We have not made provision for decrease in the value of abovementioned investments. So if provision is made in future on account of permanent decrease in value of these investments, our profits would reduce to the extent of such provision. This may have an impact on our results of operations and financial conditions.

16) Our revenues could be significantly affected if the governments in countries in which our customers or business partners are based, restrict companies from outsourcing work to non-domestic corporations.

Any downturn or reversal of existing industry trends toward offshore outsourcing might be a deterrent to compete effectively. Measures aimed at limiting or restricting offshore outsourcing have been enacted in a few countries and there is currently legislation pending in several countries. The measures that have been enacted to date generally have restricted the ability of government entities to outsource work to offshore business process service providers. Though, we have not been significantly adversely affected by aforementioned restrictions, however, pending or future legislation in other countries could significantly affect our business. For further details for business of our Company, Kindly refer section “**Business Overview**” beginning on Page 78.

17) Our insurance coverage may not adequately protect us against all losses. To the extent that we suffer loss or damage which is not covered by insurance or exceeds our insurance coverage, our results of operations and financial performance could be adversely affected.

Our Company has obtained insurance coverage in respect of certain risks. While we believe that the insurance coverage we maintain would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, nor that we have taken out sufficient insurance to cover all material losses. The Company has not taken any insurance for protecting us from future business losses and in the event of such losses occurring, the operations of our Company may be affected significantly. Furthermore, there can be no assurance that we will be able to maintain adequate insurance coverage in the future at acceptable costs. To the extent that we suffer loss or damage for which we do not obtain or maintain insurance or exceeds our insurance coverage, the loss would have to be borne by us and our results of operations and financial performance could be adversely affected. For more details regarding insurance taken by us, please refer section “**Business Overview**” on page 78.

18) We require substantial capital for our business operations, and the failure to obtain additional financing in the form of debt or equity may affect our ability to grow and our future profitability.

Our business is capital intensive, requiring substantial capital to do business. The actual amount and timing of our future capital requirements may also differ from estimates as a result of, among other things, unforeseen delays or cost overruns, change in business plans due to prevailing economic conditions, unanticipated expenses, regulatory and engineering design changes. To the extent our planned expenditure requirements exceed our available resources; we will be required to seek additional debt or equity financing. Additional financing could increase our cost, in case of debt increase in interest cost and additional restrictive covenants and in case of equity dilution of our earnings per share. We cannot assure that in future, we will be able to raise additional financing on acceptable terms in a timely manner or at all. For more information, regarding financial assistance please refer chapter titled “**Financial Information of the Company**” beginning on page 129.

19) The conditions and restrictions imposed by our financing agreements could adversely affect our ability to conduct our business and operations.

Certain of our debt financing agreements contain restrictive covenants and/or events of default that limit our ability to undertake certain types of transactions. These agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities. These debt financing agreements also require us to maintain certain financial covenants.

We cannot assure you that we have complied with all such restrictive covenants in a timely manner, or at all, or that we will be able to comply with all such restrictive covenants in the future. Further, during any period in which we are in default, we may be unable to raise, or may face difficulties raising further financing. In such eventuality, other third parties may have concerns over our financial position. Any of these circumstances could adversely affect our business, credit ratings, prospects, results of operations and financial condition. Additionally, any such action initiated by our lenders could result in the price of the Equity Shares being adversely affected.

20) Our Company has made applications for registration of trademarks, which are under process of registration. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.

We have made an applications with 'The Registrar of Trade Marks, Trade Marks Registry for

Registration of our trademark " "on May 24, 2017, whose current status is "Objected"

and " Business Live E-Data Synchronise System " on June 16, 2017, whose current status is "Accepted & Advertised". The registration for the said trademarks in our name is important to retain our brand equity. If our applications for registration are not accepted or if the oppositions filed against our trademark applications, are successful, we may lose the statutory protection available to us under the Trade Marks Act, 1999 for such trademark. Further, we cannot assure that our pending applications would be granted registration or if granted registration, will not be invalidated or circumvented. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.

21) Any dispute in relation to use of the leased premises or title of the owned premises would have a material effect on our business and results of operations.

We do not own some of the branch and support offices from where we operate. The said offices are taken on rent by our Company For further details regarding details of our branch and support offices, please refer to the section titled "**Business Overview**" on page 78. If we are unable to renew the agreements under which we occupy or use the premises, on terms and conditions acceptable to us, or at all, we may suffer a disruption in our operations. In addition to the above, any failure to renew the said agreement could force us to procure new premises, including substantial time and cost of relocation. Any of the aforesaid could have a material effect on our business, results of operation and financial condition.

Further, certain of our lease agreements may have not been registered with local authorities or may not be duly registered as per applicable law. Consequently, we may not be able to enforce these leases in the event of default on behalf of the lessor. We may also be required to make additional stamp duty or similar payments for certain of our lease agreements that may currently be insufficiently stamped, which could have an adverse effect on our business, results of operations, cash flows and financial condition.

