SECTION III – RISK FACTORS

An investment in equity involves a high degree of risk. Investors should carefully consider all the information in this Offer Document, including the risks and uncertainties described below, before making an investment in our equity shares. Any of the following risks as well as other risks and uncertainties discussed in this Offer Document could have a material adverse effect on our business, financial condition and results of operations and could cause the trading price of our Equity Shares to decline, which could result in the loss of all or part of your investment. In addition, the risks set out in this Offer Document may not be exhaustive and additional risks and uncertainties, not presently known to us, or which we currently deem immaterial, may arise or become material in the future. Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other risks mentioned herein.

The Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in the Draft Prospectus.

MATERIALITY

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in the future.

NOTE:

The risk factors are disclosed as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “RISK FACTORS” and elsewhere in this Draft Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in our restated financial statements prepared in accordance with Indian GAAP.

Unless otherwise specifically provided in the respective Risk factors given below, the amounts of impact of risks specified hereunder, on our financial conditions, are not quantifiable.

INTERNAL RISK FACTORS:

1. **We generate our almost entire sales from our operations in Gujarat especially in Jamnagar region and any adverse developments affecting our operations in Gujarat could have an adverse impact on our revenue and results of operations.**

Although almost entire sales of our company is in the state of Gujarat especially in Jamnagar region and also we did projects in the state of Maharashtra and Uttar Pradesh. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in these regions to expand our operations in other parts of India, should we decide to further expand our operations.

Further, factors such as competition, culture, regulatory regimes, business practices and customs, customer tastes, behaviour and preferences in the cities where we may plan to expand our operations may differ from Gujarat, and our experience in the Gujarat may not be applicable to these states. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national developers, but also local developers who have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors, suppliers, relevant government authorities, and who have access to existing land reserves or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside Gujarat market may adversely affect our business prospects, financial conditions and results of operations.

2. **Our top 5 customers contribute more than 80% of our revenue from operations.**

As per our current business model, our Company has a limited customer base as we generate our sales from limited number of clients. For the year ended March 31, 2021, 2020 and 2019 our top 5 customers contributed 81.65%, 96.68% and 98.90% respectively of our sales and for the period ended October 31, 2021, our top 5 customers contributed 91.99% of our sales. Any decline in our quality standards, growing competition and any change in the demand, may adversely affect our ability to retain them. Although, we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, we cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations. However, the composition and revenue generated from these customers might change as we continue to add new customers in the normal course of business.

3. The Company is dependent on few numbers of suppliers for purchase of product. Loss of any of this large Suppliers may affect our business operations.

Our Top ten Suppliers contribute to 68.34%, 70.36%, 39.51%, and 24.78% of our Purchases (Material and for services) for the period/year ended October 31, 2021, March 31, 2021, March 31, 2020 and March 31, 2019 respectively. Out of which 50.25%, 38.62%, 22.30%, and 6.66% of our Purchases (Material and for services) for the period/year ended October 31, 2021, March 31, 2021, March 31, 2020 and March 31, 2019 respectively is from related parties. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seek new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

4. There may be potential conflict of interests between our Company and group entity/ company promoted by our Promoters cum Director.

Our Company is engaged in the business of civil construction services, such as piling, excavation, road preparation, land leveling, structural painting, building construction in nature of commercial and industrial project, mechanical scaffolding services including structuring and piping, Plant maintenance. Our group entity/company namely Arpit Techno Infra Private Limited are engaged in the business of contractor for industrial structure and erection and fabrication of industrial work and Micro Protech ("Partnership Firm") is engaged in the business of Civil and other construction of Military Engineer Services ("MES") and other corporate and non-corporate entities. Further we have not executed any Non-Compete Agreement with our Group Entity/Company undertaking not to engage in businesses similar to that of our Company.

As a result, conflicts of interests may arise in allocating business opportunities amongst our Company, our other Promoter Group Entities/Company in circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour our Group Entities/Company in which our Promoters have interests. There can be no assurance that our Promoters/Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our business, results of operations and financial condition. For further details please refer to chapter titled "FINANCIAL INFORMATION OF OUR GROUP COMPANIES/ENTITIES" beginning on page no. 181 of this Draft Prospectus.

5. Our Company has availed unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.

As on period ended on October 31, 2021, our Company has unsecured loans amounting to ₹ 1310.75 lakhs from lenders that are repayable on demand to them. Such loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lenders at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition. For further details of unsecured loans of our Company, please refer "Note 6" Details of Short Term Borrowings as Restated of chapter titled – Financial Statements as Restated beginning on page F 17 of this Draft Prospectus.

6. Our Promoter and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters

Upon completion of this Issue, our Promoter and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoter and promoter group will have the ability to exercise significant influence over all matters

requiring shareholders' approval. Our Promoter and promoter group will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoter and promoter group could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and promoter group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. Except as disclosed in "Capital Structure" on page no. 44 of this Draft Prospectus, we cannot assure you that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

7. Seasonality and weather conditions may adversely affect our business.

Our business operations may be materially and adversely affected by severe weather, which may require us to evacuate personnel or curtail services and may result in damage to a portion of our ongoing projects, resulting in the suspension of operations. In addition, such weather may prevent us from delivering materials to our project sites in accordance with contract schedules or generally reduce our productivity.

Our operations are also adversely affected by difficult working conditions and extremely high temperatures during summer months and during monsoon, which restrict our ability to carry on civil construction activities, mechanical activities, plant maintenance and which fully utilize our resources. We record revenues for those stages of a project that we complete, after we receive certification from the client that such stage has been successfully completed. Revenues recorded during the first half of our financial year, between April and September, are traditionally substantially lower compared to revenues recorded during the second half of our financial year, due to the peak summer and monsoon seasons falling in the April to September period. During periods of curtailed activity due to adverse weather conditions, we may continue to incur operating expenses, but our revenues from operations may be delayed or reduced.

8. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

9. In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies/Entities.

Our Promoters – Directors are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoters and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity which may be or may not be at Arms' Length Price and in Ordinary Course of Business. If the transactions are executed not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. For details of transactions already executed by our Company with our Promoters, Directors and Group Companies/Entities during last three years, please refer to the "Annexure – J" - "RELATED PARTY TRANSACTION" on page F 35 of Restated Financial Statements under the Chapter titled "RESTATED FINANCIAL INFORMATION" beginning on Page No. 161 of this Draft Prospectus.

10. Labour unrest problems and shortage of labour may significantly affect our business and if our employees unionize, we may be subject to, slowdowns and increased wage costs

We believe that the construction industry in India is currently experiencing a shortage of labour. As a consequence, we face competitive pressures in recruiting skilled and unskilled labour and professionally qualified staff as and when we need them. We believe that we currently pay salaries / wages at market rate in order to secure an adequate number of skilled and unskilled labours; however, we may in the future need to pay remuneration that is above market rates which could result in lower profit margins for us. Further, there can be no assurance that increased salaries / wages will result in a lower rate of attrition. The loss of the services of our skilled and unskilled labour or our inability to recruit or train a sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects. In addition, India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and our business may be adversely affected.

We operate in a labour-intensive industry and we hire casual labour to work on our projects. In the event of a labour dispute, if we are unable to successfully negotiate with the workmen, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. Either of these factors could adversely affect our business, financial condition, results of operations and cash flows. In addition, we may be liable for or exposed to sanctions, penalties or losses arising from accidents or damages caused by our workers.

11. We may experience reduced profits or losses under or, in some cases, cancellations or deferrals of, contracts if costs increase above estimates.

