## **INTERNAL RISK FACTORS**

### **BUSINESS RELATED RISKS**

- 1. We are required to obtain licenses and approvals under several legislations. Our inability to obtain or renew such permits, approvals and licenses in the ordinary course of our business may adversely affect our business, financial condition and results of operations.***

We are required to obtain and renew various licenses and approvals under several legislations from time to time. As of date of this Draft Prospectus, our company has applied for various approvals amongst others, including, factory license under Factories Act, 1978, registration under the shops and establishment under the Gujarat Shops and Establishments (Regulation of Employment and Conditions of Service) Act, 2019. These approvals, licenses, registrations and permits are subject to several conditions and are primarily valid for a specific period. For example, licenses granted the Factories Act, 1948 for our manufacturing unit are typically granted for a period of five years and we are required to renew such licenses after such period. However, in some cases, these licenses could have been granted for shorter period as well. These licenses contain certain terms and conditions which are required to be complied with throughout the period of the license. We cannot assure you that we shall be able to obtain or renew such licenses or be able to continuously meet such conditions specified in such licenses or be able to prove compliance with such conditions to statutory authorities, which may lead to cancellation, revocation or suspension of relevant consents/permits/licenses/approvals. We cannot assure you that we shall be able to obtain such licenses or approvals on a timely manner or at all which may affect the timelines or the operations of the outlet. Further, the relevant authorities may also initiate penal actions against us, restrain our operations, impose fines/penalties or initiate legal proceedings for inability to obtain approvals in a timely manner or at all. Any such failure or delay in obtaining such consents, approvals, permits and licenses may affect our ability to continue our operations, which may in turn have an adverse effect on our business, financial condition and results of operations.

- 2. There have been instances of delays of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 to RoC. Further, there have also been instances where our Company has inadvertently filed incorrect information with the RoC in its statutory filings.***

In the past, there have been certain instances of delays in filing statutory forms, such as Forms MGT-14 as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC. There have also been instances wherein the disclosures made in the statutory filings done under Companies Act, 1956 and Companies Act, 2013 are incomplete or erroneous in nature, for instance, in accordance with Companies (Prospectus and Allotment of Securities) Rules, 2014, our Company inadvertently failed to file a copy of the record of the further allotment undertaken on March 25, 2014 in Form PAS-5 along with the private placement offer letter in Form PAS-4 with the RoC, and revised filing for the same has not been done by our Company.

No show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

- 3. We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.***

Our Company is engaged in the business of manufacturing of pharmaceutical products. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long terms agreements with our

customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders or expand our customer base on a regular basis or at all may adversely affect our business, revenues, cash flows and operations. The percentage of Revenue from our top 10 customers were 84.07%, 86.28% and 91.05% in FY21, FY20, FY19 respectively. The percentage of Purchase from our top 10 suppliers were 76.70%, 79.06% and 89.02% in FY21, FY20, FY19 respectively.

**4. *We conduct our business activities on a purchase order basis and therefore, have not entered into long-term agreements with our customers.***

Our Company is engaged in the business of manufacturing of pharmaceutical products on the basis of orders which are received from our customers. We have not entered into any formal agreements, arrangement or any other understanding with our customers or our traders and therefore, our business is dependent upon the continuous relationship with the customers, our traders and the quality of products supplied to us. Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing the products supplied to us. If there occurs any change in the market conditions, market trends, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

**5. *The novel coronavirus (Covid-19) pandemic outbreak and steps taken to control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.***

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the onslaught of the third wave of the virus and the likelihood of a fourth wave, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

Our Company was also adversely affected by the onslaught of the pandemic. During such period, our Company reported a decline in total revenue from 2019 to 2020 by 4.96% and a growth of 8.82% from 2020 to 2021 but the profit reported from 2019 to 2020 grew by 19.14% and from 2020 to 2021, profit reported grew by 50.42%. This significant decline in our production, revenue, profit etc. was caused due to the lockdown imposed by the Central Government and various State Governments and the consequent halting of operations in our manufacturing units. Even after resumption of operations from May 2020, our business operations and capacity utilization levels were adversely affected due to scarcity of workers and the time spent by us in mobilizing the required workforce, which impacted our business, results of operations and financial condition

Further if in case due to any fourth or consequent wave of Coronavirus or surge in new and deadly variants of the Virus, if another lockdown is imposed in the country and further restrictions are imposed by the government, we may face huge losses and our business operations could be severely impacted. Any such restrictions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

6. ***Our Company is reliant on the demand from the pharmaceutical industry for a significant portion of our revenue. Any downturn in the pharmaceutical industry or an inability to increase or effectively manage our sales could have an adverse impact on our Company's business and results of operations.***

Our Company is engaged in the business of manufacturing of pharmaceutical products and therefore, our revenues are highly dependent on our customers from the pharmaceutical industry and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations. Further, in the event, there takes place a shift of practice of developing our products in-house in the pharmaceutical industries, it may have an adverse impact on the demand for our products. Similarly, in the event of any new breakthrough in the development of a novel product or raw material by our competitors or customers, our products may become obsolete or be substituted by such alternatives; thereby impacting our revenues and profitability adversely. It may also happen that our competitors are able to improve the efficiency of their manufacturing process or their distribution or raw materials sourcing process and thereby offer their similar or high quality products at lower price our Company may be unable to adequately react to such developments which may affect our revenues and profitability.

7. ***We highly depend on our major raw materials and a few key suppliers who help us procure the same. Our Company has not entered into long-term agreements with its suppliers for supply of raw materials. In the event we are unable to procure adequate amounts of raw materials, at competitive prices our business, results of operations and financial condition may be adversely affected.***

Our Company is engaged in the business of manufacturing pharmaceutical products. Therefore, we are highly dependent on API, which is the primary component of our manufacturing process. Thus, if we experience significant increase in demand, or need to replace an existing supplier, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. Further, in view of the ongoing pandemic, wherein partial or complete lockdown and various travel restrictions has been imposed in various countries, we may not be able to procure adequate amount of raw materials for our manufacturing unit.

The pharmaceutical products qualify as essential commodities, therefore generally their demand has not been deterred by the ongoing pandemic and the nationwide lockdown imposed by various governments. In view of the above, we will have to source adequate raw materials for our manufacturing unit to cater to the consistent demand of our pharmaceutical customers. Furthermore, the demand of the pharmaceutical products is seeing an increasing demand due to the health crisis caused due to the pandemic, accordingly the demand of our products is also likely to rise. In the event, due to logistical glitches and restrictions on crossing state and country borders imposed by various governments, we are not be able to procure the required amount of raw materials, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to procure the required amount of raw materials in the backdrop of the global pandemic, we cannot assure you that we will be able to do in a cost effective manner, which may impact our pricing and profitability.

We depend on a number of suppliers for procurement of raw materials required for manufacturing our products. The percentage of Purchase from our top 10 suppliers were 76.70%, 79.06% and 89.02% in FY21, FY20, FY19 respectively. Our Company maintains a list of registered and unregistered suppliers from whom we procure the materials on order basis as per our internal demand projections. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacture of our products, could have a material adverse effect on our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us.

Further, the amount of raw materials procured and the price, at which we procure such materials, may fluctuate from time to time. In addition, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, seasonal factors, environmental factors and changes in government policies and regulations, including those relating to the pharmaceutical industry in general. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers. Further, we also cannot assure you with a reasonable certainty that the raw materials that we would procure in the future will not be defective. In the absence of formal agreements, should we receive any defective raw materials, we may not be in a position to recover any advance payments made or claim compensation from our suppliers consequently increasing the manufacturing costs and/or reducing the realization of our finished products. Any inability on our part to procure sufficient quantities of raw materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins which could adversely affect our business, results of operations and financial condition.

**8. *Our continued operations are critical to our business and any shutdown of our manufacturing unit may adversely affect our business, results of operations and financial condition.***

Our manufacturing unit is located in Gujarat. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our current manufacturing unit is subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities.

In the event, we are forced to shut down our manufacturing unit for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiraling cost of living around our unit may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness. For instance, due to the ongoing pandemic and the lockdown imposed by the Central Government and various state governments, we may be required to shut down our manufacturing unit which may cause an adverse impact on our business operations, revenue, results of operations and financial conditions.

In addition to the above if our manufacturing unit suffers losses as a result of any industrial accident, we may be forced to shut down our manufacturing unit which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing unit may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our manufacturing unit, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

**9. *Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.***

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of internal and international quality standards. However, we cannot assure you that our quality control processes or our product will pass the quality tests and inspections conducted by various international and domestic agencies as per their prescribed standards will not fail. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence and human error or otherwise, may damage our products and result in deficient products. It is imperative for us to meet the international quality standards set by our international customers and agencies as deviation from the

same can cause them to reject our products and can also cause damage to our reputation, market standing and brand value.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

**10. Any adverse change in regulations governing our products and the products of our customers, may adversely impact our business prospects and results of operations.**

Regulatory requirements with respect to our products and the products of our customers are subject to change. An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our manufacturing and/or distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for manufacturing and marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to forced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

**11. There are outstanding litigations involving our Company, Promoters and Directors which, if determined adversely, may affect our business and financial condition.**

As on the date of this Draft Prospectus, our Company, Promoters and Directors are involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and/or severally from us and/or other parties, as the case may be. We cannot assure you that these legal proceedings will be decided in favour of our Company, Promoters and Directors or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

- 12. *Some of the raw materials that we use are corrosive and combustible in nature. While we take adequate care and follow all relevant safety measures, there is a risk of fire and other accidents, at our manufacturing unit. Any accidents may result in loss of property of our Company and/or disruption in the manufacturing processes which may have a material adverse effect on our results of operations, cash flows and financial condition.***

Due to the combustible nature of certain of our raw materials, we may be exposed to fires or other industrial accidents. While our Company believes that it has necessary controls and processes in place, any failure of such systems, mishandling of hazardous chemicals or any adverse incident related to the use of these chemicals or otherwise during the manufacturing process or storage of products and certain raw materials, may cause industrial accidents, fire, loss of human life, damage to our and third-party property or cause environmental damage. If any industrial accident, loss of human life or environmental damage were to occur we could be subject to significant penalties, other actionable claims and, in some instances, criminal prosecution. In addition to adversely affecting our reputation, any such accidents, may result in a loss of property of our Company and/or disruption in our manufacturing operations entirely, which may have a material adverse effect on our results of operations and financial condition. In addition to the loss as a result of such fire or industrial accident, any shutdown of our manufacturing unit could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition.

