SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

Tyre inner tubes are the internal components of the primary tyre which are designed to sustain air pressure. Majority of the tyres which are used in motorcycles, bicycle, large vehicles such as tractors, heavy trucks, cars, and buses are designed for their application with inner tubes. These are made from impermeable materials such as synthetic, elastic, soft rubber for the purpose of avoiding air leakage and are torus shaped in nature. In addition, inner tubes which are larger in size possess the ability to be re used for other applications such as rafting and swimming. These tubes are large inflatable toruses which are manufactured for these applications while also offering a choice of decks, handles, fabric covering, colours and other various accessories, eliminating the protruding valve stem. Manufacturers such as Schrader International develop inner tubes for two-wheeler vehicles which provide high performance to motorcycle tube tyres.

2. Our Registered Office and Manufacturing Facility, from where we operate are not owned by us.

Our Registered Office premise situated at 915/916, Maple Trade, Nr. Surdhara Circle, SAL Hospital Road, Thaltej, Ahmedabad, Gujarat – 380059, India is not owned by us, it is taken on lease rental basis w.e.f. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

3. We depend on certain brand names and our corporate name and logo that we may not be able to protect and/or maintain.

Our ability to market and sell our products depends upon the recognition of our brand names and associated consumer goodwill. Currently, we do not enjoy protection against the trademark infringement as the logo of our company  and  are not registered with the authority. In the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our corporate name or logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition, results of operations and prospects.

4. We do not own the trademarks used by our company. Our Company is mainly manufacturing and selling our products under the registered trademark of “VIAZ” and “CVAZ” which are a registered trademark of third party, who have given their consent to use the brand name which may be withdrawn by them.

Our Company is mainly manufacturing and selling the products under registered trademark “VIAZ” for which our Company has entered into an assignment agreement with the owner Mrs. Binita Shah, for period of 50 years. The said Agreement and consent may be withdrawn by her by giving 30 days advance notice. In case of withdrawal of rights for using “VIAZ” trademark by the owner, our Company may not be able to meet the demand of “VIAZ” brand which may impact the revenue from operations and financial condition of the company.

Further, our company has started developing new brand “” in order to capture more market share. The trademark is registered in the name of our promoter Mr. Janakkumar Mahendrabhai Patel, who has given his

NoC for using the said trademark. In case of withdrawal of rights for using “” trademark by the owner, our Company may not be able to meet the demand of “” brand which may impact the revenue from operations and financial condition of the company.

- 5. We require certain approvals and licenses in the ordinary course of business, some of the approvals are required to be transferred in the name of ‘Viaz Tyres Limited’, we are yet to apply for the some of the said registrations and the failure to successfully obtain/renew such registrations would adversely affect our operations, results of operations and financial condition.***

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to conversion of company from private to public Company i.e. ‘Viaz Tyres Private Limited’ to ‘Viaz Tyres Limited’.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, please refer chapter titled “Government and Other Approvals” beginning on Page No. 159 of this Draft Prospectus.

- 6. The price, at which we are able to obtain the Raw Material for manufacture of our finished products depend largely on prevailing market prices. Increase in costs of our raw materials could have a material adverse effect on our Company’s sales, profitability and results of operations.***

Our Company is dependent on third party suppliers for procuring raw materials. We are exposed to fluctuations in the prices of these raw materials as well as its unavailability, particularly as we typically do not enter into any long-term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure the materials. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Though we enjoy favourable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our production and delivery schedules, which may result in the loss of our customers and revenues.

- 7. We do not enter into contract with our distributors. If our distributors choose not to buy their products from us, our business, financial condition and results of operations may be adversely affected.***

We have not entered any contract with our distributors. Consequently, there is no commitment on the part of the distributor to continue to source their requirements from us, and as a result, our sales from period to period may fluctuate significantly as a result of changes in our distributors vendor preferences. Any failure to meet our distributor’s expectations could result in reduction in sales. There are also a number of factors other than our performance that are beyond our control and that could cause the loss of a distributor. Distributors may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, any of which may have an adverse effect on our business, results of operations and financial condition.

- 8. Our Company had negative cash flow from operating activity in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.***

The detailed break up of cash flows is summarized in below table and our Company has reported negative cash flow from operating activity in the financial years is as mentioned below, which could affect our business and growth:

(₹ in Lakhs)

Particulars	For the period ended September 30, 2022	For the year ended March 31		
		2022	2021	2020
Net Cash flow from Operating Activities	(156.39)	(114.09)	447.46	(1,066.44)

9. *There may be potential conflicts of interest if our Promoters, Promoters' Group or Directors are involved in same business activities that compete with or are in the same line of activity as our business operations.*

Our Group Company/entity and our subsidiary company are involved in similar line of Business that is being carried out by our Company. Also our Company has entered into various transactions with our Group Companies, companies and will continue to do in future. For detailed information for our transaction with group Companies, companies please refer to "Annexure 28 – Related Party Transactions" under chapter titled "Restated Financial Information" beginning on Page No. 142 of this Draft Prospectus. Further, we have not entered into any non-compete agreement with our said entity. We cannot assure you that our Promoters, Promoter's Group or Directors who have common interest in said entities may not favor the interest of the said entity. Any such present and future conflicts could have a material effect on our reputation, business, results of operations and financial condition which may affect our profitability and results of operations.

10. *Our Company is dependent on few numbers of suppliers for purchase of products. Loss of any of this large Suppliers may affect our business operations.*

Our Top ten Suppliers contributes to 92.84%, 85.66%, 75.15%, and 90.91% of our total Purchases for the period/year ended September 30, 2022, March 31, 2022, March 31, 2021 and March 31, 2020 respectively. Depending on quality and availability of required material at favorable terms Goods are procured. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. Our industry operates on established distribution network, we believe that we will not face substantial challenges in maintaining our business relationship with our suppliers.

11. *Our main operations may be adversely affected in case of industrial accidents at our manufacturing unit and also Rubber is a combustible commodity which may lead to any fire mishaps or accidents could lead to property damages, property loss and accident claims.*

Usage of machinery, handling of materials by labour during production process or otherwise, lifting of materials by humans, cranes, heating processes of the furnace etc. may result in accidents, which could cause injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. Any such occurrence of accidents could hamper our production and consequently affect our profitability.

Rubber being a combustible commodity, every stage from procurement, processing, storage and transportation to final dispatch is fraught with an imminent danger of an instant fire. The risk of fire hazard is increased due to increased automation and use of large volume of air for material handling. Any spark generated can not only generate fire but also the same could propagate to other machines through spread of fire by rubber's flammability. Though we have taken insurance policy to cover damage caused by fire however, the cover may not be adequate to the loss suffered.

12. *Our industry is labour intensive, and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

Our industry being labour intensive is highly dependent on labour force for carrying out its manufacturing operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. To maintain a lower attrition rate among the employees, we issue various in-house facilities to the employees. Although we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

13. We have working capital requirements. If we experience insufficient cash flows to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.

Our business requires significant working capital, part of which would be met through additional borrowings in the future. In many cases, significant amounts of working capital are required to finance the procurement of branded products before payments are received from customers. Our working capital requirements may increase, under certain conditions, where payment terms do not include advance payments or include delayed payments from customers. Additionally, our working capital requirements have increased in recent years due to the general growth of our business. All these factors may result, or have resulted, in increases in our working capital needs. The details of working capital requirements are as follows:

14. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.

Modernization and technology upgradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions. In case of a new-found technology in the manufacturing facilities, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

15. Continued operations of our manufacturing facilities are critical to our business and any disruption in the operation of our manufacturing facilities may have a material adverse effect on our business, results of operations and financial condition.

