You should consult your tax, financial and legal advisors about particular consequences to you of an investment in this Issue. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

To obtain a complete understanding, you should read this section in conjunction with the sections “Industry Overview”, “Our Business” and “Management’s Discussion and Analysis of Financial Position and Results of Operations” on pages 75, 87 and 140 of this Draft Prospectus, respectively. The industry-related information disclosed in this section that is not otherwise publicly available is derived from industry sources as well as Government Publications. Industry sources as well as Government Publications generally state that the information contained in those publications has been obtained from sources believed to be reliable but that their accuracy and completeness and underlying assumptions are not guaranteed and their reliability cannot be assured.

This Draft Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and, in the section titled “Forward-Looking Statements” on page 18 of this Draft Prospectus.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

1. Our Company do not own any premises where the registered office of the company is situated.

Our Registered office of the company situated at Plot No. C-94, Phase VII, Industrial Focal Point, S.A.S Nagar, Mohali-160055, Punjab Our registered office is owned by one of our group company M/s Pritika Industries Limited with whom we have entered into a rent agreement dated 14th February, 2018 and further extend the agreement upto 31st July, 2023. However if the agreement is terminated by either of the parties or upon expiry of the said agreement or increase in rent or any non-compliance, we may have to vacate the office and re-locate to another premises or agree to pay the extra amount for using the same premises. Further

increase in rent structure will lead to increase of our expenditure which in turn will lead to decrease of revenue and increase operational cost.

2. ***We extend significant credit terms to our customers and are subject to counterparty credit risk. Any deterioration in such customers' financial position and their ability to pay or our inability to extend credit in line with market practice may adversely impact our profitability.***

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments for an order over which our Company have devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

3. ***We do not have firm commitment long-term supply agreements with our customers. If our customers choose not to source their requirements from us, there may be a material adverse effect on our business and results of operations.***

We do not generally have firm commitment long-term supply agreements with our customers and instead rely on purchase orders issued by our customers from time to time that set out the commercial terms, delivery conditions and the indicative volumes to be procured from us. Where we have supply agreements with our customers, these agreements set forth the terms of sales but do not bind customers to any specific products, specifications, purchase volumes or duration and can be terminated by our customers with or without cause, with little or no advance notice and without compensation. In addition, such supply agreements provide flexibility to our customers to place an order for a lesser quantity of products in the schedules given to us despite a higher quantity specified in the contract. Customers may also place an order for products with different specifications from those stated in the contract. There is no commitment on the part of the customer to continue to place orders with us. For actual supply, we rely on schedules given to us periodically by our customers. These schedules may be amended or cancelled prior to delivery, and should such amendment or cancellation take place, we may be unable to seek compensation for any surplus products that we manufacture that are unpurchased. As our customers do not typically give these schedules to us until a short time before the products are required from us, we do not hold a significant order book at any time, making it difficult for us to forecast revenue, production volume or sales.

Our customers have high standards for product quality and delivery schedules. Any failure to meet customers' expectations could result in the cancellation or non-renewal of our supply agreements with them. Also, purchase orders are typically subject to conditions such as ensuring that all products delivered to the customer have been inspected and are safe for use. Customers may set off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by undertaking more work in-house or replace their existing products with alternative products, any of which may have an adverse effect on our business and results of operations.

4. ***We have a tentative timeline for our project of Investment in relation to the new unit set up by our wholly owned subsidiary, Meeta Castings Limited (MCL). In the event of any delay in receiving the orders, or in the event of delay in installation of machineries in a timely manner, or at all, may result in time and cost overruns and our business, prospects and results of operations may be adversely affected.***

We intend to utilize portions of the Net Proceeds for our project of Investment in relation to the new unit set up by our wholly owned subsidiary, Meeta Castings Limited (MCL). For details in respect of the foregoing, see "Objects of the issue" on page 61. While we are proceeding with the tentative timeline mentioned in the "Objects of the issue", such timelines are tentative in nature and may be subject to revisions, and other commercial and technical factors. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. Further, the actual amount and timing of our future capital requirements may differ from our estimates as a result of, among other things, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, engineering design changes and technological changes. In the event of any delay in procuring the order and/or installation of machineries, or an escalation in the cost of acquisition of the equipment or in the event the vendors are not able to provide and/or install the equipment in a timely manner, or at all, we may encounter time and cost overruns.

As on the date of draft prospectus, the Percentage and value terms of the Plant and Machinery for which orders are yet to be placed is approximately Rs. 481.84 lacs i.e. 44.92%. Further, if we are unable to procure and/or install the requisite materials or equipments, we cannot assure you that we may be able to identify alternate entity to provide and/or install the materials or equipments which satisfy our requirements at acceptable prices. Our inability to procure and/or install the machinery and equipment at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations

5. *Pricing pressure from our customers may adversely affect our gross margin, profitability and ability to increase our prices, which may in turn have a material adverse effect on our results of operations and financial condition.*

We manufacture and supply complex, high-quality precision forged and machined components for the automotive sectors. We have in the past experienced and may continue to experience pressure from our customers to reduce our prices, which may affect our profit margins going forward. In addition, as any price reduction is the result of negotiations and factors that may be beyond our control, we, like other manufacturers, must be able to reduce operating costs and increase operating efficiencies in order to maintain profitability. As our business is very capital intensive, requiring us to maintain a large, fixed cost base, our profitability is dependent, in part, on our ability to spread fixed costs over higher sales volume. However, we may not be able to spread such fixed costs effectively as our customers generally negotiate for larger discounts in price as the volume of their orders increases. If we are unable to offset customer price reductions in the future through improved operating efficiencies, new manufacturing processes, sourcing alternatives and other cost reduction initiatives, our results of operations and financial condition may be materially adversely affected.

6. *The proceeds from this issue are intended to be utilized for Investment in relation to the new unit set up by our wholly owned subsidiary, Meeta Castings Limited (MCL). This project is yet to be approved by an Appraisal agency.*

Our company plans to utilize the proceeds from the issue for Investment in relation to the new unit set up by our wholly owned subsidiary, Meeta Castings Limited (MCL). We are yet to receive approval from the appraisal agency regarding this project. Any deviation in appraisal outcome from the appraisal agency may force our company to change the projected costings and may push the completion date of the project further which may have a business and financial impact on our overall performance and we may also lose certain customers and market share. This may also impact on the viability of the project and may also reduce the cost-benefit of the project.

7. *We are yet to renew certain regulatory licenses, registrations and approvals in respect of our business operations. Failure to obtain or maintain licenses, registrations, permits and approvals may severely affect our business and results of operations.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to require, to obtain and hold relevant licenses, approvals and permits at state and central government levels for carrying our business operations. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we will need to apply for renewal of approvals, licenses, registrations and permits, which are subject to expiration in the near future. Furthermore, if the Company wishes to enter into a new line of business or introduce a new product in the market, we would need additional permits and approval which may or may not be granted by the relevant authority amounting to hindrances in new business set up or future plans of the Company.

While we have obtained a number of approvals, licenses, registrations and permits from the relevant authorities. However, any failure to apply for and obtain the required consents and registrations or any cognizance being taken by the concerned authorities for non-registration could result in levy of penalties and other legal proceedings which may adversely affect our business, financial condition, results of operations and prospects. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see Chapter titled “Government and Other Approvals” on page 162 of this Draft Prospectus.

Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied regularly by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents and registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

8. There are certain outstanding legal proceedings involving Our Company. Any failure to defend these proceedings successfully may have an adverse effect on our financial conditions, business, reputation and result of ongoing operations.

Our Company are involved in certain legal proceedings, which if determined, against us/them could harm our reputation or adversely affect our business, financial condition and results of operations. These proceedings are pending at different levels of adjudication before various courts, tribunals and appellate authorities. We do not have any patent with respect to our manufacturing processes as on date. Our rights may not prevent our competitors from developing, using or commercializing products that are functionally equivalent or similar to our products. The process of seeking patent protection can be lengthy and expensive. Further, our patent applications may fail to result in patents being issued, and our future patents may be insufficient to provide us with meaningful protection or a commercial advantage.