Moreover, we may be subject to restrictive provisions regarding our property under municipal zoning or other property-related laws and regulations, or under our lease agreements, or our properties may be subject to legal proceedings with regard to such restrictions on use involving local municipal corporations or regulatory authorities. Further, improperly executed, unregistered or insufficiently stamped conveyance instruments in a property's chain of title, unregistered encumbrances in favor of third parties, rights of adverse possessors, ownership claims of family members of prior owners or third parties, or other defects that a purchaser may not be aware of can affect title to a property. In addition to title uncertainties, there may be other irregularities, defects, noncompliance, or unsettled claims in relation to the properties that we lease from time to time, including issues that we may not be aware of.

Any such factors may affect the peaceful and uninterrupted possession and use of our properties or require us to incur significant additional compliance costs or rental expenses, or may curtail our future expansion, which may adversely affect our business, financial condition, results of operations and prospects.

22) Our Group Company i.e. Semaphore Infotech Pvt Ltd has been struck off in past year.

Our Promoter Group Company i.e. Semaphore Infotech Pvt Ltd with which our Promoters were associated as Directors and shareholders has struck off its name from the Registrar of Companies, Ahmedabad. Further, we cannot assure that any other company in which our promoters are directors and/or promoter will not struck off their names from respective Registrar of Companies. For more information, regarding our other group Companies refer section titled "**Our Promoters and Promoter Group**" beginning on page 122.

23) Our ability to pay dividends in the future will depend on our results of operations and financial condition, capital requirements, contractual restrictions (including the terms of some of our financing arrangements that restrict our ability to pay dividends) and other factors considered relevant by our Board of Directors and shareholders.

Although our Company has consistently paid dividends in last five financial years, our ability to pay dividends in the future will depend upon a number of factors, including our results of operations and financial condition, capital requirements, contractual restrictions (including the terms of some of our financing arrangements that restrict our ability to pay dividends) and other factors considered relevant by our Board of Directors and shareholders. There is no assurance that our Company will declare and pay, or have the ability to declare and pay, any dividends on Equity Shares at any point in the future.

24) Our revenues are dependent upon our meeting specific customer requirements largely on a case-to-case basis. Any failure or limitation on our ability to provide customised software solutions may detrimentally affect our future growth.

Our assignments for providing services largely involve us providing business and software solutions on a case to-case basis, depending upon the needs of each customer. Our inability to provide customised software solutions could lead to erosion of our market image and brand value, which could lead to customers discontinuing their work with us and stagnation of our customer base, which in turn could harm our business and profitability. Our future growth will depend on our continued evolution of specific sets of customised services to deal with the rapidly evolving and diverse needs of our customers in a cost competitive and effective manner. For further details for business of our Company, Kindly refer section titled “**Business Overview**” beginning on Page 78.

25) Wage increases in India may reduce our profit margins.

Our wage costs in India have historically been lower than wage costs in the developed countries for comparably skilled employees. However, wage increases in India may affect our profit margins. We may need to increase the levels of our employee compensation more rapidly than in the past to retain talent. Unless we are able to continue to increase the efficiency and productivity of our employees over the long term, wage increases may reduce our profit margins. Furthermore, increases in the proportion of employees with less experience, or sources of talent from other low cost locations could also negatively affect our profits.

26) We face intense competition, and competition may have a negative impact on our business prospects, future performance and financial condition.

The market for our business is intensely competitive and characterised by rapid changes in technology, user requirements, industry standards and frequent new product introductions and improvements. We expect competition in product and pricing terms to increase. Competitive pressures could also lead to increases in expenses such as advertising and sales promotion expenses, R&D expenses, product rebates, product placement fees, continuous product service and marketing support provided to our business partners. Our current and potential competitors may also establish co-operative relationships among themselves or with third parties that may further enhance their resources. Current or potential competitors may be acquired by third parties with greater available resources. As a result of such acquisitions, our current or potential competitors might be able to adapt more quickly to new technologies and customer needs, devote greater resources to the promotion or sale of their solutions, initiate or withstand substantial price competition, take advantage of other opportunities more readily or develop and expand their offerings more quickly than we do.

27) Our business is substantially dependent on limited number of customers for a significant portion of our revenues. The loss of any significant clients or an adverse change in the customer relationship may have a material and adverse effect on our business and results of operations.

The Company is largely dependent on single and few customers, as the top one and top ten customers constitutes around 24.94% and 48.02% of the total income for the year 2016-17 on a standalone basis. While we are constantly working to increase our customer base so as to enable us to reduce dependence limited number of customers, there is no assurance that we will be able to broaden our customer base in a particular time frame in future. Our business or results of operations could be adversely affected by a reduction in demand or change in preference for our product or cessation of our relationship with any such major customers.

28) Our Company's success depends largely upon its skilled professionals and its ability to attract and retain these personnel. The Industry where our Company operates is a highly employee intensive industry.

Our Company's ability to execute projects and to obtain new clients depends largely on their ability to attract, train, motivate and retain highly skilled professionals, particularly project managers and other mid-level professionals. The attrition rates in the industry in which we operate have been high due to a highly competitive skilled labour market in India. We invest in training professionals that we hire to perform the services we provide. These professionals are often targeted by the lateral recruitment efforts of our competitors. The performance of our Company will be benefited on the continued service of these persons or replacement of equally competent persons from the domestic or global markets. We may have difficulty in redeploying and retraining our professionals to keep pace with continuing changes in technology, evolving standards and changing customer. For further details for employees of our Company, Kindly refer section titled "**Business Overview**" beginning on Page 78.