Further, any fire or industrial accident, any shutdown of our manufacturing unit or any environmental damages could increase the regulatory scrutiny and result in enhanced compliance requirements including on use of materials and effluent treatment which would, amongst others, increase the cost of our operations. We cannot assure you that despite our best efforts we will not face similar situations at our manufacturing unit which may result in significant loss to our Company and/or a disruption of our manufacturing operations. The loss incurred by our Company, though adequately insured, may

or may not be recoverable through the insurance maintained by us. Such loss and/or disruption of our manufacturing operations may have a material adverse effect on our operations, cash flows and financial condition.

***13. Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.***

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

***14. Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.***

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

***15. We are dependent on information technology systems in carrying out our business activities and it***

***forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.***

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

***16. We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.***

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the pharmaceutical industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

***17. We are 100% dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to***

***meet their obligations could adversely affect our business, financial condition and results of operation.***

To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing unit and transportation of our products from our unit to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long term agreements with our transporters for our manufacturing unit and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

***18. Our inability to manage inventory in an effective manner could affect our business.***

Our business model requires us to maintain a certain level of inventory of pharmaceutical products, to meet the present and future orders. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

***19. If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.***

Our Company is currently using the logo which is not yet registered in the name of our Company neither we have made any application for the registration of the trademark with the respective authorities. If we are unable to get the same registered with the trademark authorities then, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations.

Our current domain name 'www.jfllifesciences.com' is owned by our Company under the provisions of the Trademarks Act, 1999. There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition. For further details, please refer to the chapters titled "Our Business" and "Government and other Statutory Approvals" on pages 94 and 166, respectively of this Draft Prospectus.

***20. We have significant power and water requirements for continuous running of our manufacturing unit. Any disruption to our operations on account of interruption in power and water supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations***

*and financial condition.*

Our manufacturing unit significant electricity and water requirements and any interruption in the supply of water or power may temporarily disrupt our operations. Since, we have a high power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing unit and thereby cause an increase in the production cost which we may not be able to pass on to our customers. Water is one of the main components of our manufacturing unit, therefore continuous water supply is essential for smooth business operations of our Company. There are limited number of electricity providers in the areas from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled “*Our Business*” on page 94 of this Draft Prospectus.

**21. *We operate in a competitive business environment and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.***

The pharmaceutical industry in India is competitive with both organized and unorganized markets. However, we are required to compete both in the domestic and international markets. We may be unable to compete with the prices and products offered by our competitors. We may have to compete with new players in India and abroad who enter the market and are able to offer competing products. Our competitors may have access to greater financial, manufacturing, research and development, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations. We cannot assure you that we will be able to compete with our existing as well as future competitors as well as the products prices and payment terms offered by them. In addition, our customers may enter into contract manufacturing arrangements with third parties, for products that they are presently purchasing from us. Our failure to successfully face existing and future competition may have an adverse impact on our business, growth and development.

Further, some of our competitors may be larger than we are or develop alliances to compete against us and may have greater resources, market presence and geographic reach and have products with better brand recognition than ours. Some of our competitors may be able to procure raw materials at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices. Some of our international competitors may be able to capitalize on their overseas experience to compete in the Indian market. Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may significantly increase their marketing expenses to promote their brands and products, which may require us to similarly increase our advertising and marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business, results of operations and financial condition. For further details, please see “*Industry Overview*” on page 76 of this Draft Prospectus.

**22. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.***

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of our Promoter and Other Interests and Disclosures*” in the chapter titled — “*Our Promoter and Promoter Group*”, “*Financial Indebtedness*” and “*Restated Financial Information*” on pages 128, 128, 140, 140 and 147, respectively of this Draft Prospectus.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

**23. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.***

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold [●]% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

**24. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.***

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a fixed price basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "*Capital Structure*" on page 54 of this Draft Prospectus.

**25. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

**26. *We have in past entered into related party transactions and we may continue to do so in the future.***

As of February 28, 2022, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — "*Restated Financial Information*" at page 147.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and

financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

**27. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.***

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 159 of this Draft Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

**28. *Our Company has availed certain unsecured loans which may be recalled at any time.***

Our Company has availed certain unsecured loans of which an amount of ₹ 77.25 lakhs is outstanding as on February 28, 2022, which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “*Financial Indebtedness*” on page 159 of this Letter of Offer.

**29. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.***

As on February 28, 2022, our Company’s total outstanding secured loans are ₹ 1,522.93 lacs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our

indebtedness, please refer to the chapter titled “*Financial Indebtedness*” on page 159 of this Draft Prospectus.

- 30. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 66 of this Draft Prospectus.

- 31. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 128 of this Draft Prospectus.

- 32. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.***

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, we maintain insurance cover against loss or damage by fire, earthquake, terrorism, spoilage, impact damage due to road or rail services, etc., by availing various insurance policies. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

- 33. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 146 of this Draft Prospectus.

**34. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.***

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

**35. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.***

As the issue size shall be less than ₹10,000 lacs, under Regulation 262 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 66 of this Draft Prospectus.

**36. *We have not independently verified certain data in this Draft Prospectus.***

We have not independently verified data from the Industry and related data contained in this Draft Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

**37. *The requirements of being a listed company may strain our resources.***

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited

annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

**38. *Delay in raising funds from the IPO could adversely impact the implementation schedule.***

The proposed fund requirement, for purchasing plant and machinery, primarily, as detailed in the chapter titled "Objects of the Issue" beginning on page 66 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

**39. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

**40. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

**41. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.***

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

**42. *The price of the Equity Shares may be highly volatile after the Issue.***

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

**43. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.***

The Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

**44. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.***

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

**45. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.***

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;

- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the real estate sector;
- adverse media reports about us or the Indian real estate sector;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

***46. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

***47. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

***48. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

***49. We have in the last 12 months issued Equity Shares at a price that may be at lower than the Issue Price.***

In the last 12 months we may have issued fresh Equity Shares to the promoters and other shareholders of our Company which are as follows: -

Date of allotment	Number of Equity Shares allotted	Face value (₹)	Issue Price	Nature of allotment	Benefit accrued to our Company	Source out of which Bonus Shares Issued
January 13, 2022	74,03,484	10	-	Bonus issue in the ratio of 12 Equity Shares issued for every 1 Equity Shares held by the existing Equity Shareholders authorised by our Board, pursuant to a resolution passed at its meeting held on January 6, 2022 and by our Shareholders pursuant to a resolution passed at the EGM held on January 11, 2022. <sup>(1)</sup>	-	Bonus Issued out of General Reserves

<sup>(1)</sup> Bonus Issue of a total of 74,03,484 Equity Shares in the ratio of 12 Equity Share for every 1 Equity Share held to Smiral Ashwinkumar Patel (50,27,640 Equity Shares), Tejal Smiral Patel (16,83,432 Equity Shares), Smiral Ashwinkumar Patel HUF (4,04,376 Equity Shares), Ashwinbhai Jivrambhai Patel (90,156 Equity Shares), Dakshaben Jashwantbhai Patel (37,560 Equity Shares), Rupesh Kirtibhai Patel (34,080 Equity Shares), Ashokkumar Prahladbhai Patel (27,600 Equity Shares), Shilpa Samirbhai Patel (26,400 Equity Shares), Ushaben Ashokbhai Patel (21,600 Equity Shares), Artiben Manishbhai Patel (20,760 Equity Shares), Shobhaben Kirtibhai Patel (17,880 Equity Shares) and Kiritkumar P. Patel (12,000 Equity Shares).

The Equity Shares allotted to investors pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time.

For Further details of equity shares issued, please refer to the chapter titled “*Capital Structure*” beginning on page 54 of the Draft Prospectus.

## **EXTERNAL RISK FACTORS**

### ***50. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“**GST**”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2022 and the Ministry of Finance has notified the Finance Act, 2021 (“**Finance Act**”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may

have an impact on our results of operations. Further, a draft of the Personal Data Protection Bill, 2019 (“**Bill**”) has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

**51. *Changes in interest rates in India could adversely affect our business and the market for our real estate developments.***

Our results of operations, and the purchasing power of our real estate customers, are substantially affected by prevailing interest rates and the availability of credit in the Indian economy. Interest rates in India have fluctuated over the last few years. Our ability to borrow funds for the development of our real estate projects is affected in part by the prevailing interest rates available to us from leading Indian banks. Changes in prevailing interest rates affect our interest expense in respect of our future borrowings, and our interest income in respect of our interest on short-term deposits with banks and loans to associates. Significantly, the interest rate at which we may borrow funds, and the availability of capital to us for development purposes, affects our results of operations by limiting or facilitating the number of projects we may undertake and determining the return which we must obtain from each project to meet our obligations under our borrowings.

Changes in interest rates also affect the ability and willingness of our prospective real estate customers, particularly the customers for our residential properties, to obtain financing for their purchases of our completed developments. The interest rate at which our real estate customers may borrow funds for the purchase of our properties affects the affordability and purchasing power of, and hence the demand for, our real estate developments.

There can be no assurance that variations in interest rates and interest rate policy by the RBI will not adversely affect our financial condition and results of operations.

