2. We conduct our business activities on a purchase order basis and therefore, have not entered into long-term agreements with our customers.

Our Company is engaged in the business of manufacturing of pharmaceutical products on the basis of orders which are received from our customers. We have not entered into any formal agreements, arrangement or any other understanding with our customers or our traders and therefore, our business is dependent upon the continuous relationship with the customers, our traders and the quality of products supplied to us. Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing the products supplied to us. If there occurs any change in the market conditions, market trends, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

3. Our Company is reliant on the demand from the pharmaceutical industry for a significant portion of our revenue. Any downturn in the pharmaceutical industry or an inability to increase or effectively manage our sales could have an adverse impact on our Company's business and results of operations.

Our Company is engaged in the business of manufacturing of pharmaceutical products and therefore, our revenues are highly dependent on our customers from the pharmaceutical industry and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations. Further, in the event, there takes place a shift of practice of developing our products in-house in the pharmaceutical industries, it may have an adverse impact on the demand for our products. Similarly, in the event of any new breakthrough in the development of a novel product or raw material by our competitors or customers, our products may become obsolete or be substituted by such alternatives; thereby impacting our revenues and profitability adversely. It may also happen that our competitors are able to improve the efficiency of their manufacturing process or their distribution or raw materials sourcing process and thereby offer their similar or high quality products at lower price our Company may be unable to adequately react to such developments which may affect our revenues and profitability.

4. We highly depend on our major raw materials and a few key suppliers who help us procure the same. Our Company has not entered into long-term agreements with its suppliers for supply of raw materials. In the event we are unable to procure adequate amounts of raw materials, at competitive prices our business, results of operations and financial condition may be adversely affected.

Our Company is engaged in the business of manufacturing pharmaceutical products. Therefore, we are highly dependent on API, which is the primary component of our manufacturing process. Thus, if we experience significant increase in demand, or need to replace an existing supplier, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. Further, in view of the ongoing pandemic, wherein partial or complete lockdown and various travel restrictions has been imposed in various countries, we may not be able to procure adequate amount of raw materials for our manufacturing unit.

The pharmaceutical products qualify as essential commodities, therefore generally their demand has not been deterred by the ongoing pandemic and the nationwide lockdown imposed by various governments. In view of the above, we will have to source adequate raw materials for our manufacturing unit to cater to the consistent demand of our pharmaceutical customers. Furthermore, the demand of the pharmaceutical products is seeing an increasing demand due to the health crisis caused due to the pandemic, accordingly the demand of our products is also likely to rise. In the event, due to logistical glitches and restrictions on crossing state and country borders imposed by various governments, we are not be able to procure the required amount of raw materials, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to procure the required amount of raw materials in the backdrop of the global pandemic, we cannot assure you that we will be able to do in a cost effective manner, which may impact our pricing and profitability.

We depend on a number of suppliers for procurement of raw materials required for manufacturing our products. The

percentage of Purchase from our top 10 suppliers were 66.49%, 90.12% and 74.14% in 9 months period ended December 31, 2022, FY22 and FY21 respectively. Our Company maintains a list of registered and unregistered suppliers from whom we procure the materials on order basis as per our internal demand projections. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacture of our products, could have a material adverse effect on our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us.

Further, the amount of raw materials procured and the price, at which we procure such materials, may fluctuate from time to time. In addition, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, seasonal factors, environmental factors and changes in government policies and regulations, including those relating to the pharmaceutical industry in general. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers. Further, we also cannot assure you with a reasonable certainty that the raw materials that we would procure in the future will not be defective. In the absence of formal agreements, should we receive any defective raw materials, we may not be in a position to recover any advance payments made or claim compensation from our suppliers consequently increasing the manufacturing costs and/or reducing the realization of our finished products. Any inability on our part to procure sufficient quantities of raw materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins which could adversely affect our business, results of operations and financial condition.

5. *Our continued operations are critical to our business and any shutdown of our manufacturing unit may adversely affect our business, results of operations and financial condition.*

Our manufacturing unit is located in Uttarkand. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our current manufacturing unit is subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities.

In the event, we are forced to shut down our manufacturing unit for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiraling cost of living around our unit may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness. For instance, due to the ongoing pandemic and the lockdown imposed by the Central Government and various state governments, we may be required to shut down our manufacturing unit which may cause an adverse impact on our business operations, revenue, results of operations and financial conditions.

In addition to the above if our manufacturing unit suffers losses as a result of any industrial accident, we may be forced to shut down our manufacturing unit which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing unit may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our manufacturing unit, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

6. *Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.*

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of internal and international quality standards. However, we cannot assure you that our quality control

processes or our product will pass the quality tests and inspections conducted by various international and domestic agencies as per their prescribed standards will not fail. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence and human error or otherwise, may damage our products and result in deficient products. It is imperative for us to meet the international quality standards set by our international customers and agencies as deviation from the

same can cause them to reject our products and can also cause damage to our reputation, market standing and brand value.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

7. *Any adverse change in regulations governing our products and the products of our customers, may adversely impact our business prospects and results of operations.*

Regulatory requirements with respect to our products and the products of our customers are subject to change. An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our manufacturing and/or distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for manufacturing and marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to forced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

8. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.*

We are exposed to payment delays and/or defaults by our customers. Our debtors payment cycle has been very long in the past. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

9. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers

to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of Equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

10. We are 100% dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.

To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing unit and transportation of our products from our unit to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long term agreements with our transporters for our manufacturing unit and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

11. Our inability to manage inventory in an effective manner could affect our business.

Our business model requires us to maintain a certain level of inventory of pharmaceutical products, to meet the present and future orders. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

12. If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.

Our Company is currently using the logo which is not yet registered in the name of our Company neither we have made any application for the registration of the trademark with the respective authorities. If we are unable to get the same registered with the trademark authorities then, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations.