Our manufacturing facilities are subject to operating risks, such as unavailability of spare parts of the machinery, break- down, obsolescence or failure of machinery, disruption in power supply or processes, performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory

restrictions. In the event of a breakdown or failure of such machinery, replacement parts may not be available and such machinery may have to be sent for repairs or servicing. This may lead to delay and disruption in our production process that could have an adverse impact on our sales, results of operations, business growth and prospects.

16. *Our Company is dependent on third party transportation providers for the delivery of our products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.*

We depend on third-party transportation to receive input materials required for our products and to deliver our finished products to our customers. We use third-party logistics providers for all of our product distribution and input materials procurement. This makes us dependent on such third-party transportation providers. Weather-related problems, strikes, or other events which affects third-party transportation could impair our ability to receive the raw materials and/or deliver the requisite quantities of products in time to our customers, which could adversely affect the performance of our business, results of operations and cash flows.

17. *In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies/Entities.*

Our Promoter – Directors are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoter and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity. All transactions with related parties entered into by the company in past were at arm's length basis, in compliance with applicable provisions of Companies Act, 2013 and other applicable provisions. Our company, promoter and group companies may enter into such related party transaction in future as well which may be or may not be at Arms' Length Price and in Ordinary Course of Business. If such future transactions are not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. For details of transactions already executed by our Company with our Promoter, Directors and Group Companies/Entities during last three years, please refer to the "Annexure 28 – Related Party Transaction" under the Chapter titled "Restated Financial Information" beginning on Page No. 142 of this Draft Prospectus.

18. *There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with the Registrar of Companies and taxation authorities.*

In the past, our company delayed in filing for the alteration of the MOA of the Company with respect to change in the object clause of the MOA of the Company and other forms including Annual Filing for financial year 2021-22. Further our company had filed form MGT-14 and form DIR-12 under CFSS Scheme. Further, there have been certain discrepancies in form AOC-4 filed for F.Y. 2019-20 and form PAS-3 for allotment dated May 15, 2019. Although no show cause notice have been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Further we cannot assure that we may not do delay filings in future and not be subjected to penalty or interest.

Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

19. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.*

Few of our agreements may not be stamped adequately or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

20. *We face competition in our business from organized players, which may adversely affect our business operation and financial condition.*

The market for our industry is competitive on account of organized players. Players in this industry generally compete on key attributes such as timely delivery, pricing, the quality etc. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

21. *Our company has availed credit facility from bank and it is subject to certain restrictive covenants. Any Delay in issuing No Objection Certificate for the proposed issue may delay our proposed Initial public offering.*

At present, we avail credit facilities from State Bank of India aggregating to ₹ 1,107.49 Lakhs. We have entered into mortgage agreement with our lenders and the covenants in borrowings from bank / lenders, among other things require us to obtain prior permissions in writing in respect of, including, but not limited to effecting any change in the management/Board of the Company, declaration of dividend, capital structure of the Company; undertake any new project, implement any scheme of expansion or acquire fixed assets, enter into borrowing arrangement either secured or unsecured with any other bank/financial institution/Company or otherwise, formulate any scheme of amalgamation, acquisition, merger, or reconstruction etc. We have applied to our lenders for No Objection Certificate (NOC) for our proposed Initial Public offer, for which their NOC is awaited. In an event, lenders delay in granting their NOC, it will delay our proposed Initial public offering which may delay our Schedule of Implementations and consequently impact our functioning to that extent.

22. *We are subject to the restrictive covenants of banks in respect of the Loan/Credit Limit and other banking facilities availed from them.*

We have entered into agreements for availing debt facilities from lenders. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. In the event we breach any financial or other covenants contained in certain of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows.

23. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or get manufactured by third parties on our account, we may be required to write-down our inventory or pay our suppliers without new purchases or create additional vendor financing, which could have an adverse impact on our income and cashflows.

24. *Our Object has not been appraised by any Bank or Financial Institution. Any significant deviation in the Object could adversely impact our operations and sustainability in absence of any independent monitoring agency.*

We have estimated fund raising to the extent of ₹ [●] Lakh to finance the 'Objects of the Issue' (including Issue Expenses). The proposed objects for which the funds are being raised have not been appraised by any Bank or Financial Institution and the fund requirements are based primarily on management estimates. There is no guarantee that our estimates will prove to be accurate and any significant deviation in the project cost could adversely impact our operations and sustainability in the absence of any independent monitoring agency. For more details, please refer to the chapter titled "Object of the Issue" beginning on Page No. 61 of this Draft Prospectus.

25. *Our success depends heavily upon our Promoters, Directors and Key Managerial Personnel for their continuing services, strategic guidance and financial support. Our success depends heavily upon the continuing services of Promoters, Directors and Key Managerial Personnel who are the natural person in control of our Company.*

Our Promoters and Directors have a vast experience in the field of business undertaken by our company. They have established cordial relations with various customers and suppliers over the past several years, which have immensely benefitted our Company's current customer and supplier relations. We believe, our Promoters and Directors, who have rich experience in this industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability.

We benefit from our relationship with our Promoters, Director and Key Managerial Personnel and our success depends upon their continuing services. We also depend significantly on our Directors and Key Managerial Persons for executing our day-to-day activities. The loss of any of our Promoters, Directors and Key Management Personnel, or failure to retain, recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and Key Managerial Personnel, please refer to the chapter titled "Our Management" beginning on Page No. 122 of this Draft Prospectus.

26. *We face foreign exchange risks that could adversely affect our results of operations and cash flows.*

We are exposed to foreign currency fluctuation risk. Although, we closely follow our exposure to foreign currencies by entering into forward contracts to hedge our exposure in an attempt to reduce the risks of currency fluctuations, our results of operations, cash flows and financial performance could be adversely affected in case these currencies fluctuate significantly. We may from time to time be required to make provisions for foreign exchange differences in accordance with accounting standards. We from time to time avail forward cover to minimise the foreign exchange related risks, we may experience foreign exchange losses and gains in respect of transactions denominated in foreign currencies. While we selectively enter into hedging transactions to minimize our foreign currency exchange risks, there can be no assurance that such measures will enable us to manage our foreign currency risks. For further details please refer to chapter titled "Restated Financial Information" beginning on Page No. 142 of this Draft Prospectus.

In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our results of operations and cash flows. Any such losses on account of foreign exchange fluctuations may adversely affect our results of operations and cash flows. Certain markets in which we sell our products may be subject to foreign exchange repatriation

27. *Our insurance coverage may not be sufficient or adequate to protect us against all material hazards or business losses, which may adversely affect our business, results of operations and financial condition.*

Our operations are subject to hazards including inherent in rubber manufacturing facilities. Our principal types of coverage include property fire policy, stock fire policy. We could be held liable for accidents that occur at our manufacturing facilities or otherwise arising out of our operations. In the event of personal injuries, fires or other accidents suffered by our employees or other people, we could face claims alleging that we were negligent, provided inadequate supervision or be otherwise liable for the injuries.

While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our business, to the extent that we suffer loss or damage, for which we have not obtained or maintained insurance, or which is not covered by insurance, which exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations and financial condition could be adversely affected. In addition, our insurance policies expire from time to time and we may not be able to renew our policies in a timely manner, or at acceptable cost.

We cannot assure you that, in the future, any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Further, an insurance claim once made could lead to an increase in our insurance premium, result in higher deductibles and also require us to spend towards addressing certain covenants specified by the insurance companies.

28. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

29. *Industry information included in this draft prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this draft prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

30. *Within the parameters as mentioned in the chapter titled “Objects of this Issue” of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use Net Issue Proceeds towards repayment of borrowings and meeting the working capital requirement. We intend to deploy the Net Issue Proceeds in financial year 2022-23 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Issue” beginning on Page No. 61 of this Draft Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in chapter titled “Objects of the Issue” beginning on Page No. 61 of this Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue, subject to approval from Shareholders of the Company. Our Board of Directors will monitor the proceeds of this Issue.

31. *We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”.*

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details, please refer to the chapter titled “Object for the Issue” beginning on Page No. 61 of this Draft Prospectus.

32. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

33. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19.

The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing "stay-at-home" orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a "notified disaster" and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices.

Our business operation were closed for four months upto July 2020. We resumed our business operations from August 2020. Our Company had also availed Moratorium offered by RBI during 2020. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future. The COVID19 pandemic has affected and may continue to affect our business, results of operations and financial condition in a number of ways such as construction delays at our ongoing projects due to several factors such as lockdowns enforced by government agencies, work-stoppage orders, disruptions in the supply of materials and shortage of labour, which delays could result in a failure to meet development milestones as well as an increase in the cost of construction. We have gradually resumed construction at our sites in compliance with the government guidelines. It led to a closure of our offices and we moved to a work-from-home model. We resumed operations at our offices in a staggered manner in compliance with government guidelines. A surge in the number of COVID-19 cases in the future could result in a complete or partial closure of, or other operational issues at our offices resulting from government action. our inability to access debt and equity capital on acceptable terms, or at all, and a further disruption and instability in the global financial markets or deteriorations in credit and financing conditions or downgrade of India's credit rating that may affect our access to capital and other sources of funding necessary to fund our operations or address maturing liabilities on a timely basis. it may result in imposition of operational guidelines or other conditions on landlords to protect the health and safety of personnel working at our commercial developments, which may result in additional costs and demands on our facility management team. It may affect our ability to execute our growth strategies and expand into new markets

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees' and suppliers' ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk. The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

EXTERNAL RISK FACTORS

34. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased, it is not yet clear when the lockdown conditions will be fully lifted in India. Further, although we were declared an essential business and were able to adjust our business to continue operating during the lockdown, there can be no assurance that further restrictions will not be introduced or that we will continue to retain such essential status. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees’ and suppliers’ ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers’ business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

35. *Our Company is dependent on external suppliers/distributors for its product requirements. Any delay or failure on the part of the external suppliers/distributors to deliver products, may materially and adversely affect our business, profitability and reputation.*

The products sold by us at our stores are sourced from a wide variety of suppliers/distributors. Any delay or failure on the part of our suppliers/distributors to deliver products in a timely manner may materially and adversely affect our business, profitability and reputation. Further, any deterioration in the financial condition or business prospects

of these suppliers could reduce their ability to meet our requirements and accordingly result in a significant decrease in our revenues. The operations of our suppliers are further subject to various operating risks. For instance, the COVID-19 pandemic impacted our suppliers' business because of the nationwide lockdown imposed by the Government of India. These factors may result in delay of supply of products we sell and could also have an adverse effect on our business.

36. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager has appointed [●] as Designated Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

37. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading on stock exchange. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

38. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

39. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

40. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

41. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

42. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

43. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

44. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

TYRE INNER TUBES

Tyre inner tubes are the internal components of the primary tyre which are designed to sustain air pressure. Majority of the tyres which are used in motorcycles, bicycle, large vehicles such as tractors, heavy trucks, cars, and buses are designed for their application with inner tubes. These are made from impermeable materials such as synthetic, elastic, soft rubber for the purpose of avoiding air leakage and are torus shaped in nature. In addition, inner tubes which are larger in size possess the ability to be re used for other applications such as rafting and swimming. These tubes are large inflatable toruses which are manufactured for these applications while also offering a choice of decks, handles, fabric covering, colours and other various accessories, eliminating the protruding valve stem. Manufacturers such as Schrader International develop inner tubes for two-wheeler vehicles which provide high performance to motorcycle tube tyres.

GLOBAL OUTLOOK

The global economy is experiencing a few turbulent challenges. Inflation higher than seen in several decades, tightening financial conditions in most regions, Russia's invasion of Ukraine, and the lingering COVID-19 pandemic all weigh heavily on the outlook. Normalization of monetary and fiscal policies that delivered unprecedented support during the pandemic is cooling demand as policymakers aim to lower inflation back to target. But a growing share of economies are in a growth slowdown or outright contraction. The global economy's future health rests critically on the successful calibration of monetary policy, the course of the war in Ukraine, and the possibility of further pandemic-related supply-side disruptions, for example, in China.

