SECTION III – RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of this Issue including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or any other risks that are not currently known or are currently deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or any part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider as immaterial to our operations.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. Unless otherwise stated, the financial information of our Company used in this section is derived from our Restated Financial Information prepared in accordance with Indian GAAP and the Companies Act and restated in accordance with the SEBI ICDR Regulations. To obtain a better understanding, you should read this section in conjunction with the chapters titled “Our Business”, “Industry Overview”, and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 97, 81 and 165, respectively, of this Draft Prospectus, as well as other financial and other information contained in the Draft Prospectus. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviations” beginning on page 1 of this Draft Prospectus.

The Draft Prospectus also contains forward looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in the Draft Prospectus.

Materiality

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- Some events may not be material individually but may be found material collectively.
- Some events may have material impact qualitatively instead of quantitatively.
- Some events may not be material at present but may have material impact in the future.

Note:

The risk factors are disclosed as envisaged by the management along with the proposals to address the risk, if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Prospectus, any discrepancies in any table between total and the sums of the amount listed may be due to rounding off. Any percentage amounts, as set forth in “Risk Factors” and elsewhere in this Draft Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in our Restated Financial Statements.

In this section, unless the context requires otherwise, any reference to “we”, “us” or “our” refers to Rite Zone Chemcon India Limited.

The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISK FACTORS

1. Our reliance on third party for our business, including our products exposes us to certain risks.

We rely on third parties for manufacturing of our products for performance of services carried out by our Company. 100% of our manufacturing is outsourced to our suppliers to carry out production at their respective manufacturing units. We also rely on third party transporters for logistics support to transport our products from our supplier locations to our customer locations. Our reliance on third parties for outsourced manufacturing of our products and on transporters for transport and logistics may affect our timelines for completion of the contracts with our customers.

We put in a considerable amount of resources in supplier development and provide continued support to our supplier. Our ability to maintain relationship with our supplier contributes significantly to our growth and our successful management of our inventory as well as other aspects of our operations. Our material and component supplier may fail to consistently deliver products of acceptable quality and within stipulated schedules, or the supplier to whom we have outsourced manufacturing functions may not fulfil specified performance standards, or delivery timelines, which may adversely affect our operations.

We may be required to replace a supplier if its products or services do not meet our quality, technical or performance standards or if a supplier should unexpectedly discontinue operations due to reasons beyond its or our control (including financial distress). Our ability to maintain close and satisfactory relationship with our suppliers may impact quality and quantity of our supplies and production timelines. We have not entered any long-term arrangement or contracts with the suppliers which oblige them to maintain their business with us, thus there is no assurance that the suppliers will continue to supply to us on reasonably acceptable terms. Any conflict, changes in policy or dispute with our suppliers may extremely severely impact our ability to procure products for our orders and may affect the survivability of our business. This could adversely affect our production processes and our ability to deliver orders on time and cause disruption in our supply chain.

As we rely on third party transport and logistics service providers for transporting the entirety of our products, any failure on their part to perform their services in the expected manner could result in us breaching our committed completion timelines as per contracts. Factors such as the financial instability of contractors, suppliers, supplier's non-compliance with applicable laws, labour disputes, currency fluctuations, changes in tariff, severe weather, political uncertainty, terrorist attacks and transport capacity and cost may disrupt our supply chains, which may result in increased costs or delivery delays. Therefore, there is no assurance that third party service provider will be able to meet their contractual commitments to us, or that we will not be required to incur additional costs to remedy any deficiencies in their services or to obtain alternative sources of supply in the event that our contracted suppliers should default or be delayed in their performance. A significant disruption in supply of materials, contract labour, power or other third-party services may, in turn, disrupt our operations and adversely affect our inventory management, business and financial condition, at least until alternative sources of supply of goods and services are arranged. If such events take place, we may be unable to meet our desired level of quantity or quality, which may give rise to contractual penalties or liability for failure to perform contracts, which we may not be able to recover from our suppliers. We may also lose customers and suffer damage to our reputation

2. We typically do not enter into long-term agreements with majority of our customers, and an inability to continue to engage with them would have a material adverse effect on our business, results of operations and financial condition:

Though we have had repeat orders from customers and have developed long-term relationships with certain customers, we typically do not enter into long-term contracts with our customers. In the absence of long-term contracts, there can be no assurance that our existing customers will continue to purchase our products and any loss of our customers will have a material adverse effect on our business, results of operations and financial condition. Customers with whom we do not have long-term agreements may choose to cease sourcing our products. In the event a customer ceases to use us as its preferred supplier for their products, we cannot assure you that we will be successful in marketing those products to another customer. This could lead to a surplus of those products in our inventory. We are also exposed to risks of lower sales volume or lower price realization on such volumes depending on prevailing market conditions, as a result of such

short-term arrangements. Further, in the event of any disputes with our customers including in relation to payments for the products supplied, in the absence of formal, long-term agreements, we may have limited recourse to seek contractual remedies against our customers. Our relationship with our customers are therefore dependent to a large extent on our ability to regularly meet customer requirements, including price competitiveness, efficient and timely product deliveries and consistent product quality. In the event we are unable to meet such requirements in the future, it may result in decrease in orders or cessation of business from affected customers.

3. The Company is dependent on few numbers of customers and suppliers for sales and purchase from top 10 customers and Top 4 suppliers. Loss of any of these large customer and supplier will significantly affect our revenues and profitability.

Our top 10 customers contribute to 67.9%, 88.5%, and 71.9% of our revenue from operations for the Fiscal 2022, Fiscal 2021, and Fiscal 2020 respectively and our top 10 suppliers delivered 100.0%, 100.0%, and 99.4% of our purchases for the Fiscal 2022, Fiscal 2021, and Fiscal 2020 respectively. The loss of a significant client or supplier would have a material adverse effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them.

Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could adversely impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, adversely impacting our income and financial condition.

4. We plan to expand into new geographies and may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

We plan to expand into new geographies in the future. The risks involved in entering new geographies in India and expanding operations in those areas, may be higher than expected. By expanding into new geographical regions, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

Our third-party manufacturing facilities and procurement operations are concentrated in a few cities and any adverse developments affecting these regions could have an adverse effect on our business, results of operations and financial condition.

Our third-party manufacturing facilities are located at Vapi, Mumbai, Navi Mumbai and Thane city. Since most of our infrastructure, facilities and business operations are currently concentrated in these Gujarat and Maharashtra, any significant social, political or economic disruption, or natural calamities or civil disruptions in these regions, or changes in the policies of the state or local governments of these regions or the Government of India, could require us to incur significant capital expenditure, change our business structure or strategy, which could have an adverse effect on our business, results of operations and financial condition.

5. We have incurred borrowings from commercial banks and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.

We have entered into agreements with banks for short-term and long-term borrowings. As of March 31, 2022, we had Total Borrowings (consisting of borrowings under non-current liabilities, current maturities of long-term debts and borrowings under current liabilities) of ₹ 1,06,23,831, which includes secured loan from ICICI Bank. Certain agreements that we have entered into contain restrictive covenants, including requirements that we obtain consent from the lenders prior to undertaking with regards to certain matters such as availing fresh credit facility or transfer of facility. Any failure to service such indebtedness, or otherwise perform any obligations under such financing agreements may lead to a termination of one or more of our credit facilities or incur penalties and acceleration of payments under such credit facilities, which may adversely affect our business and financial condition.

Further, we are required to, among other obligations, comply with certain financial covenants including, insurance coverage on the hypothecated properties and lien creation. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. Any fluctuations in the interest rates may directly impact the interest costs of such loans, and affect our business, financial condition, results of operations and prospects. Our ability to make repayments and refinance our indebtedness will depend on our continued ability to generate cash from our future operations. We may not be able to generate enough cash flow from operations or obtain enough capital to service our debt. For further information including in relation to borrowings, please see under chapter titled “*Financial Information*” beginning on page 136 of this Draft Prospectus.