Our current domain name 'www.vilinbiomed.co.in' is owned by our Company under the provisions of the Trademarks Act, 1999. There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition. For further details, please refer to the chapters titled "Our Business" on page 75 of this Draft Prospectus.

13. We operate in a competitive business environment and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.

The pharmaceutical industry in India is competitive with both organized and unorganized markets. However, we are required to compete both in the domestic and international markets. We may be unable to compete with the prices and products offered by our competitors. We may have to compete with new players in India and abroad who enter the market and are able to offer competing products. Our competitors may have access to greater financial, manufacturing, research and development, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations. We cannot assure you that we will be able to compete with our existing as well as future competitors as well as the products prices and payment terms offered by them. In addition, our customers may enter into contract manufacturing arrangements with third parties, for products that they are presently purchasing from us. Our failure to successfully face existing and future competition may have an adverse impact on our business, growth and development.

Further, some of our competitors may be larger than we are or develop alliances to compete against us and may have greater resources, market presence and geographic reach and have products with better brand recognition than ours. Some of our competitors may be able to procure raw materials at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices. Some of our international competitors may be able to capitalize on their overseas experience to compete in the Indian market. Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may significantly increase their marketing expenses to promote their brands and products, which may require us to similarly increase our advertising and marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business results of operations and financial condition. For further details, please see "Industry Overview" on page 69 of this Prospectus.

14. We might face claims / liabilities / suits from our customers should they perceive any deficiency in service or in the event of bodily harm / injury to them during our events organized by us.

We believe in providing quality customer service and due care is taken while providing services. We attempt to mitigate the associated risks which may happen due to factors beyond our control. We may face financial liabilities or loss of reputation, in the event of accidents / mishaps during our events. While we endeavor to take maximum possible precautions, any mishap, accident or breach of security during the event, which may or may not lead to personal injuries, may take place due to factors which are beyond our control. Occurrence of such events may have an adverse impact on our business operations and financial results.

15. Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their Directorship in our Company. Further, we have taken our registered office on rent from Padmaja Kalyani Sadhanala, our Director and also forming part of our Promoter Group at the monthly rent of Rs. 15, 000 and security deposit of Rs. 90,000. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other Company or firm in which they are Directors or partners.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

16. Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold 64.52% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other Equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

17. The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a fixed price basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "Capital Structure" on page 45 of this Prospectus.

18. Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

19. Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to Directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with

these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “Financial Indebtedness” on page 144 of this Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

20. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. We will be applying for certain approvals relating to our business. If we fail to maintain such registrations and licenses or comply with applicable conditions, or a regulatory authority claims we have not complied, with these conditions, our certificate of registration for carrying on a particular activity may be suspended and/or cancelled and we will not then be able to carry on such activity. This could materially and adversely affect our business, financial condition, and results of operations. We cannot assure you that we will be able to obtain approvals in respect of such applications or any application made by us in the future. For more information about the licenses required in our business and the licenses and approvals applied for, please refer “Government and Other Approvals” on page 148 of this Draft Prospectus, respectively.

21. Operational risks are inherent in our business as it includes rendering services at high quality standards. A failure to manage such risks could have an adverse impact on our business, results of operations and financial condition.

Certain operational risks are inherent in our businesses due to the nature of the industry in which we operate. Our business is subject to various operating and business risks common to the industry, including the impact of secrecy and security of clients plans and products. Further, in rendering such services our personnel are required to adhere to our internal standard operating procedures with regard to data safety and security and in their interaction with our clients other members of the public. Our services require proper and the careful handling the clients data and information. If any such clients data is not handled properly or any leak of information may have an adverse impact on the business of our clients. Such breach can also lead to disputes or litigations with our clients. Failure to effectively implement our corporate, crisis response, training and management policies and protocols and to adequately address and manage risks inherent in our business, or a failure to meet the requirements of our guests, or a failure to develop effective risk mitigation measures, could have an adverse effect on our reputation and consequently, our business, results of operations and financial condition. Although we have not faced any such occurrence, events such as breach of confidential information may subject us to legal proceedings resulting in adverse publicity and cause a loss of consumer confidence in our business.

22. We have referred to the data derived from internal Company reports and industry and government publications, publicly available information, and sources.

Unless stated otherwise, industry and market data used throughout this Draft Prospectus has been obtained or derived from internal Company reports and industry and government publications, publicly available information, and sources. Industry publications generally state that the information contained in those publications has been obtained from sources believed to be reliable but that their accuracy and completeness are not guaranteed, and their reliability cannot be assured. Although, our Company believes that industry data used in this Draft Prospectus is reliable, it has not been independently verified. Further, the extent to which the industry and market data presented in this Draft Prospectus is meaningful depends on the reader's familiarity with and understanding of, the methodologies used in compiling such data. There are no standard data gathering methodologies in the industry in which we conduct our business, and methodologies and assumptions may vary widely among different industry sources.

23. Our success depends largely upon the services of our Promoters, Managing Directors and other key managerial personnel and our ability to attract and retain them.

We are dependent on our Promoters, Managing Director and Key Managerial Personnel for setting our strategic direction and managing our businesses. Our Promoters have over past few years-built relations with suppliers and customers and other persons who are connected with us. Accordingly, our Company's performance is dependent upon the services of our Promoters, our Managing Director, and other key managerial personnel. Our future performance will depend upon the continued services of these persons. Demand for key managerial personnel in the industry is intense and our inability to attract and retain key managerial personnel may affect the operations of our Company.

24. Our inability to manage growth could disrupt our business and reduce our profitability.

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial, and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values, and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition, and adversely affect our results of operations.

25. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations, and financial performance.

As on date, we have not made any alternate arrangements for meeting our working capital requirements for the objects of the issue. We meet our capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled "Objects of the Issue" beginning on page 58 of the Draft Prospectus.