**52. *Our business is substantially affected by prevailing economic conditions in India.***

We perform all of our real estate development activities in India, all of our projects are located in Ahmedabad, Gujarat, India, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our real estate developments and the purchase thereof by our customers;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India’s present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighboring countries;
- prevailing national, regional or global economic conditions, including in India’s principal export markets; and
- other significant regulatory or economic developments in or affecting India or its real estate development sector.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the residential, and office space real estate markets. Demand in the residential real estate market may be adversely affected by changes such as a decrease in disposable income or a rise in residential mortgage rates or a decline in the population. Demand for our office space developments may be

adversely affected by deteriorating economic conditions that could prompt current and potential tenants to place any expansion plans on hold or to search for locations with lower rental rates.

**53. *Foreign investors are subject to foreign investment restrictions under Indian law.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

**54. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

**55. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

**56. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

**57. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.***

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

**58. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our***

***Equity Shares.***

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

#### Global Economic Overview

The war in Ukraine has triggered a costly humanitarian crisis that, without a swift and peaceful resolution, could become overwhelming. Global growth is expected to slow significantly in 2022, largely as a consequence of the war. A severe double-digit drop in GDP is expected in Ukraine due to fighting. A deep contraction is projected for Russia due to sanctions and European countries' decisions to scale back energy imports. The economic costs of war are expected to spread farther afield through commodity markets, trade, and—to a lesser extent—financial interlinkages. Fuel and food price rises are already having a global impact, with vulnerable populations—particularly in low-income countries—most affected.

The war in Ukraine will amplify economic forces already shaping the global recovery from the pandemic. The war has further increased commodity prices and intensified supply disruptions, adding to inflation. Even before Russia invaded Ukraine, broad price pressures had led central banks to tighten monetary policy and indicate increasingly hawkish future stances. As a result, interest rates had risen sharply and asset price volatility had increased since the start of 2022—hitting household and corporate balance sheets, consumption, and investment. The prospect of higher borrowing costs has also increased the cost of extended fiscal support. These changes are occurring faster than previously expected even as many parts of the global economy—particularly countries with low vaccination rates—must contend with continued strain on health care systems because of the pandemic.

The war has also added to already high uncertainty about the global outlook. Although many countries appear to be moving past the acute phase of the pandemic, new variants could again lead to waves of infection and further disruption. Inflation pressure could strengthen more than anticipated and demand more aggressive policy responses. Tighter financial conditions will shine a harsh spotlight on debt vulnerabilities among sovereign and corporate borrowers, risking widespread debt distress. Moreover, with continued tight policies toward the real estate sector and the possibility of more widespread lockdowns as part of the strict zero-COVID strategy, China's economy could slow more than currently projected—with consequences for Asia and beyond. This could further set back the recovery, particularly in emerging market and developing economies. More limited policy space could compound scarring effects, particularly in emerging market and developing economies, where medium-term baseline output is expected to be close to 6 percent below pre-pandemic projections.

More fundamentally, geopolitical tensions threaten the rules-based frameworks that have governed international economic relations since World War II. Current sanctions imposed with the aim of pressing Russia to end the war are already cutting financial and trade linkages between Russia and other countries, with far-reaching repercussions. Increased global polarization also impedes the cooperation essential for long-term prosperity. This could include derailing the urgent climate change agenda and undermining multilateral efforts to improve debt resolution frameworks, trade integration, and initiatives to avoid future pandemics.

The following graph shows the changes in inflation drivers across the globe due to varying factors from December 2020-21.

(Source: <https://www.imf.org/en/Publications/WEO/Issues/2022/04/19/world-economic-outlook-april-2022>)

Global growth is projected to slow from an estimated 6.1 percent in 2021 to 3.6 percent in 2022 and 2023. This is 0.8 and 0.2 percentage points lower for 2022 and 2023 than projected in January.

Beyond 2023, global growth is forecast to decline to about 3.3 percent over the medium term. War-induced commodity price increases and broadening price pressures have led to 2022 inflation projections of 5.7 percent in advanced economies and 8.7 percent in emerging market and developing economies—1.8 and 2.8 percentage points higher than projected last January. Multilateral efforts to respond to the humanitarian crisis, prevent further economic fragmentation, maintain global liquidity, manage debt distress, tackle climate change, and end the pandemic are essential.

India's economy is poised for a rebound after enduring a second wave of COVID-19 infections this year that further constrained activity and took a heavy toll on its people.

India's broad range of fiscal, monetary and health responses to the crisis supported its recovery and, along with economic reforms, are helping to mitigate a longer-lasting adverse impact of the crisis.

Following the deadly ‘second wave,’ growth in FY22 is expected to be nearer to the lower bound of the range of 7.5 to 12.5 percent – still putting India among the fastest growing economies in the world. The pace of vaccination, which is increasing, will determine economic prospects this year and beyond. Successful implementation of agriculture and labor reforms would boost medium-term growth, while weakened household and corporate balance sheets may constrain it. The economic slowdown triggered by the outbreak is believed to have had a significant impact especially on poor and vulnerable households. Recent projections of GDP per capita growth, taking into account the impact of the pandemic, suggest that poverty rates in 2020 have likely reverted to estimated levels in 2016.

The informal sector, where the vast majority of India’s labor force is employed, has been particularly affected. As in most countries, the pandemic has exacerbated vulnerabilities for traditionally excluded groups, such as youth, women, and migrants. Labor market indicators suggest that urban households are now more vulnerable to fall into poverty than they were before the onset of the pandemic.

The response of the government to the COVID-19 outbreak has been swift and comprehensive. A national lockdown to contain the health emergency was complemented by a comprehensive policy package to mitigate the impact on the poorest households (through various social protection measures) as well as on small and medium enterprises (through enhanced liquidity and financial support).

To build back better, it will be essential for India to stay focused on reducing inequality, even as it implements growth-oriented reforms to get the economy back on track. The World Bank is partnering with the government in this effort by helping strengthen policies, institutions, and investments to create a better future for the country and the people through green, resilient and inclusive development.

In response to the COVID-19 shock, the government and the Reserve Bank of India took several monetary and fiscal policy measures to support vulnerable firms and households, expand service delivery (with increased spending on health and social protection) and cushion the impact of the crisis on the economy. Thanks in part to these proactive measures, the economy is expected to rebound.

In 2022-23, India's GDP is expected to rise by 8.0-8.5%, owing to broad vaccine coverage, gains from supply-side reforms and regulatory ease, healthy export growth, and the availability of fiscal space to ramp up capital spending. The trajectory set for India's economy by the previous year's budget has been reinforced in Budget 2022-23. A lot of private investments taking place and consumption levels are rising as a result of increased employment. Capex generated by the government will also encourage private investment. The Production Linked Incentive (PLI) schemes in 14 sectors will further encourage private investment in order to boost export growth and allow for feasible import substitution in the country. The growth forecast for 2022-23 is based on the premise that there will be no further devastating pandemic-related economic disruption, that the monsoon will be expected, and that major central banks will withdraw global money in a relatively orderly manner.

Despite the third wave of COVID-19, overall economic activity remained stable, indicating that India has learned to cope with virus-related restrictions. Several high frequency indicators, such as electricity consumption, PMI manufacturing, exports, and e-way bill creation, reflect this. The economy's confidence has been bolstered even more by the rapid pace of immunisation. In addition, the Union Budget commitment to asset creation (public infrastructure development) in 2022-23 will re-energize the virtuous cycle of investment and crowd in private investment with huge multiplier effects, boosting inclusive and sustainable growth. Consumption will rise up once the uncertainty and worry caused by the Covid-19 virus has passed, and the demand rebound will allow the private sector to step in with investments to boost production to satisfy the rising demand. This scenario should play out for the Indian economy in 2022-23, barring geopolitical and economic surprises.

The geo-political tension triggered by the conflict between Russia and Ukraine since 24<sup>th</sup> February, 2022 has not ceased. The economic fallout of the crisis is only gradually unfolding. It may be accentuating some of the trends already underway such as global food shortages. The dated Brent Crude oil price, which forms the bulk of Indian crude oil basket has hovered around USD 105-106 / bbl since 1st of April, after having risen above USD 135 in the first/second week of March from around USD 95 just before the crisis. The Government is exploring all viable options, including import diversification, to procure crude at an affordable price. Affordability is desired as even the present level of international crude price, should it persist for a long time, may come in the way of India achieving a real economic growth rate north of 8 per cent in FY23. Be that as it may, India's economy, having swiftly recovered in 2021-22, after the pandemic induced contraction, may prove resilient owing to government's thrust on capital expenditure and improved corporate sector's financial health.

Real GDP of India increased by 8.4% YoY in Q2 of FY 22, recovering more than 100% of pre-pandemic output in the equivalent quarter of FY 20. India is one of the few countries to have grown for four consecutive quarters in Covid-19 (Q3, Q4 of FY21 and Q1, Q2 of FY22), demonstrating the economy's resiliency.

The recovery was fuelled by a resurgence in the services sector, a complete recovery in manufacturing, and continued expansion in the agriculture sector. In addition to successful pandemic management and signalling impact of promised measures, recovery was aided by a quick increase in vaccine coverage from 32% of the adult population at the end of Q1 to 75% at the end of Q2 of FY 22. According to the latest GDP estimates issued by the NSO, the Indian economy increased by 8.4% YoY in Q2 of FY 22, after growing by 20.1% YoY the previous quarter.

Industry has also been showing robust growth, particularly in the second -half of 2021-22. The combined Index of Eight Core Industries registered a YoY growth of 5.8 per cent in February 2022, highest in the last four months following an increase in output of natural gas, coal, refinery products among others. PMI manufacturing has stayed in the expansionary zone continuously for nine months contributing much to the recovery in 2021-22. Credit to industry has also seen a boisterous growth with loan growth to large corporates finally turning positive towards end of 2021-22.

### **Action against Covid-19 – India**

India has been successfully running world's second largest vaccination programme administering, as on 31st March 2022, more than 184 crore doses of vaccine. Around 91 crore of adults have received at least one dose, of which 79 crore are now fully vaccinated. The coverage of adolescents aged between 15-18 years stands at 76 per cent. In numbers, 5.7 crore adolescents have received at least one dose of which 3.8 crore are fully vaccinated, equivalent to 51 per cent of their population.