9. *Conflicts of interest may arise out of common business undertaken by our Company and our Promoter Company and Promoter Group, Pritika Auto Industries Ltd and Pritika Industries Limited.*

Our Promoter and Promoter Group company, Pritika Auto Industries Ltd and Pritika Industries Limited are authorized to carry similar activities as those conducted by our Company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our Promoter Company in circumstances where our respective interests diverge. There can be no assurance that our Promoter or our Group Company will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

10. *Our Promoters and certain members of our Promoter Group have extended personal guarantees with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.*

Our Promoters and certain members of our Promoter Group, have extended personal guarantees in favour of certain banks with respect to various facilities availed by our Company from them. Our financial position and future ability to avail loans are dependent on our promoters to honour the guarantee. There is no guarantee about the willingness and ability of our promoters to honour the said guarantees, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. In the event any of these guarantees are revoked, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. If our lenders enforce these restrictive covenants or exercise their options under the relevant debt financing agreements, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details please refer to the chapter titled — “*Financial Indebtedness*” on page 150 of this Prospectus.

11. *We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.*

The percentage of Revenue from our top 3 customers in FY22 and FY21 were 99.79% and 99.65% respectively, and for FY20, the percentage of Revenue from our top 2 customers were 99.80%. Our Company is engaged in the business of manufacturing of engineering products. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction

in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders or expand our customer base on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

12. Our financing agreements impose certain restrictions on our operations, and our failure to comply with operational and financial covenants may adversely affect our reputation, business and financial condition.

Certain of our financing arrangements impose restrictions on the utilization of the loan for certain specified purposes only. Moreover, certain of our financing documents contain provisions that may limit our ability to incur future debt and create security and require us to obtain the respective lenders' consent prior to carrying out certain activities and entering into certain transactions. While, as on the date of this Draft Red Herring Prospectus, we have obtained requisite consents from our lenders for undertaking the Offer, failure to obtain requisite consents in the future in a timely manner or at all could have significant consequences on our business, prospects and operations. While we have not breached any covenants in the past, a failure to observe the covenants under our financing arrangements or to obtain necessary waivers may lead to the termination of our credit facilities, acceleration of amounts due under such facilities, suspension of further access/ withdrawals, either in whole or in part, for the use of the loans/facilities, imposition of penal interest, appointment of a nominee director by the lender on our Board and enforcement of security. Additionally, working capital facilities availed by us are typically repayable on demand. In the event any or all of our lenders, demand immediate repayment of facilities availed from them, we may be unable to procure alternative financing in a timely manner at acceptable terms.

The lenders may have the right to withdraw their facilities in the event of any change in circumstances, including, any material change in the ownership or shareholding pattern of our Company. Such financing agreements may also require us to maintain certain financial ratios. Certain of our loans can also be recalled by lenders at any time. If the lenders exercise their right to recall a loan, it could have an adverse effect on our reputation, business and financial position.

If our future cash flows from operations and other capital resources are insufficient to pay our debt obligations or our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets, our financial condition at such time and the terms of our other outstanding debt instruments. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest or principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our creditworthiness or credit rating, which could harm our ability to incur additional indebtedness on acceptable terms. Additionally, our cost of borrowing may increase when there is a change in LIBOR rates and a resultant increase in interest rates for our existing loans. These ultimately may have an impact on our business and financial health.

13. We have incurred significant capital expenditures in the past and there can be no assurance that our past or planned capital expenditures will result in growth and/or additional profitability for our Company.

Our company has installed capacity of 9600 MT, 12000 MT and 12000 MT in FY20, FY21 & FY22 respectively. We have incurred significant capacity expenditures to increase our manufacturing capacity. The capacity utilization in FY20, FY21 & FY22 was 41%, 44% and 55% respectively.

There is no guarantee or assurance that the unutilized capacity would be utilized in the future to generate additional revenue or profitability for our company.

14. In the event that any of our contingent liabilities materialise, our financial condition, results of operations and cash flows may be adversely affected.

As of March 31, 2022, our aggregate contingent liabilities amounted to ₹ 90.50 lacs. The following table sets forth certain information relating to our contingent liabilities as of March 31, 2022:

Contingent liabilities

(in ₹ lacs)

Particulars	As of March 31, 2022
Letter of credit	90.50
Total	90.50

We cannot assure you that these contingent liabilities shall not become established as liabilities. In the event any of these contingent liabilities become established as liabilities, it may have an adverse effect on our financial condition and results of operations. Further, there can be no assurance that we shall not incur similar or increased levels of contingent liabilities in the future. For further details, see also “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on page 140.

15. We depend on our senior management team and other personnel with technical expertise, and if we are unable to recruit and retain qualified and skilled personnel, our business and our ability to operate or grow our business may be adversely affected.

Our success depends to a large extent on the continued services of our senior management team and other personnel with technical expertise. In an event they no longer work for us, there is no assurance that we will be able to find suitable replacements for such Key Managerial Personnel in a timely manner or at all and implement a smooth transition of responsibilities to any newly appointed management personnel. The market for qualified professionals is competitive and we may not continue to be successful in our efforts to attract and retain qualified people. We may therefore need to increase compensation and other benefits in order to attract and retain personnel in the future, which may adversely affect our results of operations.

We are a technology driven company with significant focus and investment in our in-house engineering capabilities. Our future success, amongst other factors, will depend upon our ability to continue to attract and retain qualified personnel, particularly engineers and other associates with critical expertise, know-how and skills that are capable of helping us develop technologically advanced systems and components and support key customers and products. The specialised skills we require in our industry are difficult and time-consuming to acquire and, as a result, are in short supply. We require a long period of time to hire and train replacement personnel when we lose skilled employees. Our inability to hire, train and retain a sufficient number of qualified employees could delay our ability to bring new products or services to the market and impair the success of our operations. This could have an adverse effect on our business and results of operations.

Our success also depends, in part, on key customer relationships forged by our senior management team. If we were to lose these members of the senior management, we cannot assure you that we will be able to continue to maintain key customer relationships or renew them, which could adversely affect our business, financial condition, results of operations and cash flows.

16. We have incurred indebtedness. In addition, certain of our financing agreements involve variable interest rates and an increase in interest rates may adversely affect our results of operations and financial condition.

Our company operates in the industry which is capital intensive in nature, and we fund a large part of our operations through financing from banks. As on March 31, 2022, we had total financial indebtedness of ₹ 2507.67 lakhs. For further information on our secured borrowings, see “*Financial Indebtedness*” on page 150. We usually finance our working capital requirements mainly through our internal accruals and arrangements with banks. Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows and our capacity to service debt in a rising interest rate environment.

If our future cash flows from operations and other capital resources are insufficient to pay our debt obligations or our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets, our financial condition at such time and the terms of our other outstanding debt instruments. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations.

We are susceptible to changes in interest rates and the risks arising therefrom. Certain of our financing agreements provide for interest at variable rates and the lenders are entitled to charge the applicable rate of interest, which is a combination of a base rate/MCLR rate that depends upon the policies of the RBI and a contractually agreed spread. Also see “*Financial Indebtedness*” on page 150 for a description of interest payable under our financing agreements. Further, in recent years, the GoI has taken measures to control inflation, which included tightening the monetary policy by raising interest rates. As such, any increase in

interest rates may have an adverse effect on our business, results of operations, cash flows, and financial condition.

17. We have in the past entered into related-party transactions and may continue to do so in the future, which may potentially involve conflicts of interest.

We have entered into certain transactions with related parties and are likely to continue to do so in the future. For details on our related-party transactions, see “Other Financial Information – Related Party Transactions” on page 138. Although all related-party transactions that we may enter into are at arm’s length, as required under the Companies Act and the SEBI Listing Regulations, we cannot assure you that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. Such related-party transactions may potentially involve conflicts of interest which may be detrimental to our interest and we cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, financial condition and results of operations.

18. Certain of our Promoters, Directors and Key Management Personnel may be interested in us other than in terms of remuneration and reimbursement of expenses, and this may result in conflict of interest with us.

In future certain of our Promoters, Directors and Key Management Personnel may be interested in us, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding, direct and indirect, and our stock options and benefits arising therefrom. Our Promoter may also be interested in us to the extent of his shareholding in us and any benefits arising therefrom. We cannot assure you that our Promoter, certain of our Directors and Key Management Personnel will exercise their rights as shareholders to our benefit and best interest.

19. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

The issue proceeds are entirely at the discretion of the issuer/management. As per SEBI (ICDR) Regulations, 2018, appointment of monitoring agency is required only if Issue size exceeds ₹ 10,000 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the Companies Act, 2013 the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

20. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the objects of the Issue as has been stated in the section “Objects of the Issue” on page no. 61 of the Draft Prospectus. The proposed schedule of implementation of the objects of the Issue are based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue this may affect our revenues and results of operations.

21. Any default in repayment of deposits or payment of interest thereon by the issuer and subsidiaries, and the roll over of liability may impact our cash flows, financial and business health.