Any failure to comply with the conditions and covenants in our financing agreements that is not waived by our lenders or guarantors or otherwise cured could lead to a termination of our credit facilities, foreclosure on our assets, acceleration of all amounts due under such facilities or trigger cross-default provisions under certain of our other financing agreements, any of which could adversely affect our financial condition and our ability to conduct and implement our business plans.

6. *We have had negative cash flows in the past and it is possible that we may experience negative cash flows in the future:*

The table below sets forth selected information from our statements of cash flows in the periods indicated below:

8. Our Company’s failure to maintain the quality standards of the products or keep pace with the technological developments could adversely impact our business, results of operations and financial condition.

Our products depend on recent inventions and developments as we market the products as per the market trends. Any failure to maintain the quality standards may affect our business. Although we have put in place strict quality control procedures, we cannot assure that our products will always be able to satisfy our customer’s quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations. Also, rapid change in our customer’s expectation on account of changes in technology or introduction of new products or for any other reason and failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition. While, we believe that we have always introduced new products based on consumers need to cater to the growing demand of our customers and also endeavour regularly update our existing technology, our failure to anticipate or to respond adequately to changing technical, market demands and/or client requirements could adversely affect our business and financial results.

9. Product liability and other claims and costs incurred as a result of product recalls could harm our business, results of operations and financial condition.

We face an inherent business risk of exposure to product liability or recall claims, in the event that our products fail to perform as expected or such failure results, we may be subject to claims resulting from our manufacturing defects or failure to satisfy the requirements of our customers. These claims may include payment for the replacement of a product. Even unsuccessful product liability claims would likely divert management’s time in addressing the issue, adversely affect our goodwill and impair the marketability of our customer’s products to the end client. Although, we undergo complete testing and we are liable for the quality of the products manufactured. Depending on the terms under which we supply products, our customer may hold us responsible for some or all of the repair or replacement costs of defective products, when the product supplied does not perform as expected. A successful product liability claim or costs incurred for a product recall, would have an adverse effect on our business, results of operations and financial condition. We do not carry insurance for product liability or recall. Till date our company has rarely incurred such major cost, and have been successful in passing down such costs to our suppliers, but we cannot assure you that we will not experience any material

product liability losses in the future or that we will not incur significant costs to defend any such claims. Further, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our customer, our company or products or mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

Also, our Company may face regulatory proceedings w.r.t. to the Receipt / Payment of the Debtors / Creditors taken over etc. Further, the company has applied or in some cases will apply, for the transition or endorsement of name of the company on many of the documents, registration, bank account and other documents which are in the name of M/s Maruti Infrachem Solutions [Bhavesh Babulal Bhandari HUF]. 11. Any non-compliance, default or penalty imposed by any regulatory authority on any person belonging to Promoter and promoter group shall impact our business directly or indirectly.

Our Promoter has incorporated a company in the name and style of “Maruti Chemcon Limited” together with few of our Promoter group members and other shareholders of the Company. One of the main object of Maruti Chemcon Limited is “To take over the running business of a HUF, M/s Maruti Infrachem Solutions [Bhavesh Babulal Bhandari HUF], engaged in the business of construction chemicals together with all its rights, including intellectual property rights, privileges, goodwill, licenses, assets & liabilities whereupon the said concern shall stand dissolved”.

Also, the subscribers of Maruti Chemcon Limited failed to infuse subscription money as agreed by them in MOA of Maruti Chemcon Limited. As per Amendment in Companies Act, 2013 with New Section 10A inserted after Section 10 by Companies (Amendment) Ordinance, 2018 dated November 02, 2018 and same has been inserted in Rule 23A of the Companies (Incorporation) Rules, 2014 is having share capital is required to file e-form INC-20A with their respective Registrar of companies within 180 days from date of incorporation of company and same has been not Filed by the Maruti Chemcon Limited. This might impact our business directly or indirectly. Any of such issue may impact our business reputation and operations directly or indirectly.

12. Certain agreements may be inadequately stamped, notarised or may not have been registered as a result of which our operations may be adversely affected.

Our agreements may have irregularities of enforceability, such as non-registration, not notarised and inadequate payment of stamp duty which may affect the evidentiary value of the relevant lease or license agreements in specific performance or other injunctive procedures in a court of law, and could impair our operations. Further, it may result in levy of penal charges, in case cognizance being taken by concerned authorities. In the event of any dispute arising out of such

unstamped, unnotarized and/or unregistered agreements, we may not be able to effectively enforce our rights arising out of such agreements which may have a material adverse impact on our business.

13. There have been instances in the past where we have not made certain regulatory filings with the RoC and there were certain instances of discrepancies in relation to certain statutory filings and corporate records of our Company:

There have been some instances of non-filings or incorrect filing or delays in filing statutory forms with the RoC, which have subsequently been filed along with the payment of additional fees, as specified by RoC. We cannot assure you that regulatory proceedings or actions will not be initiated against us in the future and we will not be subject to any penalty imposed by the competent regulatory authority in this regard. We manage the regulatory compliance by monitoring and evaluating our internal controls, and ensuring that we are in compliances with all relevant statutory and regulatory requirements. There can be no assurance that deficiencies in our filings will not arise in future, or that we will be able to implement, or continue to maintain, adequate measures to rectify or mitigate any deficiencies in our internal control. Any inability on our part to adequately detect, rectify any deficiencies in our internal controls may adversely impact our ability to accurately report, or successfully manage, our financial risks and to avoid frauds. As we continue to grow, there can be no assurance that there will be no other instances of such inadvertent non-compliances with statutory requirements, which may subject us to regulatory action, including monetary penalties, which may adversely affect our business and reputation.

14. Our Promoter play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter and Executive Directors remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.

We benefit from our relationship with our Promoter and our success depends upon the continuing services of our Promoter and executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoter and executive Directors have been actively involved in the day-to-day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoter and executive Directors. If our Promoters and executive directors unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacements, and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoter and executive Directors, along with the key managerial personnel, have over the years built relations with various customers and other persons who form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

15. There may be potential conflict of interests between our Company and other entities promoted by our directors or Promoter Group Members/ Entities.

Our Company deals in the range of construction chemicals and concrete products. Entities promoted by our Promoters i.e. Rite Zone Chemicals India and Maruti Chemcon Limited are also engaged in the similar line of business. However, we have not executed any Non-Compete Agreement with our Directors or Promoter Group Members/ Entities to not to engage in businesses similar to that of our Company.

Conflicts of interests may arise in the future in allocating business opportunities amongst our Company, Promoter Group Members/ Entities in such circumstances where our respective interests diverge. There can be no assurance that our Directors/Promoter/Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any future conflicts could have a material adverse effect on our business, results of operations and financial condition.

16. We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse effect on our

operations, profitability and growth prospects.

We operate in a working capital intense industry therefore our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favorable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. For further details regarding incremental working capital requirement, please refer to the chapter titled “*Object of the Issue*” beginning on page 72 of this Draft Prospectus.

17. The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or lead manager or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.

The fund requirement and deployment, as mentioned in the “*Objects of the Issue*” on page 72 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or lead manager or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business strategies, development and other plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and result of operations. The deployment of the funds as stated under chapter “*Objects of the Issue*” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “*Objects of the Issue*” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control.

18. Our Company does not own any trademarks for the logo representing our products/services or the trademark of word “Rite Zone” or the logo used in this Draft Prospectus. In case we do not apply for registration of any trademark,

it may affect our business and brand reputation.

Our Company has not applied for the registration of any trademarks in relation to its business as on the date of filing of this Draft Prospectus. It may be possible that the trademark registration continues to not be applied for or applied but not approved or use of similar/ same name by third parties, may cause the validity or scope of the application to be challenged. In such situations, the Company may not have a strong recourse to legal proceedings to protect its trademark which could have an adverse effect on our business and/or reputation. In such a scenario, we may also be required to invest significant resources in developing new brands or logos, which could materially and adversely affect our business, financial condition, results of operations and prospects.