From 16th March 2022, vaccination drive has been extended to cover the adolescent population in the age group of 12-14 years. As of 31st March 2022, 1.7 crore doses have been administered to this age group. Additionally, India has also expanded its booster dose programme by removing a restriction related to comorbidities. About 2.3 crore precautionary doses have been administered to healthcare, front line workers and people aged above 60 years.

Steady fall in new COVID-19 cases and the consequent withdrawal of restrictions across states continue to strengthen the economic activity. Daily cases further abated to less than 1400 in March, reaching about one-eighth of what it was in February. The daily recoveries continue to outnumber daily new cases pushing up the recovery rate to 98.7 per cent. As on 31st March, 2022 India had less than 26 thousand active cases – down from a peak of 22.0 lakh cases on 27th Jan 2022. Delhi and Maharashtra have now made masks optional to wear reflecting their belief that the pandemic is under control. The hope is that any new variant such as Omicron XE would not pose a serious threat to the economic recovery.

In view of the controlled pandemic situation, mobility continues to expand above prepandemic levels by 7.5 per cent in March compared to 3.3 per cent in February. Average daily E-toll count increased to 87.2 lakh in March 2022 registering a growth of 40 per cent on year on year (y-o-y) basis. While average E-toll collection expanded by 32.8 per cent on y-o-y basis to ₹132.0 crore in March 2022. During 2021-22, average daily E-toll collection increased by 64 per cent while average daily E-toll count higher by 81 per cent compared to previous year.

### **Pharmaceuticals market – Global**

The pharmaceutical industry is responsible for the research, development, production, and distribution of medications. The market has experienced significant growth during the past two decades, and pharma revenues worldwide totaled 1.27 trillion U.S. dollars in 2020.

### **Covid-19 impact on the industry – Global**

Due to the upheaval caused by the COVID-19 pandemic, pharmaceutical retail shops have seen fewer walk-ins, which has brought about a loss in profit. In the long run, these decreases in revenue may require redundancies. This revenue loss also applies to manufacturers, as the demand for various pharmaceutical products changes. The dramatic surge in demand for personal protective equipment (PPE) and over-the-counter (OTC) medications during the current pandemic, as well as the onset of panic-buying by patients, brought about shortages, making it even more difficult to maintain quality of life.

China and India, the two main global suppliers of active pharmaceutical ingredients (APIs) and generics, implemented initial export bans due to COVID-19, there were shortages of both products in most countries, which slowed down the manufacture of finished products and caused certain medicines to become scarce, especially in emerging markets like Iran.

Shortages of APIs and finished products brought about price increases and prompted governments to consider whether their supply chains are robust enough or could benefit from a more self-sufficient approach. Some countries also revised regulations to restrict the importation of generics and APIs to avoid future shortages. Regulations were revised to fast-track approvals for pandemic-related treatments and compulsory licensing, which is accessed by World Trade Organization (WTO) member countries, causing a delay in the approval of non-pandemic related treatments.

Following the approval of treatments or vaccines, pharmaceutical companies can be subject to scrutiny due to the large profit margins they impose to recoup the investment in R&D. This sparks an ethical dilemma, as some struggle to decide whether to invest in researching potential cures, with the promise of boosting their reputation if they can become the first pharma company to produce pandemic-related medicines. Additionally, the impacts of the pandemic on patients' livelihoods may present the opportunity to implement patient support strategies. In these instances, companies have to decide whether the expense is worthwhile in the long run. Facing these challenges, while still upholding ethics, requires pharmaceutical companies to have strong policies.

Although the economic damage caused by a pandemic is unavoidable, pharmaceutical companies continue to donate medications, funding, services and more to countries to improve healthcare. This generosity is likely because pharmaceutical companies will gain financially from crises such as these.

Panic-buying also means an increase in sales and reduced wastage in the supply chain as medications become less likely to meet their expiry date in shipping/distribution. Therefore, we can say pandemics are an opportunity for the pharmaceutical industry to grow. During the initial wave of coronavirus infections in 2019, demand for chronic disease medications such as those for diabetes, hypertension, cholesterol, etc, increased because there were fears about shortages due to the export bans in China and India (these have since been lifted).

In addition, the worldwide policies surrounding wearing face masks continue to drive sales of PPE and there continues to be high demand for immune-boosting OTC medications, both of which financially benefit pharmaceutical companies. Also, for their therapeutics pertaining to COVID-19, some companies have applied for Orphan Drug Designation (ODD), which, if granted, provides huge tax benefits and prevents the introduction of cheaper generic/biosimilar options. Remdesivir (Veklury), produced by Gilead Sciences, is one example of a pandemic-related medication that received ODD. Moreover, because research projects shifted to focus on pandemic-related medications and priority was granted to these trials, the development of some new therapies for other indications has been delayed or their market launch disrupted.

### Pharmaceutical Market – India

The Indian Pharmaceutical Industry has witnessed a robust growth over the past few years moving on from a turnover of approx. US \$ 1 billion in 1990 to over US \$30 billion in 2015 of which the export turnover is approximately US \$ 15 billion.

The country now ranks 3rd world wide by volume of production and 14th by value, thereby accounting for around 10% of world's production by volume and 1.5% by value. Globally, it ranks 4th in terms of generic production and 17th in terms of export value of bulk actives and dosage forms. Indian exports are destined to more than 200 countries around the globe including highly regulated markets of US, West Europe, Japan and Australia. It has shown tremendous progress in terms of infrastructure development, technology base creation and a wide range of products. It has established its essence and determination to flourish in the changing environment.

The industry now produces bulk drugs belonging to all major therapeutic groups requiring complicated manufacturing technologies. Formulations in various dosage forms are being produced in GMP compliant facilities. Strong scientific and technical manpower and pioneering work done in process development have made this possible. Recognizing the potential for growth, the Government of India took up the initiative of developing the Indian Pharmaceuticals sector by creating a separate Department in July 2008. The Department is entrusted with the responsibility of policy, planning, development and regulation of Pharmaceutical Industries. An assessment of the Indian Pharmaceutical Industry's strength reveals the following key features:

- Strong export market- India exported drugs worth US\$ 15 billion to more than 200 countries including highly regulated markets in the US, Europe, Japan and Australia. Large Indian pharma companies have emerged as

among the most competitive in the evolving generic space in North America and have created an unmatched platform in this space. Indian companies are also making their presence felt in the emerging markets around the world, particularly with a strong portfolio in anti-infective and antiretroviral.

- Large domestic pharma companies have continued to grow, assuming leadership position in many therapies and segments in the Indian market as well as creating a strong international exports back-bone.
- Competitive market with the emergence of a number of second-tier Indian companies with new and innovative business modules.
- Indian players have also developed expertise in significant biologics capabilities.
- Biologic portfolios while still nascent in India are being built with an eye on the future.
- Multinational companies have continued to invest significantly in India and are making their presence felt across most segments of the Indian pharma market. Companies have also begun to invest in increasing their presence in tier II cities and rural areas and making medical care more accessible to a large section of the Indian population.
- Low cost of production.
- Low R&D costs.
- Innovative Scientific manpower.
- Excellent and world-class national laboratories specializing in process development and development of cost-effective technologies.
- Increasing balance of trade in Pharma sector.
- An efficient and cost effective source for procuring generic drugs, especially the drugs going off patent in the next few years.
- An excellent center for clinical trials in view of the diversity in population.

#### *Experience & Expertise*

India is the only country with largest number of US-FDA compliant plants (more than 262 including APIs) outside of USA. We have nearly 1400 WHO-GMP approved Pharma Plants, 253 European Directorate of Quality Medicines (EDQM) approved plants with modern state of the art Technology. No other country can boast of such an infrastructure. Thus Indian pharma companies have a wide variety of experience in manufacturing as per global standards. Through intensive competition in the Indian market, Indian companies are experienced in the manufacturing of a variety of formulations that makes them efficient and competitive in their operations.

The Indian pharma market is mature with decades of experience in generics manufacturing, catering to the needs of the general population. These companies have the experience and know-how to produce quality drugs in an efficient, high-quality and cost-effective manner without compromising on any aspect. There are many companies manufacturing drugs for oncology, AIDS and other complex therapies.

#### *Low cost of manufacture*

India is capable of manufacturing low-cost generic alternatives due to a number of economic factors favoring the industry. Some of these include the competitive land rates, the cheap labor available, low resource costs like water, electricity, lower cost of production machinery. Importantly, the various drugs like, Intermediates, APIs and Formulation companies are seamlessly integrated while following international regulations of safety.

#### *Research & Development*

The Government has taken several policy initiatives for strengthening Research & Development in Pharmaceuticals sector such as fiscal incentives to R&D units sector and streamlining of procedures concerning development of new drug molecules, clinical research and new drug delivery systems leading to new R&D set-ups with excellent infrastructure in the field of original drug discovery. India has a large branded generics market which enables most companies to launch their version of a generic drug in the market place. Research and Development is an important aspect for development of generics that match the quality and cost targets.

India is now increasingly recognized as a strategic partner in the drug discovery value chain. Further, there are Indian companies which are investing in their R&D centers and are offering early stage discovery services as well as

promising molecules. A large scientific pool in India is dedicated to Research and Development of patent non-infringing methodologies for drugs.

#### *Highly educated, specialized scientists*

India's rich human capital is the strongest asset for the Indian Pharmaceuticals Industry which is a knowledge-led industry. Various studies show that the scientific talent pool of Indians is the second largest English-speaking group worldwide, after the US. This enables easier access to qualifications that handle the basic work in a plant or an R&D set-up in India. National Institute of Pharmaceutical Education and Research (NIPER) at Mohali is a premier institute in the field of Pharmaceuticals. The institute is a member of Association of Commonwealth Universities. NIPER Mohali is offering Masters level programs and PhD programs in 15 streams. The laboratories here are fully equipped with modern facilities and the available facilities are of international level and standards. Further, six new National Institutes of Pharmaceutical Education and Research (NIPER) were opened in 2007. Recently, three new NIPERs have been proposed in the states of Maharashtra, Rajasthan and Chattisgarh.