26. The objects of the Issue include funding working capital requirements of our Company, which are based on certain assumptions and estimates and such working capital requirements may not be indicative of the actual requirements of our Company. Additionally, our financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been independently appraised.

Our funding working capital requirements, financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and certain assumptions in relation to inter alia cost and holding periods of inventories of raw materials and finished goods as well as capacity utilisation and have not been appraised by any bank or financial institution. In view of the highly competitive nature of the industry in which we operate, factors beyond our control including force majeure conditions and availability of funding from banks or financial institutions, we may have to revise our management estimates from time to time and consequently our financing requirements and the expected deployment of the net proceeds of the Issue may also change. For further details, please refer to the chapter titled "Objects of the Issue" beginning on page 58 of this Draft Prospectus.

27. Operating Expenses constitute a significant percentage of our Company's total expenses. Any increase in prices and any decrease in the supply would materially adversely affect our Company's business.

Operating Expenses constitute a significant percentage of the total expenses of our Company. Our operating expenses mainly include the purchase of pharma raw materials required. The operating expenses accounted for 61.78%, 79.12% and 77.34% of total expenses for the period ended December 31, 2022 and Fiscals 2022 and 2021 respectively. Any increase in the price of services, media or materials consumed, which our Company is unable to pass on the impact of, would have a material adverse effect on our Company's business. We mainly purchase third party services, media and material required from local suppliers and place our orders based on demand estimates and orders in hand. Any shortage or interruption in the supply or decrease in the quality due to natural causes or other factors could result in increased production costs that which we may not be able to pass on to customers, which in turn would have a material adverse effect on our Company's business.

28. Any failure to keep abreast with the latest trends in the technologies may adversely affect our cost competitiveness and ability to develop new products.

We operate in a technologically intensive environment, where we will be competing on a global scale for our services. Players of this industry are largely dependent on the technology adopted. The process and media in our industry are regularly changing and is prone to technological and process changes. Technology by its very nature is dynamic and ever-changing, and we may not be able to keep pace with the rapidly changing technological environment. Any such failure on our part could adversely affect our ability to compete efficiently, our cost-competitiveness and the quality of our service, which could consequentially adversely affect our sales and profitability.

29. We have historically derived, and may continue to derive, a significant portion of our income from our top 10 customers.

Our top 10 customers represented 96.23%, 82.51% and 99.27%, respectively, of our revenue from operation for nine months period ended December 31, 2022, Fiscal 2022 and Fiscal 2021, respectively. We have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

30. The business which we undertake may be delayed, modified, cancelled, or not fully paid for by our clients and therefore, could materially affect our business, results of operations and financial condition.

The business which we undertake may be cancelled or may be subject to changes in scope or schedule. We may also encounter problems executing the orders or executing them on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone an order or cause its cancellation. Such factors could include delays or failures to obtain necessary permits, right-of-way, other types of difficulties or obstructions. Any delay, failure, or execution difficulty with respect to orders in our Order Book could materially affect our business, results of operations and financial condition.

31. We do not own our Registered Office from which we operate.

We do not own the premises on which our Registered Office is situated. Our Company has taken the registered office on leave & license basis from one of our Directors, Padmaja Kalyani Sadhanala at a monthly rent of ₹ 15,000 per month. If the owner of the premises, revoke this agreement or impose terms and conditions that are unfavourable to us, we may suffer a disruption in our operations or have to pay increased rent, which could have a material adverse effect on our business, prospects, results of operations and financial condition. For further details of our office premises please refer to the section titled "Our Business" on page 75 of the Draft Prospectus.

32. Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- maintaining high levels of customer satisfaction;
- costs relating to our operations;
- adhering to our high quality and process execution standards;
- pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;
- recruiting, training, and retaining sufficient skilled technical and management personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems;

Also, please refer “*Management's Discussion and Analysis of Financial Condition and Results of Operations*” on page 135 for details on the factors affecting our financial results. All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

33. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

We have entered into related party transactions with our Promoters, Promoter Group, Group Entities and Directors. For details of these transactions, please refer "*Related Party Transactions*" on page 109.

We cannot assure you that we will be able to maintain the terms of such transactions or in the event that we enter future transactions with related parties, that the terms of the transactions will be favourable to us. Additionally, while it is our belief that all our related party transactions have been conducted on an arm's-length basis, we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. We may also enter related party transactions in the future, which could involve conflicts of interest, although going forward, all related party transactions that we may enter will be subject to audit committee or board or shareholder approval, as applicable, as under the Companies Act, 2013 and the SEBI (LODR) Regulations. As such, we can provide no assurance that these transactions will not adversely affect our business, results of operation, cash flows and financial condition.

34. Our Company has availed certain unsecured loans from the Promoters and Promoter Group that are recallable by the lenders at any time.

As on December 31, 2022, our Company has availed certain unsecured loans from Promoters, Promoter Group and other that are recallable on demand by our lenders. The total amount of outstanding as on December 31, 2022 is ₹ 108.24 Lakhs. For further details of these unsecured loans, refer "*Financial Indebtedness*" on page 144. In case of any demand from our lenders for repayment of such unsecured loans, the resultant cash outgo, may adversely affect our business operations and financial position of our Company.

35. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

36. Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution.

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising, or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our board. In addition, schedule of implementation as described herein are based on management's current expectations and are subject to change due to various factors some of which may not be in our control.

37. Our Company's management will have flexibility in utilizing the Net Proceeds. There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

38. We have experienced negative cash flows in the past. Any such negative cash flows in the future could adversely affect our business, results of operations and prospects.