As on March 31st, 2022, we do not have any loans from our Promoter Company on our balance sheet. But during the normal course of business, our wholly owned subsidiary may take a decision to take loans from external borrowers or from our company or from our promoter. This would increase the credit risk of the subsidiary. There is no guarantee that our subsidiary will be able to appropriately use the funds to generate enough returns as expected while taking the debt. There is no guarantee that our subsidiary will be able to service the debt as its business operations may not be able to generate enough cash flows. Any inability to repay debts may lead to a roll over effect of the liability on to our company or to our promoters. Our company or our promoters may have to service the debts taken by our subsidiary in case of the inability of our subsidiary in servicing its own debts. This may hamper the financial plans of our company or our promoters, as our cash flows may be diverted for repayment of the debt of our subsidiary, which may impact our financial and business performance.

22. Development of technologically advanced products involves a lengthy and expensive process with uncertain timelines and outcomes. We may be unsuccessful in innovating or developing technologically advanced products or may be unable to add to our existing capabilities, which could adversely affect our business, results of operations and cash flows.

Our future growth depends on our ability to continue to develop and commercialize innovative, viable and sustainable new automotive systems and components in a timely and cost-effective manner. The development and commercialization of new products is complex, time-consuming and costly, and its outcome is inherently uncertain. The automotive industry is characterized by rapid and frequent advancements in technology and changes in market demand can often render existing technologies and equipment obsolete and could require substantial new capital expenditures. Due to the long lead times associated with development for many of the technologically advanced automotive systems and components, as well as the competitive advantage that can come from being the initial developer of a new product, it is important that we maintain a sufficiently large portfolio of systems and components and a product pipeline and manage their development processes so as to bring our systems and components to market on a timely basis. The launch of a new product is a complex process, the success of which depends on a wide range of factors, including the production readiness of our manufacturing facilities and manufacturing processes and those of our suppliers, as well as factors related to tooling, equipment, employees, initial product quality and other factors. Production shortfalls or production delays, if any, or our inability to accurately estimate the cost to design, develop and launch new products could result in our failure to effectively manage our manufacturing costs relating to these product program launches. If we are unable to bring enough products to market, or if products are brought to market after competing products are commercialized, our growth strategy may not be successful, and our business would be adversely affected.

We are dependent on the success of our design and engineering team and the failure to develop new or improved products or process improvements or production techniques could adversely affect our business, financial condition and results of operations and have a negative effect on our competitive position.

23. Any failure to adapt to industry trends and evolving technologies to meet our customers' demands may materially adversely affect our business and results of operations.

Changes in consumers' preferences, regulatory or industry requirements, or competitive technologies may render certain of our products obsolete or less attractive.

We could also face competition for potential future revenue streams if our competitors are able to commercialise certain innovations before we can do so. We may have to procure a license for the technology, which may not be available on reasonable terms, if at all, and may significantly increase our operating expenses or may require us to restrict our business activities in one or more respects. As a result, we may also be required to develop alternative non-infringing technology, which could require significant effort and expense. If we fail to develop sufficient revenue streams covered by adequately robust intellectual property rights, we could lose market share and revenues to competitors. Any of these developments, alone or in combination, may have a material adverse effect on our business, results of operations and financial condition.

24. We may be subject to reputational risks due to any dissatisfaction in the product quality or delivery commitments mismanagement. If our products does not meet our customers' expectations, we may face reputational risk which may become hard for our company to recover from.

Our products may contain quality issues or undetected errors or defects, especially when first introduced, resulting from the design or manufacture of the product or raw materials used in the product. While we test for quality on a sample basis, we cannot assure you that all products would meet the quality standards. We may be asked to replace such products, in the event that our products fail to meet the required quality standards. Further, if any of the products sold by us fail to comply with quality standards, it may result in customer dissatisfaction, which may have an adverse impact on our business, sales and results of operations. We may fail to acquire new customers because of loss of reputation which may have a long term impact on our business performance. We may make efforts to recover our loss of reputation through various marketing campaigns or public relations efforts which may increase our costs and affect our bottom line, and that may also not assure us any recovery of reputation.

25. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

Our Company is engaged in business of manufacturing which attracts tax liability such as Goods and Service tax, Income tax, and professional tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund and Employee State Insurance. Any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

26. There have been instances of delays of certain forms which were required to be filed as per the reporting Requirements under the Companies Act, 2013 to RoC.

In the past, there have been certain instances of delays in filing statutory forms, such as Forms DIR-12 as per the reporting requirements Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC. Company has also filed Form MGT-7, DPT-3 and AOC-4 under Companies Fresh Start Scheme, 2020 (“CFSS Scheme”).

27. We depend on third parties with whom we do not have long-term supply contracts for the supply of raw materials. A loss of suppliers or interruptions in the delivery of raw materials or volatility in the prices of raw materials on which we rely may have a material adverse effect on our business and results of operations.

	% of Cost of Materials Consumed		
	FY22	FY21	FY20
Top 5	40.19%	64.13%	35.12%
Top 10	61.35%	89.44%	50.36%

The percentage of Cost of Materials Consumed from our top 5 suppliers were 40.19%, 64.13% and 35.12% in FY22, FY21 and FY20 respectively, and from our top 10 suppliers were 61.35%, 89.44% and 50.36% in FY22, FY21 and FY20 respectively.

We are dependent on third party suppliers for the supply of our raw materials and assembled components. Our ability to identify and build relationships with reliable suppliers contributes to our growth and our successful management of our inventory as well as other aspects of our operations. In the absence of long-term contracts, we cannot assure you that a particular supplier will continue to supply our products in the future. Further, there can be no assurance that increased demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. Any change in the supply pattern of our raw materials can adversely affect our business and results of operations. Discontinuation of production by our suppliers, a failure by any of our suppliers to adhere to any delivery schedule or a failure to provide materials of the requisite quality could also hamper our production schedule and affect our business. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers and cannot procure the raw materials from other sources, we may be unable to meet our production schedules for our products and ship such products to our customers in timely fashion, which may adversely affect our customer relations and reputation. We may also be required to replace a supplier if its products or services do not meet our safety, quality or performance standards or if a supplier unexpectedly discontinues operations due to reasons beyond its or our control, including financing constraints caused by credit market conditions.

In addition, prices of certain raw materials we rely on, such as CRC Scrap, MS Scrap, Turning Scrap, Cast Iron & Pig Iron, are linked to commodity markets and thus subject to fluctuation. There can be no assurance that the prices for these products will not be volatile in the future. While in practice we have passed the increase in the cost of raw materials onto our domestic customers, our cash flows may still be adversely affected due to any gap in time between the date of procurement of those raw materials and the date on which we can reset the component prices for our customers so as to account for the increase in the prices of such raw materials. In addition, we may not be able to pass all of our raw material price increases to our customers. Our ability to adjust pricing terms with customers varies based on our specific customer relationships, market practice with respect to the particular raw material or component and other factors such as raw material content and whether medium-term price fluctuations have been factored into our component prices at the time of price finalisation.

28. Information relating to the installed capacity and capacity utilisation included in this Draft Prospectus is based on various assumptions and estimates and capacity utilisation may vary

Information relating to the installed capacity and capacity utilisation included in this Draft Prospectus are based on various assumptions and estimates of our management that have been taken into account by the chartered engineer in the calculation of our installed capacity and capacity utilisation. Future capacity utilisation rates may vary significantly from the estimated production capacities of our manufacturing facilities and historical capacity utilization rates. In addition, capacity utilisation is calculated differently in different countries, industries and for the different kinds of products we manufacture. Undue reliance should therefore not be placed on our historical installed capacity and capacity utilisation for our existing manufacturing facilities included in this Draft Prospectus. Please refer chapter titled “Our Business” – Installed Capacity and Capacity Utilisation by Product Family on page 87.

29. We are exposed to counterparty credit risk of our customers and any significant delay in receiving payment or non-receipt of payments may have a material adverse effect on our results of operations.

We are exposed to counterparty credit risk of our customers and any significant delay in receiving payments or non-receipt of payments may have a material adverse effect on our results of operations, financial

condition and cash flows. There is no assurance that we will accurately assess the creditworthiness of our customers. Macroeconomic conditions, such as a credit crisis in the global financial system or global economic uncertainty, or a pandemic, such as the COVID- 19 pandemic, could lead to deterioration in our customers financial condition and results of operations, which could limit their access to the credit markets, which in turn may worsen their creditworthiness and may impact their ability to process our payments. Such conditions could cause our customers to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which may increase our receivables. For details on the ageing of trade receivables, please refer the chapter titled “*Financial Statements*” Note 9 Trade Receivables on page 137. Timely collection of dues from customers also depends on our ability to complete our contractual commitments and subsequently bill for and collect from our clients. If we are unable to meet our contractual obligations, we may experience delays in the collection of, or be unable to collect, our customer balances, which may have a material adverse effect on our results of operations and cash flows and our credit risk also increases.