#### *Experience in International Servicing*

Many of the Indian pharmaceutical companies are experienced in servicing top multinational companies for their highly regulated markets, meeting their stringent quality expectations. The same experience enables Indian organizations to cater to the needs of the regulatory authorities of most nations across the world. Further, technical consultancy capability of NIPERs is contributing to the growth of the industry.

Indian clinical trials industry has developed a complete gamut of clinical research services capabilities of global standards. From medical writing to site management, data management, regulatory submissions to patient recruitment the expertise meets the highest standards of stringent regulatory conditions internationally. There is an effective control system to monitor the quality of pharmaceuticals at all the levels in India. There are various agencies/ bodies under Ministry of Health & Family Welfare and Department of Pharmaceuticals. They are responsible for standard of drugs, market authorizations, import licenses, cGMP, monitoring of quality of drugs & cosmetics manufactured, pre & post licensing inspection, and price control etc. The recent initiatives through new legislations and optimized processes are targeted towards regulating the industry better and effectively.

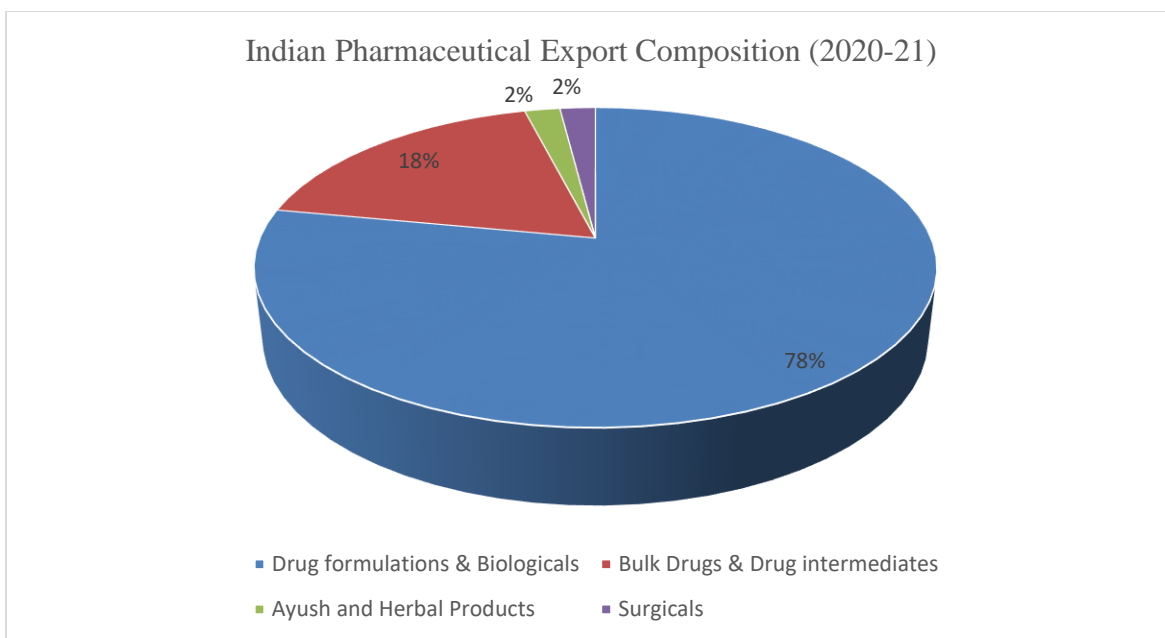

Drugs have to comply with stringent quality provisions under the Drugs and Cosmetic Act of India. Any drug including API conforms to the specifications of the prescribed pharmacopeias or those claimed on the label ensuring that all the products manufactured in India are of highest quality. All the pharmaceutical products are inspected at the customs port of the country by competent authorities before they are shipped out.

### **Pharmaceutical industry – Africa**

The estimated value of Africa's pharmaceutical market was \$20 billion in 2018. With sustained investment, it is expected to be valued at \$26 billion by 2022. This will correspond to about 2 percent of the global pharmaceutical market (projected at \$1.44 trillion) in 2022. There are about 375 pharmaceutical manufacturers on the continent, with most based in North Africa, catering to the needs of about 1.3 billion people. Those in Sub-Saharan Africa are located mainly in about nine of 46 countries, and most have small operations that do not meet international standards. By comparison, China and India, each with a similar population to Africa's, have as many as 5,000 and 10,500 manufacturers, respectively.

In Sub-Saharan Africa, only Kenya, Nigeria, and South Africa have a sizable pharmaceutical industry presence, producing to serve the local demand and export to other African countries. The companies in the region are primarily drug manufacturers that buy active pharmaceutical ingredients (APIs) from other manufacturers abroad and formulate them into finished products ready for the market. Only three companies (two in South Africa and one in Ghana) produce APIs. In general, the requisite chemical industry to support production of APIs is missing.

Regulatory standards and their enforcement across Sub-Saharan Africa lag behind global standards. As the region develops a local pharmaceutical industry, greater attention needs to be paid to adopting global standards and/or establishing, maintaining, and enforcing quality standards. Governments in the region have stepped up the fight against counterfeit, expired, and substandard drugs.

### **Key drivers for increased consumption**

The following factors have been identified as key drivers of increased consumption of health-care products and have inspired a renewed focus on achieving universal health coverage across many African nations:

#### *Changing disease burden*

Africa is experiencing an increasing incidence of non-communicable diseases. Since 2000, cases of malignant neoplasm and cardiovascular disease have increased by 2 percent per year. In contrast, infectious and parasitic diseases have declined by about 3 percent over the same period. Over the last three years, the antihypertensive market in Kenya grew by 23 percent, compared to antibacterial market growth of 11 percent.

### *Maturing business environment*

On business environment measures such as the Ease of Doing Business index and the Corruption Perception Index, Africa lags behind developed markets (such as the European Union and North America) and developing markets (such as Brazil and South Africa). However, trade policies such as the Continental Free Trade Agreement and the African Medicine Regulatory Harmonization efforts under implementation will contribute to a more market-friendly environment and accelerate access to medicines across the continent.

In the World Bank's Doing Business 2020 Report, Kenya was ranked 56 out of 190 countries, an improvement by five places from the previous year. Among African countries, Kenya was ranked fourth, after Mauritius, Rwanda, and Morocco. In 2019, Kenya implemented reforms including embracing digitalization, simplifying property registration processes, improving access to credit, and strengthening minority investor protection. In the World Economic Forum's Global Competitiveness Report 2019, Kenya was ranked ninety-fifth and improved its score by 0.5 points. Kenya performed well in areas such as corporate governance, future orientation of government, and business dynamism.

### *Policy interventions to promote local manufacturing and generic drugs usage*

To effectively meet the demand for quality and affordable medicines in Africa, governments across the continent are implementing policies to boost local manufacturing capacity, with varying levels of success. For instance, in 2008, Algeria banned the import of pharmaceuticals that were being manufactured by at least three manufacturers locally and meeting market demand. The ban list included 358 pharmaceutical products of all categories. Since then, the government has modified the list several times. The Algerian government also provides pharmaceutical manufacturers with access to purpose-built industrial parks. In Morocco, the government introduced an "equivalent price" mechanism, with periodic reviews of drug prices, to promote generic drug use. These policies are yielding results: eight of the top 20 and three of the top 10 pharmaceutical manufacturers in Africa are local or regional players producing branded or unbranded generic medicines for consumption on the continent. Furthermore, 57 percent of drugs (by volume) consumed in the first quarter of 2018 were generics.

### *Partnerships with government bodies*

The leading companies with interests in Africa are partnering with government bodies to increase awareness about disease and treatment, and to provide affordable medicines. In 2018, approximately 300 public-private partnership programs were implemented in Africa, about 40 of which focused on noncommunicable diseases. The nature of these programs ranges from treatment availability and financing to health system infrastructure development and system strengthening. These activities are components of crucial access strategies employed by pharmaceutical companies and are required for effective local operations across the continent.

### *Digital innovations*

The rapid growth in digitalization in all countries on the continent presents new opportunities to improve health-care delivery to the most vulnerable and those in hard-to-reach areas. High penetration of mobile subscriptions allows digital innovations to scale up in Africa. For example, according to the Communications Authority of Kenya, mobile penetration was estimated to be 112 percent in December 2019. The penetration of 2G and 3G networks was estimated to be 96 percent and 93 percent, respectively.

(Source: <https://www.psk.or.ke/public.pdf>)

### **Future outlook**

Medicine spending in India is projected to grow 9-12% over the next five years, leading India to become one of the top 10 countries in terms of medicine spending.

Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers, which are on the rise.

The Indian Government has taken many steps to reduce costs and bring down healthcare expenses. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian

pharmaceutical companies. In addition, the thrust on rural health programmes, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

## **BUSINESS PROCESS**

Most of the pharmaceutical market is highly regulated. Our business model relies on us manufacturing the highest standard of pharmaceutical products following the best industry practices and registering our Company in multiple countries to manufacture products. Given the time barrier for registration, this makes product switching extremely difficult as it is registered product in a regulated market. This earns our Company strength to do business in a sustained way.

Our products can be primarily bifurcated in following categories:

- a) Solid Oral Dosage form
- b) Parenteral drug dosage
- c) Oral Rehydration Solutions (ORS)

**The following are diagrammatical representations of the manufacturing processes for different products done in our Company:**

### ***Solid Oral Dosage Forms***

The solid oral dosages can be categorized two sub categories:

- Tablets
- Capsules

We manufacture solid oral dosage forms in tablets & capsules. The total sequence of operations followed from the issuance of BMR up to the final release of the batch is enclosed. For the purpose of identification equipment / machinery / containers are appropriately labelled to identify the stage of process.