We conduct our business under various types of contractual arrangements where costs are estimated in advance. A significant proportion of our contracts are fixed-price or lump sum contracts, where we bear a significant portion of the risk for cost overruns. Under these types of contracts, contract prices are established in part on cost and scheduling estimates which are based on a number of assumptions. For these contracts, the assumptions include assumptions relating to future economic conditions, prices and availability of labour, equipment and materials. If these estimates prove inaccurate, or circumstances change such as unanticipated technical problems, difficulties in obtaining permits or approvals, changes in local laws, weather delays or our third party associates inability to perform, cost overruns may occur and we could experience reduced profits or in some cases, a loss for such projects. These risks tend to be exacerbated for longer-term contracts since there is increased risk that the circumstances under which we based our original bid could change with a resulting increase in costs. In many of these contracts, we may not be able to obtain compensation for additional work performed or expenses incurred and if a project is delayed, we may be required to pay penalties for such delays. Even under our cost-reimbursable contracts, where we do not bear the risk of cost-overruns, costs can exceed client expectations, resulting in deferrals or even cancellations of the contract. Unanticipated costs or delays in performing part of a fixed price contract could have compounding effects by increasing costs of performing other parts of the contract. These variations and the risks generally inherent to the industry we operate in may result in our profits being different from those originally estimated and may result in our experiencing reduced profitability or losses on projects. Depending on the size of a project, these variations from estimated contract performance could have a significant effect on our results of operations.

12. Compliance with, and changes in, safety, health and environmental laws and various labour, workplace and related laws and regulations impose additional costs and may increase our compliance costs and a such adversely affect our results of operations and our financial condition.

We are subject to a broad range of safety, health and environmental laws and various labour, workplace and related laws and regulations in the jurisdictions in which we operate, which impose controls on the disposal and storage of raw materials, noise emissions, air and water discharges, on the storage, handling, employee exposure to hazardous substances and other aspects of our operations. Compliance with, and changes in these laws may increase our compliance costs and as such adversely affect our results of operations and financial condition.

Development of industrial and infrastructural projects are subject to extensive local, state and central laws and regulations that govern the construction and development of land, including laws and regulations related to zoning, permitted land uses, proportion and use of open spaces, building designs, fire safety standards, height of the buildings, access to water and other utilities, and water and waste disposal. In addition, we are subject to laws and regulations relating to, among other things, environmental approvals in respect of the project, minimum wages, working hours, health and safety of labourers and requirements of registration for contract labour.

13. Our Company has not complied with certain statutory provisions under Companies Act and has delayed in filing of required forms with Registrar of Companies in a timely manner. Such non compliances / lapses may attract penalties.

Our Company is required under the Companies Act, 2013 to make filings with the RoC from time to time within the stipulated period. Our Company had not filed MGT-14 forms with ROC pursuant to clause (g) of sub section 3 of Section 179 of Companies Act, 2013 for adoption of financial statement and the Board Report for the period ended March 31, 2018, 2019 and 2020.

In addition, our Company was not in compliance with Rule 9A of the Companies (Prospectus and Allotment of Securities) Rules, 2014 upto December 07, 2021. Our company being unlisted public limited company had not facilitated dematerialisation of all its existing securities by making necessary application to a depository as defined in clause (e) of sub-section (1) of section 2 of the Depositories Act, 1996 and had not secured International Security Identification Number (ISIN) upto December 07, 2021. Consequently, our Company had permitted transfer of 2,25,000 Equity Shares to promoters in physical mode lodged by the Shareholders and/or promoters on May 30, 2020.

Although, till the date of Draft Prospectus, no action has been initiated by the ROC for such noncompliance, in future they may levy penalty for the same and could lead to legal proceedings.

14. Contracts in the infrastructure sector are awarded on the basis of pre-qualification criteria and competitive bidding processes. We face intense competition from other construction companies. Once the technical requirements of the tender are cleared, the contract is usually awarded on the basis of the competitive price quoted by the bidder

In selecting contractors for the project, clients generally limit the tender to contractors that prequalifies based on several criterion including experience, technological capacity and performance, quality standards, ability to execute the project within the present timeframe, sophisticated machines etc. Disqualification on any of these grounds will make us ineligible for bidding. These pre-qualification criteria are at the discretion of the clients and we cannot assure that we would continue to meet the pre-qualification criterion of our existing or prospective clients. This would have an adverse impact on the financials of our Company.

15. Projects included in our Order Book may be delayed, cancelled or not fully paid for by our clients, which could materially harm our cash flow position, revenues or profits.

As of December 20, 2021, our Order Book constituting major 13 ongoing project of ₹ 4551.69 lakhs out of which work of ₹ 2041.14 Lakhs has already been executed. For further details refer to chapter titled —Business Overview beginning on page 92 of this Draft Prospectus. Future earnings related to the performance of the work in the Order Book may not necessarily be realized. Although projects in the Order Book represent business that we consider firm, cancellations or scope adjustments may occur. Due to changes in the scope of the project and its schedule, we cannot predict with certainty when or if the projects in our Order Book will be completed. In addition, even where a project proceeds as scheduled, it is possible that contracting parties may default and fail to pay amounts owed or dispute the amounts owed to us. Any delay, cancellation or payment default could materially harm our cash flow position, revenues or profits, and adversely affect the trading price of our Equity Shares.

16. The nature of our construction business exposes us to delays and defects that affect our projects and which may have an adverse effect on our business.

We may be subject to claims resulting from defects arising from procurement and / or construction services provided by us within the warranty periods extended by us, which range from 6 to 24 months from the date of completion. Actual or claimed defects in construction quality could give rise to claims, liabilities, costs and expenses, relating to loss of life, personal injury, damage to property, damage to facilities, pollution, inefficient operating processes, loss of production or suspension of operations. Although in certain cases suppliers are required to compensate us for certain raw material quality, such arrangements are subject to fixed caps and may not fully compensate us for the damages that we suffer as a result of equipment failures and defects or the penalties under our agreements with our clients, and do not generally cover indirect losses such as loss of profits or business interruption. Any significant operational problems or the loss of our business for an extended period of time could result in delays or incomplete projects or services and adversely affect our results of operations.

17. Our projects are exposed to various implementation and other risks and uncertainties

Some of our projects are under construction or development. The construction or development of these new projects involves various implementation risks including construction delays, delay or disruption in supply of raw materials,

unanticipated cost increases, force majeure events, cost overruns. We may be further subject to regulatory risks, financing risks and the risks that these projects may ultimately prove to be unprofitable. In particular:

- Delays in completion and commercial operation could increase the financing costs associated with the construction and cause our forecast budget to be exceeded;
- some of the drawings for the sites on which these projects are expected to be developed may not be accurate;
- we may encounter unforeseen engineering problems, disputes with workers, force majeure events and unanticipated costs due to defective plans and specifications;
- we may not be able to obtain adequate capital or other financing at affordable costs or obtain any financing at all to complete construction of and to commence operations of these projects;
- we may experience shortages of, and price increases in, materials and skilled and unskilled labour, and inflation in key supply markets;
- geological, construction, excavation, regulatory and equipment problems with respect to operating projects and projects under construction;
- we may be subject to risk of equipment failure or industrial accidents that may cause injury and loss of life, and severe damage to and destruction of property and equipment;
- we may experience adverse changes in market demand or prices for the services that our projects are expected to provide; and
- other unanticipated circumstances or cost increases

18. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registration and permits, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. If we fail to maintain such registrations and licenses or comply with applicable conditions, then such respective regulatory can impose fine on our company or suspension and/or cancellation the approval/licenses which may affect our business adversely.