29) Our success depends largely upon the services of our Executive Directors and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.

Our Executive Directors have built relations with clients and other persons are connected with us. Our success is substantially dependent on the expertise and services of our Executive Directors and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

30) Our Head, branch and Support offices are located at various locations in India. Our results of operations could be materially and affected if such facilities are disrupted.

Majority of our employees are based in Ahmedabad & Delhi in India. These offices are the one of the main locations from where we provide our services / products and solutions to our clients. Because of the concentration of our people and other resources at these facilities, our results of operations could be materially and adversely affected if one or more of those facilities are damaged as a result of a natural disaster, including an earthquake, flood, fire, or other event that disrupts our business or causes material damage to our property. Also, our operations in these centres may be interrupted due to discontinuation / non-renewal or cancellation of the existing rent agreements on these places. Although we have back-up facilities for some of our operations, It could be difficult for us to maintain or resume our operations quickly in the aftermath of such a disaster / event if occur at our site offices and location from where we operate our business. For further details for locations of our Company, Kindly refer section titled "**Business Overview**" beginning on Page 78.

31) We do not currently have long term contracts or exclusive supply arrangements with any of our vendors. Any major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition.

We do not currently have long term contracts or exclusive supply arrangements with any of our vendors. Further, we will be dependent on adequate and timely deliveries of necessary raw materials or equipment. In the event of a delay, inadequacy or default in deliveries by any of our vendors, we may not be able to obtain substitutes on an adequate and timely basis or on commercially acceptable terms. A major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition.

32) Our work with government clients exposes us to additional risks inherent in the government contracting environment.

We are empanelled as IT Solution provider in government sector, therefore our clients include governmental entities. Our government work carries various risks inherent in the government contracting process, which may affect our operating profitability. These risks include, but are not limited to, the fact that the Government contracts are often subject to more extensive scrutiny and publicity than contracts with commercial clients, there may be delays in payment due to time taken to complete internal processes, political and economic factors such as pending elections, changes in leadership among key governmental decision makers, revisions to governmental tax policies and reduced tax revenues can

affect the number and terms of new government contracts signed, terms and conditions of government contracts tend to be more onerous and are often more difficult to negotiate than those for commercial contracts.

33) Our business will suffer if we fail to anticipate and develop new services and enhance existing services in order to keep pace with rapid changes in technology and the industries on which we focus.

The IT services market is characterized by rapid technological changes, evolving industry standards, changing client preferences, and new product and service introductions that could result in product obsolescence and short product life cycles. Our future success will depend on our ability to anticipate these advances, enhance our existing offerings or develop new service offerings to meet client needs, in each case, in a timely manner. We may not be successful in anticipating or responding to these advances on a timely basis, or at all. If we do respond, the services or technologies we develop may not be successful in the marketplace. We may also be unsuccessful in stimulating customer demand for new and upgraded services, or seamlessly managing new service introductions or transitions.

Our failure to address the demands of the rapidly evolving IT environment, particularly with respect to emerging technologies, and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition. Additionally, during the regular course of operating our business, we may adjust our future plans as a result of our research, experience, technology evolution and market demand. Accepting unforeseen business opportunities may also result in a business model change. We cannot guarantee that any adjustment in our future plans will become successful or be more successful than our current business model. A shift in our plans may result in the use of other technologies. Other technologies may in the future prove to be more efficient and/or economical to us than our current technologies. We cannot guarantee that any change in technology will become successful or be more successful than our current technology.

34) Significant security breaches in our computer systems and network infrastructure and fraud could impact our business.

We seek to protect our computer systems and network infrastructure from physical break-ins as well as security breaches and other disruptive problems. Computers break-in and power disruptions could affect the security of information stored in and transmitted through these computers systems and networks. To address these issues and to minimize the risk of security breaches we employ security systems. However, these systems may not guarantee prevention of frauds, break-ins, damage and failure. A significant failure in security measures could have an effect on our business. For further details for business of our Company, Kindly refer section titled “**Business Overview**” beginning on Page 78.

35) Our inability to manage our growth strategy could disrupt our business and reduce our profitability.

The success of our business will depend greatly on our ability to implement our business strategies effectively. For details, see “**Business Overview**” on page 78. There can be no assurance that we will be able to execute our strategies on time and within the estimated budget, or that we will meet the expectations of our targeted clients. Our inability to manage our business and strategies could have an adverse effect on our business, financial condition and profitability.

36) There may be further equity offerings in the Company which will dilute the shareholding of existing shareholder.

The Company may require further infusion of funds to satisfy its capital needs and future growth plans, which the Company may not be able to procure. Any future equity offerings by the Company may lead to dilution of equity and may affect the market price of the Equity Shares.

37) Exchange rate fluctuations in various currencies in which we do business could negatively impact our business, financial condition and results of operations.

