflation rates remain at about double their pre-2021 levels on average and far above target among almost all inflation-targeting countries. Moreover, differences across economies reflect their varying exposure to underlying shocks. For example, headline inflation is running at nearly 7 percent (year over year) in the euro area—with some member states seeing rates near 15 percent—and above 10 percent in the United Kingdom, leaving household budgets stretched.

A Challenging Outlook

A return of the world economy to the pace of economic growth that prevailed before the bevy of shocks in 2022 and the recent financial sector turmoil is increasingly elusive. More than a year after Russia's invasion of Ukraine and the outbreak of more contagious COVID-19 variants, many economies are still absorbing the shocks. The recent tightening in global financial conditions is also hampering the recovery. As a result, many economies are likely to experience slower growth in incomes in 2023, amid rising joblessness. Moreover, even with central banks having driven up interest rates to reduce inflation, the road back to price stability could be long. Over the medium term, the prospects for growth now seem dimmer than in decades. This section first describes the baseline projections for the global economy and the assumptions on which they are predicated. The baseline scenario assumes that the recent financial sector turmoil is contained and does not generate material disruptions to global economic activity with widespread recession (a broad-based contraction in economic activity that usually lasts more than a few months). Fuel and nonfuel commodity prices are generally expected to decline in 2023, amid slowing global demand (see the Commodity Special Feature). Crude oil prices are projected to fall by about 24 percent in 2023 and a further 5.8 percent in 2024, while nonfuel commodity prices are expected to remain broadly unchanged. The forecasts are also based on the assumption that global interest rates will stay elevated for longer than expected at the time the October 2022 WEO was published, as central banks remain focused on returning inflation to targets while deploying tools to maintain financial stability as needed (Figure 1.12). Governments are on average expected to gradually withdraw fiscal policy support, including, as commodity prices decline, by scaling back packages designed to shield households and firms from the effects of the fuel and energy price spikes in 2022.

At the same time, in consideration of the elevated risks and uncertainties stemming from the recent global financial market turmoil, this section also places strong emphasis on a plausible alternative scenario that illustrates the impact of downside risks materializing.

Indian Economic Overview

The economy is estimated to have grown by 6.8% in fiscal year 2022 (FY2022, ending 31 March 2023). Despite global headwinds, expansion benefited from strong growth in private consumption by an estimated 7.3%, and in investment, up by an estimated 11.2% (Figure 2.17.1). On the supply side, GDP growth was supported by agriculture, up by 3.3%, and services, up by 8.8%. Trade, hotels, transport, and communication grew robustly by an estimated 14.0%. Manufacturing growth moderated yet remained positive at 0.6%, reflecting a slowdown in global growth and high input costs (Figure 2.17.2).

Headline inflation exceeded the inflation target range of 2%–6%, averaging 6.8% in the first 10 months of FY2022. At its highest, it reached 7.8% in April 2022. Global prices for oilseed, fertilizer, and fuel were elevated by the Russian invasion of Ukraine, an Indonesian ban on palm oil exports, a shortfall in global production of edible oil, and such domestic factors as disappointing wheat production and an unseasonably hot March spiking vegetable prices. These factors pushed food inflation to an average of 6.9% in the first 10 months of FY2022, while fuel inflation remained in double digits, averaging 10.6%. Inflation in both rural and urban areas was high in January 2023.

The government and the Reserve Bank of India, the central bank, undertook several measures to control inflation and its impact. The government banned exports of wheat and broken rice in 2022 to tamp down domestic price fluctuation and ensure food security. The ban on exports of broken rice was lifted in November 2022 but the ban on wheat remains.

GDP growth is forecast to slow to 6.4% in FY2023 (Table 2.17.1). The causes are an expected global economic slowdown, tight monetary conditions, and persistently elevated oil prices. The growth rate in India is stronger than in many peer economies, reflecting relatively robust domestic consumption and lesser dependence on global demand. Growth is expected to strengthen to 6.7% in FY2024 as private investment improves and growth accelerates in industry.

Private consumption will be the main driver of growth.

India's large domestic consumption base will mitigate the impact of a global growth slowdown. A robust labor market and rising consumer confidence are indicators of relatively strong growth in consumption in FY2023 and FY2024 (Figure 2.17.13). Further, a higher tax rebate and a raised income threshold for tax exemption, announced in the most recent budget, may increase disposable income for the middle class, also boosting private consumption. However, public consumption is likely to grow only slowly, as central government expenditure shifts toward investment. Private investment growth is likely to be lower in FY2023 given tightened monetary policy, high lending rates, global uncertainty, and moderating optimism on business conditions (Figure 2.17.14). However, FY2024 should bring fast growth in investment because of strong macroeconomic fundamentals; lower nonperforming loans in banks than in recent years, which supports banks' ability to lend; and significant corporate deleveraging, which has improved corporations' ability to borrow. Several government policies aiming to improve transport infrastructure, logistics, and the business ecosystem will induce greater private investment. However, the contribution of net exports to growth will be small as growth in both exports and imports of goods moderates in tandem with a slowing global economy, even as India's service exports remain relatively robust.