Some of the permits, licenses and approvals etc. are granted for a fixed period of time and may expire and for which we may have to make an application for obtaining the approval or its renewal. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business. Moreover, there can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Further, certain statutory and regulatory authority may put certain terms and conditions, which are required to be complied with by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. For more information on the various statues applicable to our company, please refer chapter titled “KEY INDUSTRY REGULATIONS” appearing on Page no. 128 of this Draft Prospectus.

Our company was incorporated by conversion of erstwhile partnership firm “Sonu Enterprises”. Many of the Licenses and approvals are in the name of “Sonu Enterprises”, the same are required to be updated/ changed with various government/semi government authorities and various organizations. For more information about the licenses required in our business and the licenses and approvals taken by our company please refer chapter titled “GOVERNMENT APPROVALS” appearing on Page no. 177 of this Draft Prospectus.

19. We depend on certain brand names and our corporate name and logo that we may not be able to protect and/or maintain.

Our ability to market and sell our services depends upon the recognition of our brand names and associated consumer goodwill. Currently, we do not have registered trademarks for our corporate name and logo under the Trade Marks Act, 1999. Consequently, we do not enjoy the statutory protections accorded to registered trademarks in India for the corporate name and logo of our company, which are currently pending. In the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our corporate name or logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition, results of operations and prospects.

20. Our Object has not been appraised by any Bank or Financial Institution. Any significant deviation in the Object could adversely impact our operations and sustainability in absence of any independent monitoring agency.

We have estimated fund raising to the extent of ₹ [●] Lakh to finance the 'Objects of the Issue' (including Issue Expenses). The proposed objects for which the funds are being raised have not been appraised by any Bank or Financial Institution and the fund requirements are based primarily on management estimates. There is no guarantee that our estimates will prove to be accurate and any significant deviation in the project cost could adversely impact our operations and sustainability in the absence of any independent monitoring agency. For details of the "OBJECT OF THE ISSUE", please refer Page no. 61 of this Draft Prospectus.

21. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

The issue proceeds is entirely at the discretion of the issuer/management. As per SEBI (ICDR) Regulations, 2018, appointment of monitoring agency is required only if Issue size exceeds ₹ 10,000 Lakh. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the companies Act, 2013 the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

22. We are dependent upon third parties for supply of key raw materials and any disruption in their supply could disrupt our business and adversely affect our financial results

In certain contracts the cost of raw materials are included in the contract. TMT- Roundbar, Cement, Steel, Plywood, Tiles, Sanitary Parts, Sands, Concretes, MS Plate/Sheet, MS Pipe, Colour etc. our major raw materials which contribute significantly to our total raw material cost.

We do not enter into any long term agreements with our suppliers and our arrangements with them are generally on short-term and spot basis. Hence, there is no assurance that in future also we will be able to source such raw materials at commercially acceptable prices, or at all. This could affect our ability to fulfil our supply commitments or to fulfil them in an economical manner, which will have an adverse effect on our business, financial condition and results of operations.

23. Our business is dependent on our continuing relationships with our clients, with whom we have not entered into long term arrangements

We do not have any long term arrangements with any of our clients. Our business is based upon mutual agreed terms with our clients without any written arrangement. Although we have satisfactory business relations with our clients but we cannot assure continued flow of business from them. The loss of or interruption of work by, a significant client or a number of significant client or the inability to procure tender contracts on a regular basis or at all may have an adverse effect on our revenues, cash flows and business and financial operations.

24. Our Promoters, members of Promoter Group and third party have mortgage their properties and provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities

Our Promoters, members of promoter group and third party have mortgage their properties and provided personal guarantees in relation to certain loan facilities availed of by us. In the event that any of these properties or guarantees are revoked by promoters, members of promoters group or third party, the lenders for such facilities may require alternate properties as mortgages/guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities.

We may not be successful in procuring alternative properties/guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

25. We could be adversely affected if we fail to keep pace with technical and technological developments in the construction industry

Our clients are increasingly developing larger, more technically complex project in the civil construction and infrastructure space. To meet our clients' needs, we need to regularly modernize existing technology and acquire or develop new technology for our construction business. In addition, rapid and frequent technology and market demand changes can also render existing technologies and equipment obsolete, requiring substantial outlay in capital expenditures and/or write-downs of obsolete assets. Our failure to anticipate or to respond adequately to changing technical, market demands and / or client requirements could adversely impact our business and financial results.

26. The sectors in which we operate are capital intensive in nature, and we may not be able to raise the required capital for these projects or the capital to sustain projects through their full development cycles, which could have a material adverse effect on our ability to complete our projects.

Projects in the sectors in which we operate typically are capital intensive and require us to obtain financing through various means. Whether we can obtain such financing on acceptable terms is dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investors' confidence, our high levels of existing indebtedness and other factors beyond our control as well as on the timely completion of our projects. Therefore, our future financing attempts may not be successful or be on favourable terms. Any inability to arrange for financing on commercially acceptable terms could result in the loss of or inability to complete planned projects and materially affect our business and results of operations.

27. Our continued success is dependent upon our ability to hire, retain, and utilize qualified personnel

The success of our business is dependent upon our ability to hire, retain, and utilize qualified personnel, including project managers, engineers, architects, designers, and corporate management professionals who have the required experience and expertise. From time to time, it may be difficult to attract and retain qualified individuals with the expertise and in the timeframe demanded by our clients, and we may not be able to satisfy the demand for our services because of our inability to successfully hire and retain qualified personnel.

If we cannot attract and retain qualified personnel or effectively implement appropriate succession plans, it could have a material adverse impact on our business, financial condition, and results of operations. Moreover, we may be unable to manage knowledge developed internally, which may be lost in the event of our inability to retain employees. The cost of providing our services, including the extent to which we utilize our workforce, affects our profitability. If an expected contract award is delayed or not received, we could incur cost resulting from excess staff, reductions in staff, or redundancy of facilities that could have a material adverse impact on our business, financial conditions, and results of operations.

28. We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms at a future date, may have an adverse effect on our operations, profitability and growth prospects.

Our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favorable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

Summary of our working capital position is as given below:

Our Working capital requirements are in line with the industry standards. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled —Objects of the Issue beginning on page 61 of this Draft Prospectus.

29. Our Company has a negative cash flow in its operating activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business

Our Company has incurred negative cash flows from our operating activities as well as investing activities during our operating history as per the Restated Financial Statements and the same are summarized as under:

(₹ In Lakhs)

Particulars	For the year ended			For the Period ended October 31, 2021
	March 31, 2019	March 31, 2020	March 31, 2021	
Net Cash Generated from Operating Activities	57.00	101.06	54.52	(444.74)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

30. Any misconduct by employees or our failure to comply with laws or regulations could weaken our ability to win contracts, which could result in reduced revenues and profits

Any misconduct, fraud, non-compliance with applicable laws and regulations, or other improper activities by our employees could have a significant negative impact on our business and reputation. Such misconduct could include the failure to comply with government procurement regulations, regulations regarding the protection of classified information, regulations prohibiting bribery and other corrupt practices, regulations regarding the pricing of labour and other costs in government contracts, regulations on lobbying or similar activities and any other applicable laws or regulations. Our failure to comply with applicable laws or regulations or acts of misconduct could subject us to fines and penalties, and suspension or debarment from contracting, which could weaken our ability to win contracts and result in reduced revenues and profits and could have a material adverse impact on our business, financial condition, and results of operations.