Although our reporting currency is in Rupees, we transact a portion of our business in several other currencies, primarily USD, Euro and Pound Sterling. In Financial Years 2017, 2016 and 2015, respectively, we derived Rs. 782.73 Lacs, Rs. 1157.63 Lacs and 1475.91 Lacs earnings from foreign exchange. However, a portion of our costs are in Rupees. The exchange rate between the Rupee and foreign currencies has fluctuated significantly in recent years and may continue to fluctuate in the future.

Any significant appreciation of the Rupee against foreign currencies in which we do business can fundamentally affect our competitiveness in the long-term. As our financial statements are presented in Rupees, such fluctuations could have a material impact on our reported results. Our clients generally demand that all risks associated with such fluctuations are borne by us.

In order to mitigate our foreign exchange risks, we do not hedge the major currencies in which we transact business by entering into forward contracts. If the currencies in which we transact business fluctuate then our business, financial condition and results of operations may be adversely impacted.

38) The Company may continue to be controlled by our promoter group following this Offer and our other shareholders may not be able to affect the outcome of shareholder voting.

After the completion of the Offer, our promoter group will collectively hold approximately 62.45% of the outstanding Equity Shares. Consequently, our Promoter Group, if acting jointly, may exercise substantial control over us and *inter alia* may have the power to elect and remove a majority of our Directors and/or determine the outcome of proposals for corporate action requiring approval of our Board of Directors or shareholders, such as lending and investing policies, revenue budgets, capital expenditure, dividend policy and strategic acquisitions/joint ventures.

39) There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

40) The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer price and you may not be able to sell your Equity Shares at or above the Offer Price.

The Offer Price of our Equity Shares has been determined by fixed price method. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Offer Price" beginning on page 68) and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Successful and timely completion of the projects;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

41) You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Offer until the Offer receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchange, we are required to refund all monies collected to investors.

42) Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of sale of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

B. EXTERNAL RISK FACTORS BEYOND THE CONTROL OF THE COMPANY

Certain factors beyond the control of the Company could have a negative impact on the Company's performance, such as:

43) Changes in Government Policies and political situation in India could adversely affect our business operations.

Since 1991, the Government of India has pursued policies of economic liberalization, including relaxing restrictions on the private sector. We cannot assure you that these liberalization policies will continue in future. Protest against liberalization could slowdown the pace of economic development. The rate of economic liberalization could change, specific laws and policies could change, and foreign investment, currency exchange rates and other matters affecting investing in our securities could change as well.

Any adverse change in Government policies relating to our Industry in general may have an impact on the profitability of the industry.

44) Changes in regulations could adversely affect our business operations.

Changes in regulatory environment relating to IT Industry will significantly impact the business of the Company.

45) Changes in taxation policies could adversely affect our business operations & results of operations.

Statutory taxes and other levies may affect our margin in the event of our inability to factor such expense in our trading margin. Any increase in taxes and/ or levies, or the imposition of new taxes and/ or levies in the future, may have a material adverse impact on our business, results of operations and financial condition.

46) Terrorist attacks, civil unrests and other acts of violence or war in India and around the world could adversely affect the financial markets, result in a loss of business confidence and adversely affect our business, results of operations, financial condition and cash flows.

Terrorist attacks, civil unrests and other acts of violence or war in India and around the world may adversely affect worldwide financial markets and result in a loss of business confidence and ultimately adversely affect our business, results of operations, financial condition and cash flows. India has, from time to time, experienced instances of civil unrest and political tensions and hostilities in some parts of the country and among neighbouring countries. Such political and social tensions could create a perception that investment in Indian companies involves higher degrees of risk which could have a possible adverse effect on the Indian economy, future financial performance and the trading prices of our Equity Shares.

47) We will be subject to risks arising from interest rate fluctuations, which could adversely affect our business, financial condition and results of operations.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our future borrowings increase significantly, our cost of servicing such debt will increase. This may adversely impact our results of operations, planned capital expenditures and cash flows.

48) Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

49) The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

50) A slowdown in economic growth in India could cause our businesses to suffer.

Our performance and the growth of our business are necessarily dependent on the health of the overall Indian economy. As a result, a slowdown in the Indian economy could adversely affect our business. India's economy could be adversely affected by a general rise in interest rates, inflation, natural calamities, increases in commodity prices, and protectionist efforts in other countries or various other factors. In addition, the Indian economy is in a state of transition. It is difficult to gauge the impact of these fundamental economic changes on our business. Any slowdown in the Indian economy or future volatility in global commodity prices could adversely affect our business.

51) Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

52) Trading of Equity Shares will be permitted only in Dematerialized form and shareholders holding Equity Shares in physical form will not be able to trade in such Equity Shares.

Since the Equity Shares of the Company are required to be traded compulsory in demat form, shareholders who hold shares in Physical Form may not be able to trade in such Equity Shares unless they get their holding dematerialized.

SECTION III – INTRODUCTION

SUMMARY OF INDUSTRY

The Global IT-BPM Industry

Worldwide, 2016 has been a year of continued technology disruptions (IoT, cloud, AI, etc.) and political upheavals led by the UK voting to leave the EU (Brexit) and the US Presidential elections. The year also saw a decline in GDP of key markets (USA, UK and Japan). While the implications of the political changes are yet to be fully felt, technology implications are visible everywhere. Driverless cars are now a reality, driverless trucks are being beta-tested in a few cities around the world; artificial intelligence has enabled intelligent personal assistants and robotics has found its way into household chores, hospitality industry, media, and medical fields.