30. *A substantial portion of our assets are hypothecated or mortgaged in favour of lenders as security for some of our fund-based and non-fund-based borrowings. Our lenders may enforce the security in the event of our failure to service our debt obligations which may adversely affect our business, financial condition and results of operations.*

As of March 31, 2022, we had total secured fund and non-fund-based borrowings of ₹ 2507.67 lacs. These borrowings are secured, among others, through a charge by way of hypothecation on our present and future current assets and fixed assets as well as through mortgage on our land and buildings. Please refer the chapter titled “*Financial Indebtedness*” on page 150. As these assets are hypothecated or mortgaged, our rights in respect of transferring or disposing of these assets are restricted. Further, in the event we fail to service our debt obligations, the lenders have the right to enforce the security created in respect of our secured borrowings. If the lenders choose to enforce security and dispose our assets to recover the amounts due from us, our business, financial condition and results of operations may be adversely affected.

31. *Our operations are subject to environmental, health and safety laws, which could result in material liabilities in the future.*

We are subject to applicable laws and regulations and customer specifications with respect to the protection of the environment and employee health and safety in each of the jurisdictions in which we operate. Our manufacturing processes and products are subject to stringent quality and safety standards and new laws and regulations may be imposed from time to time that may increase our compliance costs or restrict our operations. There can be no assurance that these requirements will not become more stringent over time.

32. *A decline in the financial condition and results of operations of our customers could have a material adverse effect on our business, results of operations and cash flows.*

The financial condition and results of operations of our customers is affected by the sales of their products to their respective customers, which may be impacted by several factors, including general economic conditions and the COVID-19 pandemic. Any material weakening of the sales of our material customers could directly impact our business due to the potential postponement or cancellation of their planned purchases or the potential delay of their designs of new platforms.

33. *We are dependent on third parties for the transportation and timely delivery of our products to customers*

We rely on third parties for the transportation services for the timely delivery of our products to our customers located in India. Our domestic operations use road transportation. Therefore, we face a risk that there could be deficiency or interruption in these third-party services.

34. *Any failure to compete effectively in the highly competitive precision components industry could have a material adverse effect on our business, financial condition, results of operations and cash flows.*

We face competition in India, which is based on many factors, including product quality and reliability, breadth of product range, product design and innovation, technology, manufacturing capabilities, distribution channels, scope and quality of service, price and brand recognition. We compete with global competitors to retain our existing business as well as to acquire new business. Some of our competitors may have certain advantages, including greater financial, technical and/ or marketing resources, which could enhance their ability to finance acquisitions, fund international growth, respond more quickly to technological changes and/ or operate in more diversified geographies and product portfolios

In addition, we face increasing competition across our product portfolio. Some of our competitors may be able to produce similar or equivalent products at lower costs than we can produce them. Additionally, we face competitive price pressures from lower-cost manufacturers and we expect such price pressures to increase as our customers continue to expand their manufacturing footprints in emerging markets, thereby providing opportunities for local manufacturers to compete. Accordingly, we may not be able to compete

effectively with our competitors, which may have an adverse effect on our business, financial condition, results of operations and cash flows.

Further, manufacturers that do not currently compete with us could expand their product portfolios to include products that would compete directly with ours. Changes in the product focus of larger manufacturers could also result in such manufacturers establishing relationships with our customers that may reduce or entirely replace our business with those customers. In addition, certain key customers to whom we currently sell certain products could decide to compete with us as manufacturers of these products. Any of these factors could have a material adverse effect on our business, financial condition, results of operations and cash flows.

35. Our estimates of production volumes may not correspond to the actual demand for our products.

We estimate our production volumes based on close customer dialogue, purchase orders, historical production volumes by our customers, our experience and general economic and market conditions. However, we are unable to assure that the demand for our products will develop in line with our estimates. The actual demand for our products for a few of our customers has varied significantly from their estimated sales volumes in the past. There is no assurance that we will be able to plan our production schedules to meet the actual requirements. In addition, regardless of the accuracy of such indicators, factors outside our control may require revision of our estimates. If we over-estimate the volume of products we expect to sell, we will have excess production capacity which may reduce operational efficiency and the margins on the products sold. If we underestimate the volume of products we need to produce at any of our manufacturing facilities, or fail to order a sufficient volume of supplies and input materials from our third-party suppliers, we may be unable to meet customer orders, which may affect our reputation or lead to a discontinuation of future orders from customers. In some cases, our customers have required a rapid increase in production, which placed an excessive burden on our resources and caused a material increase in costs.

36. We might unintentionally infringe upon the intellectual property rights of others, any misappropriation of which could harm our competitive position

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty as to whether we are infringing on any existing third-party intellectual property rights. We may therefore be susceptible to claims from third parties asserting infringement and other related claims. If claims or actions are asserted against us, we may be required to obtain a licence, modify our existing technology or cease the use of such technology and design a new non-infringing technology. Such licences or design modifications can be extremely costly. Furthermore, necessary licences may not be available to us on satisfactory terms, if at all. In addition, we may decide to settle a claim or action against us, the settlement of which could be costly. We may also be liable for any past infringement. Any of the foregoing could adversely affect our business and results of operations.

In certain cases, our customers share their intellectual property rights in the course of the product development process that we carry out for them. If our customers intellectual property rights are misappropriated by our employees in violation of any applicable confidentiality agreements, our customers may seek damages and compensation from us. This could have an adverse effect on our business, results of operations and damage our reputation and relationships with our customers.

37. Any shutdown of our manufacturing facilities may have an adverse effect on our business, results of operations and financial condition.

Our manufacturing facilities are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, industrial accident, labour disputes, natural disasters, epidemics or pandemics, such as the COVID-19 pandemic, and the need to comply with the directives of relevant government authorities. The assembly lines of our customers rely significantly on the timely delivery of our components and our ability to provide an uninterrupted supply of our products is critical to our business. Our customer relationships, business and results of operations may be adversely affected by any disruption of operations of our product lines, including as a result of any of the factors mentioned above. Any shutdown or operational failure of our manufacturing facilities may also result in a reduction in the capacity utilisation levels at our manufacturing facilities, which may have an adverse effect on our results of operations.

38. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage or accurately report our financial risks.

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. Any dilution or deficiency in our internal control system may expose us to additional risks.

39. We cannot assure payment of dividends on the Equity Shares in the future.

Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flows, capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and subsequent approval of Shareholders and will depend on factors that our Board of Directors and Shareholders deem relevant, including among others, our future earnings, financial condition, cash flows, capital requirements, capital expenditures, business prospects and restrictive covenants under our financing arrangements. We may decide to retain all of our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on the Equity Shares. We cannot assure you that we will be able to pay dividends at any point in the future. For further information, please refer the chapter titled “*Dividend Policy*” on page 136.

40. We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public.

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. It may also result to additional expenses

41. We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the automobile industry, changing customers’ taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

EXTERNAL RISK FACTORS

42. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“GST”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST.

43. *The novel coronavirus (Covid-19) pandemic outbreak and steps taken to control the same have impacted our industry and to a certain extent, our business, results of operations, financial condition and cash flows and its further impact will depend on future developments, which are highly uncertain.*

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the onslaught of the third wave of the virus and the likelihood of a fourth wave, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees faced the threat of getting infected. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our operations in order to follow the Government's norms. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. Once the lockdown was lifted, our operations restarted in full swing. Initially we did find a little hiccup in finding workers but because of our enterprising organization, we were able to source quality workforce and we were able to train them and we restarted our operations. After lifting the lockdown and resuming our operations the demand in our industry abruptly increased from the different sectors and we attained the highest production during the partial year 2020-21 and FY 2021-22. The demand after pandemic ultimately nullified the impact of shutdown during COVID 19 pandemic.

Further, if in case due to any fourth or consequent wave of Coronavirus or surge in new and deadly variants of the Virus, if another lockdown is imposed in the country and further restrictions are imposed by the government, we may face huge losses and our business operations could be severely impacted. Any such restrictions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition. Also, see "Restated Financial Statements" on page 137 of this Draft Prospectus.