The following table sets forth our cash flow for the periods indicated:

(₹ in lakhs)

Particulars	Period ended December 31, 2022	Fiscal 2022	Fiscal 2021	Fiscal 2020
Net Cash from Operating Activities	--	--	(100.18)	(145.59)
Net cash from Investing Activities	2.85	--	--	(2.42)
Net cash from Financing Activities	--	(21.62)	--	--

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. Such negative cash flows lead to a net decrease in cash and cash equivalents. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares. For further details, please refer “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 111 and 135, respectively.

39. We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, see “Dividend Policy” on page 110.

40. The requirements of being a listed company may strain our resources.

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI (LODR) Regulations, which require us to file audited / unaudited reports periodically with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, for which significant resources and management overview will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate and relevant experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner or at all.

EXTERNAL RISKS

41. Any downturn in the macroeconomic environment in India could adversely affect our business, results of operations, cash flows and financial condition.

India is our key market. For Fiscal 2021, entire of our Company’s revenue from operations was from India. In addition, an increase in India’s trade deficit, a downgrading in India’s sovereign debt rating or a decline in India’s foreign exchange reserves could increase interest rates and adversely affect liquidity, which could adversely affect the Indian economy and our business, results of operations, cash flows and financial condition.

42. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, in the jurisdictions in which we operate may adversely affect our business and results of operations.

Our business is subject to various laws and regulations, which are evolving and subject to change. For details, see “Key Industrial Regulations and Policies in India” on page 85. We are also subject to corporate, taxation and other laws in effect in India, which require continued monitoring and compliance. These laws and regulations and the way in which they are implemented and enforced may change. There can be no assurance that future legislative or regulatory changes will not have any adverse effect on our business, results of operations, cash flows and financial condition.

43. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India, or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

44. Significant differences exist between Ind AS and Indian GAAP and other accounting principles, such as IFRS and US GAAP, which may be material to investors’ assessments of our financial condition, result of operations and cash flows.

Our financial statements for Fiscals 2019, 2018 and 2017 included in this Draft Prospectus are prepared and presented in conformity with Indian GAAP and restated in accordance with the requirements the SEBI (ICDR) Regulations and the Guidance Note on “Reports in Company Prospectuses (Revised 2016)” issued by the ICAI. Ind AS differs from Indian GAAP and other accounting principles with which prospective investors may be familiar in other countries, such as IFRS and U.S. GAAP. Accordingly, the degree to which the Financial Statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Persons not familiar with Indian accounting practices should limit their reliance on the financial disclosures presented in this Draft Prospectus.

RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE

45. Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges.

There has been no public market for our Equity Shares prior to the Issue. The price may not necessarily be indicative of the market price of our Equity Shares after the Issue is completed. You may not be able to re-sell your Equity Shares at or above the Issue price and may as a result lose all or part of your investment.

Our Equity Shares are expected to trade on EMERGE Platform of NSE after the Issue, but there can be no assurance that active trading in our Equity Shares will develop after the Issue, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

The price at which our Equity Shares will trade at after the Issue will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows;
- The history of and prospects for our business;
- An assessment of our management, our past and present operations, and the prospects for as well as timing of our future revenues and cost structures; and
- The valuation of publicly traded companies that are engaged in business activities similar to ours;
- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts’ recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations, or capital commitments;
- announcements of significant claims or proceedings against us;
- new laws and government regulations that directly or indirectly affect our business;

- additions or departures of Key Management Personnel;
- changes in the interest rates;
- fluctuations in stock market prices and volume; and general economic conditions.

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.

46. Any future issuance of Equity Shares by us or sales of Equity Shares by the Promoters could adversely affect the trading price of our Equity Shares and in the case of the issuance of Equity Shares by us result in the dilution of our then current shareholders.

As disclosed in “Capital Structure” on page 45, an aggregate of 20% of our fully diluted post-Issue capital held by our Promoters shall be considered as minimum Promoters’ contribution and locked in for a period of three years and the balance Equity Shares held by the Promoters will be locked-in for one year from the date of Allotment. Except for the customary lock-in on our ability to issue equity or equity-linked securities discussed in “Capital Structure” on page 45, there is no restriction on our ability to issue Equity Shares. As such, there can be no assurance that our Company will not issue additional Equity Shares after the lock-in period expires or that the Promoters will not sell, pledge or encumber their Equity Shares after the lock-in periods expire. Future issuances of Equity Shares or convertible securities and the sale of the underlying Equity Shares could dilute the holdings of our Shareholders and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the then trading price of our Equity Shares or the Issue Price. Sales of Equity Shares by the Promoters could also adversely affect the trading price of our Equity Shares.

47. You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Previously, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) was paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of Equity Shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, now seeks to tax on such long-term capital gains exceeding ₹ 100,000 arising from sale of equity shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

48. QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their applications (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting an application. Retail Individual Bidders can revise their applications during the Issue Period and withdraw their applications until Issue Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Offer within six Working Days from the Issue Closing Date, events affecting the Bidders’ decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders’ ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing.

49. Political, economic, or other factors that are beyond our control may have an adverse effect on our business and results of operations.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity, and the price of our Equity Shares.

Our performance, growth and market price of our Equity Shares are and will be dependent on the health of the Indian economy. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional, and global economies. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

50. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of corporate and tax laws, may adversely affect our business and financial results.

Our business and financial performance could be adversely affected by any change in laws or interpretations of existing laws, or the promulgation of new laws, rules and regulations applicable to us and our business including those relating to the industry in which we operate. There can be no assurance that the Government of India or state governments will not introduce new laws, regulations and policies which will require us to obtain additional approvals and licenses or impose onerous requirements on our business.

For example, the new Companies Act, 2013 contains significant changes to Indian company law, including in relation to the issue of capital by companies, disclosures in offer documents, related party transactions, corporate governance, audit matters, internal controls, shareholder class actions, restrictions on the number of layers of subsidiaries, prohibitions on loans to directors, insider trading and restrictions on directors and key management personnel from engaging in forward dealing. Moreover, effective April 1, 2014, companies exceeding certain net worth, revenue or profit thresholds are required to spend at least 2% of average net profits from the immediately preceding three financial years on corporate social responsibility projects, failing which an explanation is required to be provided in such companies' annual reports.