2016 was also the year when global technology industry saw fairly modest rise in growth, about 4%, after a couple of years of flat growth. Global IT-BPM market stood at USD 1.2 trillion in 2016 (excl. hardware). And the ongoing need for firms to adapt to the age of the customer is pushing CIOs to invest in the business technology agenda for winning, serving and retaining customers.

Global sourcing market growth continues to outperform IT-BPM spend growth; in 2016, global sourcing grew 1.7X to reach USD 173-178 billion. India continued as the world's No.1 sourcing destination with a share of 55 per cent. New delivery centers set up worldwide in 2016 grew ~32% to 258 centers with 15% being set up in India and over 53% in Europe and Latin America a testament of the growing nearshore model.

IT-BPM sector wise spend (USD Billion)
Software & Services: ~4% Growth over 2015

NASSCOM notes that Global sourcing market growth continues to outperform IT-BPM spend growth; in 2016, global sourcing grew 1.7X to reach USD 173-178 billion.

INDUSTRY OVERVIEW

The Global IT-BPM Industry

Worldwide, 2016 has been a year of continued technology disruptions (IoT, cloud, AI, etc.) and political upheavals led by the UK voting to leave the EU (Brexit) and the US Presidential elections. The year also saw a decline in GDP of key markets (USA, UK and Japan). While the implications of the political changes are yet to be fully felt, technology implications are visible everywhere. Driverless cars are now a reality, driverless trucks are being beta-tested in a few cities around the world; artificial intelligence has enabled intelligent personal assistants and robotics has found its way into household chores, hospitality industry, media, and medical fields.

2016 was also the year when global technology industry saw fairly modest rise in growth, about 4%, after a couple of years of flat growth. Global IT-BPM market stood at USD 1.2 trillion in 2016 (excl. hardware). And the ongoing need for firms to adapt to the age of the customer is pushing CIOs to invest in the business technology agenda for winning, serving and retaining customers.

Global sourcing market growth continues to outperform IT-BPM spend growth; in 2016, global sourcing grew 1.7X to reach USD 173-178 billion. India continued as the world's No.1 sourcing destination with a share of 55 per cent. New delivery centers set up worldwide in 2016 grew ~32% to 258 centers with 15% being set up in India and over 53% in Europe and Latin America a testament of the growing nearshore model.

IT-BPM sector wise spend (USD Billion)

Software & Services: ~4% Growth over 2015

NASSCOM notes that Global sourcing market growth continues to outperform IT-BPM spend growth; in 2016, global sourcing grew 1.7X to reach USD 173-178 billion.

Trends

According to NASSCOM, the IT-BPM sector in India is expected to reach revenues worth USD 154 billion in FY 2017, with a growth rate of 7.8 per cent.

Exports

The exports market grew at 7.6 per cent during the FY 2017 to reach USD 117 billion.

Domestic

IT services has come a long way from providing cost arbitrage to managing IT from a business perspective and providing enterprise digital transformation. Not only has the overall understanding of business improved, services are now more closely aligned and customised to the needs of individual customers in every industry and focused on providing business outcomes. The effect of digitisation and automation has pervaded all the key service areas, converting from process and delivery driven to strategic and transformational solution providers. Customers are looking for 'platformised services' providing business outcomes at minimum costs and fastest possible time.

The table below shows the evolution of the Indian IT-BPM industry over the past four decades in terms of various metrics:

Note:

1. Data given for FY1991, FY2000, FY 2010, FY 2017
2. Share in total services exports
3. World bank has revised its base from 2005 to 2010; hence, the change in % share vis-à-vis previous years
4. Total global sourcing numbers have been revised

Trends in the exports markets

According to NASSCOM, IT-BPM exports from India in fiscal year 2017 are expected to reach at USD 117 billion, a 7.6% growth over the previous year and an addition of USD 8.2 billion. IT services accounts for nearly 56% share and this segment is nearly 2.5X the next largest segment, BPM. At USD 26 billion, BPM's share in total exports is about 22.5%. ER&D and packaged software together account for a little over 21% share. Of the total incremental addition, BPM and ER&D exports together are likely to have a 50% share.

India's IT-BPM exports are playing a key role in India's economy. Its share in India's total services exports is over 49% and it accounts for 32% of India's forex reserves.

Trends in the domestic market

In FY2017, India's domestic IT-BPM market is likely to grow over 8.5% y-o-y to reach USD 38 billion (excl. eCommerce). IT services is the largest segment with close to 40.5% share, followed by hardware (~37%), software products (12.5%) and BPM with 10% share.

In terms of growth, IT services is to record the fastest growth of 11.4%; demand for mobile apps, website development and consulting services (around customer experience, IoT, and analytics) are the key growth drivers. Software products, though, only one-third the size of IT services segment, is to grow 10.4% to USD 4.8 billion due to the ever growing demand for cloud-based solutions, particularly from

SMBs. Rapid digitization and GST implementation is expected to further catalyze growth as firms would focus on modifying/implementing ERP solutions to simplify their supply chain and inventory management systems.