44. *Financial instability in other countries may cause increased volatility in Indian financial markets and, directly or indirectly, adversely affect the Indian economy and our business, financial condition, results of operations and cash flows.*

The Indian financial markets and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and emerging economies in Asia. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian financial markets. Although economic conditions vary across markets, a loss of investor confidence in one emerging market may cause increased volatility in other emerging markets, including the Indian financial markets. Therefore, financial instability in other countries may cause increased volatility in Indian financial markets and, directly or indirectly, have an adverse effect on the Indian economy and our business, financial condition, results of operations and cash flows.

45. *Political instability, changes in economic policy, changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business, financial condition and results of operations.*

Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalisation and deregulation. The rate of economic liberalisation could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. For further details of the laws currently applicable to us, please refer the chapter titled "Key Regulations and Policies" on page no. 103.

There can be no assurance that the Government of India will not implement new regulations and policies that would require us to obtain approvals and licences from the Government of India and other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

In addition, unfavourable changes in, or interpretations of, (or the promulgation of) existing or new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may require management time and other resources, and any failure to comply may adversely affect our business and results of operations. Uncertainty in the applicability, interpretation or implementation of any amendment to, or changes in, governing laws, regulations or policies, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming and costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, it could increase our tax payments (prospectively or retrospectively) and/ or subject us to penalties. As a result, any such changes or interpretations could have an adverse effect on our business, financial condition and results of operations.

46. Terrorist attacks, civil disturbances and regional conflicts involving India may have an adverse effect on our business, results of operations and the price of the Equity Shares.

India has, from time to time, experienced social and civil unrest within the country and hostilities with neighbouring countries. There have been continuing tensions between India and Pakistan over the states of Jammu and Kashmir. In the past there were armed conflicts over parts of Kashmir. Isolated troop conflicts and terrorist attacks continue to take place in these regions. In addition, in June 2020, a confrontation occurred between Indian and Chinese military forces. These hostilities and tensions could lead to political or economic instability in India, which may have an adverse effect on our business, results of operations and the price of the Equity Shares. In addition, any further hostilities and tensions could result in investors attaching a higher risk premium to shares of Indian companies, which could have an adverse effect on the price of the Equity Shares.

India has witnessed localized terrorist attacks in the recent past, including, among others, the terrorist attacks in Pulwama in 2019, in Pathankot and Uri in 2016, in Mumbai in 2011 and 2008 and in New Delhi in 2011. Any further terrorist attack in India could result in investors attaching a higher risk premium to shares of Indian companies, which could have an adverse effect on the price of the Equity Shares.

47. If inflation rises in India, increased costs may result in a decrease in our profits.

Increasing inflation in India could cause the costs of rent, wages, raw materials and other expenses to rise. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, financial condition, results of operations and cash flows.

48. The occurrence of natural disasters may adversely affect our business, financial condition, results of operations and cash flows.

The occurrence of natural disasters, including hurricanes, floods, tsunamis, earthquakes, tornadoes, fires and explosions, could damage or destroy one or more of our manufacturing facilities and adversely affect our business, financial condition and results of operations and cash flows.

49. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction. Further, our Company's Articles of Association, composition of our Company's Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as a shareholder in an Indian company than as a shareholder of an entity in another country or jurisdiction.

RISKS RELATING TO THE OFFER AND THE EQUITY SHARES

50. Investors may be subject to Indian taxes arising out of the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realised on

the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax ("STT"), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on the seller and/or the purchaser of the Equity Shares and collected by the domestic stock exchange on which the Equity Shares are sold. Further, any capital gains realised on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India as well as STT.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020 and, accordingly, such dividends would not be exempt in the hands of the shareholders, both for residents as well as non-residents. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action, including dividends.

Similarly, any business income realised from the transfer of equity shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller. Additionally, in terms of the Finance Act, 2018, which has been notified on March 29, 2018 with effect from April 1, 2018, taxes payable by an assessee on the capital gains arising from transfer of long-term capital assets (introduced as section 112A of the Income-Tax Act, 1961) shall be calculated on such long-term capital gains at the rate of 10%, where the long-term capital gains exceed ₹ 100,000, subject to certain exceptions in case of resident individuals and Hindu Undivided Families.

Further, the Finance Act, 2019 has made various amendments in the taxation laws and clarified that, in the absence of a specific provision under an agreement, the buyer will be liable to pay stamp duty in case of sale of securities through stock exchanges, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis, is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. These amendments were notified on December 10, 2019 and have come into effect from July 01, 2020.

51. Fluctuations in the exchange rate between the Rupee and other currencies could have an adverse effect on the value of the Equity Shares in those currencies, independent of our results of operations.

The Equity Shares will be quoted in Rupees on the Stock Exchanges. Any dividends in respect of the Equity Shares will be paid in Rupees. Any adverse movement in currency exchange rates during the time it takes to undertake such conversion may reduce the net dividend received by investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares, may reduce the net proceeds received by investors. The exchange rate between the Rupee and other currencies (such as the U.S. dollar, the Euro, the pound sterling, the Hong Kong dollar and the Singapore dollar) has changed substantially in the past and could fluctuate substantially in the future, which may have an adverse effect on the value of the Equity Shares and returns from the Equity Shares in foreign currency terms, independent of our results of operations.

52. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Offer Period and withdraw their Bids until Bid/ Offer Closing Date. While our Company is required to complete Allotment pursuant to the Offer within six Working Days from the Bid/ Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, financial condition or results of operations may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

Global Economic Overview

The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have reimposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies. The ongoing retrenchment of China's real estate sector and slower-than-expected recovery of private consumption also have limited growth prospects.

Global growth is expected to moderate from 5.9 in 2021 to 4.4 percent in 2022—half a percentage point lower for 2022 than in the October World Economic Outlook (WEO), largely reflecting forecast markdowns in the two largest economies. A revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply shortages produced a downward 1.2 percentage-points revision for the United States. In China, pandemic-induced disruptions related to the zero-tolerance COVID-19 policy and protracted financial stress among property developers have induced a 0.8 percentage-point downgrade. Global growth is expected to slow to 3.8 percent in 2023. Although this is 0.2 percentage point higher than in the previous forecast, the upgrade largely reflects a mechanical pickup after current drags on growth dissipate in the second half of 2022. The forecast is conditional on adverse health outcomes declining to low levels in most countries by end-2022, assuming vaccination rates improve worldwide and therapies become more effective.

Elevated inflation is expected to persist for longer than envisioned in the October WEO, with ongoing supply chain disruptions and high energy prices continuing in 2022. Assuming inflation expectations stay well anchored, inflation should gradually decrease as supply-demand imbalances wane in 2022 and monetary policy in major economies responds.

Risks to the global baseline are tilted to the downside. The emergence of new COVID-19 variants could prolong the pandemic and induce renewed economic disruptions. Moreover, supply chain disruptions, energy price volatility, and localized wage pressures mean uncertainty around inflation and policy paths is high. As advanced economies lift policy rates, risks to financial stability and emerging market and developing economies' capital flows, currencies, and fiscal positions—especially with debt levels having increased significantly in the past two years—may emerge. Other global risks may crystallize as geopolitical tensions remain high, and the ongoing climate emergency means that the probability of major natural disasters remains elevated.

With the pandemic continuing to maintain its grip, the emphasis on an effective global health strategy is more salient than ever. Worldwide access to vaccines, tests, and treatments is essential to reduce the risk of further dangerous COVID-19 variants. This requires increased production of supplies, as well as better in-country delivery systems and fairer international distribution. Monetary policy in many countries will need to continue on a tightening path to curb inflation pressures, while fiscal policy—operating with more limited space than earlier in the pandemic—will need to prioritize health and social spending while focusing support on the worst affected. In this context, international cooperation will be essential to preserve access to liquidity and expedite orderly debt restructurings where needed. Investing in climate policies remains imperative to reduce the risk of catastrophic climate change.

The following graph shows the rise in inflation across the globe due to varying factors.

Emerging Markets Lead the Rebound

Emerging markets, excluding China, have faced numerous cyclical challenges in recent years. Now, with more favourable COVID-19 dynamics in many developing nations, emerging markets could set the pace for global growth. Morgan Stanley economists expect this momentum to continue into next year. At the same time, emerging markets should benefit from widening U.S. current account deficits, low U.S. real interest rates, a weaker dollar, and accommodative macroeconomic policies.