19. Our business requires us to obtain and renew certain registrations, licenses, approvals, NOCs and permits in the ordinary course of our business. Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business, financial condition and results of operations.

We are required to obtain and maintain a number of statutory and regulatory licences, registrations, permits and approvals, generally for carrying out our business. In addition, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek new approvals, licenses, registrations and permits from time to time, as and when required in the ordinary course of our business. Obtaining licences, registrations, permits and approvals or their renewals are time consuming processes and subject to frequent delays. We have obtained licenses, registrations, permits and approvals from the relevant authorities and are renewing such statutory approvals periodically for our business.

Further, pursuant to conversion after complying with the relevant and the applicable provisions and procedures of Companies Act, 2013, the name of our company was changed. Many of the Licenses and approvals are in the old name, the same are required to be updated/ changed with various government/semi government authorities and various organizations. We are in the process of taking necessary steps for transferring the approvals in the new name of our Company. There can be no assurance that the relevant authorities will renew or issue any of such permits or approvals in the time-frame anticipated by us or at all. Any failure to apply for and obtain the required approvals, licenses, registrations or permits in a timely manner, or any suspension or revocation of any of the approvals, licenses, registrations and permits would result in a delay in our business operations which could otherwise adversely affect our financial condition, results of operations and future prospects of the Company. We cannot assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. In addition to same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business and results of operations.

Compliance with many of the regulations applicable to our operations may involve incurring significant costs and otherwise may impose restrictions on our operations. We cannot assure you that we will not be subject to any adverse regulatory action in the future. If the interpretation of the regulators and authorities varies from our interpretation, we may be subject to penalties and the business of our Company could be adversely affected. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of the terms and conditions stipulated under any of our licenses or permits, one or several of our licenses and certificates may be suspended or cancelled and we shall not be able to carry on the activities permitted thereunder.

20. We engage in a highly competitive business and any failure to effectively compete could have a material adverse effect on us.

We compete on the basis of the strength of our supplier network, good track record, continued relationship with customers, and ability to complete orders with trained supervision. As a result, to remain competitive in our markets amongst organized and unorganized players, we must continuously strive to offer differentiated products/services, expand our distribution network, enhance our brand and improve our operating efficiencies. Our competitors therefore also include companies that have established their presence in specific regions as part of their strategy. These competitors may limit our opportunity to increase our market share as a result of a stronger dealer network in such regions and customer brand

preferences in these locations, and may also compete with us on pricing of products. Our competitors may also introduce new and more competitive products and strengthen their supply chain management, make strategic acquisitions or establish relationships among themselves or with third parties, including suppliers of our products, thereby increasing their ability to address the needs of our target customers. An inability to effectively compete in terms of branding, providing competitive and differentiated products or services or expand into new markets, could have a material negative effect on our business, financial condition and growth prospects.

21. Some of our orders may not be completed within their agreed completion dates. Such delays may adversely affect our business, results or operations and financial conditions.

Sometime our business involves various implementation risks including preparation of finalization of end product, delay or disruption in supply of raw materials, and government approvals and consents, unanticipated cost increases, logistics issues, adverse environmental and weather conditions, natural disasters, pandemics, force majeure events or permits.

In the past, we have experienced delays in implementation of some of our purchase orders and thus instances of time over-run in the completion of our orders. Recently, such time overrun and delay increased due to the hindrances posed by the COVID- 19 pandemic. While, till date there has been no major cost or litigation consequent to such delay in execution of our orders. However, we cannot assure you that no penalties or liquidated damages may not be levied upon us on account of such extension for completion. Similarly, our future orders may also be subject to delays and time and cost over-run on account of reasons which are beyond our control. Such modification and changes to the order completion timelines may have significant impact on our ongoing and future orders and consequently, we may be penalized and be required to pay damages to our clients, which may have an adverse effect on our business, client relations, our credibility, results of operation and financial conditions. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays can be mitigated and that we will be able to prevent any time and cost over-runs and any loss of profits resulting from such delays, shortfalls and disruptions

22. A shortage or non-availability of essentials such as manpower and utilities like electricity and water could affect the operations of our suppliers' operations and thus have an adverse effect on our business, results of operations and financial condition.

Our business operations are heavily dependent on continuous smooth operations of our suppliers' manufacturing facilities. Thus, the operations being manpower intensive, we are indirectly dependent on the availability of a sufficient pool of skilled, semi-skilled and unskilled labour to efficiently execute our orders. Our suppliers' may not be able to secure the required number of skilled/ semi-skilled labourers required for the timely execution of our orders for a variety of reasons including possibility of disputes with sub-contractors, strikes, less competitive rates to suppliers' sub-contractors as compared to our competitors, COVID- 19 related challenges or changes in labour regulations that may limit availability of contractual labour. This could cause a delay in completion and thus impact schedule of completion and impact revenues. Also, the supply of electricity and water are critical to our suppliers' operations. This may cause halt or pause in operations. While our suppliers' have been adequately meeting their power requirements, we cannot assure you that these will be sufficient and, or, that they will not face a shortage of electricity despite their existing arrangements. Any shortage or non-availability of water or electricity could result in temporary shut-down of a part, or all, of our suppliers' operations at the locations experiencing such shortage. Such shut-downs could, particularly if they are for prolonged periods, have an adverse effect on our business, results of operations and financial condition. Moreover, if our suppliers' are required to operate for extended periods of time on diesel-generator sets or if we are required to source water from third parties, their cost of production would be higher during such period which could be passed on to us and thus have an adverse impact on our profitability.

23. While we are currently not subject to extensive Governmental regulation, any regulatory or legal framework introduced in the future may increase our compliance requirements and costs, which may adversely affect our business, results of operations and prospects. However, to run our business, we require certain regulatory permits and approval to operate.

At present, the segments in which we operate are not subject to extensive Government regulation. While we are not in a position to predict the likelihood, timing or content of any such regulation or legislation, if any such regulation or

legislation is notified, we may be affected in various ways. However, we have obtained all permits and licenses, which are adequate to run our business. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

24. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our distribution channel and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analysis of market conditions and other data or the strategies that we may use in future to use will be successful under various market conditions.

25. Our Promoters and members of our Promoter Group will continue to retain majority control in the Company after the Issue, which will enable them to influence the outcome of matters submitted to shareholders for approval.

Upon completion of this Issue, our Promoters and members of the Promoter Group will continue to have substantial shareholding of our post-Issue equity share capital. As a result, the Promoter Group will have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoters and Promoter Group continue to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoters and members of the Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which we or our other shareholders do not agree.

26. In addition to normal remuneration/ sitting fees, other benefits and reimbursement of expenses of our Promoters and our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Promoters and our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration/ sitting fees or benefits and reimbursement of expenses. We cannot assure you that our Directors/ Promoters would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors and Promoters will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

27. The LM has relied on declarations, undertakings and affidavits for some of their details included in this Draft Prospectus.

Some of our Directors have been unable to trace copies of documents pertaining to their educational qualifications and/or prior professional experiences and have not provided documents of their directorships in other entities. Accordingly, reliance has been placed on signed resume, declarations, undertakings and affidavits furnished by these Directors to the

Lead Manager to disclose details of their educational qualifications and/or professional experience and other directorships in entities outside India, in this Draft Prospectus. We have not received accurate documentation on their individual holdings and has thus furnished a declaration to the Lead Manager, based on which disclosures relating to her Promoter Group Entities outside India have been mentioned in this Draft Prospectus. Further, our Group Companies, being companies incorporated outside India, have been unable to provide certain information required to be disclosed due to inapplicability, thus LM has relied on declarations provided. Accordingly, the Lead Manager has been unable to independently verify these details prior to inclusion in this Draft Prospectus. Further, there can be no assurances that our Directors, Promoter Group Members and Group Companies will be able to trace the relevant documents or provide accurate and complete details pertaining to the above information in the future, or at all.