India as a Digital Solutions Partner

As technology continues to evolve rapidly and permeate more layers of business operations, digital solutions have become an integral component of the growth roadmaps for most enterprises. The enterprise imperative for going digital is fuelled by confluence of factors including an expanding base of demanding digital-savvy consumers, intensified competition from digital-savvy competitors including disruptivenew-entrants, and the necessity to stay ahead of them in the market. This has been aided by ubiquitous access to enabling technologies at rapidly increasing efficiencies in terms of cost and performance and their successful application towards improving customer experience.

Technology service providers have responded to these evolving priorities by ramping up their digital services portfolio through a variety of internal (organic capability development, reorganisation and resource rebalancing) and external (partnerships, strategic investments and acquisitions) measures. The key drivers for this change are enhanced customer engagement, business model innovation, application portfolio consolidation, and data based personalization initiatives across industries in order to further improve operational efficiencies.

Adoption of digital technologies at the enterprise level in India is still at a very nascent stage. Spend on social media highest; while security, analytics spend is less than 5% of the total IT budget. BFSI, telecom, retail are already on the digital transformation journey and the progression path is towards becoming a digital enabled organization, while healthcare is in the early stages of adopting technologies and is yet to define a digital strategy at the organisation level.

Digital India Key Enabler

With 375+ million Internet subscribers, India has the 2nd largest user base after China. India is highjacking global market shares everywhere, be it the number of internet users, smartphone users, app downloads, and online payments. There is significant push from the government to go Digital; the global technology giants are supporting this; and the 1.3+ billion people are embracing it in a manner like never before. The year-end also witnessed demonetisation of higher value notes, which is giving a significant boost to digital payments – leading to a cashless, paperless economy. Government of India through its 'Digital India' mission has successfully initiated a number of projects which include the National Digital Literacy Mission, e-kranti mission, wi-fi hotspots, NOFNs being laid, newer technologies are being tried to bring Internet closer to the masses. Among the proposed 100 smart cities, 60 cities are already undergoing developments, with a proposed fund allocation of ₹ 2 billion/city/year. With these initiatives, coupled with 'Make in India', India has embarked upon the journey of becoming a 'Digital Nation' in its truest sense.

India's value proposition: Partner of the future

India is setting itself up to be the digital transformation partner for global businesses. Over the past 25 years, it has set up an USD 154 billion business; which comprises over 16,000 firms that span every technology segment, with over 8,000 firms offering digital solutions. It has continuously been the world's No. 1 preferred location for setting up technology business; is one of the world's fastest growth economies and emerging as the R&D hub for global MNCs in digital technologies. India is also home to 4,750+ start-ups offering a ready ecosystem for collaboration and partnerships in niche technology areas. Its global operating model has over 700 ODCs across 80 countries and offers flexibility in terms of business and pricing models.

THE INFORMATION TECHNOLOGY ACT, 2000 (THE “IT ACT”)

The Information Technology Act, 2000 (the “IT Act”) was enacted with the purpose of providing legal recognition to electronic transactions. In addition to providing for the recognition of electronic records, creating a mechanism for the authentication of electronic documentation through digital signatures, the IT Act also provides for civil and criminal liability including fines and imprisonment for various computer related offenses. These include offenses relating to unauthorized access to computer systems, modifying the contents of such computer systems without authorization, damaging computer systems, the unauthorized disclosure of confidential information and computer fraud. The Information Technology (Amendment) Act, 2008, which came into force on October 27, 2009, amended the IT Act and *inter alia* gives recognition to contracts concluded through electronic means, creates liability for failure to protect sensitive personal data and gives protection to intermediaries in respect of third party information liability.

In April 2011, the Department of Information Technology under the Ministry of Communications & Information Technology, GoI notified the Information Technology (Reasonable security practices and procedures and sensitive personal data or information) Rules, 2011 in respect of section 43A of the IT Act (the “Personal Data Protection Rules”) and the Information Technology (Intermediaries guidelines) Rules, 2011 in respect of section 79(2) of the IT Act (the “Intermediaries Rules”). The Personal Data Protection Rules prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data. The Intermediaries Rules require persons receiving, storing, transmitting or providing any service with respect to electronic messages to not knowingly host, publish, transmit, select or modify any information prohibited under the Intermediaries Rules and to disable such information after obtaining knowledge of it. Further, the Department of Personnel and Training under the Ministry of Personnel, Public Grievances and Pensions, GoI has proposed to introduce a new legal framework that would balance national interest with concerns of privacy, data protection and security.

As part of our Company's operations, we are required to comply with the IT Act and the provisions thereof.

SALE OF GOODS ACT, 1930

It defines sale and agreement to sell as a contract whereby the seller transfers or agrees to transfer the property in goods to the buyer for a price and provides that there may be a contract of sale between part owner and another and that the contract of sale may be absolute or conditional. Provisions are made in this Act for existing or future goods, perishable goods, ascertainment of price, conditions and warranties, effects of the contract, delivery to carrier, duties of seller and buyer, buyer's right of examining the goods, liability of buyer for neglecting or refusing the delivery of goods, rights of unpaid seller, suits for breach of the contract, sale, etc.