Indian Economic Overview

The Indian economy has fully recovered to the pre-pandemic real GDP level of 2019-20, according to the provisional estimates of GDP released on May 31, 2022. Real GDP growth in FY 2021-22 stands at 8.7%, which is 1.5% higher than the real GDP in FY 2019-20. These figures are associated with stronger growth momentum, indicating increased economic demand. The investment rate in the fourth quarter increased to its highest level in the previous nine quarters. Moreover, capacity utilisation in the manufacturing sector rose in the fourth quarter, as against the third quarter, implying a build-up in demand, which is consistent with the growth objectives of the Indian economy.

Future capital spending of the government in the Indian economy is expected to be supported by factors such as tax buoyancy, streamlined tax system, thorough assessment and rationalisation of the tariff structure and digitisation of tax filing. In the medium term, an increase in capital spending on infrastructure and asset-building projects is set to increase growth multipliers. Furthermore, revival in monsoon and Kharif sowing helped the agriculture sector gain momentum. As of July 11, 2022, the South-West monsoon has covered the entire country, resulting in 7% higher rainfall than the normal level.

India has emerged as the fastest-growing major economy in the world, and is expected to be one of the top three economic powers globally over the next 10-15 years, backed by its robust democracy and strong partnerships.

GDP and Inflation rate in India

(as on April, 2022)

(Source: <https://www.imf.org/en/Countries/IND>)

India's economy is poised for a rebound after enduring a second wave of COVID-19 infections this year that further constrained activity and took a heavy toll on its people.

India's broad range of fiscal, monetary and health responses to the crisis supported its recovery and, along with economic reforms, are helping to mitigate a longer-lasting adverse impact of the crisis.

India: Economic statistics

(Source: <https://www.imf.org/en/News/Articles/2021/11/02/na111121-indias-economy-to-rebound-as-pandemic-prompts-reforms>)

Following the deadly ‘second wave,’ growth in FY22 is expected to be nearer to the lower bound of the range of 7.5 to 12.5 percent – still putting India among the fastest growing economies in the world. The pace of vaccination, which is increasing, will determine economic prospects this year and beyond. Successful implementation of agriculture and labour reforms would boost medium-term growth, while weakened household and corporate balance sheets may constrain it. The economic slowdown triggered by the outbreak is believed to have had a significant impact especially on poor and vulnerable households. Recent projections of GDP per capita growth, taking into account the impact of the pandemic, suggest that poverty rates in 2020 have likely reverted to estimated levels in 2016.

The informal sector, where the vast majority of India’s labour force is employed, has been particularly affected. As in most countries, the pandemic has exacerbated vulnerabilities for traditionally excluded groups, such as youth, women, and migrants. Labour market indicators suggest that urban households are now more vulnerable to fall into poverty than they were before the onset of the pandemic.

The response of the government to the COVID-19 outbreak has been swift and comprehensive. A national lockdown to contain the health emergency was complemented by a comprehensive policy package to mitigate the impact on the

poorest households (through various social protection measures) as well as on small and medium enterprises (through enhanced liquidity and financial support).

To build back better, it will be essential for India to stay focused on reducing inequality, even as it implements growth-oriented reforms to get the economy back on track. The World Bank is partnering with the government in this effort by helping strengthen policies, institutions, and investments to create a better future for the country and the people through green, resilient and inclusive development.

In response to the COVID-19 shock, the government and the Reserve Bank of India took several monetary and fiscal policy measures to support vulnerable firms and households, expand service delivery (with increased spending on health and social protection) and cushion the impact of the crisis on the economy. Thanks in part to these proactive measures, the economy is expected to rebound.

Real GDP of India increased by 8.4% YoY in Q2 of FY 22, recovering more than 100% of pre-pandemic output in the equivalent quarter of FY 20. India is one of the few countries to have grown for four consecutive quarters in Covid-19 (Q3, Q4 of FY21 and Q1, Q2 of FY22), demonstrating the economy's resiliency.

The recovery was fuelled by a resurgence in the services sector, a complete recovery in manufacturing, and continued expansion in the agriculture sector. In addition to successful pandemic management and signalling impact of promised measures, recovery was aided by a quick increase in vaccine coverage from 32% of the adult population at the end of Q1 to 75% at the end of Q2 of FY 22. According to the latest GDP estimates issued by the NSO, the Indian economy increased by 8.4% YoY in Q2 of FY 22, after growing by 20.1% YoY the previous quarter.

Automotive Parts and Components market – Global

Auto components refer to the spare parts and replacement parts that are used in an automobile. Auto components are the various equipment installed in an automobile for performing specific functions. They can be broadly categorized into two types: mechanical and electrical systems. A car may require a clutch, flywheel, or brakes, depending on whether it is light-weighted like a passenger vehicle (PC) or heavy-weight such as a commercial vehicle (LCV and HCV). The most common auto components are engines, brakes, suspensions, steering wheels, etc. An automotive component is a single part of the overall vehicle system that has been engineered to fulfill one or more functions at different stages throughout its life cycle. Auto components are the parts, pieces, and equipment related to different types of vehicles. Auto components include all mechanical devices that have been attached to a vehicle to function properly.

Auto parts and components include bodies, chassis, interiors, exteriors, seating, powertrains, electronics, mirrors, closures, roof systems & modules, etc. All the parts and components are installed in a car to supply the best driving experience.

Robert Bosch, Denso Corp., Magna International, Continental and ZF Friedrichshafen are the leaders of the Automotive Parts and Components industry, which take about 10% market share. China is the major region of the global market, which takes about 25% market share.

India holds the pole position with an annual production of about a million units in FY21, almost half of the global volume. Last year the domestic sales stood at 900,000 and exports were at 100,000 units. India's tractor industry contributes USD 4 billion to 5 billion to the country's automotive component industry.

Covid-19 impact on the industry – Global

COVID-19 sickness began to spread all over the world at the beginning of 2021, infecting countless individuals in general, and important governments all over the world imposed foot restrictions and work stoppage orders. Aside from the clinical supplies and life support items organizations, most endeavours have been significantly impacted, and Automotive Parts and Components adventures have been severely impacted.

Trends

The automotive industry is rapidly growing due to the introduction of new innovations, which is bolstering the growth of the auto parts manufacturing industry. Therefore, the key players are aligning their strategies to the prevalent trends in order to maintain competitiveness in such a dynamic environment. For example, the demand for auto parts manufacturing is expected to expand in the coming years by introducing the latest technology in automotive engine radiators. Leading industries are now planning to manufacture lightweight car parts to produce components, which are significantly lightweight and much more fuel-efficient than their predecessors. Owing to stricter environmental regulations leading to the replacements in motor cars and their engines, the amount of scrap is higher in developed countries compared to the developing world. Similarly, in developed countries, the use of new technologies and innovations in motors like hybrid motors is more prevalent than developing countries. The demand for manufacturing new vehicles with reduced consumption of fuel is stimulated by increasing government support with relatively stricter emission standards, resulting in the higher demand for automotive parts. These factors are expected to support the growth of the global market for auto parts manufacturing.

The Asia Pacific emerged as a significant market for auto parts manufacturing in 2020. The region is also anticipated to be a major global market, witnessing a robust growth rate. New technology applications in the field of producing automotive parts are expected to boost the automotive sales in the region. The regional market is being driven by an increase in the production and sales of vehicles and passenger cars and the digitisation of distribution systems for automotive components.

Governments around the globe also have stringent vehicle emission regulations for product manufacturers to manufacture environmentally sustainable and highly effective automobile products for both the domestic and international markets, which is likely to boost the market demand. In recent years, there have been considerable development in the automotive industry, with developing markets like China, India, and Brazil anticipated to boost market growth globally.

The increasing use of smaller tractors for performing specific agricultural tasks is a key trend being observed in the Indian tractor market. Small tractors are increasingly being used for different activities, such as mowing grass, cleaning up the piles, and hauling. This helps in increasing the efficiency of the farming activities, as a particular tractor is assigned to perform a specific task. Additionally, it helps reduce the cost for the farmers, who can now buy the tractor for serving their specific purpose only, without hampering the utility of the larger tractors. Rapid urbanization and growth in population, expansion in industrialization and investments by governments in logistics are main drivers of commercial vehicle industry growth.

Our Business Process

The demand from client is sourced through sale & marketing department. Upon receipt of the demand, the process of production commences. Procurement of raw material is planned accordingly. Thereafter the Production department creates the production schedule (monthly/weekly/daily/shift wise). The manufacturing process is as follows: Core Making, Molding, Melting, Pouring, Shakeout, Short Blasting, Fettling, Inspection, Painting and Machining.

The final product is sent to the Store & Sales Department that takes care of supplying it to the end customers.