31. Our insurance coverage may be inadequate to satisfy future claims against us.

We maintain insurance coverage which is typical in our industry which we believe to be commercially appropriate for risks. However, such insurance may not be adequate to cover all our losses or liabilities that may arise from our operations. Our insurance policies contain exclusions and or all limitations on coverage, as a result of which, we may not be able to successfully assert our claims for any liability or loss under the said insurance policies.

Additionally, there may be various other risks and losses, specially arising out of our business agreements, for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms. Furthermore, there can be no assurance that in the future we will be able maintain insurance of the types or at levels which we deem necessary or adequate or at premiums which we deem to be commercially acceptable. The occurrence of an event for which we are not insured, where the loss is in excess of insured limits or where we are unable to successfully assert insurance claims from losses, could result in uninsured liabilities. Further, despite such uninsured losses we may remain obligated for any future financial indebtedness or other obligations related to our business. Any

such uninsured losses or liabilities could result in an adverse effect on our business operations, financial conditions and results of operations.

32. Our revenue and earnings are largely dependent on the award of new contracts which we do not directly control.

A substantial portion of our revenue is generated locally, generally obtained through one to one negotiations as well as through bidding process. The timing of when project awards will be made is unpredictable and outside of our control. We operate in highly competitive markets where it is difficult to predict whether and when we will receive awards since these awards and projects often involve complex and lengthy negotiations and bidding processes. These processes can be impacted by a wide variety of factors including governmental approvals, financing contingencies, environmental conditions and overall market and economic conditions. In addition, during an economic downturn, many of our competitors may be more inclined to take greater or unusual risks or accept unfavourable terms and conditions in a contract that we might not deem fit or acceptable. Because a significant portion of our revenue is generated from such contracts, our results of operations can fluctuate from quarter to quarter and year to year depending on whether and when contract awards occur and the commencement and progress of work under such awarded contracts. As a result, we are subject to the risk of losing new awards.

33. Our success largely depends on our Board and Key Managerial Personnel and our ability to attract and retain them. Any loss of our director and key managerial personnel could adversely affect our business, operations and financial condition

We depend significantly on the expertise, experience and continued efforts of our executive Directors Mr. Ramji Pandey, Mr. Ketan Modi, Mrs. Seema Pandey and our key managerial personnel. If one or more members of our Board or key managerial personnel are unable or unwilling to continue in his / her present position, it could be difficult to find a replacement. Our business could thereby be adversely affected. Opportunities for key managerial personnel in our industry are intense and it is possible that we may not be able to retain our existing key managerial personnel or may fail to attract / retain new employees at equivalent positions in the future. As such, any loss of key managerial personnel could adversely affect our business, operations and financial condition. For further details on the Management of our Company please refer to the chapter titled —Our Management beginning on page 142 of this Draft Prospectus.

34. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the “Objects of the Issue”. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, debts, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans.

For further details please refer to the chapter titled —Objects of the Issue” beginning on page 61 of this Draft Prospectus.

35. Certain information contained in this Draft Prospectus is based on management estimates and we cannot assure you of the completeness or accuracy of the data.

Certain information contained in this Draft Prospectus like Project cost, estimated commencement and completion dates, our funding requirements and our proposed use of issue proceeds is based solely on management estimates. The estimated project dates as well as costs may change depending on the circumstances like changes in laws and regulations, competition, irregularities or claims with respect to title of land, the ability of third parties to complete their services, delays, cost overruns or modifications to our ongoing and planned projects. Such circumstances can have an impact on our financial condition and results of operation.

36. The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP

growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19.

The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing “stay-at-home” orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices.

Our business operation were closed for four months upto July 2020. We resumed our business operations from August 2020. Our Company had also availed Moratorium offered by RBI during 2020. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future. The COVID19 pandemic has affected and may continue to affect our business, results of operations and financial condition in a number of ways such as construction delays at our ongoing projects due to several factors such as lockdowns enforced by government agencies, work-stoppage orders, disruptions in the supply of materials and shortage of labour, which delays could result in a failure to meet development milestones as well as an increase in the cost of construction. We have gradually resumed construction at our sites in compliance with the government guidelines. It led to a closure of our offices and we moved to a work-from-home model. We resumed operations at our offices in a staggered manner in compliance with government guidelines. A surge in the number of COVID-19 cases in the future could result in a complete or partial closure of, or other operational issues at our offices resulting from government action. our inability to access debt and equity capital on acceptable terms, or at all, and a further disruption and instability in the global financial markets or deteriorations in credit and financing conditions or downgrade of India’s credit rating that may affect our access to capital and other sources of funding necessary to fund our operations or address maturing liabilities on a timely basis. it may result in imposition of operational guidelines or other conditions on landlords to protect the health and safety of personnel working at our commercial developments, which may result in additional costs and demands on our facility management team. It may affect our ability to execute our growth strategies and expand into new markets

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees’ and suppliers’ ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers’ business continuity plans, and resultant operational risk. The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

EXTERNAL RISK FACTORS

1. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

2. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “Key Industry Regulations and Policies” beginning on page no. 128 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations

or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse affect on our business, financial condition and results of operations.

3. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price And liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

4. 100% of our Revenue is derived from business in India and a decrease in economic growth in India could cause our business to suffer.

AT present, we derive 100% of our revenue from operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

5. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

6. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company has appointed Swastika Investmart Limited as Lead Manager and also appointed [●] as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

7. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

8. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares is ₹ [●]/-. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page no. 67 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you

will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following;

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per
- share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

9. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include various taxes introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

GLOBAL ECONOMY

Economic prospects have diverged further across countries since the April 2021 World Economic Outlook (WEO) forecast. Vaccine access has emerged as the principal fault line along which the global recovery splits into two blocs: those that can look forward to further normalization of activity later this year (almost all advanced economies) and those that will still face resurgent infections and rising COVID death tolls. The recovery, however, is not assured even in countries where infections are currently very low so long as the virus circulates elsewhere.

The global economy is projected to grow 6.0 percent in 2021 and 4.9 percent in 2022. The 2021 global forecast is unchanged from the April 2021 WEO, but with offsetting revisions. Prospects for emerging market and developing economies have been marked down for 2021, especially for Emerging Asia. By contrast, the forecast for advanced economies is revised up. These revisions reflect pandemic developments and changes in policy support. The 0.5 percentage-point upgrade for 2022 derives largely from the forecast upgrade for advanced economies, particularly the United States, reflecting the anticipated legislation of additional fiscal support in the second half of 2021 and improved health metrics more broadly across the group.

Recent price pressures for the most part reflect unusual pandemic-related developments and transitory supply-demand mismatches. Inflation is expected to return to its pre-pandemic ranges in most countries in 2022 once these disturbances work their way through prices, though uncertainty remains high. Elevated inflation is also expected in some emerging market and developing economies, related in part to high food prices. Central banks should generally look through transitory inflation pressures and avoid tightening until there is more clarity on underlying price dynamics. Clear communication from central banks on the outlook for monetary policy will be key to shaping inflation expectations and safeguarding against premature tightening of financial conditions. There is, however, a risk that transitory pressures could become more persistent and central banks may need to take pre-emptive action.

Risks around the global baseline are to the downside. Slower-than-anticipated vaccine rollout would allow the virus to mutate further. Financial conditions could tighten rapidly, for instance from a reassessment of the monetary policy outlook in advanced economies if inflation expectations increase more rapidly than anticipated. A double hit to emerging market and developing economies from worsening pandemic dynamics and tighter external financial conditions would severely set back their recovery and drag global growth below this outlook's baseline.