SOFTWARE TECHNOLOGY PARKS SCHEME

The STPI Scheme was introduced by the Government with the objective of encouraging, promoting and boosting the software exports from India. The STPI Scheme, which is a 100% export oriented scheme, provides benefits such as data communication facilities, operational space, common amenities, single window clearances and approvals including project approvals, import certification and other facilities to boost software exports from India. In order to avail the benefits as envisaged by the Government, a company is required to register itself with the appropriate authorities. The principal compliance required

of a company accorded approval under the STPI Scheme is the fulfillment of the export obligation. The letters of permission may contain other conditions. Additionally, the unit is required to file monthly, quarterly and annual returns to STPI in the nature of a performance report indicating the export performance.

TAXATION LAWS

INCOME-TAX ACT, 1961

The Income Tax Act, 1961 deals with the taxation of individuals, corporate, partnership firms and others. As per the provisions of this Act the rates at which they are required to pay tax is calculated on the income declared by them or assessed by the authorities, after availing the deductions and concessions accorded under the Act. The maintenance of Books of Accounts and relevant supporting documents and registers are mandatory under the Act.

CENTRAL SALES TAX ACT (CST)

The main object of this act is to formulate principles for determining;

- (a) When a sale or purchase takes place in the course of trade or commerce
- (b) When a sale or purchase takes place outside a State
- (c) When a sale or purchase takes place in the course of imports into or export from India,

to provide for levy, collection and distribution of taxes on sales of goods in the course of trade or commerce, to declare certain goods to be of special importance trade or commerce and specify the restrictions and conditions to which State laws imposing taxes on sale or purchase of such goods of special importance (called as declared goods) shall be subject. CST Act imposes the tax on interstate sales and states the principles and restrictions as per the powers conferred by Constitution.

VALUE ADDED TAX (VAT)

VAT is a system of multi-point levy on each of the purchases in the supply chain with the facility of set-off input tax on sales whereby tax is paid at the stage of purchase of goods by a trader and on purchase of raw materials by a manufacturer. VAT is based on the value addition of goods, and the related VAT liability of the dealer is calculated by deducting input tax credit for tax collected on the sales during a particular period. VAT is a consumption tax applicable to all commercial activities involving the production and distribution of goods and the provisions of services, and each state that has introduced VAT has its own VAT Act, under which, persons liable to pay VAT must register and obtain a registration number from Sales Tax Officer of the respective State.

We have taken registration under Gujarat VAT, Maharashtra VAT, Delhi VAT, Daman & Diu VAT and Dadra & Nagar Haveli VAT.

THE CUSTOMS ACT, 1962 (“Customs Act”)

The Customs Act came into force in India with effect from February 01, 1963. Customs duty is a duty or tax, which is levied by Central Government on import of goods into, and export of goods from, India. It is collected from the importer or exporter of goods, but its incidence is actually borne by the consumer of the goods and not by the importer or the exporter who pays it. These duties are usually levied with ad valorem rates and their base is determined by the domestic value, 'the imported goods calculated at the official exchange rate. Similarly, export duties are imposed on export values expressed in domestic currency.

The said Act contains provision for levying of custom duty on imported goods, export goods, goods which are not cleared, goods warehoused or transshipped within specified days after unloading etc. it also provides for storage of imported goods in warehouses pending clearance, for goods in transit etc, subject to prescribed conditions.

SERVICE TAX ACT

Service Tax Chapter V of the Finance Act, 1994 as amended, provides for the levy of a service tax in respect of 'taxable services', defined therein. The service provider of taxable services is required to

collect service tax from the recipient of such services and pay such tax to the Government. Every person who is liable to pay this service tax must register himself with the appropriate authorities. Further, under Rule 7 (1) of Service Tax Rules, the company is required to file a half yearly return in Form ST 3 by the 25th of the month immediately following the half year to which the return relates. Assessee is required to file the half yearly return electronically.

GOODS AND SERVICES TAX (GST)

The Government of India proposed a comprehensive national goods and services tax ("GST") regime that would combine taxes and levies by the Central and State Governments into a unified rate structure. In this regard, the Constitution (101 Amendment) Act 2016, which received Presidential assent on September 8, 2016, enabled the Government of India and state governments to introduce GST. Accordingly Goods and Services tax ("GST") was enacted to make a provision for levy and collection of tax on supply of goods or services or both and was made effective from July 1, 2017.

GST is a destination based tax levied on supply of goods and services. GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and/or services. India adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single state are levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that state. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST will be levied on all stages of the supply chain till the final sale to consumers, providing ITC benefits on the basis of invoices issued at the previous stage of the supply chain.

IN GENERAL

THE COMPANIES ACT, 1956

The Companies Act, 1956 deals with laws relating to companies and certain other associations. It was enacted by the parliament in 1956. The Companies Act primarily regulates the formation, financing, functioning and winding up of companies. The Act prescribes regulatory mechanism regarding all relevant aspects, including organizational, financial and managerial aspects of companies. Regulation of the financial and management aspects constitutes the main focus of the Companies Act. In the functioning of the corporate sector, although freedom of companies is important, protection of the investors and shareholders, on whose funds they flourish, is equally important. The Companies Act plays the balancing role between these two competing factors, namely, management autonomy and investor protection.