Agriculture Industry

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India's population. India has the world's largest cattle herd (buffaloes), largest area planted to wheat, rice, and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. Agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country's population. Thus, farmers become an integral part of the sector to provide us with means of sustenance.

Robust Demand

Factors contributing to the sharp growth in demand for processed foods include increasing urbanization, increasing disposable incomes, changing spending patterns/ priorities, the emergence of nuclear families, and the growing need for convenience foods in dual-income nuclear families.

Policy Support

Online, Competitive, Transparent Bidding System with 1.74 crore farmers and 2.39 lakh traders put in place under the National Agriculture Market (e-NAM) Scheme.

Competitive Advantage

India has access to several natural resources that provides it a competitive advantage in the food processing sector. Due to its diverse agro-climatic conditions, it has a wide-ranging and large raw material base suitable for food processing industries.

Market Size

Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

According to Inc42, the Indian agricultural sector is predicted to increase to US\$ 24 billion by 2025. Indian food and grocery market is the world's sixth largest, with retail contributing 70% of the sales. As per First Advance Estimates for FY23 (Kharif only), total foodgrain production in the country is estimated at 149.92 million tonnes. Rapid population expansion in India is the main factor driving the industry. The rising income levels in rural and urban areas, which have contributed to an increase in the demand for agricultural products across the nation, provide additional support for this. In accordance with this, the market is being stimulated by the growing adoption of cutting-edge techniques including blockchain, artificial intelligence (AI), geographic information systems (GIS), drones, and remote sensing technologies, as well as the release of various e-farming applications.

In terms of exports, the sector has seen good growth in the past year. In FY22

- Exports of marine products stood at US\$ 7.77 billion.
- Exports of rice (Basmati and Non-Basmati) stood at US\$ 6.98 billion.
- Buffalo meat exports stood at US\$ 3.30 billion.
- Sugar exports stood at US\$ 4.60 billion.
- Tea exports stood at US\$ 750.93 million.
- Coffee exports stood at US\$ 1,020.80 million.

GOVERNMENT INITIATIVES

Agriculture Export Policy 2018 (AEP)

The Government of India has introduced a comprehensive Agriculture Export Policy (AEP) to promote exports of agricultural products. The key objectives of the AEP are to diversify export basket and destinations, to boost high value-added agricultural exports, to promote indigenous, organic, traditional and non-traditional Agri products exports, to provide an institutional mechanism for pursuing market access and to enable farmers to get the benefit of export opportunities in overseas market.

Financial Assistance Scheme (FAS)

FAS is the export promotion scheme by the Agriculture and Processed Food Products Export Development Authority (APEDA). It is part of the Finance Commission Cycle for the years 2021-22 to 2025-26. The primary aim of this scheme is to assist businesses in export infrastructure development, quality development and market development. The financial assistance under the scheme will range from Rs. 5 lakh (US\$ 6,500) to Rs. 5 crore (US\$ 650,000).

Ministry of Commerce & Industry scheme

The Department of Commerce under the Ministry of Commerce & Industry has also initiated several schemes to promote exports, including Trade Infrastructure for Export Scheme (TIES), Market Access Initiatives (MAI) Scheme, etc.

In addition, assistance to the exporters of agricultural products is also available under the Export Promotion Schemes of APEDA, Marine Products Export Development Authority (MPEDA), Tobacco Board, Tea Board, Coffee Board, Rubber Board and Spices Board. Further, to boost honey exports, India has made NMR (Nuclear Magnetic Resonance) testing mandatory for honey exported to USA.

GOVERNMENT BODY

Agriculture and Processed Food Products Export Development Authority (APEDA)

APEDA was formed in 1986 for the development of the exports of the agriculture industry in India. The main functions of the authority are the registration of people as exporters, fixing standards and specifications for the scheduled products, carrying out inspections, collecting statistics and providing information, training and advisory services to the exporters. APEDA is entrusted with the responsibility of export and promotion of 14 agriculture and processed food product groups.

ROAD AHEAD

The agriculture sector in India is expected to generate better momentum in the next few years due to increased investment in agricultural infrastructure such as irrigation facilities, warehousing, and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to the concerted effort of scientists to get early maturing varieties of pulses and the increase in minimum support price.

In the next five years, the central government will aim US\$ 9 billion in investments in the fisheries sector under PM Matsya Sampada Yojana. The government is targeting to raise fish production to 220 lakh tonnes by 2024-25. Going forward, the adoption of food safety and quality assurance mechanisms such as Total Quality Management (TQM) including ISO 9000, ISO 22000, Hazard Analysis and Critical Control Points (HACCP), Good Manufacturing Practices (GMP), and Good Hygienic Practices (GHP) by the food processing industry will offer several benefits.

Through the Ministry of Food Processing Industries (MoFPI), the Government of India is taking all necessary steps to boost investments in the food processing industry in India. Government of India has continued the umbrella PMKSY scheme with an allocation of Rs. 4,600 crore (US\$ 559.4 million) till March 2026.

Among different varieties of long-grain rice, basmati rice continues to capture the highest demand owing to its superior characteristics in terms of aroma and flavour. Major cultivation of basmati rice is concentrated in India and Pakistan whereas few other South Asian countries such as Bangladesh, Vietnam and Indonesia also cultivate basmati rice, though only for self-consumption.