Multilateral action has a vital role to play in diminishing divergences and strengthening global prospects. The immediate priority is to deploy vaccines equitably worldwide. A \$50 billion IMF staff proposal, jointly endorsed by the World Health Organization, World Trade Organization, and World Bank, provides clear targets and pragmatic actions at a feasible cost to end the pandemic. Financially constrained economies also need unimpeded access to international liquidity. The proposed \$650 billion General Allocation of Special Drawing Rights at the IMF is set to boost reserve assets of all economies and help ease liquidity constraints. Countries also need to redouble collective efforts to reduce greenhouse gas emissions. These multilateral actions can be reinforced by national-level policies tailored to the stage of the crisis that help catalyze a sustainable, inclusive recovery. Concerted, well-directed policies can make the difference between a future of durable recoveries for all economies or one with widening fault lines—as many struggle with the health crisis while a handful see conditions normalize, albeit with the constant threat of renewed flare-ups.

(Source: <https://www.imf.org/en/Publications/WEO/Issues/2021/07/27/world-economic-outlook-update-july2021>)

India joined the global economy in an unprecedented contraction in 2020-21, dragged down by the COVID-19 pandemic. Headline inflation was elevated for most part of the year led by supply chain disruptions due to the pandemic and spikes in key food prices. Inflation, however, moderated subsequently due to seasonal easing in food prices since December 2020, albeit with an upside push from adverse base effects during February-March 2021. Monetary and credit conditions remained expansionary and financial market conditions eased considerably on the back of abundant liquidity. Public finances were impacted by a cyclical slowdown in revenues, which was exacerbated by COVID-19, while pandemic-induced fiscal measures pushed up expenditure. On the external front, the sizeable contraction in imports relative to exports, under deep recessionary conditions, led to a current account surplus; along with robust net capital inflows, this led to a large build-up of foreign exchange reserves.

In 2020, the global economic sky was overcast with COVID-19 - a virus of the size of 0.12 microns. By end-March 2021, the virus had resulted in over 128 million infections and over 2.8 million mortalities worldwide. The year 2021 has commenced with both hope and fear – several parts of the world are locking down and bracing against new waves of infections and speedily communicable mutations. At the same time, the approval of several vaccines has spurred vaccination drives worldwide, albeit at different speeds. Nearly 600 millions of vaccine doses have already been administered (March 31, 2021), even as vaccine producers struggle to tweak vaccines to keep pace with mutations. In the event, 2020 has gone down in human history as the year of the ‘Great Lockdown’¹, with output losses dwarfing those suffered during the global financial crisis (GFC) of 2008-09. World trade declined by around 8.5 per cent, with the contraction in services trade outpacing the fall in merchandise trade.

The year 2020 will also be memorable for unprecedented policy responses which, although not coordinated, turned out to be synchronised. A slew of conventional and unconventional measures was unleashed across the world, with monetary authorities slashing policy rates to zero and below in real terms - and even in nominal terms in some countries - while executing massive asset purchase programmes, payment deferral schemes, provision of public guarantees, emergency funding avenues and provision of ample liquidity to financial markets. The stimulus provided by fiscal authorities was equally unprecedented in scale and scope, amounting to US\$ 16 trillion² (15.3 per cent of the GDP). Of the total amount, US\$ 10 trillion consisted of additional spending or foregone revenue, while US\$ 6 trillion comprised liquidity support in the form of guarantees, loans, asset/debt purchases, and equity injections. This policy fight back led to a massive easing of financial conditions and imparted stability to the financial system, thereby containing downside risks to growth.

Equity markets, in particular, have recovered exuberantly from the panic that set in when COVID-19 was declared a pandemic in March 2020. Cyclical stocks have led the rally, driven by optimism surrounding the arrival of vaccines and fresh rounds of fiscal stimulus in major economies. Crude oil prices and other commodity prices are also firming up on the back of these positive developments, with production restraints by the organisation of the petroleum exporting countries (OPEC) providing added momentum in February and March 2021 and creating conditions for the forming of a new commodity super-cycle.

With gradual lifting of restrictions and reopening of the economy, the pace of contraction moderated in Q2 and GDP returned to positive terrain in Q3 of 2020-21. Sensing the recovery gaining traction, equity markets became ebullient, with the BSE Sensex staging a V-shaped recovery and rising over 91 per cent by end-March 2021 from the lows of March 2020, buoyed by strong corporate performance in Q2 and Q3 of 2020-21, the roll-out of a massive vaccine programme, fiscal and monetary stimulus in place and surges of capital inflows. The prospects for the Indian economy though impacted by the second wave, remain resilient backed by the prospects of another bumper rabi crop, the gathering momentum of activity in several sectors of the economy till March, especially housing, road construction and services activity in construction, freight transportation and information technology (IT). Meanwhile, the activation of the production linked incentive (PLI) scheme, spectrum auctions and considerable easing of financial conditions are helping to shape the turnaround. On the other hand, large and medium-scale industry, mining and quarrying and several contact-intensive sectors remain subdued.

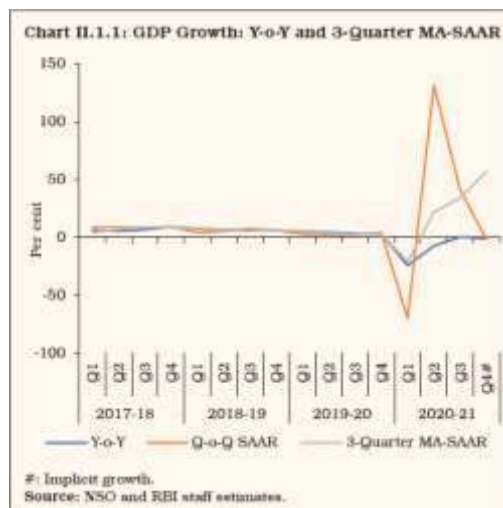

The second advance estimate (SAE) that were released by the National Statistical Office (NSO) in February 2021 revealed that aggregate demand, measured by real GDP, contracted by 8.0 per cent in 2020-21 (Table II.1.1 and Appendix Table 1). This is the first contraction experienced since 1980-81 and the severest ever. In fact, the contraction was of the order of 15.9 per cent in the first half of 2020-21 under the full brunt of the lockdown imposed to curb the transmission of COVID-19.

Progressive restoration in demand conditions was evident with a sharp rebound in seasonally adjusted annualised growth rate (SAAR) in Q2:2020-21, indicating a recovery in momentum. This was sustained in the next quarter as well, reflected in an uptick in the three quarter moving average (MA-SAAR) of GDP in Q3:2020-21 (Chart II.1.1).

Underlying the vicissitudes in aggregate demand conditions in 2020-21 were compositional shifts among constituents. Private final consumption expenditure (PFCE) registered a contraction for the first time in the past four decades (Chart II.1.2). Government final consumption expenditure (GFCE) continued to provide support to aggregate demand; however its contribution waned in 2020-21 as stress mounted on government finances. Gross fixed capital formation (GFCF) recorded a contraction, primarily due to prevailing uncertainty and the imposition of lockdown. There was a marked contraction in the external sector too; however, with imports declining sharper than exports, overall net exports made a positive contribution to aggregate demand. The contraction in GDP outpaced the retrenchment in gross value added (GVA) at basic prices on account of Food Corporation of India (FCI) food subsidies being reflected on the Union Budget.