The Ministry of Finance has issued a notification dated March 31, 2015 notifying ICDS which creates a new framework for the computation of taxable income. Subsequently, the Ministry of Finance, through a press release dated July 6, 2016, deferred the applicability of ICDS from April 1, 2015 to April 1, 2016 and is applicable from FY 2017 onwards and will have impact on computation of taxable income for FY 2017 onwards. ICDS deviates in several respects from concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. Such specific standards for computation of income taxes in India are relatively new, and the impact of the ICDS on our results of operations and financial condition is uncertain. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition going forward.

The Government of India has recently approved the adoption of a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure, with effect from July 1, 2017. Given the limited availability of information in the public domain concerning the GST, we cannot provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, because of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

We have not determined the effect of such legislations on our business. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws

or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

51. Investors may have difficulty enforcing foreign judgments against us or our management.

We are a limited liability company incorporated under the laws of India. All our directors and executive officers are residents of India and all our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon us or such persons outside of India, or to enforce judgments obtained against such parties outside of India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of the Code of Civil Procedure, 1908 ("CPC") on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognise the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record.

However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside of India which the Central Government has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalty.

The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States on civil liability, whether or not predicated solely upon the federal securities laws of the United States, would not be enforceable in India. However, the party in whose favour such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

It is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian practice. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered.

52. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the EMERGE Platform of NSE may not develop or be sustained after the Issue. Our Company and the Lead Manager have appointed [●] as Designated Market Maker for the Equity Shares of our Company. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the EMERGE Platform of NSE, securities

markets in other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

Indian Economy Overview

Source: <https://www.ibef.org/economy/indian-economy-overview>

INTRODUCTION

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022-23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

ROAD AHEAD

The pharmaceutical industry in India is a significant part of the nation's foreign trade and offers lucrative potential for investors. Millions of people around the world receive affordable and inexpensive generic medications from India, which also runs a sizable number of plants that adhere to Good Manufacturing Practices (GMP) standards set by the World Health Organization (WHO) and the United States Food and Drug Administration (USFDA). Among nations that produce pharmaceuticals, India has long held the top spot. Medicine spending in India is projected to grow 9-12% over the next five years, leading India to become one of the top 10 countries in terms of medicine spending. Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers, which are on the rise. The Indian Government has taken many steps to reduce costs and bring down healthcare expenses. The National Health Protection Scheme, which aims to offer universal healthcare, the ageing population, the rise in chronic diseases, and other government programmes, including the opening of pharmacies that offer inexpensive generic medications, should all contribute to boost the Indian pharmaceutical industry. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian pharmaceutical companies. In addition, the thrust on rural health programmes, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

ORAL LIQUID means a composition intended for oral administration to a patient comprising any of (i) a liquid solution, (ii) a solid-in-liquid suspension, and (iii) a powder or other solid formulation intended to be reconstituted into a liquid solution or a solid-in-liquid suspension. Liquid manufacturing is not a complex process. Most of liquids is prepared in Sugar syrup base except sugar free liquids. Sugar grade and quality should be high. Water

used for making syrup is De-mineralized water for prevention of any reaction to mineral present in water with ingredients used for preparation.

- After preparation of syrup base, filter it to remove impurities from it.
- After filtration transfer again it in sugar melting vessel and add active ingredients & other excipients.
- Mixed it by stirrer and high-speed homogenizer with heating
- Then leave it for cooling purpose with continuous stirring.
- Filter it and transfer it to storage tank (With Stirring).
- Passed it through colloid mill for homogeneous mixing
- Transfer it to floating tank of filling machine by transfer pump system.
- Fill liquid into bottles of your choice i.e. 100 ml/200 ml/500 ml etc.
- Place cap to the neck of bottle and sealed it.
- Send sealed bottle for labeling and packaging purpose

Flow Chart for Manufacturing Process of Suspensions:

Manufacturing Flow Chart and IPQC Test Of SUSPENSION

1. A Suspension is a heterogeneous mixture in which the solute particles do not dissolve but get suspended throughout the bulk of the solvent, let floating around freely in the medium. □ A Pharmaceutical Suspension is a coarse dispersion in which internal phase (therapeutically active ingredient) is dispersed uniformly throughout the external phase.
2. Based on general classes - □ Oral suspension (eg: Paracetamol Suspension Antacids, Tetracycline) □ Externally applied suspension (eg: Calamine Lotion). □ Parenteral Suspension (eg: Procaine Penicillin G-Insulin Zinc Suspension C) Based on electrokinetic nature of solid particle □ Flocculating- □ Deflocculating-
3. Based on Size of Solid Particles – □ Colloidal Suspensions (< 1 micron) -Suspensions having particle sizes of suspended solid less than about 1micron in size are called as Colloidal Suspensions. □ Coarse suspensions (>1 micron) - Suspensions having particle sizes of greater than about 1micron in diameter are called as coarse suspensions. □ Nanosuspensions- Suspensions are the biphasic colloidal dispersions of nanosized drug particles stabilized by surfactants. Size of the drug particles is less than 1mm.
4. Advantages- □ Suspension can improve chemical stability of certain drug. Eg. Procaine Penicillin G. □ Drug in suspension exhibits higher rate of bioavailability than other dosage forms. □ Solution > Suspension > Capsule > Compressed Tablet > Coated Tablet ¾ Duration and onset of action can be controlled. Eg: Protamine Zinc- Insulin Suspension. □ Suspension can mask the unpleasant / bitter taste of Drug. Eg: Chloramphenicol.
5. The formulation of a suspension depends on whether the suspension is flocculated or deflocculated. □ Three approaches are commonly involved- 1. Use of structured vehicle 2. Use of controlled flocculation 3. Combination of both of the methods
6. Structured Vehicles are also called thickening or suspending agents. □ They are aqueous solutions of natural and synthetic gums. □ These are used to increase the viscosity of the suspension. □ It is applicable only to deflocculated suspensions. Eg: Methyl Cellulose, Sodium Carboxy Methyl Cellulose, Acacia, Gelatin and Tragacanth □ These Structured Vehicles entrapped the particle and reduces the sedimentation of particles. Thus, the use of deflocculated particles in a structure vehicle may form solid hard cake upon long storage.
7. Too high viscosity is not desirable as: a) It causes difficulty in pouring and administration. b) It may affect drug absorption since they adsorb on the surface of particle and suppress the dissolution rate. □ Structured vehicle is not useful for Parenteral Suspension because they may create problem in syringe ability due to high viscosity.