Our Company usually quarantines all type of products/items prior to moving for next stage of process. There is separate room in both the factories namely 'Quarantine Area' where the relevant products or unprocessed items are quarantined. In case of tablets, the materials are quarantined after granulation, compression, coating and final packing operations for clearance from Q.A. before pursuing the next stage of process. There is difference in terms of period of quarantine for each product/item. For example, Parenteral Drugs are quarantined for the purpose of sterilizing for at least 14 days before proceeding for next stage of process.

In case of capsule, the materials are quarantined after mixing, filling and final packing operation for clearance from Q.A. before pursuing the next stage of process.

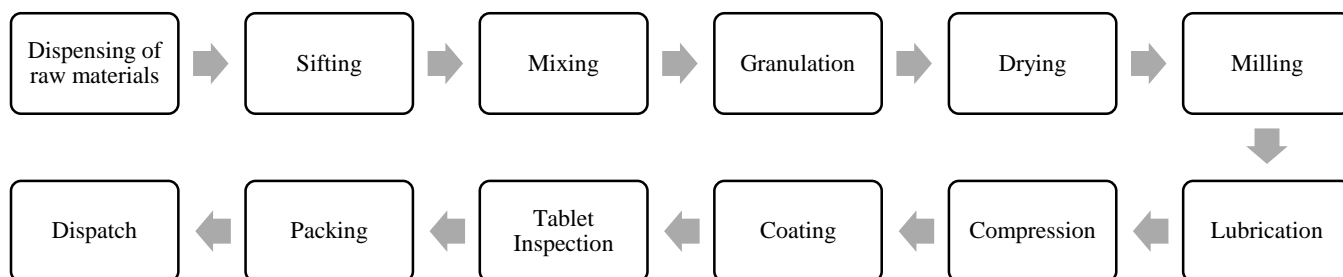

Each consignment of material received is examined visually and damaged goods and are kept separate and await Quality Control's further instructions for disposal or return.

On verification of quantity received and making batch wise segregation identification number is given serially.

Containers are labelled as 'UNDER TEST' with details such as name, code number, quantity, no of containers, manufacturer's name, material code no, and material is then quarantined.

Samples are drawn as per sampling plan and tested in detail as per specifications by quality control. On completion of tests Q.C. decides whether the material is approved or rejected and accordingly if materials is approved, 'APPROVED' labels are affixed and material is transferred to 'Approved Material' storage area.

### **Flow Chart for manufacturing process of Tablets:**

### **Dispensing of raw materials**

Dispensing the right materials to the right batches prior to the manufacturing process is a key activity in life sciences and other process industries. The process is critical when working with potent active pharmaceutical ingredients (APIs) in drug manufacturing.

### **Sifting**

Pharmaceutical Vibro Sifter is used to separate mass composition of solids, liquid from solid and grading the material as per particles size. It is a type of pharmaceutical machine used for separation of pharmaceutical solids or liquids.

### **Mixing**

Mixing of pharmaceutical powder is a unit operation that serves to make two or more components uniformly distributed in the powder bed. In most cases, solid dosage forms do not only contain one component.

### **Granulation**

Granulation, the process of particle enlargement by agglomeration technique, is one of the most significant unit operations in the production of pharmaceutical dosage forms, mostly tablets and capsules. Granulation process transforms fine powders into free-flowing, dust-free granules that are easy to compress.

### **Drying**

Drying is the process of removing the presence of solvents (i.e. water or other liquids) in a formulation with the presence of heat. The final product of this unit operation is a dry solid mass or powders.

### **Milling**

Milling involves the application of mechanical energy to physically break down coarse particles to finer ones and is regarded as a “top–down” approach in the production of fine particles. Fine drug particulates are especially desired in formulations designed for parenteral, respiratory and transdermal use.

### **Lubrication**

Lubricants are agents added in small quantities to tablet and capsule formulations to reduce the friction and improve certain processing characteristics.

### **Compression**

Direct compression (DC) is the most straightforward manufacturing option, with the fewest manufacturing steps, making it the easiest to control and least expensive. The direct compression tablet process uses two primary process steps: blending the API with excipients and compressing the finished tablets.

## Coating

Coating is a process by which an essentially dry, outer layer of coating material is applied to the surface of a dosage form in order to confer specific benefits that broadly ranges from facilitating product identification to modifying drug release from the dosage form.

## Table Inspection

Specifically, visual inspection detects cosmetic defects—such as scratches, inclusions, and dents—in a container as well as evaluates the color, fill level, and identifies the presence of foreign particles within the drug product.

## Packaging

Packaging is the process by which the pharmaceuticals are suitably placed so that they should retain their therapeutic effectiveness from the time of their packaging till they are consumed.

## Dispatch

Products are dispatched to customers as per their requirements.

### Flow Chart for manufacturing process of Capsules:

## Dispensing of raw materials

Dispensing the right materials to the right batches prior to the manufacturing process is a key activity in life sciences and other process industries. The process is critical when working with potent active pharmaceutical ingredients (APIs) in drug manufacturing.

## Sifting

Pharmaceutical Vibro Sifter is used to separate mass composition of solids, liquid from solid and grading the material as per particles size. It is a type of pharmaceutical machine used for separation of pharmaceutical solids or liquids.

## Lubrication

Lubricants are agents added in small quantities to tablet and capsule formulations to reduce the friction and improve certain processing characteristics.

## Capsule filling

Encapsulators or capsule fillers are put on work to fill empty capsules made of gelatin with powders, granules, semi-solids, liquids substances, etc. These ingredients comprise API or active pharmaceutical ingredients or a mixture of active drug substances and excipients.

### **Capsule Inspection**

Specifically, visual inspection detects cosmetic defects—such as scratches, inclusions, and dents—in a container as well as evaluates the color, fill level, and identifies the presence of foreign particles within the drug product.

### **Packaging**

Packaging is the process by which the pharmaceuticals are suitably placed so that they should retain their therapeutic effectiveness from the time of their packaging till they are consumed.

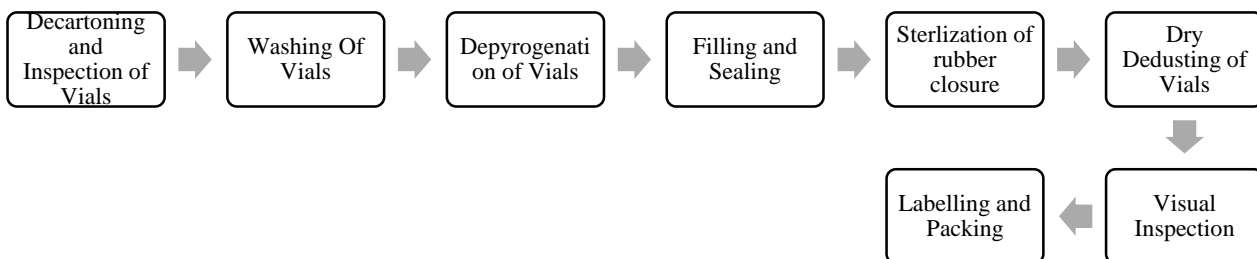

### **Dispatch**

Products are dispatched to customers as per their requirements.

### ***Parenteral Drug Injections***

A Parenteral Drug (LVP, SVP) is defined as one intended for injection through the skin or other external boundary tissue, rather than through the alimentary canal, so that active substances they contain are administered, using gravity or force, directly into a blood vessel, organ, tissue, or lesion.

#### **Flow Chart for manufacturing of Parenteral Drug dosage:**

### **Decartoning and Inspection of Vials**

Vials are dedusted and inspected for the initiation of process.

### **Washing of Vials**

The purpose of a vial washer is to remove particulate matter and microorganisms from the inside of vials. The ovens or tunnels are used for depyrogenation of the vials to reduce the quantity of endotoxins to an acceptable level.

### **Depyrogenation**

Depyrogenation is the process that removes pyrogens, including bacterial endotoxins, from vial surfaces. There are several different ways to do so, including the common method of using dry heat, whereby the exposure to temperatures above 250°C destroys the pyrogens.

### **Filling and sealing**

Product manufactured are filled in vials and are sealed for protection.

### **Sterilization of rubber closer**

The most common methods to sterilize rubber closures (e.g., stoppers) are autoclaving (saturated steam) and gamma irradiation. Both methods can influence chemical (e.g., extractables profile) and physical/functional properties (e.g., break-loose and extrusion forces)

### **Dry Dedusting of Vials**

After filling and sealing, Vials are dry dedusted through machinery with air to avoid unnecessary liquid or dry powder post sealing process.

### **Visual Inspection**

Specifically, visual inspection detects cosmetic defects such as scratches, inclusions, and dents in a container as well as evaluates the color, fill level, and identifies the presence of foreign particles within the drug product.

### **Labelling and Packaging**

Labelling and Packaging is the process by which the pharmaceuticals are suitably placed so that they contain identity based on brand and retains their therapeutic effectiveness from the time of their packaging till they are consumed.

### ***Oral Rehydration Salts - ORS***

Our company as on 28<sup>th</sup> February 2022 has licence and manufacturing capacity to manufacture ORS. Despite no manufacturing of the product has happened, we have designed manufacturing process with best industry practices.

### **Flow Chart for manufacturing of ORS:**

### **Dispensing of raw materials**

Dispensing the right materials to the right batches prior to the manufacturing process is a key activity in life sciences and other process industries. The process is critical when working with potent active pharmaceutical ingredients (APIs) in drug manufacturing.

## END USE BASED ON PRODUCT CATEGORIES

### Beta-Lactum Products

Beta-Lactam are a group of medicines that are used to treat infections caused by some germs (bacteria and certain parasites). They do not work against infections that are caused by viruses - for example, the common cold or flu. There are various type of dosages in this Group. Like Tablets, Capsules, Injection and Dry Syrups for oral Solution.

Antibiotics are normally only prescribed for more serious bacterial infections, as many infections get better on their own. Correct use of antibiotics is absolutely essential to help reduce antibiotic resistance. Germs become resistant to antibiotics over time, which then makes them less effective.

Normally this Drugs are expensive in compared to General Group of Solid Oral Dosage Forms.