What Drives Recovery in Growth after a Crisis?

For a self-sustaining GDP growth trajectory post-COVID-19, a durable revival in private consumption and investment demand together would be critical as they account for around 85 per cent of GDP. In view of the limited share of government consumption demand in GDP (at around 13 per cent in 2020-21), a rebound in private demand is essential to sustain the recovery. Typically, post-crisis recoveries have been led more by consumption than investment; however, investment-led recoveries can be more sustainable and can also lift consumption in parts by better job creation. In either case, private demand plays a pivotal role. In this context, the turning points in the growth cycle, determined by identifying the local

maxima and minima - using the first and fourth quartiles of GDP growth, i.e., the lowest 25 per cent and the highest 25 per cent of the growth are examined. Additionally, a few censor rules are applied, such as eliminating back to back minima or maxima and ensuring that there is at least a one quarter gap between maxima and minima. These additional censor rules help to cleanly identify turning points in the GDP cycle (Chart 1).

A group of AR(1) models of GDP growth, augmented by current period (i) private final consumption expenditure (PFCE) and (ii) investment [gross fixed capital formation (GFCF)] is estimated (Table 1). The analysis uses the GDP cycle dating algorithm to create dummies that capture upcycles and down cycles. The findings suggest that an increase in consumption and investment during a down cycle boosts GDP growth more than during an upcycle. The analysis also suggests that an increase in investment leads to higher consumption, suggesting that an investment-led recovery could boost both output and consumption. A mix of policies may be needed, as very low capacity utilisation rates may leave little incentive for the private sector to start a strong investment cycle. Therefore, there will be a need for an increase in public investment spending that can crowd in private investment, while private consumption needs to be supported through improvement in consumer credit. As a robustness check, high-frequency lead indicators of consumption and investment demand confirm that an increase in investment and consumption contribute more to GDP growth during a down cycle than in an upswing. While an increase in investment leads to higher consumption demand through positive income and employment effects, an increase in consumption does not cause an increase in investment. Both results highlight the role of an investment led recovery for sustaining the post COVID-19 rebound.

Impact of COVID-19 on Corporate Performance

Following the announcement of a nation-wide lockdown on March 25, 2020 and restrictions on mobility that continued even after the gradual opening up of the economy, the corporate sector witnessed a sudden and sharp contraction in demand and also clogged supply chains due to stalled movement of goods, both for inputs used in production processes as well as final products meant for wholesale and retail sale. Survival of businesses in this environment of collapsing sales, vanishing cash flows and sticky operating expenses emerged as a key challenge. In Q1:2020-21, average revenue from sales contracted by 32 per cent for a sample of 2,536 listed firms. Firms resorted to aggressive cost cutting measures, enabling them to lower their total expenditure by 34 per cent. Profits nosedived, endangering their debt servicing capacity. Indian corporates, however, adjusted quickly to the altered business environment. As sales recovered in Q2:2020-21, cost cutting continued as the preferred path to regain efficiency and return to profitability. While revenue contraction moderated to 5.3 per cent, total expenditure (which includes costs) contracted by 12.5 per cent, enabling net operating profit to rise by 33.4 per cent in Q2. However, in Q3, revenue increased by 2.0 per cent and expenditure increased by 0.3 per cent that led to further increase in profits by 35.6 per cent. This in turn improved their capacity to service debt, as evident from the increase in interest coverage ratio (ICR) to 3.7 in Q2 and 4.5 in Q3 from 2.0 in Q1. As demand conditions in many segments normalised fully by the end of Q3:2020-21 to pre-COVID-19 levels, there was evidence of improvement in margins, on account of revenue recovery,

cost saving and pass-through of increased costs to retail producer and retail prices. Therefore, profitability has improved further in Q3. In the three quarters of 2020-21 combined, revenues and expenditure declined by 11.6 per cent and 15.2 per cent, respectively, while operational profit (earnings before interest and taxes - EBIT) increased by 7 per cent year-on-year (Chart 1). The impact of COVID-19 has been varied for firms of different size/nature of operations. Evidence from both advanced and emerging economies show that smaller sized firms are relatively more vulnerable to extended periods of lockdown (Shen et al., 2020; OECD, 2020; Cowling et al., 2020). Larger firms may have found it easier to cut costs compared to smaller firms during the lockdown. In India, although the interest coverage ratio (ICR) deteriorated for firms of all size categories in 2020-21, small firms appear to have been affected more by the lockdown in Q1:2020-21 (Chart 2). However, both small firms and large firms have improved their debt serviceability ratios in Q3 to levels which are higher than pre-pandemic period. Rise in profits and a sharp decline in borrowing costs contributed to the recovery in the interest coverage ratio. Industry-wise sectors which depend on discretionary spending by consumers were impacted more (such as hotels, recreation services, gems and jewellery), while sectors which were excluded from the lockdown (such as food and utilities) experienced relatively lower deterioration in ICR in Q1.

Services Sector

The contraction in the services sector in 2020-21 is unprecedented in independent India's history. Even during the GFC, the services sector remained resilient. In 2020-21, however, construction suffered in the aftermath of the pandemic due to an inventory overhang in residential housing, coupled with stressed liquidity conditions which restricted new launches. The situation was exacerbated by imposed social distancing norms which led to construction activity in Q1:2020-21 getting reduced by half year-on-year. However, the revival of housing sector in H2:2020-21 has been a sharp 'V', with sales almost doubling in Q3:2020-21 sequentially, supported by favourable interest rates, adequate liquidity and steep discounts by developers to clear inventory, besides reduction in stamp duty by a few states. With new launches also registering a sharp rebound, the inventory overhang has dropped sharply.

The contraction was severe in contact intensive sectors as activities in hotels, restaurants, and passenger transport remained much below pre-COVID-19 levels. There has been a swift recovery in trading activities as evident in the collection of the goods and services tax (GST) and issuance of E-way bills. This has also imparted a boost to freight traffic. The performance of information technology (IT) companies has been better than their counterparts in the hospitality and the aviation segments. Sector-wise GVA trend estimates for the services show that realised growth in 2019-20 was below trend growth for trade, hotels transport, communications and services relating to broadcasting and financial, real estate and professional services. In 2020-21, COVID-19 brought major services activities to a near halt and the sector contracted in a broad-based manner by 24.8 per cent in Q1:2020-21 and 10.9 per cent in Q2:2020-21, but in Q3:2020-21, services sector output returned broadly to its level a year ago. Domestic trading activities, railway freight traffic, port cargo, construction activities, and automobiles sales indicators for Q4:2020-21 suggested improvement in services sector. However, with the onslaught of second wave, many indicators showed a moderation though it was not to the extent of last year (Table II.1.7).

The Reserve Bank's services sector composite index (SSCI)⁹, which tracks activity in construction, trade, transport and financial services and is a coincident indicator of GVA growth in the services sector excluding public administration, defence and other services (PADO), witnessed a marginal decline in Q4:2020-21 after registering an uptick in the previous quarter (Chart II.1.17)

As per the annual Periodic Labour Force Survey (PLFS), the labour force participation rate (LFPR) was estimated at 37.5 per cent in 2018-19, which was an increase of 0.6 percentage points over 2017-18. In terms of gender divide, the annual PLFS report suggested that the LFPR for females continues to be lower at 18.6 per cent (rural: 19.7 per cent and urban: 16.1 per cent) in 2018-19, compared to the rate of 55.6 per cent for males (rural: 55.1 per cent and urban: 56.7 per cent). Some of the reasons cited for low female labour force participation include higher educational enrolment, higher household income and absence of suitable employment opportunities. More recent information on LFPR, as available from the Centre for Monitoring Indian Economy (CMIE) database, shows that it increased to 40.2 per cent in March 2021 from 35.6 per cent in April 2020 (Chart II.1.18).