Our business processes are mainly comprising of two processes:

- a. Foundry
- b. Machining

PROCESS OF MANUFACTURE : FOUNDRY

Product:

Our Company manufactures various Tractors & Automobile components like End Cover, Cover Sealed Brake, Differential Case, Cover Hydraulic Lift, Cover Transcase, Front Wheel hub, Fly Wheel Housing, Rear Axle Casings, Hydraulic Lift Covers, Brake Housing & Front Engine Supports etc. The manufacturing process is given here under.

1. Preparation of Sand:

This is most important activity of the unit, where sand is prepared by adding new sand & additives etc. as per quality parameters. The quality of the sand governs the castings finish & controls other sand defects. Fully automatic plant is being provided which comprises of Intensive mixers, Knock Out, Sand Cooler, Hoppers, Magnetic Separator, Bucket elevator & Conveyor Belt.

2. Preparation of Moulds:

Moulds are made on one line Simultaneous jolt & Squeeze pressure Moulding Machine. This machine is Semi-automatic where molding, Mold transfer, closing, etc, is done automatically. These Machine shall be capable of produce 60 moulds per hour.

3. Melting:

Two Induction Furnaces with two crucibles of 1000 kg/1500 kg each (1 working + 1 standby) with pollution control equipment is installed to obtain molten metal at 1400 to 1600 degree temperature with electricity. CI turning boring, MS Scrap & Pig Iron are used as major raw materials.

4. Pouring :

The molten metal from Induction Furnaces is poured into the moulds by ladle on monorails/crane.

5. Knock Out :

After pouring the moulds shall be carried through automatic track line & punch out machine will punch the sand & casting from the mould box automatically. The sand will go in the return circle & casting will go to shot Blasting/ Fettleing.

6. Shot Blasting:

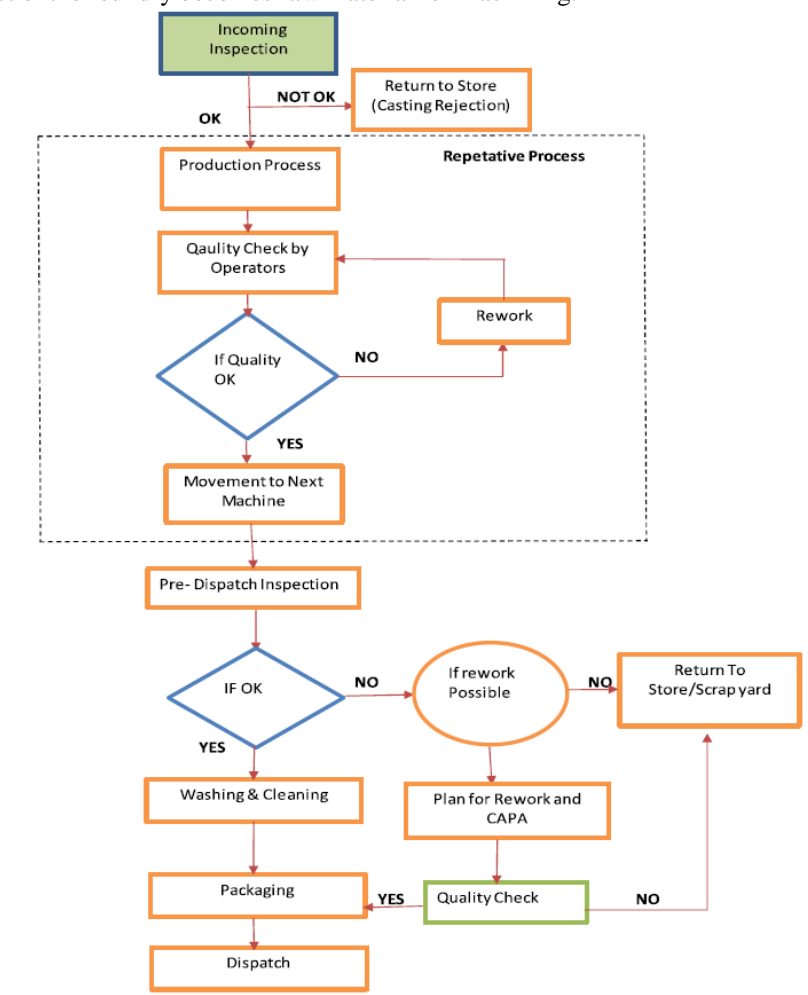

After punch-out (Knock Out) the casting shall be cleaned through shot blasting process. The two Nos. of Shot blasting Machines have been installed for the purpose. After that extra material / fins etc shall be removed by hand / bench grinders. After fettling castings shall be primer coated with casting sealer.

7. Quality Control/Inspection Foundry:

Incoming Inspection & raw materials like Pig iron, Sand, Betonites etc. is done. Inspection of Sand, Metal and Molds shall be done with suitable inspection facility like chemical, physical, spectrometer & sand lab. The final product is inspected as per customer / International Standards or specification and appropriate facilities shall be provided.

PROCESS OF MANUFACTURE : MACHINING

The finished product of the foundry becomes raw material for machining.

1. Machining

Good castings be transferred to the Machining section for further processing. The castings shall require several jobs such as rough turning, finish turning, drilling & milling as per drawings provided by the customer.

The castings is being processed on Conventional Machines like Lathe, CNC Turning Centre & Vertical Machining Centre as per the requirement of customer & components

2. Quality Control/Inspection Machine Shop

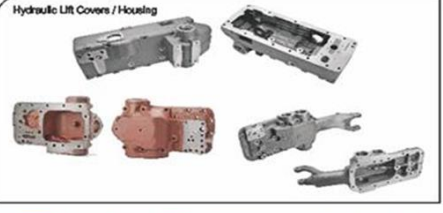

The final components is being checked with the gauges, instruments as per the requirement of customer / International Standards or specification. For this Inspection facilities like Gauges, Measuring Instruments is already available.

3. Dispatch

The component is duly packed as per customer requirement and dispatched to the customer.

COMPETITION

Our Industry is fragmented consisting of large established players and small niche players. We compete with organized as well as unorganized sector on the basis of availability of product, product quality and product range. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Industry is very competitive and we expect competition to continue and likely to increase in the future.

Impact of Covid-19

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our operations in order to follow the Government's norms. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. Once the lockdown was lifted, our operations restarted in full swing. Initially we did find a little hiccup in finding workers but because of our enterprising organization, we were able to source quality workforce and we were able to train them and we restarted our operations. After lifting the lockdown and resuming our operations the demand in our industry abruptly increased from the different sectors and we attained the highest production during the partial year 2020-21 and FY 2021-22. The demand after pandemic ultimately nullified the impact of shutdown during COVID 19 pandemic.

The Company is wholly owned subsidiary of Pritika Auto Industries Limited .The Restated financial statements were approved for issue by the board of directors on July 18 , 2022.

Note No. 2: SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of Preparation of Financial Statements

These financial statements have been prepared in accordance with the Indian Accounting Standards (hereinafter referred to as the 'Ind AS') as notified by Ministry of Corporate Affairs pursuant to Section 133 of the Companies Act, 2013 ('Act') read with of the Companies (Indian Accounting Standards) rule as amended from time to time.

2.2 The Company has prepared the Balance sheet by recognising all assets and liabilities whose recognition is required by Ind AS , not recognising assets or liabilities which are not permitted by Ind AS .

2.3 Summary of Significant Accounting Policies

2.3.1 Current versus non - current classification

All assets and liabilities have been classified as current or non current as per the Company's normal operating cycle and other criteria set out in the schedule III to the Companies Act , 2013 . Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents , the Company has determined its operating cycle as twelve months for the purpose of current-non current classification of assets and liabilities. Current assets do not include elements which are not expected to be realised within 12 months and current liabilities do not include items where the Company does not have an unconditional right to defer settlement beyond a period of 12 months , the period of 12 months reckoned from the reporting date .

2.3.2 Property, Plant and Equipment (PPE)

PPE are initially recognised at cost. The initial cost of PPE comprises its purchase price, including non-refundable duties and taxes net of any trade discounts and rebates. The cost of PPE includes interest on borrowings (borrowing cost) directly attributable to acquisition, construction or production of qualifying assets subsequent to initial recognition, PPE are stated at cost less accumulated depreciation (other than freehold land, which are stated at cost) and impairment losses, if any.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and capital work in progress) less their residual values over the useful lives, using the straight- line method ("SLM"). Management believes based on a technical evaluation (which is based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc.) that the revised useful lives of the assets reflect the periods over which these assets are expected to be used, which are as follows:

Asset Useful live

Buildings including factory buildings	30 years
General Plant and Machinery	15 years
Furniture and Fixtures	10 years
Office Equipment	5 years
Vehicles	8 years
Computers	3 Years

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal or retirement of an item of property, plant and equipment is determined as the difference between sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

2.3.3 Intangible assets

Intangible assets are measured on initial recognition at cost and subsequently are carried at cost less accumulated amortisation and accumulated impairment losses, if any. An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses on derecognition are determined by comparing proceeds with carrying amount. These are included in profit or loss.