8. Controlled Flocculation of particles is obtained by adding Flocculating Agents, which are: (1) Electrolytes (2) Surfactants (3) Polymers.
9. Wetting Agents - They are added to disperse solids in continuous liquid phase. □ Flocculating Agents- They are added to floc the drug particles. □ Thickeners - They are added to increase the viscosity of suspension. □ Buffers and pH adjusting agents -They are added to stabilize the suspension to a desired pH range. □ Osmotic Agents - They are added to adjust osmotic pressure comparable to biological fluid. □ Coloring Agents - They are added to impart desired color to suspension and improve elegance. □ Preservatives - They are added to prevent microbial growth. □ External liquid vehicle They are added to construct structure of the final suspension.
10. Step 1: Suspensions are prepared by grinding (or) levigating the insoluble materials in the mortar to a smooth paste with a vehicle containing the wetting agent. Step 2: All soluble ingredients are dissolved in same portion of the vehicle and added to the smooth paste to Step-1 to get slurry. Step 3: The slurry is transformed to a graduated cylinder; the mortar is rinsed with successive portion of the vehicle. Step 4: Decide whether the solids are Suspended in a Structured Vehicle, Flocculated, and then Suspended. Add the vehicle containing the Suspending Agent (or) Flocculating Agent. Step 5: Make up the dispersion to the final volume. Thus, Suspension is prepared.
11. In Process Quality Control Test of Suspension
12. IPQC stands for IN PROCESS QUALITY CONTROL. These are checks that are carried out before the Manufacturing Process is completed. The function of In-process Controls is monitoring and if necessary adaption of the Manufacturing Process, in order to comply with the specifications. This may include control of equipment and environment too. In-process Materials should be tested for identity, strength, quality, and purity as appropriate and approved or rejected by the Quality Control Unit during the Production Process. Rejected in- process materials should be identified and controlled under a quarantine system designed to prevent their use in manufacturing. Written procedure should be established and followed that describe the In-process Controls and tests as specified.
13. Visual inspection- □ With visual inspection the API and final products are carefully examined for purity and for appearance. □ Physical appearance of products are critical for the product acceptability to the patients. 2. Color, odour, taste- Those are very important IPQC tests for suspension as changes in color, odour and taste indicates chemical instability.
14. Density Measurement - Density Measurement is very important for suspension. Decrease in density indicates that entrapped air is there in the structure of the suspension. It can be measured by hydrometer.
15. pH Values - □ pH of the suspension is checked to maintain the stability as well as formulation characteristics. □ So pH of the different vehicles, phases of suspension before and after mixing, pH should be checked time to time to monitor optimum pH. □ It can be checked using pH meter or pH paper.
16. Clarity Testing – Clarity Testing is carried out to check whether any particulate is there in the formulation or not. This Test is carried out to ensure that there will be no problem during the suspension filling during the Manufacturing Process.
17. Sedimentation Volume – The Suspension Formulation (50 ml) is poured into separate measuring cylinder 100 ml and Sedimentation Volume is read after 1, 2, 3, 7 days interval for 12 weeks. Triplicate Results are obtained for each preparation. Sedimentation volume is calculated using the formula $F = V_u/V_o$ Where F = Sedimentation Volume, V_u = Ultimate volume of Sediment, V_o = Initial volume of Total Suspension.
18. It provides information about the settling behaviour. □ The arrangements of the vehicle and the particles structural features. □ Brookfield viscometer is used to study the viscosity of the suspension. Electrokinetic Method - Zeta potential can be measured by Zeta Plus and Microelectrophoresis apparatus. -It shows stability of a disperse system by applying EMF which propels Zeta Particles (+/-). -approximately 1 ml of suspension was transferred to plastic cuvette using a pipette and diluted with distilled water. -25° C and Refractive Index 1.33 is set. The Zeta Potential of the sample was measured on day 0, 7, 14, 21 and 28th day Post-Formulation.
19. Determine the content of the active ingredients of each of 10 containers taken at random using any suitable analytical method. □ The preparation complies with the test if the individual values that obtained thus are all between 85 to 115 percent of the average value. □ The preparation fails to comply the test if any one individual

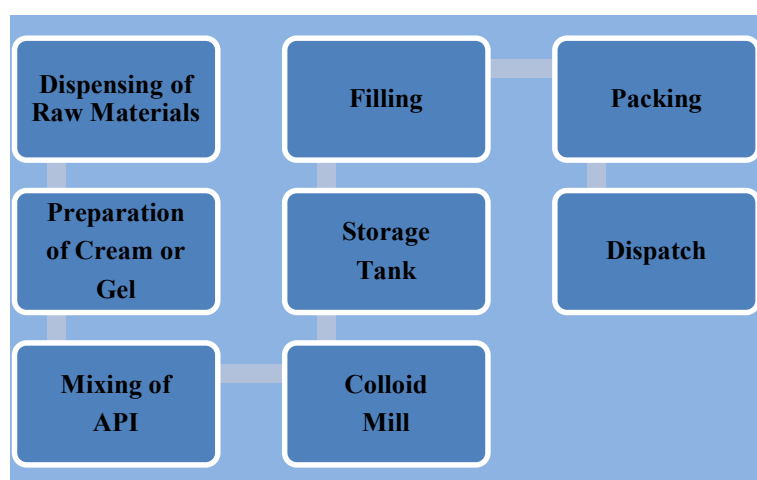

lies outside 75 to 125 percent of the average value or more than one of the individual lies outside the range 75 to 125 percent of the average value.