The majority of states recorded an improvement in employment conditions in the post lockdown phase, supported by faster recovery in rural employment (Charts II.1.19a and II.1.19b). For the majority of states, LFPR has reached pre-lockdown period levels, with the exception of Delhi, Kerala, Tamil Nadu and Tripura.

The majority of states recorded an improvement in employment conditions in the post lock down phase, supported by faster recovery in rural employment (Charts II.1.19a and II.1.19b). For the majority of states, LFPR has reached pre-lockdown period levels, with the exception of Delhi, Kerala, Tamil Nadu and Tripura. September 2020, three labour codes – Industrial Relations Code Bill, 2020, Code on Social Security Bill, 2020 and Occupational Safety, Health and Working Conditions Code Bill, 2020 were passed which would promote harmonious industrial relations, higher productivity and more employment generation. These measures would benefit workers of both formal and informal sectors and positively contribute to mitigate the distress of labour market in India.

The launch of the proposed National Monetisation Pipeline will enhance the viability of potential brownfield infrastructure projects and is also likely to help real sectors significantly while freeing resources to finance further investment. The National Highways Authority of India (NHAI) and the Power Grid Corporation of India Limited (PGCIL) have already sponsored one Infrastructure Investment Trust (InvIT) each, with investment of ₹ 5,000 crore and ₹ 7,000 crore, respectively.

Moving forward, outturn predictability has turned a bit turbid. The growth prospects essentially depend on how fast India can arrest the second wave of COVID-19 pandemic. While the economy has not moderated to the extent during the first wave, the surrounding uncertainties can act as a deterrent in the immediate period. On the supply side, agriculture has proven its resilience, enduring the shock of the pandemic, thus providing support to rural demand and the economy at large. In case of services, recovery has been varied, with revival in construction, trade, freight transportation and information technology (IT) related activities. While performance of contact-intensive sectors is still sub-par, it is also improving. Going ahead, as

the vaccination drive picks-up and cases of infections fall, a sharp turnaround in growth is likely, supported by strong favourable base effects.

INFRASTRUCTURE INDUSTRY

Increased impetus to develop infrastructure in the country is attracting both domestic and international players. Private sector is emerging as a key player across various infrastructure segments, ranging from roads and communications to power and airports. In order to boost the construction of buildings in the country, the Government of India has decided to come up with a single window clearance facility to accord speedy approval of construction projects.

In October 2021, the combined index of eight core industries stood at 133.5.

In March 2021, the combined index of eight core industries stood at 122.5. In the road's sector, the Government's policy to increase private sector participation has proved to be a boon for the infrastructure industry as many private players are entering the business through the public-private partnership (PPP) model. India is expected to become the third-largest construction market globally by 2022. India plans to spend US\$ 1.4 trillion on infrastructure projects through the National Infrastructure Pipeline (NIP), from 2019 to 2023, to ensure sustainable development in the country. Through the NIP, the government invested US\$ 1.4 trillion in infrastructure development as of July 2021.

Prime Minister Mr. Narendra Modi announced a Rs. 100 lakh crore master plan for multi-modal connectivity in October 2021, with the goal of developing infrastructure to lower logistic costs and improve the economy.

As a part of the GatiShakti National Master Plan, the government is planning to launch geospatial digital platform to facilitate planning and monitoring of projects ranging from telecom networks, gas pipelines to road and railways.

In the Union Budget 2021, the government allocated Rs. 60,241 crore (US\$ 8.28 billion) for road works and Rs. 57,350 crore (US\$ 7.88 billion) for the National Highways. The government plans to construct 8,500-kms road by March 2022. Moreover, an additional 11,000 kms of National Highway corridors will be completed by March 2022. The government announced an outlay of Rs. 118,101 crore (US\$ 16.20 billion) for the Ministry of Road Transport and Highways. Also, the government, under the Bharatmala Pariyojana, was awarded a project worth Rs. 5.35 lakh crore (US\$ 73.37 billion) including construction of >13,000 kms of roads worth Rs. 3.3 lakh crore (US\$ 45.26 billion). The Ministry of Road Transport & Highways announced that it achieved a milestone by constructing 13,298 kms of National Highways, with construction of 37 kms per day in FY21. In August 2021, the Ministry of Road Transport and Highways constructed national highways extending 3,335 kms compared with 3,322 kms in August 2020. By 2024, the Ministry of Road Transport and Highways wants to build 60,000 kms of world-class national highways at a rate of 40 kms each day. In May 2021, Minister for Road Transport & Highways and Micro, Small and Medium Enterprises, Mr. Nitin Gadkari stated that the government is giving utmost priority to infrastructure development and has set a target of road construction of worth Rs. 15 lakh crore (US\$ 206 billion) in the next two years.

In September 2021, the Ministry of Road Transport and Highways constructed national highways extending 3,824 kms compared with 3,950 kms in September 2020.

In October 2021, the Dubai government and India, inked an agreement to develop infrastructure such as industrial parks, IT towers, multipurpose towers, logistics centres, a medical college and a specialised hospital in Jammu & Kashmir.

For FY21, Indian Railways has the highest-ever planned capex of Rs. 215,058 crore (US\$ 29.52 billion). As per the Union Budget 2021, the Ministry of Railways has been allocated Rs. 110,055 crore (US\$ 15.09 billion). In FY21, the Indian Railways recorded the highest loading in freight transportation of 1,232.63 million tonnes. With this, the freight revenue of Indian Railways increased to Rs. 1,17,386 crore (US\$ 15.84 billion) in the same period, as against Rs. 1,13,897 crore (US\$ 15.36 billion) in FY20. In FY22 (until June 2021), passenger earnings stood at Rs. 4,921.11 crore (US\$ 662.86 million) and freight earnings stood at Rs. 33,241.75 crore (US\$ 4.48 billion). The gross revenue stood at Rs. 39,655.25 crore (US\$ 5.34 billion) in FY22 (until June 2021). In August 2021, freight earnings stood at Rs. 10,866.20 crore (US\$ 1.45 billion) and freight loading was 110.55 million tonnes.

In the Union Budget 2021, Rs. 9,000 crore (US\$ 1.24 billion) has been allocated to create and augment telecom infrastructure in the country. Also, the Budget 2021 allocated Rs. 42,824 crore (US\$ 5.88 billion) for the energy sector. Through the budget, the government announced Rs. 305,984 crore (over five years) for a revamped, reforms-based and result-linked new power distribution sector scheme.

The Mega Investment Textiles Parks (MITRA) scheme was launched to establish world-class infrastructure in the textile sector and establish seven textile parks over three years. The government announced Rs. 305,984 crore (US\$ 42 billion) over the next five years for a revamped, reforms-based and result-linked new power distribution sector scheme.

In September 2021, National Mineral Development Corporation Ltd. (NMDC) R&D Centre collaborated with CSIR-IMMT (Institute of Minerals and Materials Technology) to pursue combined research projects on iron ore mining technologies.

On September 29, 2021, NTPC Renewable Energy Ltd (REL), a 100% subsidiary of NTPC Ltd, signed its first green term loan agreement with Bank of India for Rs. 500 crore (US\$ 67.28 million) at a competitive rate and a tenor of 15 years for its 470 MW solar projects in Rajasthan and 200 MW solar projects in Gujarat.