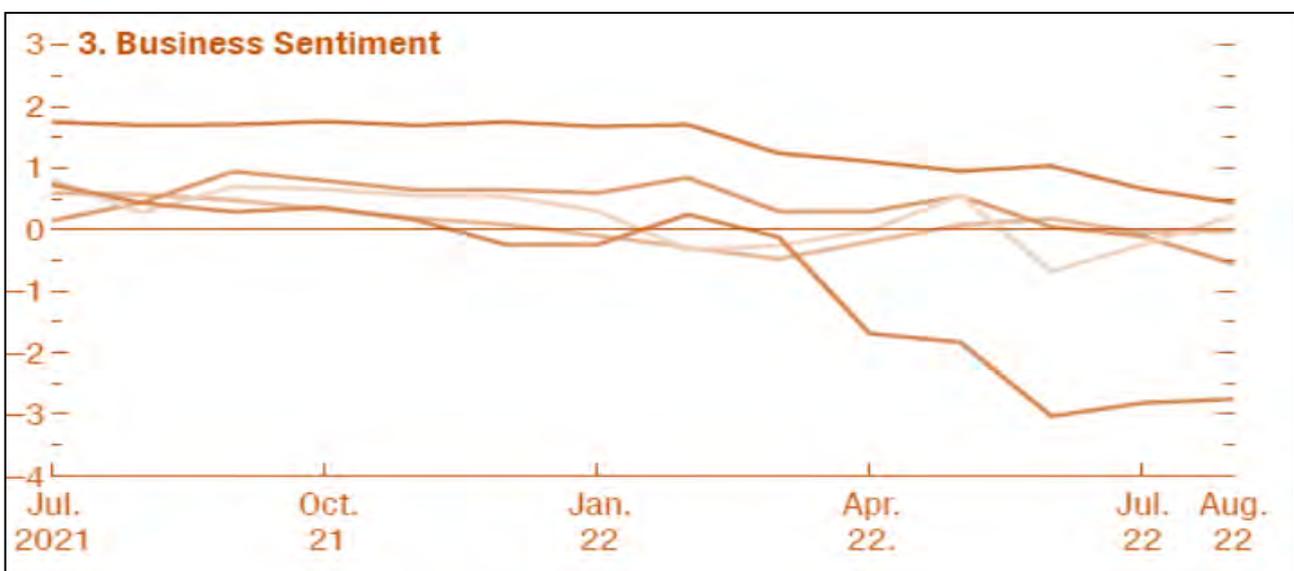

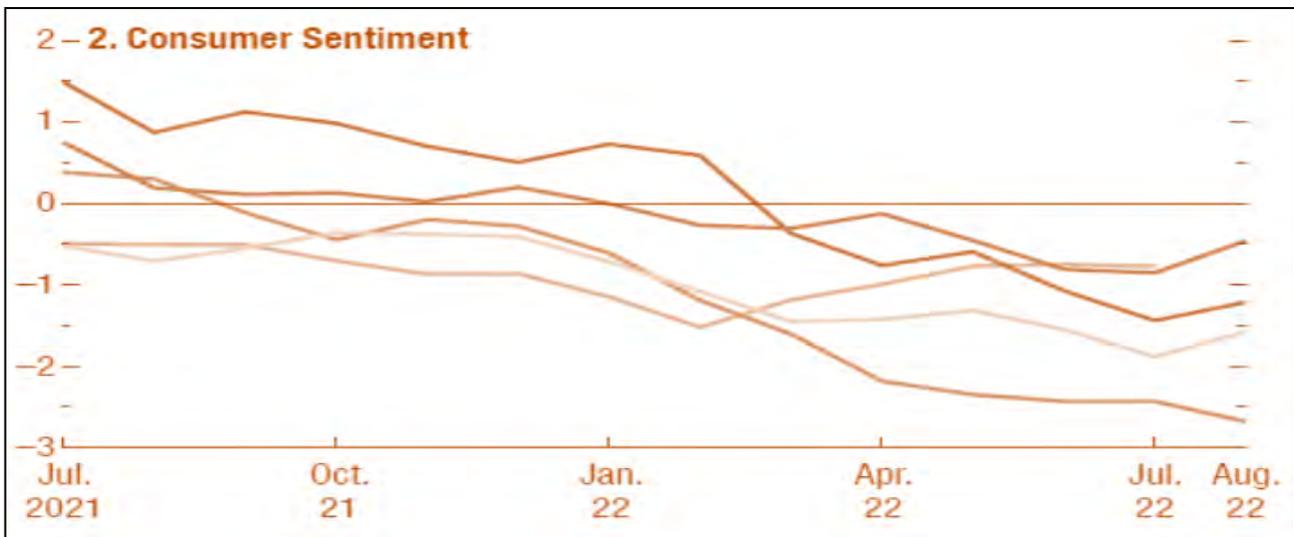

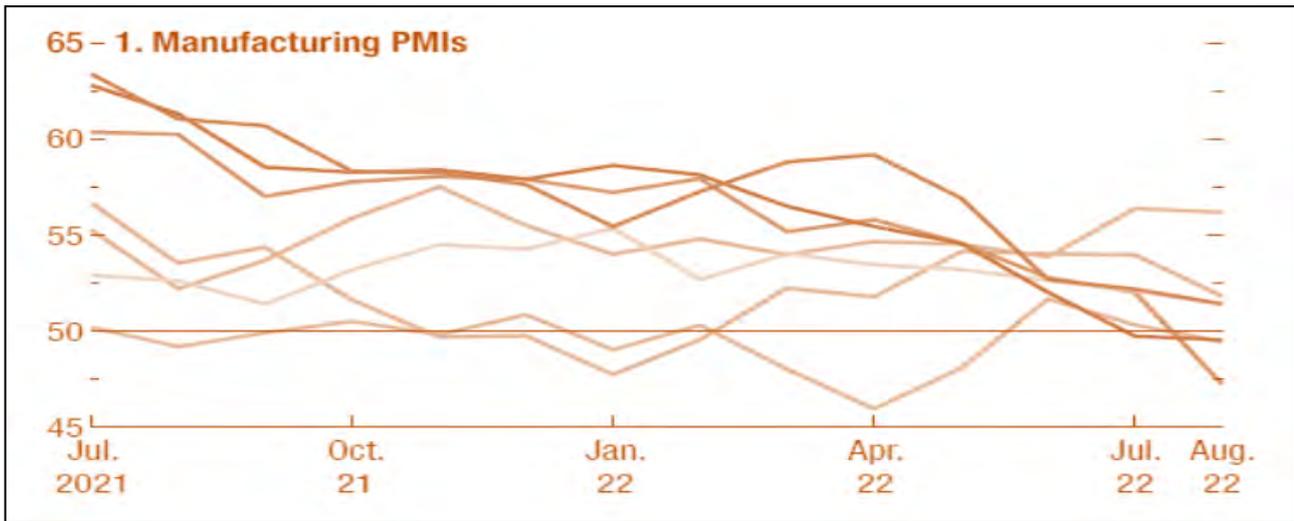

Global growth is forecast to slow from 6.0 percent in 2021 to 3.2 percent in 2022 and 2.7 percent in 2023. This is the weakest growth profile since 2001 except for the global financial crisis and the acute phase of the COVID-19 pandemic and reflects significant slowdowns for the largest economies: a US GDP contraction in the first half of 2022, a euro area contraction in the second half of 2022, and prolonged COVID-19 outbreaks and lockdowns in China with a growing property sector crisis. About a third of the world economy faces two consecutive quarters of negative growth. Global inflation is forecast to rise from 4.7 percent in 2021 to 8.8 percent in 2022 but to decline to 6.5 percent in 2023 and to 4.1 percent by 2024. Upside inflation surprises have been most widespread among advanced economies, with greater variability in emerging market and developing economies.

Inflation and Uncertainty

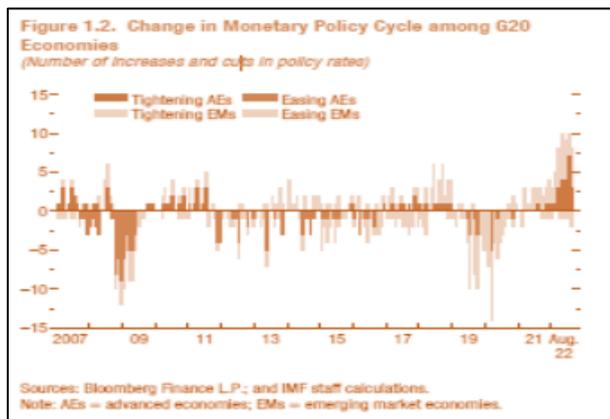

The world is in a volatile period: economic, geopolitical, and ecological changes all impact the global outlook. Inflation has soared to multidecade highs, prompting rapid monetary policy tightening and squeezing household budgets, just as COVID-19-pandemic-related fiscal support is waning. Many low-income countries are facing deep fiscal difficulties. At the same time, Russia's ongoing war in Ukraine and tensions elsewhere have raised the possibility of significant geopolitical disruption. Although the pandemic's impact has moderated in most countries, its lingering waves continue to disrupt economic activity, especially in China. And intense heat waves and droughts across Europe and central and south Asia have provided a taste of a more inhospitable future blighted by global climate change.

Amid these volatile conditions, recent data releases confirm that the global economy is in a broad-based slowdown as downside risks—including risks highlighted in the July 2022 World Economic Outlook (WEO) Update—materialize, although with some conflicting signals. The second quarter of 2022 saw global real GDP modestly contract (growth of –0.1 percentage point at a quarterly annualized rate), with negative growth in China, Russia, and the US, as well as sharp slowdowns in eastern European countries most directly affected by the war in Ukraine and international sanctions aimed at pressuring Russia to end hostilities. At the same time, some major economies

did not contract—euro area growth surprised on the upside in the second quarter, led by growth in tourism-dependent southern European economies. Forward-looking indicators, including new manufacturing orders and sentiment gauges, suggest a slowdown among major economies (Figure 1.1). In some cases, however, signals conflict—with some indicators showing output weakness amid labor market strength.

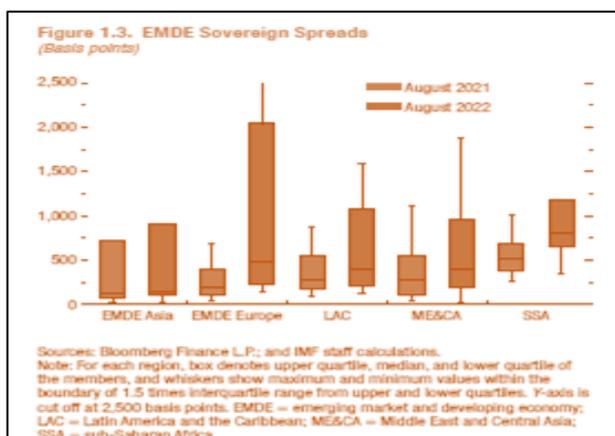

An important factor underpinning the slowdown in the first half of this year is the rapid removal of monetary accommodation as many central banks seek to moderate persistently high inflation (Figure 1.2). Higher interest rates and the associated rise in borrowing costs, including mortgage rates, are having their desired effect in taking the heat out of domestic demand, with the housing market showing the earliest and most evident signs of slowdown in such economies as the US. Monetary policy tightening has been generally although not everywhere accompanied by a scaling back of fiscal support, which had previously propped up households' disposable incomes.