28. Third party industry and statistical data in this Draft Prospectus may be incomplete, incorrect or unreliable.

We have not independently verified data from industry and other publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

29. Insurance coverage obtained by us may not adequately protect us against unforeseen losses.

We maintain general insurance with various covers for our office premises which we consider adequate. We may not have identified every risk and further may not be insured against every risk because such risks are either uninsurable or not insurable on commercially acceptable terms, including operational risk that may occur and the occurrence of an event that causes losses in excess of the limits specified in our policies, or losses arising from events or risks not covered by insurance policies such as COVID-19 and other pandemics, or due to the same being inadequate, could materially harm our cash flows, financial condition and future results of operations. However, we cannot provide any assurance that our insurance will be sufficient or effective under all circumstances and against all hazards or liabilities to which we may be subject. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all.

30. Our Company has entered into certain related party transactions and may continue to do so in the future.

Our Company has entered into few related party transactions with our Promoters, Directors, Promoter Group and group companies over the last three financial years. While our Company believes that all such transactions have been conducted on the arm's length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to section titled "Financial Statements" beginning on page 136 of this Draft Prospectus.

31. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects/ schedule of implementation of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter "Objects of the Issue" on page 72 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business strategies, development and other plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

32. The requirements of being a listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreement signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

33. We have issued Equity Shares during the last 12 months at a price which may be below the Issue price.

We have issued certain Equity shares in the last 12 months at a price which may be lower than the Issue Price. Details of such issuances are given in the table below:

Date of Allotment	Number of Equity Shares	Face value (₹)	Issue Price (₹)	Reasons for Allotment	Benefits Accrued to our Company
March 04, 2022	11,61,605	10	17	For acquisition of running business of M/s Maruti Infrachem Solutions [Bhavesh Babulal Bhandari HUF]	Our Company acquired the running business alongwith their assets and liabilities

34. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above ₹ 10,000 Lacs. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations, if any in the utilization of Issue proceeds to NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

35. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Issue, refer "*Objects of the Issue*" on page 72 of this Draft Prospectus.

36. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends

will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details regarding our dividend policy, please see “*Dividend Policy*” on page 135 of this Draft Prospectus.

37. Our Company’s operations are geographically dispersed.

Our company has a wide base of operations with locations across state boundaries, there is significant risk of failure of supply lines, communication lines or disruption of efficient management due to instability or location specific actors in different states. We are also exposed to multiplicity of diverse state specific laws, regulation or legislation, if any detrimental regulation or legislation is notified, we may be affected in various ways.

RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE

38. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company is generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months may be subject to long term capital gains tax in India at the specified rates depending on certain factors, such as STT is paid, the quantum of gains and any available treaty exemptions. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

39. Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in our Company, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other significant shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences for us including difficulty in raising debt or equity financing. In addition, any perception by investors that such issuances or sales might occur may also affect the trading price of our Equity Shares. We cannot assure you that we will not offer Equity Shares or that our shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

40. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares will be disclosed in the issue opening advertisement and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

41. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

42. We cannot assure you that our equity shares will be listed on the EMERGE platform of NSE Limited in a timely manner or at all, which may restrict your ability to dispose of the equity shares.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. Though we shall make best of our efforts to comply with all applicable regulatory, financial and operational requirements for getting the equity shares proposed to be offered through this Draft Prospectus listed on EMERGE platform of NSE in a time bound manner, yet on account of any change in applicable laws, economic conditions and/or any other reason/s beyond our control, the said shares may not get listed on the EMERGE platform of National Stock Exchange of India Ltd. in a timely manner or at all, which may restrict your ability to dispose of the equity shares. However, even in such circumstances, the company shall stay fully committed to pay such interest and/or refund the full application amount, as may be required in accordance with the applicable regulatory directives.

43. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares is ₹ [●]. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 77 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following;

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

44. After listing, sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISK FACTORS:

45. The outbreak and after-effects of COVID-19, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition, cash flows and results of operations.

The outbreak, or threatened outbreak, of any severe communicable disease or pandemic, as seen in the recent outbreak and aftermath of COVID-19, could materially adversely affect overall business sentiment and environment across industries. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty and caused economic slowdown. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment or vaccine is available. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, vendors and suppliers. If any of our employees are suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or suspend operations at the site location for disinfection. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition, cash flows and results of operations.

On account of the nationwide lockdown, operations at all of our offices and work sites were suspended. This resulted in a decrease in revenues, particularly during the initial phase of lockdown on account of government restrictions imposed and additionally on account of cost control measures implemented by our dealers and end-customers. We also experienced disruptions in supply chain and inventory management, as well as delays in new orders and payments. While we resumed our operations in a phased manner at some of our supplier locations with the progressive relaxation of the lockdown and were fully operational by September 2020, we are required to implement additional safety measures, such as, regular temperature checks, regular sanitization, and compulsory use of masks and hand sanitization, and limited workforce. We have monitored and considered the impact of known events arising from the COVID-19 pandemic and follow the required safety protocols and will continue to closely monitor the impact that COVID-19 may have on our business, financial condition, liquidity and results of operations. Adverse effects of the COVID-19 pandemic may also significantly increase the effect of the aforementioned factors affecting our results of operations.

The impact of the pandemic on our business, operations and future financial performance has included and may include the following:

- temporary shutdown of our offices and supplier manufacturing facilities due to government restrictions;

- decrease in sales of our products, particularly in the first half of Fiscal 2021;
- inability to utilize our workforce including because of travel or government restrictions, such as stay at home orders, or illness of our employees due to COVID-19 and associated quarantining requirements, which resulted in a slowdown in our operations;
- disruptions to our supply chain in terms of material sourcing due to temporary closure of the facilities of suppliers, and delivery of finished products due to transportation/ export restrictions;
- delays in completion of existing orders, and if prolonged may negatively impact our cash conversion cycle and ability to convert our backlog order book into cash;
- inability to collect full or partial payments from clients due to deterioration in liquidity, including financial distress experienced by clients;
- potential negative impact on the health of our employees, particularly if a significant number of them are afflicted by COVID-19, resulting in a deterioration in our ability to ensure business continuity during this disruption.

Any resulting financial impact due to the above cannot be reasonably estimated at this time. In addition, we cannot predict the impact that the COVID-19 pandemic will have on our suppliers, vendors, clients and each of their financial conditions; however, any material effect on these parties could adversely impact us. As a result of these uncertainties, the impact may vary significantly from that estimated by our management from time to time, and any action to contain or mitigate such impact, whether government-mandated or opted by us, may not have the anticipated effect or may fail to achieve its intended purpose altogether.

Existing insurance coverage may not provide protection or coverage for any costs that may arise from all such possible events. Further, we generate almost all of our revenue in India. The effects of COVID-19 in India may be of a greater magnitude, scope and duration than those experienced to date in other countries. To the extent that the COVID-19 pandemic adversely affects our business and operations, it may also have the effect of heightening many of the other risks described in this section.

46.Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry in which we operate is regulated by different laws, rules and regulations framed by the Central and State Government. Please refer to section titled “*Key Industry Regulations and Policies*” on page 107 of this Draft Prospectus for details of the laws currently applicable to us. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

47.Global economic conditions were unprecedented and challenging and have had, and continue to have, a material adverse impact on the Indian financial markets and the Indian economy in general, and, given the same economic conditions this may, in future, have a material adverse impact on our business and financial performance and may have an impact on the price of the Equity Shares.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

48. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of

operations

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on materials or on our Products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

49. Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

50. Malpractices by some players in the industry affect overall performance of emerging Companies.

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. *Malpractices* by some players in the industry affects the overall performance of the emerging Companies like our as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

51. The occurrence of natural or man-made disasters or outbreak of global pandemics, such as the COVID-19 pandemic, could adversely affect our results of operations, cash flows and financial condition.

Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business. The occurrence of natural disasters, including prolonged spells of abnormal rainfall, cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, infectious disease outbreaks such as the COVID-19 pandemic and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

52. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.

As stated in the reports of the Auditor included in this Draft Prospectus under section titled "*Financial Statements*" beginning on page 136 of this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on

familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

53. We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

54. Any downgrading of India’s debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

55. You will not be able to sell immediately on the Indian Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor’s demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

56. Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, the composition of our Board of Directors and Indian laws governing our corporate affairs and procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights, may differ from those that would apply to companies incorporated in other jurisdictions. Shareholders’ rights under Indian law may not be as extensive as shareholders’ rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholders of a corporation in another jurisdiction.

57. Investors may not be able to enforce a judgment of a foreign court against us.

Our Company is incorporated under the laws of India. Our Company’s assets are located in India and our Managing Director and KMP are residents of India and substantially all of our assets and the assets of the aforementioned persons are located in India. As a result, it may not be possible for investors outside of India to effect service of process on us or such persons from their respective jurisdictions outside of India, or to enforce against them judgments obtained in courts outside of India predicated upon our civil liabilities of such Director/ KMP under the laws other than Indian Law. Moreover, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce judgements if it viewed the amount of damages excessive or inconsistent with Indian public policy. In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions. In order to be enforceable, a judgment from certain specified courts located in a jurisdiction with reciprocity must meet certain requirements of the civil code. Recognition and enforcement of foreign judgments is provided for under

Section 13 of the Code of Civil Procedure, 1908, as amended, on a statutory basis. Section 13 of the Code of Civil Procedure, 1908, as amended, provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except:

- (i) where the judgment has not been pronounced by a court of competent jurisdiction;
- (ii) where the judgment has not been given on the merits of the case;
- (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable;
- (iv) where the proceedings in which the judgment was obtained were opposed to natural justice;
- (v) where the judgment has been obtained by fraud; and
- (vi) where the judgment sustains a claim founded on a breach of any law then in force in India.

Under Section 14 of the Code of Civil Procedure, 1908, as amended, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record.

However, such presumption may be displaced by proving that the court did not have jurisdiction. Section 44A of the Code of Civil Procedure, 1908, as amended, provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside of India which the Central Government has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the Code of Civil Procedure, 1908, as amended, is applicable only to monetary decrees not being of same nature as amounts payable in respect of taxes, other charges of a like nature, or of a fine or other penalties.

The Global Economy

The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have reimposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies.

Global growth is estimated at 5.9 percent in 2021 and is expected to moderate to 4.4 percent in 2022, half a percentage point lower than in the October 2021 *World Economic Outlook*. The baseline incorporates anticipated effects of mobility restrictions, border closures, and health impacts from the spread of the Omicron variant. These vary by country depending on susceptibility of the population, the severity of mobility restrictions, the expected impact of infections on labor supply, and the importance of contact-intensive sectors. These impediments are expected to weigh on growth in the first quarter of 2022. The negative impact is expected to fade starting in the second quarter, assuming that the global surge in Omicron infections abates and the virus does not mutate into new variants that require further mobility restrictions.

Advanced Economies: Among changes to advanced economy forecasts for 2022, a revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply chain disruptions have contributed to a downgrade of 1.2 percentage points for the United States. In Canada, weaker data outturns toward the end of 2021 and anticipated softer external demand for 2022 (related to the US revision) have led to a 0.8 percentage-point downgrade. In the euro area, prolonged supply constraints and COVID disruptions produced a less severe revision of 0.4 percentage point—led by a markdown of 0.8 percentage point for Germany largely due to the economy’s exposure to supply chain shocks. Mobility restrictions imposed toward the end of 2021 are expected to drag on growth in the euro area in early 2022. In the United Kingdom, disruptions related to Omicron and supply constraints (particularly in labor and energy markets) mean that growth is revised down by 0.3 percentage point to 4.7 percent.

Emerging market and developing economies: The 2022 forecast downgrade also reflects revisions among a few large emerging markets. In China, disruption in the housing sector has served as a prelude to a broader slowdown. With a strict zero-COVID strategy leading to recurrent mobility restrictions and deteriorating prospects for construction sector employment, private consumption is likely to be lower than anticipated. In combination with lower investment in real estate, this means that the growth forecast for 2022 is revised down relative to October by 0.8 percentage point, at 4.8 percent, with negative implications for trading partners’ prospects. The outlook has also weakened in Brazil, where the fight against inflation has prompted a strong monetary policy response, which will weigh on domestic demand. A similar dynamic is at work in Mexico, albeit to a lesser extent. In addition, the US downgrade brings with it the prospect of weaker-than-expected external demand for Mexico in 2022. In Russia, the forecast is marginally marked down because of a weak harvest and worse-than-expected third wave. South Africa’s growth forecast is downgraded in light of a softer-than-expected second half in 2021 and a weaker outlook for investment as business sentiment remains subdued.

Global trade: Global trade is expected to moderate in 2022 and 2023, in line with the overall pace of the expansion. Assuming that the pandemic eases over 2022, supply chain problems are expected to abate later in the year. The accompanying moderation in global goods demand will also help reduce imbalances. Cross-border services trade—particularly tourism—is expected to remain subdued.

(Source: World Economic Outlook January 2022 as published by IMF)

EMDE growth rebounded to an estimated 6.3 percent in 2021 but is projected to decelerate to 4.6 percent in 2022, as macroeconomic policy support is withdrawn and external demand moderates. Higher energy prices are expected to shift growth momentum from energy importers to exporters. Per capita income growth is expected to trail that of advanced economies in 70 percent of EMDEs over the forecast horizon.

The pace of global recovery has diminished from its strong pace in the second half of 2020. Recurring surges in the COVID-19 pandemic have sapped consumer demand, while continued supply bottlenecks and a tightening of EMDE financing conditions have also weighed on global activity. Growth in major economies, including the United States and China, has slowed, contributing to the headwinds facing many EMDEs. Global inflationary pressures have continued to build, in part reflecting rapid recoveries of demand, supply bottlenecks, and earlier increases in food and energy prices.

After surging to an estimated 5.5 percent in 2021, global growth is expected to slow markedly, to 4.1 percent in 2022 and 3.2 percent in 2023, as the initial rebound in private consumption and investment fades and macroeconomic support is withdrawn. These factors are expected to be only partly mitigated by the eventual removal of pandemic control measures, the drawdown of excess private savings, and rising real wages amid a steady tightening of labor markets. Investment, particularly in advanced economies, is projected to contribute appreciably to global growth throughout the forecast horizon. As demand softens, supply bottlenecks are also expected to dissipate. Much of the expected slowdown in global growth reflects a moderation in the contribution from major economies. The projected rate of global growth will be insufficient for output to regain its pre-pandemic trend over the forecast horizon because of the relatively subdued recovery in EMDEs

The Indian Economy

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Advance estimates suggest that the Indian economy is expected to witness real GDP expansion of 9.2 per cent in 2021-22 after contracting in 2020-21. This implies that overall economic activity has recovered past the pre-pandemic levels. Almost all indicators show that the economic impact of the “second wave” in Q1 was much smaller than that experienced during the full lockdown phase in 2020-21 even though the health impact was more severe.

Total Consumption is estimated to have grown by 7.0 per cent in 2021-22 with significant contributions from government spending. Similarly, Gross Fixed Capital Formation exceeded pre-pandemic levels on the back of ramped up public expenditure on infrastructure. Exports of both goods and services have been exceptionally strong so far in 2021-22, but imports also recovered strongly with recovery in domestic demand as well as higher international commodity prices.