In August 2021, Union Minister of Road Transport Highways, Mr. Nitin Gadkari announced to launch 1,080-km (road construction) projects worth Rs. 25,370 crore (US\$ 3.4 billion) in Gujarat under the Bharatmala Pariyojana—the ambitious road and highways project that aims to build highways from Maharashtra, Gujarat, Rajasthan, Punjab, Haryana and then cover the entire string of Himalayan territories.

In August 2021, the Government of India, the Central Water Commission (CWC), government representatives from 10 participating states and the World Bank signed a US\$ 250 million project to support the Indian government's long-term dam safety programme and improve safety and performance of existing dams across various states. The Second Dam Rehabilitation and Improvement Project (DRIP-2) will strengthen dam safety by building dam safety guidelines, bring in global experience and introduce innovative technologies. The project will be implemented in 120 dams across Chhattisgarh, Gujarat, Kerala, Madhya Pradesh, Maharashtra, Manipur, Meghalaya, Odisha, Rajasthan and Tamil Nadu, and at the national level through the CWC.

The Ministry of Commerce's Logistics Division presented its plans for 'Freight Smart Cities' in July 2021, with goal of improving the efficiency of urban freight and lowering logistics expenses. Over the next 10 years, demand for urban freight is predicted to increase by 140%. Last-mile freight transit in Indian cities accounts for 50% of the total logistics expenditures in the country's increasing e-commerce supply chains. According to ICRA ratings, the domestic road logistics sector is predicted to grow by 6-9% in FY22.

According to the Department for Promotion of Industry and Internal Trade (DPIIT), FDI in the construction development sector (townships, housing, built up infrastructure and construction development projects) and construction (infrastructure) activities stood at US\$ 26.14 billion and US\$ 25.38 billion, respectively, between April 2000 and June 2021. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion.

Introduction

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development.

Market Size

According to the Department for Promotion of Industry and Internal Trade (DPIIT), FDIs in the construction development sector (townships, housing, built up infrastructure and construction development projects) and construction (infrastructure) activities stood at US\$ 26.14 billion and US\$ 25.38 billion, respectively, between April 2000 and June 2021. PROCESS FOR EXECUTION OF CONTRACTS

- ***Project Identification***

We identify potential projects from a variety of sources, the efforts of our business development personnel and meetings with other participants in the construction industry such as architects and engineers, etc. After determining the availability of projects, we decide on which projects to pursue based on as the following, among other factors:

- Project size;
- Duration;
- Availability of personnel;
- Current backlog, competitive advantages and disadvantages;
- Prior experience;
- Reputation of the client;
- Source of project funding; and
- Type of contract

- ***Tender Bidding (in case of tender based contract)***

After deciding which contracts to pursue, we may have to complete a pre-qualification / short listing process with our client. The pre-qualification / short listing process generally limits bidders to those companies with operational experience and financial capability to effectively complete the particular project(s) in accordance with the plans, specifications and construction schedule. Our bid estimation process typically involves two phases:

Phase I: Initially, we perform the estimating process which consists of estimating the cost and availability of labour, material, equipment, sub-contractors and the project team required to complete the project on time and in accordance with the plans and specifications.

Phase II: The final phase consists of a detailed review of the estimate by the management including, among other things, assumptions regarding cost, approach, means and methods, productivity and risk. After the final review of the cost estimate, the management adds a mark up over costs to arrive at the total bid amount.

In case where tender bidding is not there, our management submits a contract to the clients having detailed terms and conditions.

- ***Tender Negotiation***

Requests for proposals or negotiated contracts with our clients are generally awarded based on a combination of technical capability and price, taking into consideration factors such as project schedule and prior experience.

- ***Signing of Letter of intent (LOI)***

On successful negotiation of the contract, we sign the letter of intent / contract with our client, which confirms the project size, amount and duration along with detailed terms and conditions.

- ***Project execution / pre-construction activities***

Once, the agreement is signed and the contract is awarded, we commence our pre-construction activities such as mobilizing manpower and equipment and construction of site infrastructure like site camps, temporary office, warehouse, workshops etc.

Based on the project requirements, we prepare a project-monitoring schedule to monitor the progress of the project execution against the milestones stipulated in the tender. Once the execution starts, the progress of work is continuously monitored and corrective measures are immediately implemented if required.

- ***Design Assessment***

We study the design concept of the owners, along with copies of the relevant drawings and plans and make value engineering assessment, considering our scope of contract and the parameters. We discuss and assess the ways and means and the methodology to construct and the requirement of plant and equipment versus the design parameters. Detailed plans are worked out at this stage by us for commencing actual work. The layout for the placement of equipment, offices and stores is discussed and agreed upon, based on which work for the project commences.

- ***Material planning***

Based upon the available drawings and time frame, we calculate the requirement of materials under three sub heads: company assets (new and available), basic materials (ordinary portland cement, steel, aggregates, stones, tiles, etc.) and consumables (shuttering plywood, wood, nails, etc.). This consolidated requirement of materials along with tentative schedule is then forwarded to our procurement department for identification and negotiation with vendors. Materials are sourced or procured directly from manufacturers, their agents or from reputed sources, quality checked, warehoused at our go-downs or delivered to construction sites, as required. Dedicated site teams engaged in construction activities are supported by back end teams to ensure timely implementation of the project. The negotiation, are done with approved vendors on the material specifications that are provided to us as part of the construction contract. The materials department of our company is given an indicative price for materials to be purchased and the dates and time when they are required. We identify the requirements, delivery schedules and other details in respect of the materials and monitor its delivery, quality and safety. We ensure that optimum quantities of materials are kept as stock in order for efficient use of working capital.

- ***Manpower Planning***

Our company manages a combination of in-house teams, mobilizes resources through labour contractors to ensure smooth implementation of project irrespective of size, complexity or deadline. The requirement for personnel is determined on the basis of the scope of work, profitability and timelines for delivery of the project. We depute qualified senior personnel to head the project as 'Project Managers' from the-head office. Further, there are site supervisors for supervising all

processes, elaborate documentation and reporting, in-house checks, scheduled management visits and periodic reviews that ensure timely completion of the projects.

- **Project completion**

On completion of the project, the architect(s) of the projects provides us an architect certification. A copy of the same is also provided to the client. On receipt of the certification, a detailed handing over list is made in accordance with the contract. We submit our final bill with all details, enclosures, etc. as per the terms of the contract once the work is completed. Finally, we clear the project site of all our materials, offices, machinery and equipment.

In line with CGST Act, each state Governments has enacted State Goods and Service Tax Act for respective states.

Goods and Services Tax (GST) is a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India to replace taxes levied by the Central and State Governments. This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services or both as part of their normal commercial activity. The mechanism provides for two level taxation of interstate and intra state transactions. When the supply of goods or services happens within a state called as intra-state transactions, then both the CGST and SGST will be collected. Whereas if the supply of goods or services happens between the states called as inter-state transactions and IGST will be collected. Exports are considered as zero-rated supply and imports are levied the same taxes as domestic goods and services adhering to the destination principle in addition to the Customs Duty which has not been subsumed in the GST.

Customs Act, 1962

The provisions of the Customs Act, 1962 and rules made there under are applicable at the time of import of goods i.e. bringing into India from a place outside India or at the time of export of goods i.e. taken out of India to a place outside India. Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

- I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications
- II. Applications which do not qualify as multiple applications as per above procedure are further checked for common DP ID/ beneficiary ID. In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of “know your client” norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.