20. The stability of the suspension depends on the particle size distribution with respect to time of the dispersed phase.
 - A change in particle size can be measured by Microscopy or Coulter Counter Method. □ Photomicroscopic Technique is also a important tool for this. □ By attaching Polaroid camera with photo microscopes , a rapid processing of photomicrographs of the suspension can be achieved.
21. If the particles in the Suspension settle, they should be easily dispersed by application of shaking. For maintaining the consistency and stability, this is a very important IPQC Test.

External Preparations

Ointments along with similar products like Creams, Lotions, Gels or Pates are certain formulations primarily designed to be applied to the skin.

Flow Chart for Manufacturing of External Preparations:

This process consists of the following steps:

1. In this process, first water is heated in a container; then wax components are added in the same container. They are stirred and heated together. After that, the drug components are also introduced in the same container, and heating and stirring are continued. The Planetary Mixer is used to help the thorough mixing.
2. The material is transferred to the storage vessel passing through a colloid mill for the reduction of particle size as well as for the proper homogenization of the product. The storage vessel will have a heating system and wheels for movement.
3. The next procedure is same. The material is heated in the storage vessel to make sure easy transport to the filling machine. The Metering Pump is used for the transportation. Triple Roller Mill helps in removing extra liquid content from the final product.
4. The procedure for filling, sealing, and packing the tubes is also the same as discussed before in the Automatic Process.
5. The vessels and containers used in the process are washed and cleaned. And here we go, our ointment tubes are ready to rock on the market.

END USE BASED ON PRODUCT CATEGORIES

Beta-Lactum Products

Beta-Lactam are a group of medicines that are used to treat infections caused by some germs (bacteria and certain parasites). They do not work against infections that are caused by viruses - for example, the common cold or flu. There are various type of dosages in this group like Tablets, Capsules, Injection and Dry Syrups for Oral Solution.

Antibiotics are normally only prescribed for more serious bacterial infections, as many infections get better on their own. Correct use of antibiotics is absolutely essential to help reduce antibiotic resistance. Germs become resistant to antibiotics over time, which then makes them less effective.

Normally these drugs are expensive in compared to general group of Solid Oral Dosage Forms.

Non-Beta-Lactam Tablets & Capsule Products

This group medicines are generally used for general diseases like Cold, Flu, Fever, Anti-gastrological, Anti-malaria, and several other viral diseases. Our Company majorly manufactures Tablets and Capsules of this Group.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Currently, our business model is such that we have strong control over our product manufacturing because of regularization. But our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our

competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc. are key factors in client decisions among competitors, however, price is the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue.

IMPACT OF COVID-19

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been minutely affected as our manufacturing units employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the Government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national, and global economies. The manufacturing units only operated at below regular capacities because of manpower shortages.

Approach to Marketing and Marketing Set-up

Our top management and key executives enjoy the confidence of several corporate clients. We interact with our customers to get the feedback on the quality of products and services and improve the same as well. The marketing team regularly stays in touch with our customers. They also regularly approach new customers to try and develop a business relationship.

INDUSTRY-SPECIFIC REGULATIONS

There are no specific laws in India governing the segments in which we operate.

Following is an overview of some of the important laws and regulations, which are relevant to our business.

Indian Contract Act, 1872

The Indian Contract Act, 1872 provides for seeking data protection under contract law and common law, by incorporating confidentiality and data protection clauses in contracts. According to this Act, when a party commits a breach of contract, the other party is entitled to receive compensation for any loss or damage caused to it. Specific performance of the contract is also a remedy under the Act. Thus companies acting as 'data importers' may enter into contracts with 'data exporters' to adhere to a high standard of data protection.

The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013

The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 (“Land Acquisition Act, 2013”) has replaced the Land Acquisition Act, 1894 and aims at establishing a participative, informed and transparent process for land acquisition for industrialization, development of essential infrastructural facilities and urbanization. While aiming to cause least disturbance to land owners and other affected families, it contains provisions aimed at ensuring just and fair compensation to the affected families whose land has been acquired or is proposed to be acquired. It provides for rehabilitation and resettlement of such affected persons. The Land Acquisition Act, 2013 has recently been amended by the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement (Amendment) Ordinance, 2014 (the “Ordinance 2014”). Under the Ordinance 2014, land acquired for certain projects is exempted from the applicability of certain sections of the Land Acquisition Act, 2013 relating to determination of social impact and public purpose and safeguarding of food security. The exempted projects are those in the area of (i) national security or defence of India; (ii) rural infrastructure including electrification; (iii) industrial corridors and building social infrastructure including public private partnership where ownership of land continues to be vested with the government; (iv) affordable housing and housing for poor people and (v) industrial corridors. Further, in case of acquisition of land under the 1894 Act where an award has been made five years or more prior to the commencement of the Land Acquisition Act, 2013 and physical possession of the land has not been taken or compensation has not been made, the proceedings will be deemed to have lapsed and the government may start fresh proceedings under the Land Acquisition Act, 2013.