Few Examples of the Antibiotic Drugs are Amoxicilline Capsules, Azithromycine Tablets, Ceftaxone Injections, Meropenam Injections, Ampicilline and Cloxacilline Capsules.

### Non Beta-Lactam Products

This Group Medicines are generally used for Genral Dieases like clod, Flu, Fever, Anti Gastrological, Anti Malerial, and several other virals. Our Company majorly manufactures Tablets and Capsules of this Group.

Few Examples of this Drugs are Paracetamole, Ciprofloxacin, Ofloxacin, Omeprazole, Fuleconaxole, Diclofenec etc.

### Oral Rehydration Salts i.e. ORS:

This type of products are used for prevention and treatment of dehydration from acute diarrhea, cholera, etc.

## COMPETITION

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Currently, our business model is such that we have strong control over our product manufacturing because of regularization. But our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc. are key factors in client decisions among competitors, however, price is the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Due to industry's fragmented nature, there is no authentic data available to our Company on total industry size and markets share of our Company vis-a-vis the competitors. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue.

## IMPACT OF COVID-19

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been minutely affected as our manufacturing units employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. The manufacturing units only operated at below regular capacities because of manpower shortages. But this issue soon subsided. We are continuously monitoring the economic conditions and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

The Drugs and Cosmetics Act, 1940 governs the import, manufacture, distribution and sale of drugs in India and deals with aspects of labeling, packing, testing and licensing. The term ‘drugs’ has been given a wide import under this legislation and includes not only the active pharmaceutical ingredient (API) component of medicines but also substances that are intended for use as components of a drug, such as empty gelatin capsules. The Central and the State Governments have been given the power to appoint inspectors under the Act, who must carry out and perform the functions as prescribed including but not limited to search and seizure, examination of records, registers and documents. Penalties have been provided for the manufacture for sale or distribution, stocking and exhibition of drugs in contravention of the Act and for the non-disclosures of names of the manufacturers, as may be prescribed. The Rules framed under this Legislation provide that for the purpose of importing drugs, an import license and registration certificate is required from the Licensing Authority. Even the manufacture for sale or distribution of drugs, requires the grant/renewal of a license by the Central License Approving Authority. Persons have been prohibited from the manufacture, distribution and sale of drugs which are not of the standard prescribed under the Act, or are misbranded, adulterated or spurious.

#### ***Drugs (Control) Act, 1950 (“Drugs Act”)***

The Drugs Act provides for control of sale, supply and distribution of drugs. Under the Drugs Act, any drug may be declared by the Central Government by notification to be a drug within its purview. The authorities may also prohibit the disposal or direct the sale of any specified drug.

#### ***Drugs (Prices Control) Order, 2013 (“DPCO”)***

The DPCO prescribes inter alia the ceiling price of scheduled formulations, retail price of a new drug for existing manufacturers of scheduled formulations, maximum retail price of scheduled formulations. Under the DPCO, the Central Government may issue directions to the manufacturers of active pharmaceutical ingredients or bulk drugs or formulations to increase production and sell such active pharmaceutical ingredient or bulk drug to such manufacturers of formulations and direct the formulators to sell the formulations to institutions, hospitals or any agency. ## ***C. Foreign Investment related Laws and Regulations***

Foreign investment in Indian securities is governed by the provisions of the Foreign Exchange Management Act, 1999 (“*FEMA*”) read with the applicable FEM Rules. FEMA replaced the erstwhile Foreign Exchange Regulation Act, 1973. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the government approval route, depending upon the sector in which foreign investment is sought to be made. The DIPP (now DPIIT) makes policy pronouncements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEM Rules. In case of any conflict, the FEM Rules prevail. Therefore, the regulatory framework, over a period of time consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DIPP (now DPIIT) issued the FDI Policy which consolidates the policy framework on FDI issued by DIPP (now DPIIT), in force on August 28, 2017 and reflects the FDI policy as on August 28, 2017. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP (now DPIIT). As per the FDI Policy, FDI up to 100% is permitted in wholesale trading under automatic route and upto 51% is permitted in multi brand retail trading under the government route subject to certain conditions prescribed under FDI policy. As per the Press Note No. 3 of 2020 dated April 17, 2020 issued by the DIPP, has amended the FDI Policy to include restrictions on entities belonging to a country, which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, where they can invest only under the Government route. In respect of all industries not specified as FDI under the automatic route, and in respect of investment in excess of the specified sectoral limits under the automatic route, approval may be required from the RBI. At present, the FDI Policy does not prescribe any cap on the foreign investments in the sector in which the Company operates. Therefore, foreign investment up to 100% is permitted in the Company under the automatic route.

### ***The Foreign Trade (Development and Regulation) Act, 1992 and the Rules framed thereunder***

Hence, every entity in India engaged in any activity involving import/export is required to obtain an IEC unless specifically exempted from doing so. The IEC shall be valid until it is cancelled by the issuing authority.

#### ***D. Environment Related Laws***

The National and State governments are jointly responsible for the sustainable management of the forest resource. Since our Company deals primarily in manufacturing activities relating to wood waste and Agro forestry, there are various environmental and forest specific laws that are required to be taken into consideration. By virtue of the 42nd amendment to the Constitution of India in 1976, the subject matter of 'forest' was brought from the state list to the concurrent list empowering the Central Government to legislate on this subject. In India, various state governments have enacted their own Forest Acts or made an amendment to the Indian Forest Act, 1927. Further, the Indian Forest Act, 1927 empowers the state government to enact rules to regulate various aspects of forest management such as prescribing procedure for issuance of transit pass, setting up of saw mills, saw pits etc. In a practical sense, the State forest departments act as the custodians of the public forest resource and as the forest authorities, managing the forest resources in the basis of the forest management plans that they submit to the central government.

Our manufacturing activities are subject to, among other laws, environmental laws and regulations promulgated by the Ministry of Environment and Forest of Government of India, Saw Mill Rules, the State Forest Policy, State Pollution Control Board and Central Empowered Committee. These include laws and regulations about cutting of trees, discharge of effluents, polluted emissions, hazardous substances etc. On wood based industries, the Hon'ble Supreme Court of India has given specific directives from time to time and the same would be applicable to our Company as well. Laws relating to excise, customs, GST, factory and labour related matters etc. are applicable to our Company, as they are applicable to other manufacturing establishments. The applicable environmental laws are summarized below:

##### ***Indian Forest Act, 1927***

The Indian Forest Act, 1927 ("**Forest Act**") is India's guiding forestry legislation that seeks to consolidate and preserve areas with forest cover or significant wildlife, to regulate movement and transit of forest produce, and to levy duties on timber and other forest produce. It lays out the procedure by which a State government can declare an area a Reserved Forest, Protected Forest or a Village Forest. It also defines as to what is a forest offence, what are the acts prohibited inside a Reserved Forest, and what penalties occur on violation of the provisions of the Forest Act. The Forest Act gives the State Governments the power to formulate rules to regulate matters such as the cutting, sawing, conversion and removal of trees and timber, and the collection, manufacture and removal of forest-produce from protected forests; the granting of licenses to persons felling or removing trees or timber or other forest-produce from such forests for the purposes of trade, and production etc.

##### ***Forest (Conservation) Act, 1980 (the "Act")***

The Act was promulgated to provide for the conservation of forests and for matters connected therewith or ancillary or incidental thereto. The Act prevents state governments from making any order directing that any forest land be used for a non-forest purpose or that any forest land is assigned through lease or otherwise to any private person or corporation not owned or controlled by the Government without the approval of the GoI. The Ministry of Environment and Forests ("**MoEF**") mandates that Environment Impact Assessment ("**EIA**") must be conducted for projects. In the process, the Ministry receives proposals for the setting up of projects and assesses their impact on the environment before granting clearances to the projects.

The EIA Notification S.O. 1533, issued on September 14, 2006 (“**EIA Notification**”) under the provisions of the Environment Act, prescribes that new construction projects require prior environmental clearance from the MoEF. The environmental clearance must be obtained from the MoEF according to the procedure specified in the EIA Notification. No construction work, preliminary or other, relating to the setting up of a project can be undertaken until such clearance is obtained. Under the EIA Notification, the environmental clearance process for new projects consists of four stages – screening, scoping, public consultation and appraisal. After completion of public consultation, the applicant is required to make appropriate changes in the draft ‘EIA Report’ and the ‘Environment Management Plan.’ The final EIA Report has to be submitted to the concerned regulatory authority for appraisal. The regulatory authority is required to give its decision within 105 days of the receipt of the final EIA Report.

#### ***Air (Prevention and Control of Pollution) Act, 1981***

The Air (Prevention and Control of Pollution) Act, 1981 (the “**Act**”) aims to prevent, control and abate air pollution and pursuant to the provisions of this Act, any person, establishing or operating any industrial plant within an air pollution control area, must obtain the consent of the relevant State Pollution Control Board prior to establishing or operating such industrial plant. The State Pollution Control Board is required to grant consent within a period of four months of receipt of an application, but may impose conditions relating to the consent granted. No person operating any industrial plant in any air pollution control area is permitted to discharge the emission of any air pollutant in excess of the standards laid down by the State Pollution Control Board. The penalties for the failure to comply with the above requirements include imprisonment of up to six years and the payment of fine extending up to ₹ 10,000.

Under the said Act, the Central Pollution Control Board has powers, inter alia, to specify standards for the quality of air, while the State Board has the power to inspect any control equipment, industrial plant or manufacturing process, to advise the State Government with respect to the suitability of any premises or location for carrying on any industry and to obtain information from any industry.

#### ***Water (Prevention and Control of Pollution) Act, 1974***

The Water (Prevention and Control of Pollution) Act, 1974 (“**Water Act**”) aims to prevent and control water pollution as well as restore water quality by establishing and empowering the Central Pollution Control Board and the State Pollution Control Boards. Under the Water Act, any person establishing any industry, operation or process, any treatment or disposal system, use of any new or altered outlet for the discharge of sewage or new discharge of sewage, must obtain the consent of the relevant State Pollution Control Board, which is empowered to establish standards and conditions that are required to be complied with. In certain cases, the State Pollution Control Board may cause the local Magistrates to restrain the activities of such person who is likely to cause pollution. Penalty for the contravention of the provisions of the said Act include the imposition of fines or imprisonment, or both.