THE COMPANIES ACT, 2013

The Companies Act, 2013, has been introduced to replace the existing Companies Act, 1956 in a phased manner. The Ministry of Corporate Affairs has vide its notification dated September 12, 2013 notified 100 Sections and on March 26, 2014 notified 183 Sections of the Companies Act, 2013. The same are applicable from September 12, 2013 and April 01, 2014, respectively. The Ministry of Corporate Affairs has issued the rules and new improved e- forms complementary to the Act establishing the procedure to be followed by companies in order to comply with the substantive provisions of the Act.

THE EMPLOYEES PROVIDENT FUNDS AND MISCELLANEOUS PROVISIONS ACT, 1952 (*"Employees Provident Fund and Miscellaneous Provisions Act"*)

The Employees' Provident Funds and Miscellaneous Provisions Act, 1952 is a social welfare legislation to provide for the institution of Provident Fund, Pension Fund and Deposit Linked Insurance Fund for employees working in factories and other establishments. The Act aims at providing social security and timely monetary assistance to industrial employees and their families when they are in distress.

The Act is administered by the Government of India through the Employees' Provident Fund Organization (EPFO). The following three schemes have been framed under the Act by the Central Government:

- (a) The Employees' Provident Fund Schemes, 1952;
- (b) The Employees' Pension Scheme, 1995; and
- (c) The Employees' Deposit-Linked Insurance Scheme; 1976.

The Central Government has constituted Employees' Provident Funds Appellate Tribunal to exercise the powers and discharge the functions conferred on such by Employees' Provident Funds and Miscellaneous Provisions Act, 1952.

EMPLOYEES STATE INSURANCE ACT, 1948

The promulgation of Employees' State Insurance Act, 1948 (ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi- dimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act 1948 encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

The Bombay Shops and Establishments Act, 1948 ("The Bombay Shops Act")

The Bombay Shops Act is also applicable to the state of Gujarat and provides for the regulation of conditions of work in shops, commercial establishments, restaurants, theatres and other establishments. The Act is enforced by the Chief Inspector of Shops (CIS) and various inspectors under the supervision and control of Deputy/Assistant Labour Commissioners of the concerned District, who in turn function under the supervision of Labour Commissioner. State of Gujarat has notified the Gujarat Shops and Establishments Rules, 1963 under the Bombay Shops Act.

The Gujarat State Tax on Professions, Trade, Callings and Employments Act, 1976

The professional tax slabs in India are applicable to those citizens of India who are either involved in any profession or trade. The State Government of each State is empowered with the responsibility of structuring as well as formulating the respective professional tax criteria and is also required to collect funds through professional tax. The professional taxes are charged on the incomes of individuals, profits of business or gains in vocations. The professional tax is charged as per the List II of the Constitution. The professional tax is classified under various tax slabs in India. The tax payable under the State Acts by any person earning a salary or wage shall be deducted by his employer from the salary or wages payable to such person before such salary or wages is paid to him, and such employer shall, irrespective of whether such deduction has been made or not when the salary and wage is paid to such persons, be liable to pay tax on behalf of such person and employer has to obtain the registration from the assessing authority in the prescribed manner. The Gujarat State Tax on Professions, Traders, Callings and Employments Rules, 1976 have also been notified by the Government.

The Payment of Gratuity Act, 1972

The Payment of Gratuity Act, 1972 was enacted with the objective to regulate the payment of gratuity, to an employee who has rendered for his long and meritorious service, at the time of termination of his services. Gratuity is payable to an employee on the termination of his employment after he has rendered continuous service for not less than five years:

- On his/her superannuation; or
- On his/her retirement or resignation; or
- On his/her death or disablement due to accident or disease (in this case the minimum requirement of five years does not apply).

5.6 BASIS OF ALLOCATION

- (a) The SEBI ICDR Regulations specify the allocation or Allotment that may be made to various categories of Applicants in an Offer depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Offer size available for allocation to each category is disclosed overleaf of the Application Form and in the Prospectus. For details in relation to allocation, the Applicant may refer to the Prospectus.

- (b) Under-subscription in any category (except QIB Category) is allowed to be met with spill-over from any other category or combination of categories at the discretion of the Issuer and in consultation with the LMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- (c) In case of under subscription in the Offer, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Offer. For allocation in the event of an under-subscription applicable to the Issuer, Applicants may refer to the RHP.

(d) Illustration of the Book Building and Price Discovery Process

Applicants should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors.

Applicants can bid at any price within the Price Band. For instance, assume a Price Band of Rs. 20 to Rs. 24 per share, Offer size of 3,000 Equity Shares and receipt of five Applications from Applicants, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Applications received from various investors.

Application Quantity	Application Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer, in consultation with the LMs, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Applications at or above this Offer Price and cut-off Applications are valid Applications and are considered for allocation in the respective categories.

Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding ("**Alternate Book Building Process**").

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/Offer Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Applicant with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Applicant is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Applicants is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Applicant, decide whether a Applicant be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Applicant be allowed single or multiple Applications.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Application Form in a Fixed Price Offer. As the Offer Price is mentioned in the Fixed Price Offer therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the application form.