The last two years have been difficult for the world economy on account of the COVID-19 pandemic. Repeated waves of infection, supply-chain disruptions and, more recently, inflation have created particularly challenging times for policy-making. Faced with these challenges, the Government of India’s immediate response was a bouquet of safety-nets to

cushion the impact on vulnerable sections of society and the business sector. It next pushed through a significant increase in capital expenditure on infrastructure to build back medium-term demand as well as aggressively implemented supply-side measures to prepare the economy for a sustained long-term expansion.

Despite all the disruptions caused by the global pandemic, India's balance of payments remained in surplus throughout the last two years. This allowed the Reserve Bank of India to keep accumulating foreign exchange reserves (they stood at US\$ 634 billion on 31st December 2021). This is equivalent to 13.2 months of merchandise imports and is higher than the country's external debt. The combination of high foreign exchange reserves, sustained foreign direct investment, and rising export earnings will provide an adequate buffer against possible global liquidity tapering in 2022-23.

The fiscal support given to the economy as well as to the health response caused the fiscal deficit and government debt to rise in 2020-21. However, a strong rebound in government revenues in 2021-22 has meant that the Government will comfortably meet its targets for the year while maintaining the support, and ramping up capital expenditure. The strong revival in revenues (revenue receipts were up over 67 per cent YoY in April-November 2021) means that the Government has fiscal space to provide additional support if necessary

Also, in FY21, India recorded a current account surplus at 0.9% of the GDP. The growth in the economic recovery is due to the government's continued efforts to accelerate vaccination coverage among citizens. This also provided an optimistic outlook to further revive industrial activities.

As per RBI's revised estimates of July 2021, the real GDP growth of the country is estimated at 21.4% for the first quarter of FY22. The increase in the tax collection, along with government's budget support to states, strengthened the overall growth of the Indian economy.

India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity from 175 gigawatt (GW) by 2022. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030.

It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

Economy recovers past Pre-Pandemic levels

The Indian economy, as seen in quarterly estimates of GDP, has been staging a sustained recovery since the second half of 2020-21. Although the second wave of the pandemic in April- June 2021 was more severe from a health perspective, the economic impact was muted compared to the national lockdown of the previous year. Advance estimates suggest that GDP will record an expansion of 9.2 per cent in 2021-22. This implies that the level of real economic output will surpass the pre-COVID level of 2019-20.

Global Construction Chemical Industry Overview

Construction chemicals and materials used in construction include concrete admixtures, waterproofing compounds, grout and concrete repair, and industrial flooring. Construction chemicals refer to the chemical compounds that are combined with building materials, such as concrete and mortar. These chemicals improve the compatibility of these materials with the building structures they are used with. They also help to improve the overall building performance and protect the structures that they are used in.

The Global Construction Chemicals Market is expected to grow from USD 25,990.42 Million in 2019 to USD 36,982.89 Million by the end of 2025 at a Compound Annual Growth Rate (CAGR) of 6.05%

The construction chemicals market size was estimated at \$71,460 million in 2020, and the market is projected to register a CAGR of over 5.5% during the forecast period (2021-2026). Across the globe, cities are introducing initiatives aimed at

improving infrastructure. Around 2050, more than two-thirds of the overall population in the world is forecasted to be living in urban areas. This rapid increase would mainly be observed in developing countries. Besides, regions like Africa and Asia are still comparatively less urbanized than other regions and hence are estimated to have the fastest urban growth rates. China and India are going to be the key contributors for Asia with absolute disposable income growth owing to greater urbanization, strong economic growth, and increasing population.

India's chemicals industry is de-licensed, except for few hazardous chemicals. In the Indian chemical industry, alkali chemicals have the largest share with ~69% in the total production; production of polymers accounts for ~59% of the total production of basic key petrochemicals in 2019. The chemical industry is expected to contribute US\$ 300 billion to India's GDP by 2025.

India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals). The chemicals industry in India covers more than 80,000 commercial products with overall market size standing at US\$ 178 billion in 2018-19. The industry is expected to grow at 9.3% to reach US\$ 304 billion by 2025 on the back of rising demands in the end-user segments for specialty chemicals and petrochemicals. In July 2021, production volumes of key chemicals stood at 909,310 MT and petrochemicals at 1,867,351 MT. The specialty chemicals sector is expected to reach US\$ 40 billion by 2025.

Indian manufacturers have recorded a CAGR of 11% in revenue between FY15 and FY21, increasing India's share in the global specialty chemicals market to 4% from 3%, according to the Crisil report. A revival in domestic demand and robust exports will spur a 50% YoY increase in the capex of specialty chemicals manufacturers in FY22 to ₹ 6,000-6,200 crore (US\$ 815-842 million). Revenue growth is likely to be 19-20% YoY in FY22, up from 9-10% in FY21, driven by recovery in domestic demand and higher realisations owing to rising crude oil prices and better exports.

The domestic chemicals sector's small and medium enterprises are expected to showcase 18-23% revenue growth in FY22, owing to an improvement in domestic demand and higher realisation due to high prices of chemicals.

The country ranks 14th in export and 8th in import of chemicals worldwide. In September 2021, exports of organic and inorganic chemical exports increased 29.65% YoY to reach US\$ 2.37 billion.

Supply disruption in China has caused the global end-user industries to diversify their vendor base mainly towards Indian players. Closure of plants in the EU and China due to increasing environmental concerns have favoured Indian manufacturers to invest further in specialty chemicals. In the chemical sector, industrial licensing and 100% FDI, under the automatic route, are allowed with exception to few hazardous chemicals. Total FDI inflow in the chemicals (other than fertilisers) sector reached US\$ 18.06 billion between April 2000 and September 2020.

Indian companies are witnessing interest from strategic investors led by Japan, Korea and Thailand, as they seek to diversify supply chains from China. The Indian Government supports the Industry through research & development and initiatives such as reducing basic customs duty on several imported products and promoting the 'Make in India' campaign. A 2034 vision for the chemicals and petrochemicals sector has been set up by the government to explore opportunities to improve domestic production, reduce imports and attract investments in the sector.

Lower per capita consumption and ease of doing business are promoted by the Indian government; this reflects good investment opportunities with huge growth potential.

In December 2020, the PCPIR policy is being completely redesigned. Under the new PCPIR Policy 2020-35, a combined investment of ₹ 10 lakh crore (US\$ 142 billion) is targeted by 2025, ₹ 15 lakh crore (US\$ 213 billion) by 2030 and ₹ 20 lakh crore (US\$ 284 billion) by 2035 in all PCPIRs across the country. The four PCPIRs are expected to generate employment for ~33.83 lakh people. ~3.50 lakh persons have been employed in direct and indirect activities related to PCPIRs by the end of 2020.

In June 2021, the Rubber Skill Development Council (RSDC) announced that it is expanding its vertical to cover the chemicals and petrochemicals sectors and will be now known by the name Rubber, Chemical, Petrochemical Skill Development Council (RCPSDC). The council will implement skill training programmes in chemicals and petrochemicals verticals for the youth across country.

Under the Union Budget 2021-22, the government allocated ₹ 233.14 crore (US\$ 32.2 million) to the Department of Chemicals and Petrochemicals. The Government of India is considering launching a production linked incentive (PLI) scheme in the chemical sector to boost domestic manufacturing and exports.

Indian Construction Chemical Industry Overview

The Indian construction chemicals market is estimated to witness a healthy growth, at an estimated CAGR of over 8% in the future. The Indian construction chemicals market follows a slightly different trend than that of the global market. Due to the lack of awareness about the long-term benefits of construction chemicals, the demand for chemicals, such as concrete admixtures, adhesives, sealants, and waterproofing, which have immediate tangible effects, is high.

The government is taking various measures to restructure corporate taxes and make them more appealing to foreign investors. The move is anticipated to boost investments in the healthcare, education, housing, transport, and water infrastructure sectors. Investments worth US\$31,650 billion have been proposed by 99 cities under their smart city plans. 100 smart cities and 500 cities are likely to invite investments worth `2 trillion in the next 5 years.