Basmati rice is known for its good cooking qualities and good marketing value in both national and international markets. A range of varieties and hybrids are available in the global basmati rice market. In addition to the famous categories of white and brown basmati rice, evolving consumer palate for different foods has led to the introduction of parboiled and steamed rice varieties along with steady popularity for raw basmati rice.

Raw basmati rice continues to capture the highest market position while delivering the greater nutritional as well as cooking benefits, affordable cost and excellent aroma. Further, while white basmati rice finds significant global penetration, dissemination of knowledge regarding the health benefits of brown rice, demand for brown basmati rice is witnessing a gradual traction in the basmati rice market.

The basmati rice market is projected to witness an optimistic growth trajectory against the backdrop of multiple factors such as growing demand for long-grain speciality rice and strong supply chain.

While rice is consumed as a staple food across world regions, demand for specialty rice is increasing exponentially following the growing appetite for aromatic rice. Although the higher cost of basmati rice continues to limit the widespread adoption, ameliorating economic conditions, steadily rising consumer purchase power and improving marketing values of basmati rice are propelling the consumption levels of speciality rice across global economies. Superior characteristics of long-grain rice capture the palate of many among which basmati rice is the highly sought after long grain speciality rice varieties.

A sizeable export of basmati rice across the world regions has generated the need for a stronger supply chain to establish a fair outcome benefiting all the supply chain participants starting from farmers to consumers. While governments are actively engaged in strengthening the basmati rice supply chain, prominent market players continue to establish authenticity in the basmati rice supply chain which, in turn, enhances the brand image in both domestic and international markets.

Indian overall and packaged rice market have grown considerably over the past couple of years. A vast section of people living in India belongs to Tier 2 and Tier 3, which are the largest consumer of unpacked rice that helps in driving the unorganised rice market in India. In the last few years, a shift towards urbanization has increased, and the size of the families is getting smaller, which have allowed them to move towards the packed rice products. The adaption of packed rice has increased in recent years, and basmati rice holds more substantial portion in the overall packed rice. With the changing trends, there is a shift in the habit in the consumption of rice as consumers are now moving towards health rice segments because of increased awareness about health products. FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in this Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Regulatory Framework

We have obtained all regulatory permissions which are necessary to run our business, Further, some of the approvals are granted for fixed periods of time and need renewals, which are obtained in the course of business, however, there may be change in statutory regulations at any time which cannot be predicted by us. There can be no assurance that the change in regulations will not impact our operations in the future.

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

Ability to manage logistics and transportation needs

Apart from in-house transportation facility we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our factory to our customers and other markets. Since the cost of our goods also carried by third party transporters is typically much higher than the consideration paid for transportation, it may be difficult for us to recover damages for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, global supply chains can be impacted with the increase in the fees of shipping routes putting cost pressures. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage or shrinkage may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

Market & Economic conditions

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customers. At the time of market slowdown the demand falls which has adverse impact on our business.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

COVID-19 Pandemic

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our operations in order to follow the Government's norms. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. Once the lockdown was lifted, our operations restarted in full swing. Initially we did find a little hiccup in finding workers but because of our enterprising organization, we were able to source quality workforce and we were able to train them and we restarted our operations. After lifting the lockdown and resuming our operations the demand in our industry abruptly increased from the different sectors and we attained the highest production during the partial year 2020-21 and FY 2021-22. The demand after pandemic ultimately nullified the impact of shutdown during COVID 19 pandemic. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter "*Risk Factors*" beginning on Page No.21. We continue to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

Significant Developments after March 31, 2023 that may affect our Future Results of Operations

The Directors confirm that there have been no other events or circumstances since the date of the last financial statements as disclosed in the Draft Prospectus which materially or adversely affect or is likely to affect the business or profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months.

Phased implementation of Unified Payments Interface

SEBI has issued a **UPI Circulars** in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. BASIS OF ALLOTMENT

Allotment will be made in consultation with the Emerge Platform of NSE (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth hereunder:

- 1) The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of Applicants in the category x number of Shares applied for).
- 2) The number of Shares to be allocated to the successful Applicants will be arrived at on a proportionate basis in marketable lots (i.e. Total number of Shares applied for into the inverse of the over subscription ratio).
- 3) For applications where the proportionate allotment works out to less than 1200 equity shares the allotment will be made as follows:
 - i. Each successful Applicant shall be allotted 1200 equity shares; and
 - ii. The successful Applicants out of the total applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.

- 4) If the proportionate allotment to an Applicant works out to a number that is not a multiple of 1200 equity shares, the Applicant would be allotted Shares by rounding off to the nearest multiple of 1200 equity shares subject to a minimum allotment of 1200 equity shares.
- 5) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Applicants in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of 1200 Equity shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the offer specified under the Capital Structure mentioned in this Prospectus.
- 6) Since present issue is a fixed price issue, the allocation in the net offer to the public category in terms of Regulation 253(2) of the SEBI (ICDR) Regulations, 2018 shall be made as follows:

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular.