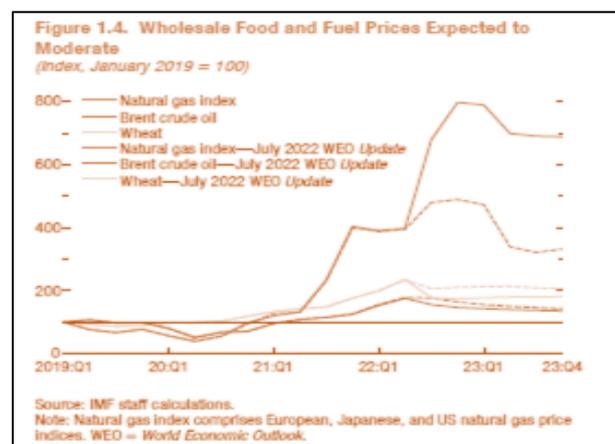

Broadly speaking, nominal policy rates are now above pre-pandemic levels in both advanced and emerging market and developing economies. With elevated inflation, real interest rates have generally not yet reverted to pre-pandemic levels. Tightening financial conditions in most regions, with the notable exception of China (October 2022 Global Financial Stability Report), reflected in a strong real appreciation of the US dollar.

This has also driven up yield spreads—the difference between countries' US dollar- or euro-denominated government bond yield and US or German government bond yields—for debt-distressed lower- and middle-income economies (Figure 1.3). In sub-Saharan Africa, yield spreads for more than two-thirds of sovereign bonds breached the 700 basis point level in August 2022—significantly more than a year ago. In eastern and central Europe, the effects of the war in Ukraine have exacerbated the shifting global risk appetite.

Beyond monetary policy alone, China's COVID-19 outbreaks and mobility restrictions as part of the authorities' zero-COVID strategy and Russia's invasion of Ukraine have also pulled down economic activity. China's lockdowns have imposed sizable constraints domestically and gummed up already strained global supply chains. The war in Ukraine and deepening cuts to supplies of gas to Europe have amplified pre-existing stresses in global commodity markets, driving natural gas prices higher once more (Figure 1.4). European economies—including the largest, Germany—are exposed to the impact of the gas supply cuts. Continued uncertainty over energy supplies has contributed to slower real economic activity in Europe, particularly in manufacturing, dampening consumer and, to a lesser extent, business confidence (Figure 1.1). However, a strong recovery in the tourism-dependent southern economies helped deliver better-than-anticipated overall growth in the first half of 2022.

High inflation in 2021 and 2022 has surprised many macroeconomic forecasters, including IMF staff. Upside inflation surprises have occurred for most economies but have been especially widespread among advanced economies. The simple question is, Why? While our understanding is still evolving, forecasters likely underestimated the impact of the strong economic recovery in 2021—supported by fiscal intervention in advanced economies—coinciding with strained supply chains and tight labor markets (Box 1.1). Across advanced economies, forecast errors are related to the size of COVID-19-related fiscal stimulus packages. The correlation of output and inflation forecast errors is positive in both 2021 and 2022, but the relationship was stronger in 2021 than it has been so far in 2022. That errors were in the same direction suggests that excess demand has been a dominant factor,

particularly in 2021, as some large economies may have been at the steeper end of the aggregate supply curve. The declining cross-country correlation in 2022 hints at an increased role for supply shocks, related to clogged supply chains and, more recently, the war in Ukraine. Headline inflation forecast errors have been larger for eastern European economies in 2022, consistent with the war in Ukraine driving up headline inflation. More generally, forecast errors for

the noncore part of inflation (mainly reflecting food and energy prices), which can reflect supply shocks, have contributed more to unexpected increases in inflation in 2022 than in 2021. Core inflation forecast errors in China and developing Asia have been negative and relatively small so far this year, consistent with the slowdown in real activity.

GLOBAL GROWTH: NEAR-TERM SLOWDOWN

A slowdown in global growth is forecast, from 6.0 percent in 2021 to 3.2 percent in 2022 and 2.7 percent in 2023 (Table 1.1). The global slowdown in 2022 is as projected in the July 2022 WEO Update, while the forecast for 2023 is lower than projected by 0.2 percentage point (Table 1.1). This prognosis for the global economy is far below average: global economic growth averaged 3.6 percent during 2000–21 (and the same during 1970–2021). For most economies, the outlook is significantly weaker than projected six months ago, in the April 2022 WEO. Forecasts are weaker than expected for 143 economies (accounting for 92 percent of world GDP) for 2023. The forecast for 2023 is the weakest since the 2.5 percent growth rate seen during the global slowdown of 2001—except for those during the global financial and COVID-19 crises.

The world's three largest economies China, the euro area, and the US—will slow significantly in 2022 and 2023, with downgrades compared with the predictions made in April and, in most cases, July. The negative revisions reflect the materialization of downside risks highlighted in the April 2022 WEO and July 2022 WEO Update and discussed at length in the previous section: tightening global financial conditions in most regions, associated with expectations of steeper interest rate hikes by major central banks to fight inflation (October 2022 Global Financial Stability Report); a sharper slowdown in China due to extended lockdowns and the worsening property market crisis; and spillover effects from the war in Ukraine with gas supplies from Russia to Europe tightening.

INDIAN ECONOMY

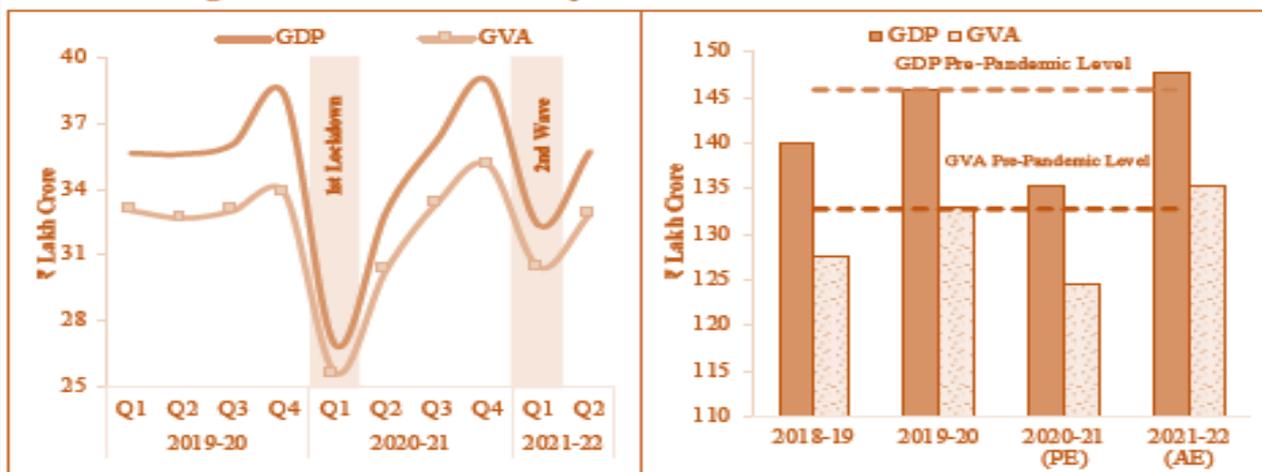

Introduction

Two years into the COVID-19 pandemic, the global economy continues to be plagued by uncertainty, with resurgent waves of mutant variants, supply-chain disruptions, and a return of inflation in both advanced and emerging economies. Moreover, the likely withdrawal of liquidity by major central banks over the next year may also make global capital flows more volatile. In this context, it is important to evaluate both the pace of growth revival in India as well as the strength of macro-economic stability indicators. It is also essential to look at progress in vaccination as this is not just a health response but also a buffer against economic disruptions caused by repeated waves of the pandemic.