Impact of COVID-19 on capital projects, construction programs

As the impacts of the novel coronavirus (COVID-19) pandemic continue to expand, businesses are struggling both to adjust to new ways of life and to grasp what this will likely mean for their operations, and especially their construction projects and cap-ex programs due to their multi-faceted components. How business and government entities that exist along the construction program lifecycle respond to COVID-19 is changing hourly, with more businesses and government entities forced to run with skeleton crews or shut down altogether. There will be delays, loss of efficiencies, and cost impacts because of COVID-19 and related regulatory responses, and there is little to no precedent to help companies understand what the potential future impacts may be or when restrictions may end. Some contractors, subcontractors, suppliers, and sources of labor may not be impacted yet because they have not been told to shut down or because they are considered

“essential” for government work. However, it is very possible that at some point, work may need to halt due to health and safety concerns. Even if it does not stop altogether, work will likely be more costly, and take more time. There are important actions that owners, contractors, subcontractors, and suppliers can take to improve control of their construction programs and efforts now in order to be better positioned when the pandemic subsides.

Infrastructure sector

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India’s overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development.

Market Size

According to the Department for Promotion of Industry and Internal Trade (DPIIT), FDIs in the construction development sector (townships, housing, built up infrastructure and construction development projects) and construction (infrastructure) activities stood at US\$ 26.14 billion and US\$ 25.38 billion, respectively, between April 2000 and June 2021. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion.

Demand drivers and restraints

Growth in Indian construction/real estate sector will drive the usage of construction chemicals products.

The construction industry is one of the fastest growing sectors in India. Growth in number of infrastructural projects and the resultant rise in spending across all states in the country are thrusting the demand for construction chemicals in the country. Rising government initiatives such as Smart City, Make in India, and Housing for All, amongst others are creating significant opportunities which will boost the sales of construction chemicals in India.

Pradhan Mantri Awas Yojana-Urban (PMAY-U), launched to address urban housing shortage including the slum dwellers by ensuring a pucca house to eligible urban households by the year 2022, the technology used to build the houses at faster speed was innovative, specially the Light House projects as part of Global Housing Technology Challenge – India (GHTC -India) initiative, in six States .The initiative led to a new era in the construction technology in India, thus giving impetus to Make in India initiative. Bringing people and technology together, LHPs will pave the way for a new eco-system where globally proven technologies will be adopted for cost-effective, environment friendly and speedier construction. Advantages of these LHPs are many, the primary ones being durability, climate-resilient, affordability, safety and speed.

MoHUA also launched the Enrolment Module for TECHNOGRAHIS including students from IITs, NITs, engineering, planning and architecture colleges, faculty members, academicians, and stakeholders for registering themselves to visit Live Laboratories at six LHP sites for learning, consultation, generation of ideas and solutions, experimentation, innovation, and technical awareness. This helped them in getting a first-hand account of the technologies being used and in turn, they can adapt and adopt them as per their requirements in the construction sector for a 'Make in India' approach.

A Technology Sub-Mission (TSM) was set up to facilitate the adoption of innovative, sustainable, eco-friendly and disaster-resilient technologies and building materials for low-cost, speedier and quality construction of houses. TSM not only aims to ensure speedier and safer delivery under PMAY-U but also has the potential to bring a paradigm shift in the overall housing construction sector in the country.

Affordable Rental Housing Complexes (ARHC) Scheme under Atmanirbhar Bharat Package addresses the vision of 'AtmaNirbhar Bharat Abhiyan' significantly by creating a sustainable ecosystem of affordable rental housing solutions and to achieve overall objective of "Housing for All" encompassing the need of affordable rental housing for urban migrants/poor. ARHCs will provide them dignified living with necessary civic amenities near their place of work.

Under Smart Cities Mission (SCM), the City Innovation Exchange (CiX) platform was launched for innovative practices in cities. The platform was a significant addition to the growing innovation ecosystem of India and focuses on fostering innovative practices in cities. CiX, through an 'open innovation' process, engages with innovators to design-test-deliver on solutions to pressing urban challenges. This initiative is among the ongoing efforts of the Government to realise Prime Minister's vision of New and AtmaNirbhar Bharat, by making cities more self-reliant and enabled to meet the needs of and provide services to their citizens. Another step towards making the SCM targets easier, a Smart Code is a platform was launched by MoHUA that enables all ecosystem stakeholders to contribute to a repository of open-source code for various solutions and applications for urban governance. It is designed to address the challenges that ULBs face in the development and deployment of digital applications to address urban challenges, by enabling cities to take advantage of existing codes and customising them to suit local needs, rather than having to develop new solutions from scratch. The India Urban Data Exchange has been developed in partnership between the Smart Cities Mission and the Indian Institute of Science (IISc), Bengaluru. A New smart cities website & Geospatial management information system GMIS for project monitoring was also developed to implement and proper scrutiny of the projects under SCM.

Ministry of Housing and Urban Affairs launched the Transport All, aiming to bring together cities, citizen groups, and start-ups to develop solutions that improve public transport to better serve the needs of all citizens. It also started the EatSmart Cities Challenge which aimed to motivate Smart Cities to develop a plan that supports a healthy, safe and sustainable food environment supported by institutional, physical, social, and economic infrastructure along with the application of 'smart' solutions to combat food related issues.

National Urban Digital Mission will create the ideal space to harness immense synergies from the domain of urban and technology towards creating a citizen-centric governance that reflects Prime Minister Shri Narendra Modi's vision of 'minimum government and maximum governance'. The National Urban Digital Mission (NUDM) will create a shared digital infrastructure for urban India, working across the three pillars of people, process, and platform to provide holistic support to cities and towns. It will institutionalise a citizen-centric and ecosystem-driven approach to urban governance and service delivery in 2022 cities by 2022, and across all cities and towns in India by 2024.

Impact of COVID-19 on our business operations:

The outbreak of COVID 19 pandemic globally and in India has severely impacted businesses and economies. There has been disruption to regular business operations due to the measures taken to curb the impact of the pandemic. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020 and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions. However, as our products were categorized under the 'essential goods' as we are supplying of our products under Govt construction and infrastructure Projects and our job worker's Manufacturing Facilities were not shut down during this pandemic. Despite the impact of the COVID-19 pandemic, our revenue from operations stood at ₹ 379.74 lakhs during the financial year ended March 31, 2021, due to continuous support from suppliers in execution of orders from and flow of orders from our customers. In view of the nationwide lockdown announced by the Government of India to control the spread of COVID-19, our business operations were temporarily disrupted from March 24, 2020. Since then, we have resumed operations in a phased manner as per the Government of India and state government's directives. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in "Risk Factors".

BUSINESS STRATERGIES

1. Expand our market in retail segment products:

Currently, we operate in Business-to-Business market (B2B) construction chemicals, concrete and concrete products and now we plan to explore in retail segment market products. Retail segment products includes concrete products, bonding chemicals, concrete repairs chemicals, waterproofing chemicals, engineering grout, tiling chemicals, plaster chemicals etc. To explore retail segment market products, we will sell our products under our own brand to the dealers and retailers in local markets.

2. Sourcing the Raw material:

Currently, we outsource our Chemical products production to third party manufacturer. The primary or key raw materials used in the manufacture of our products include Sulphonated naphthalene formaldehyde condensate as well as Polycarboxylate ether. This raw material we use in our products constitute approx. 50%-70% and that is finished product of our third party manufacturer and other approx. 30% to 50% raw material products they purchase on our behalf from local market and they charge for the same or sometime time we buy that products from the local market but also increase our cost of production. So in future, our strategy to directly import that 30% to 50% of primary raw material which will reduce our cost of production and will provide low rate to customer for better competition.

3. Stable revenue stream from Government companies projects through sub-contractors

Our constant efforts to satisfy the customers demand and timely delivery of orders to the customers is providing stable revenue stream through government companies projects.