C-94, Phase - VII , S.A.S Nagar , Mohali , Punjab-160055
ANNEXURE : V : NOTES TO THE RESTATED FINANCIAL STATEMENTS

2.3.4 Capital work-in-progress and intangible assets under development

Capital work-in-progress/intangible assets under development are carried at cost, comprising direct cost, related incidental expenses and attributable borrowing cost.

2.3.5 Non-derivative financial instruments

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

2.3.6 Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

Cash flow statement

'Cash flows are reported using the indirect method, whereby net profit/ (loss) before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the company are segregated.

2.3.7 Financial Assets

Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial liabilities

Financial liabilities are measured at amortised cost .

2.3.8 Impairment

PPE and intangibles assets

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs. If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the Statement of Profit and Loss.

2.3.9 Ind AS 115 Revenue from Contracts with Customers

Ind AS 115 was issued on 28 March 2018 and supersedes Ind AS 11 Construction Contracts and Ind AS 18 Revenue and it applies, with limited exceptions, to all revenue arising from contracts with its customers. Ind AS 115 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

Ind AS 115 requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers.

The Company adopted Ind AS 115 using the modified retrospective method of adoption. The change did not have a material impact on the financial statements of the Company.

2.3.10 Employee benefit expenses

Employee benefits consist of contribution to provident fund, superannuation fund, gratuity fund and compensated absences. Liability on account of contribution to gratuity and earned leave has not been provided during the year.

2.3.11 Borrowing cost

Borrowing costs are interest and ancillary costs incurred in connection with the arrangement of borrowings. General and specific borrowing costs attributable to acquisition and construction of any qualifying asset (one that takes a substantial period of time to get ready for its designated use or sale) are capitalised until such time as the assets are substantially ready for their intended use or sale, and included as part of the cost of that asset. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All the other borrowing costs are recognised in the Statement of Profit and Loss within Finance costs of the period in which they are incurred.

C-94, Phase - VII, S.A.S Nagar, Mohali, Punjab-160055

ANNEXURE : V : NOTES TO THE RESTATED FINANCIAL STATEMENTS

2.3.12 Income tax

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred taxes are recognised in Statement of Profit and Loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity, respectively.

Current tax

Current tax is measured at the amount of tax expected to be payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Current tax assets and current tax liabilities are off set when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle the asset and the liability on a net basis.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting dates.

2.3.13 Accounting of provisions, contingent liabilities and contingent assets

Provisions are recognized, when there is a present legal or constructive obligation as a result of past events, where it is probable that there will be outflow of resources to settle the obligation and when a reliable estimate of the amount of the obligation can be made. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. Where the effect is material, the provision is discounted to net present value using an appropriate current market-based pre-tax discount rate and the unwinding of the discount is included in finance costs.

Contingent liabilities are recognised only when there is a possible obligation arising from past events, due to occurrence or non-occurrence of one or more uncertain future events, not wholly within the control of the Company, or where any present obligation cannot be measured in terms of future outflow of resources, or where a reliable estimate of the obligation cannot be made. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for. Contingent assets are not disclosed in the financial statements unless an inflow of economic benefits is probable.

2.3.14 Earnings per share (EPS)

Basic EPS is computed by dividing the profit or loss attributable to the equity shareholders of the Company by the weighted average number of Ordinary shares outstanding during the year. Diluted EPS is computed by adjusting the profit or loss attributable to the ordinary equity shareholders and the weighted average number of ordinary equity shares, for the effects of all dilutive potential Ordinary shares.

47 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss related to adverse changes in market prices, including interest rates and foreign exchange rates. In the normal course of business, we are exposed to certain market risks including foreign exchange rate risk and interest risk.

(i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's debt obligations with floating interest rates. As the Company has no significant interest-bearing assets, the income and operating cash flows are substantially independent of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's debt obligations with floating interest rates, which are included in interest bearing loans and borrowings in these financial statements. The company's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk, since neither the carrying amount nor the future cash flows will fluctuate

(ii) Liquidity risk

The financial liabilities of the company, other than derivatives, include loans and borrowings, trade and other payables. The company's principal sources of liquidity are cash and cash equivalents and the cash flow that is generated from operations. The company monitors its risk of shortage of funds to meet the financial liabilities using a liquidity planning tool. The company plans to maintain sufficient cash and deposits to meet the obligations as and when fall due.

(iii) Credit Risk

Credit risk refers to the risk of default on its obligation by the counterparty resulting in a financial loss. The maximum exposure to the credit risk at the reporting date is primarily from trade receivables which are typically unsecured. Credit risk on cash and bank balances is limited as the company generally invests in deposits with banks and financial institutions with high credit ratings assigned by credit rating agencies. Investments primarily include investment in shares of bank having proven track record and taken as a stipulation of credit facility availed from them. The objective of managing counterparty credit risk is to prevent losses in financial assets. The Company assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors. Customer credit risk is managed by the Entities's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored. On account of adoption of Ind AS 109, the Company uses expected credit loss model to assess the impairment loss or gain.

The impairment analysis is performed on client to client basis at each reporting date for major customers. The company has not considered an allowance for doubtful debts in case of trade receivables that are past due but there has not been a significant change in the credit quality and the amounts are still considered recoverable.

Write off Policy

The financial assets are written off, in case there is no reasonable expectation of recovering from the financial asset.

(v) General

Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits and vice versa. This assumption depends on the yields on the corporate/government bonds and hence the evaluation of liability is exposed to fluctuations in the yields as at the valuation date.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Regulatory Framework

We have obtained all regulatory permissions which are necessary to run our business, Further, some of the approvals are granted for fixed periods of time and need renewals, which are obtained in the course of business, however, there may be change in statutory regulations at any time which cannot be predicted by us. There can be no assurance that the change in regulations will not impact our operations in the future.

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

Ability to manage logistics and transportation needs

Apart from in-house transportation facility we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our factory to our customers and other markets. Since the cost of our goods also carried by third party transporters is typically much higher than the consideration paid for transportation, it may be difficult for us to recover damages for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, global supply chains can be impacted with the increase in the fees of shipping routes putting cost pressures. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage or shrinkage may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

Market & Economic conditions

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customers. At the time of market slowdown the demand falls which has adverse impact on our business.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of

market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

COVID-19 Pandemic

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our operations in order to follow the Government's norms. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. Once the lockdown was lifted, our operations restarted in full swing. Initially we did find a little hiccup in finding workers but because of our enterprising organization, we were able to source quality workforce and we were able to train them and we restarted our operations. After lifting the lockdown and resuming our operations the demand in our industry abruptly increased from the different sectors and we attained the highest production during the partial year 2020-21 and FY 2021-22. The demand after pandemic ultimately nullified the impact of shutdown during COVID 19 pandemic. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter "*Risk Factors*" beginning on Page No. 25. We continue to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

Significant Developments after March 31, 2022 that may affect our Future Results of Operations

The Directors confirm that there have been no other events or circumstances since the date of the last financial statements as disclosed in the Draft Prospectus which materially or adversely affect or is likely to affect the business or profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months.

SEBI through UPI Circulars, has introduced an alternate payment mechanism using Unified Payments Interface (**UPI**) and consequent reduction in timelines for listing in a phased manner. From January 1, 2019, the UPI Mechanism for RIIs applying through Designated Intermediaries was made effective along with the existing process and existing timeline of T+6 days (“**UPI Phase I**”). The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Retail Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later (“**UPI Phase II**”), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. However, due to the outbreak of COVID-19 pandemic, UPI Phase II has been further extended by SEBI until further notice, by its circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020. Thereafter, the final reduced timeline of T+3 days may be made effective using the UPI Mechanism for applications by Retail Individual Investors (“**UPI Phase III**”), as may be prescribed by SEBI. Accordingly, the Offer has been undertaken under UPI Phase II, till any further notice issued by SEBI.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

The Consolidated FDI Policy will be valid until the DPIIT issues an updated circular and shall be subject to FEMA Rules.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectorial limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.