Economy recovers past Pre-Pandemic levels

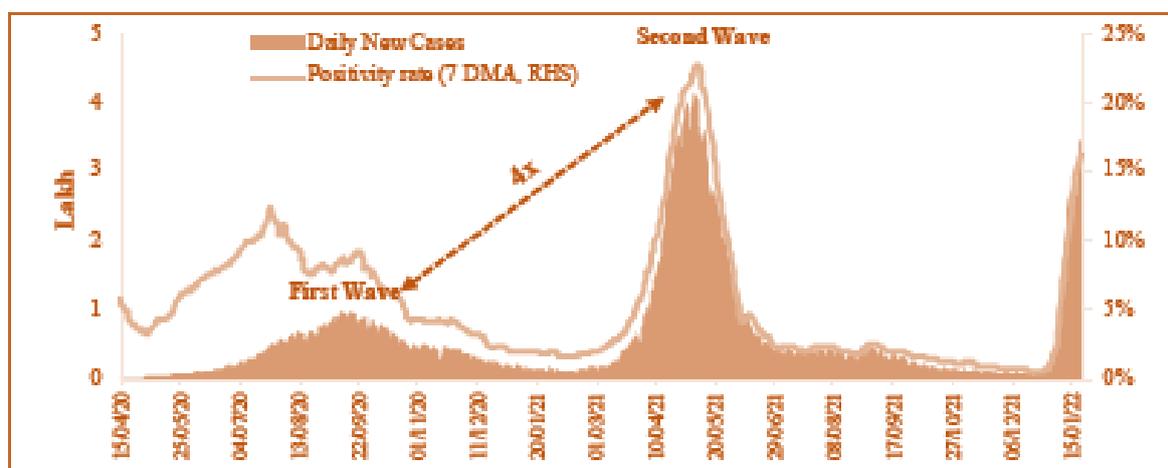

The Indian economy, as seen in quarterly estimates of GDP, has been staging a sustained recovery since the second half of 2020-21. Although the second wave of the pandemic in April- June 2021 was more severe from a health perspective, the economic impact was muted compared to the national lockdown of the previous year (see Figures 1 & 2). Advance estimates suggest that GDP will record an expansion of 9.2 per cent in 2021-22. This implies that the level of real economic output will surpass the pre-COVID level of 2019-20.

In contrast to the steady performance of the primary sector, the industrial sector went through a big swing by first contracting by 7 per cent in 2020-21 and then expanding by 11.8 per cent in this financial year. The manufacturing, construction and mining sub-sectors went through the same swing although the utilities segment experienced a more muted cycle as basic services such as electricity and water supply were maintained even at the height of the national lockdown. The share of industry in GVA is now estimated at 28.2 percent.

Since January 2021, the widely used Purchasing Managers' Index-Manufacturing has remained in the expansionary zone (i.e. over 50) except for one month when the second wave had slowed down economic activity (Figure 8). The Index of Industrial Production (IIP) and Core Industry indices have both followed a similar pattern and, in November 2021, went past their pre-pandemic level for the corresponding month in 2019.

Services account for more than half of the Indian economy and was the most impacted by the COVID-19 related restrictions, especially for activities that need human contact. Although the overall sector first contracted by 8.4 per cent in 2020-21 and then is estimated to grow by 8.2 per cent in 2021-22, it should be noted that there is a wide dispersion of

performance by different sub-sectors. Both the Finance/Real Estate and the Public Administration segments are now well above pre-COVID levels. However, segments like Travel, Trade and Hotels are yet to fully recover. It should be added that the stop-start nature of repeated pandemic waves makes it especially difficult for these sub-sectors to gather momentum.

Despite contact-sensitive services still being impacted by COVID, there has been a strong recovery of the Purchasing Managers' Index-Services since August 2021 (Figure 13). In this context, it is important to note the role of new forms of High Frequency Indicators to gauge real-time trends. For example, the Google mobility indicators for retail and recreation (i.e., restaurants, cafes, shopping centres, etc.) and transit stations (public transport hubs such as subway, bus, and train stations), measuring percentage deviation from pre-pandemic levels of mobility, has exceeded pre-pandemic levels in December 2021 before the Omicron wave again led to restrictions (Figure 12). Similarly, the hotel occupancy rate has recovered substantially, reaching 56-58 per cent in October 2021, from 30-32 per cent in April 2021.

Consumption

Total consumption is estimated to have grown by 7.0 per cent in 2021-22 with government consumption remaining the biggest contributor as in the previous year (Table 3). Government consumption is estimated to grow by a strong 7.6 per cent surpassing pre-pandemic levels. Private consumption is also estimated to have improved significantly to recover 97 percent of corresponding pre-pandemic output level. This is supported by a sharp rebound in HFIs like IIP Consumer Durables (Figure 17). However, the recent dip in vehicle registrations reflects persistent supply-side constraints owing to the shortage of semi-conductor chips rather than lack of consumption demand. This is illustrated in Box 2 on global supply-side disruptions. Further, RBI’s consumer confidence survey results on both the present situation and future expectations suggest sustained uptick in consumer sentiments (Figure 18). Also indicative of uptick in consumer sentiments is the steep rise in digital transactions, notably in UPI payments owing to the pandemic induced shift to contactless payments. Private consumption is poised to see stronger recovery with rapid coverage in vaccination and faster normalization of economic activity.

Investment

Investment, as measured by Gross Fixed Capital Formation (GFCF) is expected to see strong growth of 15 per cent in 2021-22 and achieve full recovery of pre-pandemic level. Government’s policy thrust on quickening virtuous cycle of growth via capex and infrastructure spending has increased capital formation in the economy lifting the investment to GDP ratio to about 29.6 per cent in 2021-22, the highest in seven years.

While private investment recovery is still at a nascent stage, there are many signals which indicate that India is poised for stronger investment. The number of private investment projects under implementation in manufacturing sector has been rising over the years. Companies hitting record profits in recent quarters and mobilization of risk capital bode well for acceleration in private investment. A sturdy and cleaned-up banking sector stands ready to support private investment adequately. Expected increase in private consumption levels will propel capacity utilisation, thereby fuelling private investment activity. RBI's latest Industrial Outlook Survey results indicate rising optimism of investors and expansion in production in the upcoming quarters.

Exports and Imports

India's exports of both goods and services have been exceptionally strong so far in 2021-22. Merchandise exports have been above US\$ 30 billion for eight consecutive months in 2021-22, despite a rise in trade costs arising from global supply constraints such as fewer operational shipping vessels, exogenous events such as blockage of Suez Canal and COVID-19 outbreak in port city of China etc. (Figure 22). Concurrently, net services exports have also risen sharply, driven by professional and management consulting services, audio visual and related services, freight transport services, telecommunications, computer and information services (Figure 23). From a demand perspective, India's total exports are expected to grow by 16.5 per cent in 2021-22 surpassing pre-pandemic levels. Imports also recovered strongly with revival of domestic demand and continuous rise in price of imported crude and metals. Imports are expected to grow by 29.4 per cent in 2021-22 surpassing corresponding pre-pandemic levels.