The Specific Relief Act, 1963

The Specific Relief Act is complimentary to the provisions of the Contract Act and the T.P. Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. ‘Specific performance’ means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

Certain laws and regulations that may be applicable to our Company include the following:

- Child Labour (Prohibition and Abolition) Act, 1986
- Minimum Wages Act, 1948
- The Employees Pension Scheme, 1995
- The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013

Other Laws and Regulations

In addition to the above, our Company is also required to comply with the provisions of the Companies Act, and other applicable statutes imposed by the Centre or the State for its day-to-day operations. Our Company is also amenable to various central and state tax laws.

Industry Related Laws and Regulations

- The Drugs and Cosmetics Act, 1940 (the “DCA”) and the Drugs and Cosmetics Rules, 1945 (the “Rules”)
- Drugs (Control) Act, 1950 (“Drugs Act”)
- Drugs (Prices Control) Order, 2013 (“DPCO”)
- The Narcotic Drugs and Psychotropic Substances Act, 1985 (“NDPS Act”)
- The Essential Commodities Act, 1955 (the “ECA” or the “Act”)
- National Pharmaceuticals Pricing Policy, 2012 (the “2012 Policy”)
- The Drugs and Magic Remedies (Objectionable Advertisements) Act, 1954 (the “DMRA”)

You should read the following discussion of our financial condition and results of operations together with our restated financial statements included in the Draft Prospectus. You should also read the section entitled "Risk Factors" on page 16, which discusses a number of factors, risks and contingencies that could affect our financial condition and results of operations. The following discussion relates to our Company and is based on our restated financial statements, which have been prepared in accordance with Indian GAAP, the Companies Act and the SEBI Regulations. Portions of the following discussion are also based on internally prepared statistical information and on other sources.

Our financial statements have been prepared in accordance with Indian GAAP, the Companies Act and the ICDR Regulations and restated as described in the restated financial statements dated January 12, 2023 which is included in this Draft Prospectus under "Restated Financial Statements". The Restated Financial Information has been prepared on a basis that differs in certain material respects from generally accepted accounting principles in other jurisdictions, including US GAAP and IFRS. Our financial year ends on March 31 of each year, and all references to a particular financial year are to the twelve-month period ended March 31 of that year.

Significant Developments Subsequent to the Last Financial Period

In the opinion of the Board of Directors of our Company, other than as mentioned below, since the date of the last financial statements disclosed in this Draft Prospectus, there have not arisen any circumstance that materially or adversely affect or are likely to affect the business or profitability of our Company or the value of its assets or its ability to pay its material liabilities within the next twelve months.

However, following are the major developments after December 31, 2022:

We have made following post December 31, 2022:

Date of Allotment	No. of Equity Shares	Face Value (₹)	Issue Price (₹)	Nature / Reason of Allotment	Nature of Consideration	Cumulative No. of Equity Shares	Cumulative Paid Up Share Capital (₹)	Cumulative Share Premium (₹)

COVID 19 Pandemic:

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been minutely affected as our manufacturing units employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the Government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national, and global economies. The manufacturing units only operated at below regular capacities because of manpower shortages.

Key factors affecting the results of operation:

Our Company's future results of operations could be affected potentially by the following factors:

Economic conditions in the markets in which we operate

Our results of operations are dependent on the overall economic conditions in the markets in which we operate, including India. Any change in macro-economic conditions in these markets, including changes in interest rates, government policies or taxation and political, economic or other developments could affect our business and results of operations. The iron and steel market in India may perform differently and be subject to market and regulatory developments that are dissimilar to the markets in other parts of the world. While stronger macro-economic conditions tend to result into higher demand for our products, weaker macro-economic conditions tend to result into lower demand. Change in demand in the market segments we currently supply or improvement/deterioration in the market or a change in regulations, customs, taxes or

other trade barriers or restrictions could affect our operations and financial condition.

Regulatory developments

Our Company is regulated by the Companies Act and some of its activities are subject to supervision and regulation by statutory and regulatory authorities. It is therefore subject to changes in Indian law, as well as to changes in regulation and government policies and accounting principles.

The following important factors could cause actual results to differ materially from the expectations include among others:

- General economic and business conditions;
- Volatility in financial market
- Increasing competition in the industry;
- Changes in the value of the Indian rupee and other currencies;
- Changes in laws and regulations that apply to the industry;
- Changes in fiscal, economic or political conditions in India;

Reliance on major customers

Our top 10 customers represented 96.23%, 82.51% and 99.27%, respectively, of our revenue from operation for nine months period ended December 31, 2022, Fiscal 2022 and Fiscal 2021, respectively. Any reduction in orders from our top 10 customers would adversely affect our income. The demand from our major customers, in particular our top 10 customers, determines our revenue levels and results of operations, and our sales are directly affected by their production and inventory levels. Over the years, we have developed strong relationships with our customers through whom we have been able to expand our product offerings and also our geographic reach. Our business depends on the continuity of business with these customers.

Other Key factors affecting our financial condition and our results of operations:

Important factors that could cause actual results to differ materially from our expectations include but are not limited to:

- Increased competition in this industry;
- Our ability to successfully implement our growth strategy and expansion plans, and to successfully launch and implement various projects and business plans including those for which funds are being raised through this Issue;
- Fluctuations in operating costs;
- Any adverse incident, including natural disaster, outbreak of any pandemic during or before our exhibitions;
- Our ability to maintain and expand our existing exhibitions;
- Our ability to enter into new verticals and setup new exhibition brands;
- Our ability to attract and retain qualified personnel;
- The performance of the financial markets in India and globally; and
- Any adverse outcome in the legal proceedings in which we are involved.

Phased implementation of Unified Payments Interface

SEBI has issued a **UPI Circulars** in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹ 500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (*earlier known as Department of Industrial Policy and Promotion*) (“**DPIIT**”), issued the FDI Policy, which is effect from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-Debt Instruments Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the FDI Policy and the FEMA Non-Debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus.