The Central Pollution Control Board has the powers, inter alia, to specify and modify standards for stream and wells. The State Pollution Control Board has powers, inter alia, to inspect any sewage or trade effluents, and to review plans, specifications or other data relating to plants set up for treatment of water. The State Board also has the power to evolve efficient methods of disposal of sewage and trade effluents on land, to advise the State Government with respect to the suitability of any premises or location for carrying on any industry likely to pollute a stream or well and to specify standards for treatment of sewage and trade effluents.

#### ***The Environment Protection Act, 1986***

The Environment Protection Act, 1986 (the “**Act**”) has been enacted for the protection and improvement of the environment (which includes water, air, land, human beings, other living creatures, plants, microorganisms, etc.) and for matters connected therewith. The Act empowers the Central Government to take measures to protect and improve the environment such as by laying down standards of emission or discharge of pollutants, providing for restrictions regarding areas where industries may operate, prohibitions and restrictions regarding the handling of hazardous substances and location of industries and so on. The Central Government is empowered by the Act to constitute authority or authorities for the purpose of exercising and performing such powers and functions, to appoint a person for inspection, for analysis of samples and for selection of notification of environmental laboratories.

#### ***Hazardous Wastes (Management, Handling and Trans boundary Movement) Rules, 2008***

The Hazardous Wastes (Management, Handling and Transboundary Movement) Rules, 2008 (***“Hazardous Waste Rules”***) define the term ‘hazardous waste’ and any person who has control over the affairs of a factory or premises or any person in possession of the hazardous waste is classified as an ‘occupier’. In terms of the Hazardous Waste Rules, occupiers have been, *inter alia*, made responsible for safe and environmentally sound handling of hazardous wastes generated in their establishments and are required to obtain license/authorisation from the respective State Pollution Control Board for generation, processing, treatment, packaging, storage, transportation, use, collection, destruction, conversion, offering for sale, transfer or the life of the hazardous waste.

#### ***The Noise Pollution (Regulation and Control) Rules, 2000***

The Noise Pollution (Regulation and Control) Rules, 2000 (the “Rules”) aim to regulate and control noise producing and venerating sources with the objective of maintaining the ambient air quality standards in respect of noise. The Rules declare different areas or zones each permitting for different ambient air quality standards in respect of noise and the noise levels shall not exceed this limit, as prescribed by the Schedule. The Rules also prescribe methods to cut down on noise from various sources including industries, such as by mounting machinery, using insulating screens and suitable ducts, etc.

#### ***National Environment Policy (the “Policy”)***

The present national policies for environmental management are contained in the National Forest Policy, 2018, the National Conservation Strategy and Policy Statement on Environment and Development, 1992, the Policy Statement on Environment and Development, 1992; and the Policy Statement on Abatement of Pollution, 1992. Some sector policies such as the National Agriculture Policy, 2018; National Population Policy, 2000; and National Water Policy, 2012 have also contributed towards environmental management. All these policies have recognized the need for sustainable development in their specific contexts and formulated necessary strategies to give effect to such recognition. The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. It does not displace, but builds on the earlier policies.

The Objectives of the Policy are as follows:

- Conservation of critical environmental resources
- Intra-generational equity: Livelihood security for the poor
- Inter-generational equity
- Integration of environmental concerns in economic and social development
- Efficiency in environmental resource use
- Environmental governance
- Enhancement of resources for environmental conservation

The Policy evolved from the recognition that only such development is sustainable, which respects ecological constraints and the imperatives of justice. The objectives stated above are to be realized through various strategic interventions by different public authorities at Central, State and Local government levels. They would also be the basis of diverse partnerships. The principles followed in the Policy are:

- Human beings are the center of sustainable development concerns
- Right to development must be fulfilled so as to equitably meet developmental and environmental needs of present and future generations.
- In order to achieve sustainable development environmental protection shall constitute an integral part of the development process and cannot be considered in isolation from it.
- Where there are credible threats of serious or irreversible damage to key environmental resources, lack of full scientific certainty shall not be used as a reason for postponing cost-effective measures to prevent environmental degradation.
- In various public actions for environmental conservation, economic efficiency would be sought to be realized.

The Information Technology Act, 2000 (the “**IT Act**”) creates a liability on a body corporate which is negligent in implementing and maintaining reasonable security practices and procedures, and thereby causing wrongful loss or wrongful gain to any person, while possessing, dealing with, or handling any sensitive personal data or information in a computer resource owned, controlled or operated by it but affords protection to intermediaries with respect to third party information liability. The IT Act also provides for civil and criminal liability including compensation, fines, and imprisonment for various computer related offences. These include offences relating to unauthorised disclosure of confidential information and committing of fraudulent acts through computers, tampering with source code, unauthorised access, publication or transmission of obscene material etc. The IT Act empowers the Government of India to formulate rules with respect to reasonable security practices and procedures and sensitive personal data. Additionally, the IT Act empowers the Government of India to direct any of its agencies to intercept, monitor or decrypt any information in the interest of sovereignty, integrity, defence and security of India, among other things. In April 2011, the Department of Information Technology under the Ministry of Communications and Information Technology notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules 2011 under Section 43A of the IT Act and the Information Technology (Intermediaries Guidelines) Rules, 2011 under Section 79(2) of the IT Act.

### ***Indian Patents Act, 1970***

Once granted, trademark registration is valid for ten years, unless cancelled, and may be renewed indefinitely upon payment of renewal fees every ten years. If not renewed after ten years, the mark lapses and the registration has to be restored. The Trade Mark (Amendment) Act, 2010 has been enacted by the Government to amend the Trade Mark Act to enable Indian nationals as well as foreign nationals to secure simultaneous protection of trademark in other countries. It also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to align the law with international practice.

In March 2017, the Trade Marks Rules, 2017 (“**Trade Mark Rules**”) were notified, in supersession of the Trade Marks Rules, 2002. The Trade Marks Rules brought with them some changes in the application process, in terms of an increase in application fees and common formats for multiple kinds of applications. However, the e-filing process has been incentivized by providing lower application fees.

### FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

### ***Regulatory Framework***

At present, the segments in which we operate is highly regulated. While we are not in a position to predict the likelihood, timing or content of any such regulation or legislation, if any such regulation or legislation is notified, we may be affected in various ways. Though we believe that we have obtained permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

### ***Ability of Management***

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

### ***High dependency on Geo-Political circumstances***

Our business has a major export component which is hugely dependent on the geopolitics between nations and can be grossly affected with any economic sanctions, war, global pandemics, rise in the prices of crude oil, unavailability of transportation vessels stuck in war zones, etc. Any form of economic sanctions which can prevent us from exporting to our markets or any trade agreement between our market and another supplier country can increase competition for us and can put us in a disadvantage. To mitigate this we may have to penetrate into several other markets to reduce risk of over dependence on a few markets.

### ***Ability to manage logistics and transportation needs***

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our factory to our customers and other markets. Since the cost of our goods carried by third party transporters is typically much higher than the consideration paid for transportation, it may be difficult for us to recover damages for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, global supply chains can be impacted with the increase in the fees of shipping routes putting cost pressures. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage or shrinkage may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

### ***Competition***

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Currently, our business model is such that we have strong control over our product manufacturing because of regularization. But our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc are key factors in client decisions among competitors, however, price is the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify

competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

### **COVID-19 Pandemic**

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on most businesses. But for Our Company the impact of Covid-19 was on the moderate side on the business of company. Our Company operations was regular in Covid-19 situation. But a prolonged pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the onslaught of the second wave of the virus and the likelihood of a third wave, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter “*Risk Factors*” beginning on Page No. 21. We are continue to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. ## **PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR**

SEBI has issued UPI Circular in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circular, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to

ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 and till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

**Phase II:** This phase has become applicable from July 1, 2019 and the continuation of this phase has been extended until March 31, 2020. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

**Phase III:** The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Bidders into the UPI Mechanism.

The Sponsor bank based on the mandate approved by the RII at the time of blocking of funds, will raise the debit / collect request from RIIs bank account, whereupon the funds will be transferred from RIIs account to public issue account and remaining funds, if any, will be unblocked without any manual intervention by RII or his / her bank.

##### **MULTIPLE APPLICATIONS**

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

- I. All applications are electronically strung on first name, address (1<sup>st</sup> line) and applicant’s status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband’s name to determine if they are multiple applications

- II. Applications which do not qualify as multiple applications as per above procedure are further checked for common DP ID/ beneficiary ID. In case of applications with common DP ID/ beneficiary ID, are manually checked to eliminate possibility of data entry error to determine if they are multiple applications.
- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of “know your client” norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.

An investor making application using any of channels under UPI Payments Mechanism, shall use only his / her own bank account or only his / her own bank account linked UPI ID to make an application in public issues. Applications made using third party bank account or using third party linked bank account UPI ID are liable for rejection. Sponsor Bank shall provide the investors UPI linked bank account details to RTA for purpose of reconciliation. RTA shall undertake technical rejection of all applications to reject applications made using third party bank account.

The Company, in consultation with the Lead Manager reserves the right to reject, in its absolute discretion, all or any multiple applications in any or all categories. In this regard, the procedure which would be followed by the Registrar to the Issue to detect multiple applications is given below:

1. All Applications will be checked for common PAN. For Applicants other than Mutual Funds and FII sub-accounts, Applications bearing the same PAN will be treated as multiple Applications and will be rejected.
2. For Applications from Mutual Funds and FII sub-accounts, submitted under the same PAN, as well as Applications on behalf of the Applicants for whom submission of PAN is not mandatory such as the Central or State Government, an official liquidator or receiver appointed by a court and residents of Sikkim, the Application Forms will be checked for common DP ID and Client ID.