Resultantly, India's net exports have turned negative in the first half of 2021-22, compared to a surplus in the corresponding period of 2020-21 with current account recording a modest deficit of 0.2 per cent of GDP in the first half (Figure 24). However, robust capital flows in the form of continued inflow of foreign investment were sufficient to finance the modest current account deficit. Elevated global commodity prices, revival in real economic activity driving higher domestic demand and growing uncertainty surrounding capital inflows may widen current account deficit further during the second half of the year. However, it is expected to be within manageable limits.

MANUFACTURING PROCESS

Tyre inner tubes is the rubber tube which is moulded in two annular parts from worked uncured rubber, and the parts are joined but before curing of the rubber is completed the tube is stretched to a larger internal diameter and inflated into a mould with the larger internal diameter.

The processing of the butyl rubber innertube involves several mechanical steps such as mixing the compound masterbatch, straining, extrusion, cooling, dusting, and finally cutting to length. This is followed by a various additional step such as valve fixing, splicing, splice chilling, forming, vulcanization, deflation and inspection then final packaging.

Following is the flowchart of the manufacturing process:

1. Mixing:

The process starts with Mixing the butyl rubber thoroughly to make a proper blend of rubber. This mixing is done in intensive mixer which turns rubber compound into a smooth rubber mix, suitable for further processing.

2. Straining:

Once the rubber compound is ready, its cooled off in normal temperature. Once cold, the rubber compound is passed through a compressing machine, converting it into a smooth rubber sheet. The rubber sheet is passed through the compressing machine several times, in order to achieve desired length and size of the sheet.

3. Cutting & Cooling:

Once the rubber sheet is ready, the same is cut into pieces of desired sizes, depending upon the size of inner tube to be manufactured. Such cut pieces are then cooled off in normal temperature and gathered for further processing.

4. Extrusion:

Once the rubber sheets are cut, the pieces are passed through an extrusion machine which converts the cut pieces into hollow tubes. This process is carried out on all the pieces prepared from the rubber compound. Sub hollow tubes are the actual tube which shall be filed with air in any tyre.

5. Inner Core Splicing:

Splicing is a process where two ends of different pieces of hollow rubber tubes are joined/fixe together so that they form one continuous long piece. Once joined the same piece is passed through heat to make a once piece. Once heated, the joined pieces are passed through a compressing machine to ensure the fixing of joined ends.

6. Valve fixing:

Once the Tube is ready, the same is fixed with a valve. The said valve is used to inflate the tube and lock the stored air within. The valve is fixed on the tube through punching machine. Industrial glue along with splicing is used to affix the valve on the tube.

7. Inflating and Moulding

Once the Tube is ready, the same is inflated using the valve and put in a mould to bring the same in desired standard shape. Once in mould the same is passed through heat to bring the heated rubber in shape and size. This exercise is carried out several times to ensure standard size and shape. This step act as preliminary quality check and all the defective tubes are sent for reprocessing from this stage.

8. Labelling and Branding

Once the Tube is in shape, all the tubes are passed through a labelling machine where, size and diameters of the tubes are marked through machine. Besides, Logo of the company is also affixed alongside. This provides the tubes manufactured by our company ease of identification in terms of its end use.