4. Expand our supplier base

We intend to expand our supplier base so as to drive down our net cost, increase in margins shortening time to market, increased geographical presence. Increased supplier base shall create competition between our current and new suppliers which would lead to sustained profitability growth of our Company.

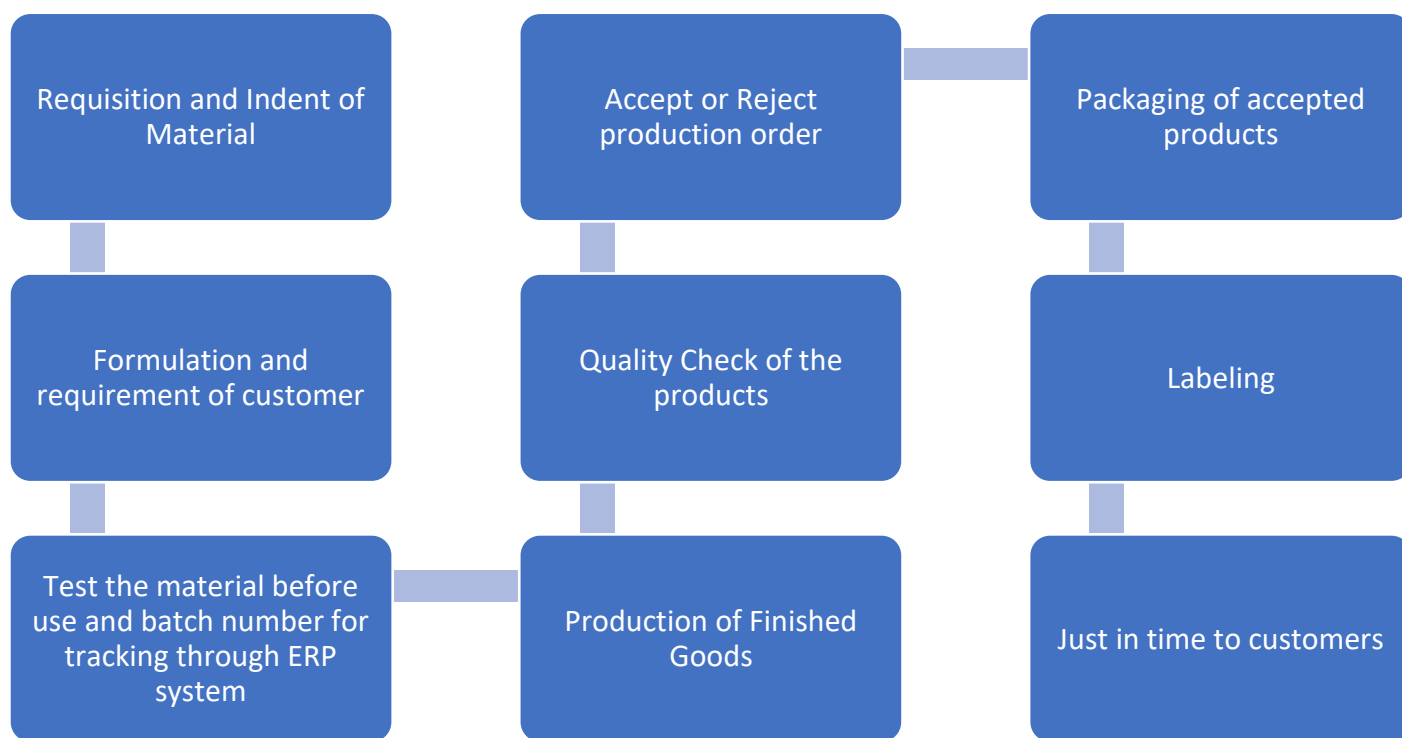

If we continually use the same suppliers without branching out into new markets, we risk being less innovative. Smaller suppliers tend to differentiate themselves from their competitors by offering a more “niche” product.

Competition

We face competition from various organized and unorganized players in the market. Competition emerges from small as well as big players operating in the construction industry. The organized players in the industry compete with each other by providing low-rated product, high quality, consistent and time bound products and value-added services. We believe the principal elements of competition in our business are consistent and quality products, their prioritized production and delivery and strong relations with manufacturers. We compete against our competitors by establishing ourselves as a knowledge-based company by assisting manufacturers at every step of production and we focus on providing products and services that would be in consonance with technical and quality requirements of our customer as well as we try to offer competitive pricing without compromise on the quality.

We do not have formal agreement with customers and thus they may procure from other suppliers. Some of players may already have a robust procurement network and develop better relations with customers, which could impact our revenue and profitability. In the future, we may also face competition from new entrants in the segment.

GENERAL LAWS

Indian Contract Act

The Indian Contract Act codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract.

Registrations under the applicable Shops & Commercial Establishments Acts of the respective States in which our Company has an established place of business/office ("Shops Act")

The Shops Act provides for the regulation of conditions of work in shops, commercial establishments, restaurants, theatres and other establishments. The Act is enforced by the Chief Inspector of Shops (CIS) and various inspectors under the supervision and control of Deputy/Assistant Labour Commissioners of the concerned District, who in turn functions under the supervision of Labour Commissioner. Such legislations regulate the working and employment conditions of the workers employed in shops and establishments including commercial establishments and provide for fixation of working hours, rest intervals, overtime, holidays, leave, termination of service, maintenance of shops and establishments and other rights and obligations of the employers and employees.

The Companies Act, 2013

The Act deals with laws relating to companies and certain other associations. The Companies Act primarily regulates the formation, financing, functioning and winding up of companies. The Act prescribes regulatory mechanism regarding all

relevant aspects including organizational, financial and managerial aspects of companies. Regulation of the financial and management aspects constitutes the main focus of the Act. In the functioning of the corporate sector, although freedom of companies is important, protection of the investors and shareholders, on whose funds they flourish, is equally important. The Companies Act plays the balancing role between the set of competing factors, namely, management autonomy and investor protection.

The Specific Relief Act, 1963

The Specific Relief Act, 1963 is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. “Specific performance” means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

On the basis of the approved Basis of Allotment, the Issuer shall pass necessary corporate action to facilitate the Allotment and credit of Equity Shares. **Bidders are advised to instruct their Depository Participant to accept the Equity Shares that may be allotted to them pursuant to the Issue.**

Pursuant to confirmation of such corporate actions, the Registrar will dispatch Allotment Advice to the Bidders who have been Allotted Equity Shares in the Issue.

b) Issuer will ensure that: (i) the Allotment of Equity Shares; and (ii) initiate corporate action for credit of shares to the successful Bidders Depository Account which will be completed within 4 Working Days of the Issue Closing Date. The Issuer also ensures the credit of shares to the successful Bidder depository account is completed within one Working Day from the date of Allotment, after the funds are transferred from the Public Issue Account on the Designated Date.

Basis of Allotment

Allotment will be made in consultation with NSE (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth here:

The total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category x number of Shares applied for).

For applications where the proportionate allotment works out to less than [●] equity shares the allotment will be made as follows:

Each successful applicant shall be allotted [●] equity shares; and

The successful applicants out of the total applicants for that category shall be determined by the draw of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.

If the proportionate allotment to an applicant works out to a number that is not a multiple of [●] equity shares, the applicant would be allotted Shares by rounding off to the lower nearest multiple of [●] equity shares subject to a minimum allotment of [●] equity shares.

If the Shares allocated on a proportionate basis to any category is more than the Shares allotted to the applicants in that category, the balance available Shares for allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising of applicants applying for the minimum number of Shares.

Since present issue is a fixed price issue, the allocation in the net issue to the public category in terms of Regulation 253 of the SEBI (ICDR) Regulations, 2018 shall be made as follows:

Minimum of 50% of the net issue of shares to the Public (i.e. [●] Equity Shares) shall be made available for allotment to retail individual investors; and

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).