9. Quality Check

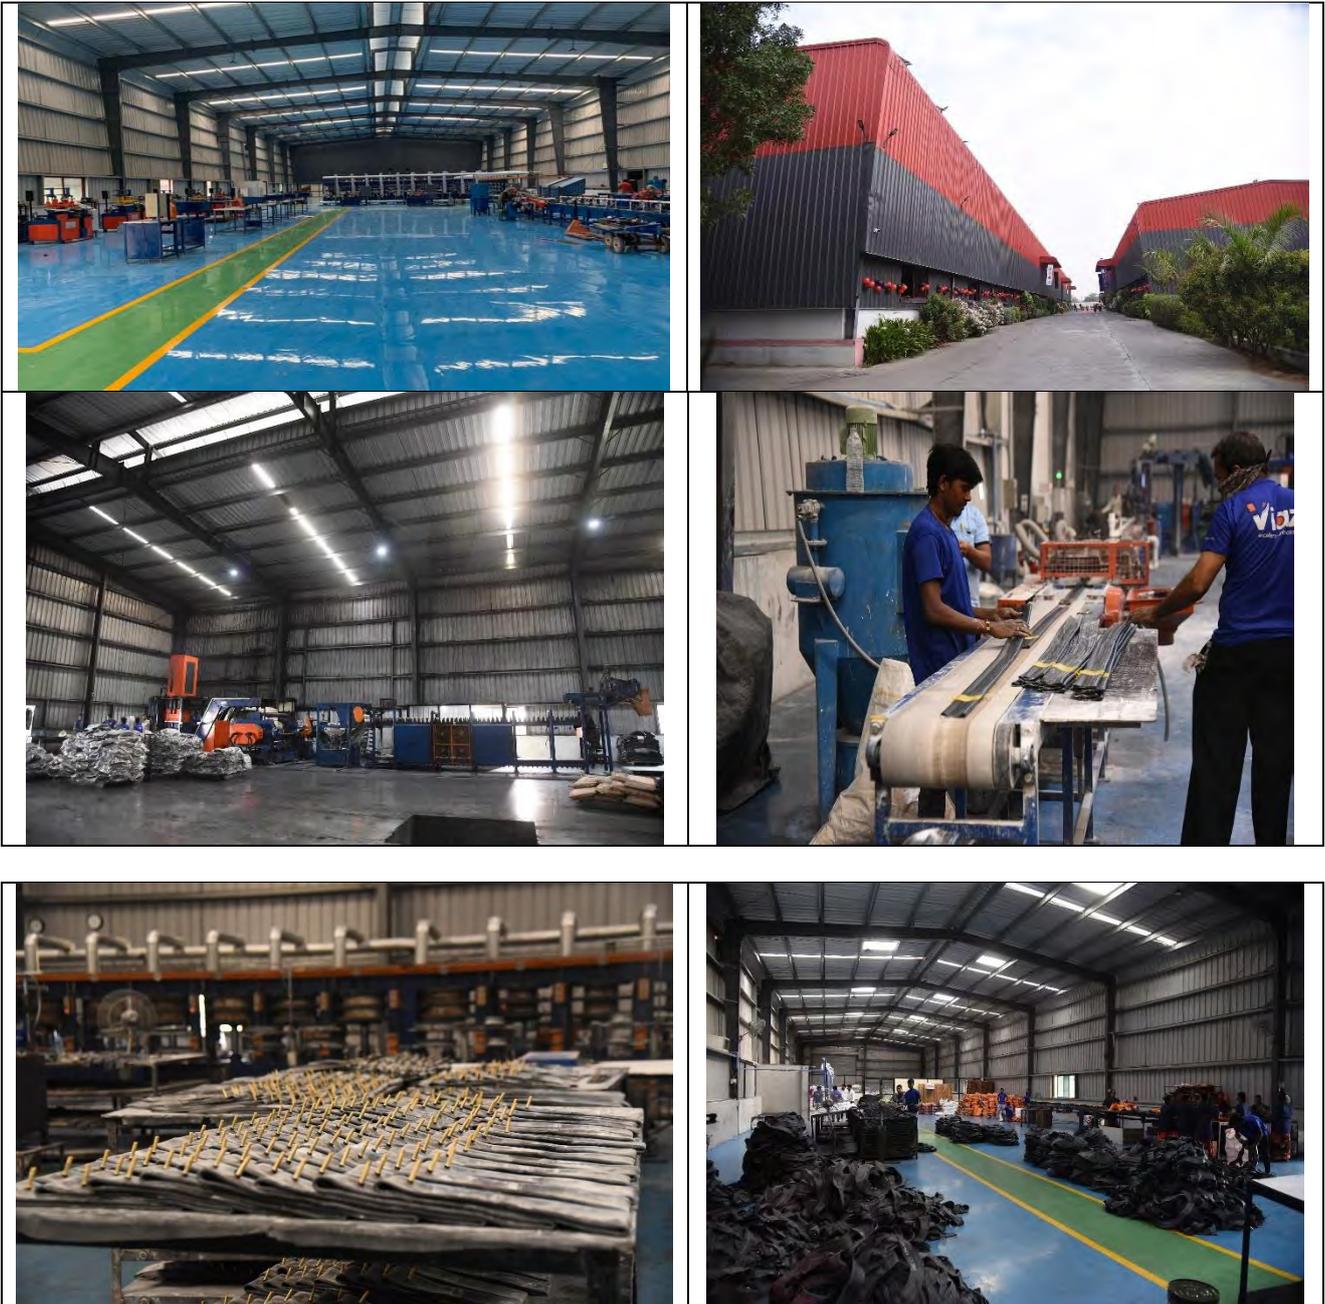

Once all the processes are done, each tube manufactured by our company undergoes thorough inspection by our workforce. Each tubes are inflated to identify any defect or puncture. Once satisfied, approved tubes are sent for packing.

10. Packing

All the approved tubes are packed in a high-quality plastic cover and tube caps are paired with all the tubes. We club the pack tubes in bunch of 10, 20 50. The bunch of packed tubes are then shifted to corrugated boxes. The packages, so packed are then stored in dispatch area for forwarding the same to the distributors/end users. We use third party transport service for delivery/dispatch of our goods.

ENVIRONMENT LAWS:

National Environmental Policy, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace but builds on the earlier policies. mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy:

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Inter-generational Equity
- Integration of Environmental Concerns in Economic and Social Development

Prevention of Money Laundering Act, 2002

Money laundering is the processing of criminal proceeds to disguise its illegal origin. Terrorism, illegal arms sales, financial crimes, smuggling, and the activities of organized crime, including drug trafficking and prostitution rings, generate huge sums. Embezzlement, insider trading, bribery and computer fraud also produce large profits and create an incentive to legitimize the ill-gotten gains through money laundering. When a criminal activity generates substantial profits, the individual or group involved in such activities route the funds to safe heavens by disguising the sources, changing the form, or moving the funds to a place where they are less likely to attract attention.

Most fundamentally, money laundering is inextricably linked to the underlying criminal activity that generates it. In essence, the laundering enables criminal activity to continue.

NOTES TO THE RESTATEMENT

Exchange difference

Exchange difference arising on restatement of foreign currency monetary items as at the year end being difference between exchange rate prevailing on initial recognition/subsequent restatement on reporting date and as at current reporting date is adjusted in the Statement of Profit & Loss for the respective year.

Any expense incurred in respect of Forward contracts entered into for the purpose of hedging is charged to the Statement of Profit and loss.

Forward Exchange Contract

The Premium or discount arising at the inception of the Forward Exchange contracts entered into to hedge an existing asset/liability, is amortized as expense or income over the life of the contract. Exchange Differences on such contracts are recognised in the Statement of Profit and Loss in the reporting period in which the exchange rates change. Any Profit or Loss arising on cancellation or renewal of such a forward contract is recognized as income or expense in the period in which such cancellation or renewal is made.

The Foreign currency exposures that have not been hedged by a derivative instrument or otherwise are as per schedule 4 (E).

e. INVESTMENTS

Non-Current/ Long-term Investments are stated at cost. Provision is made for diminution in the value of the investments, if, in the opinion of the management, the same is considered to be other than temporary in nature. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

Current investments are carried at lower of cost and fair value determined on an individual basis. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

f. PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

(i) Tangible Assets

Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

NOTES TO THE RESTATEMENT

g. DEPRECIATION AND AMORTISATION

Depreciation is calculated using the Written down value method over their estimated useful lives. The estimates of useful lives of tangible assets are as follows:

Class of Assets	Useful life as per schedule II	Useful Life as per Group
Leasehold Improvements	30 years	30 years
Office equipment	5 Years	3 years
Furniture and fixtures	10 years	10 years
Plant and Machinery	15 years	15 years
Vehicles	8 years	8 years

Leasehold improvements are amortised over of the lease or life of the asset whichever is less.

h. INVENTORIES:

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition . Cost formula used is FIFO/weighted average basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

i. IMPAIRMENT OF ASSETS:

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

NOTES TO THE RESTATEMENT

j. RETIREMENT BENEFITS:

(i) Short-term employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits:

Defined Contribution Plan

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit Plans

Unfunded Plan: The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity.

Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

k. BORROWING COST

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with Short Term/ Long Term borrowing of funds. Borrowing cost directly attributable to acquisition or construction of qualifying assets are capitalized as a part of the cost of the assets, upto the date the asset is ready for its intended use. All other borrowing costs are recognized in the Statement of Profit and Loss in the year in which they are incurred.

l. EARNINGS PER SHARE:

The earnings in ascertaining the Company's EPS comprises the net profit after tax attributable to equity shareholders and includes the post tax effect of any extraordinary items. The number of shares used in computing basic EPS is the weighted average number of shares outstanding during the year.

Diluted earnings per share is computed by dividing the profit/(loss) after tax attributable to Equity Shareholders (including the post tax effect of extra ordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.

NOTES TO THE RESTATEMENT

m. TAXATION:

Tax expense for the year comprising current tax & deferred tax are considered in determining the net profit for the year. Provision is made for current tax and based on tax liability computed in accordance with relevant tax laws applicable to the Company. Provision is made for deferred tax for all timing difference arising between taxable incomes & accounting income at currently enacted or substantively enacted tax rates, as the case may be. Deferred tax assets (other than in situation of unabsorbed depreciation and carry forward losses) are recognized only if there is reasonable certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each Balance Sheet date. Deferred tax assets, in situation of unabsorbed depreciation and carry forward losses under tax laws are recognised only to the extent that where is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be recognised. Deferred Tax Assets and Deferred Tax Liability are been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liability and where the Deferred Tax Asset and Deferred Tax Liability relate to Income taxes is levied by the same taxation authority.

n. PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS:

(i) Provisions

A provisions is recognized when the Company has a present obligation as a result of past event, if it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation.

(ii) Contingent Liability

Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only on the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

(ii) Contingent Assets

In accordance with the Accounting Standard 17 "segment reporting" as prescribed under Companies (Accounting Standard) Rules, 2006

(as amended), as the company is covered under categories of SMC companies, the said accounting standard is not applicable to it.

p. CASH & CASH EQUIVALENTS

Cash & cash equivalents comprise cash and cash on deposit with banks and corporations. The company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amount of cash to be cash equivalents.

q. LEASES

Leases where the Lessor effectively retains substantially all the risks and benefits of ownership of the Leased Asset, are classified as 'Operating Leases'. Lease rentals with respect to assets taken on 'Operating Lease' are charged to Statement of Profit and Loss on a straight line basis over the lease term.

Leases which effectively transfer to the Company substantially all the risks and benefits incidental to the ownership of the leased item are classified as 'Finance Lease'. Assets acquired on Finance Lease which substantially transfer all the risks and rewards of ownership to the Company are capitalized as assets by the Company at the lower of the fair value and the present value of the minimum lease payment and a liability is created for an equivalent amount. Lease rentals payable is apportioned between the liability and finance charge so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

NOTES TO THE RESTATEMENT

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

For further details, please refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.
