PRIMARY BUSINESS AND THE INDUSTRY

SUMMARY OF OUR BUSINESS

Zeal has 9 years of existence in the air cargo industry and continues to strive to be the global General Sales and Service Agent (“GSSA”). Our Company is a steadfast forward-looking company with a comprehensive experience in GSSA cargo business. GSSA is a sales partner for an airline in the offline region. We have created a squad of expertise to serve around the clock and is particularly skilled to put quality at its zenith level.

OVERVIEW OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

INDIAN LOGISTICS INDUSTRY

India is world's fifth largest economy by nominal GDP and is one of the fastest-growing economies globally. Efficient logistics is the bed rock for a growing economy like India. The reduction in logistics cost could be a key enabler in enhancing the competitiveness of all sectors of the economy. Improving supply chain efficiencies and reducing logistics costs are fundamental to India capitalizing on this strategic shift and meeting the well-defined aspiration to become a USD 5 trillion economy as set by the Hon'ble Prime Minister.

Improvement in Logistics is the cornerstone of the Government's push towards achieving Aatma Nirbhar Bharat. Various initiatives are being taken by the Central and State/UT governments to improve logistics ecosystem across the country. Infrastructure development initiatives like Sagarmala, Bharatmala, Dedicated Freight Corridors (DFCs) amongst others are under different stages of implementation. Besides, regulatory and process related reforms like paperless EXIM trade process through E-Sanchit, faceless assessment through Turant Customs and introduction of mandatory electronic toll collection system (FASTag) have contributed to increasing the efficiency of the logistics sector.

The Indian logistics industry is growing, due to a flourishing e-commerce market and technological advancement. The logistics sector in India is predicted to account for 14.4% of the GDP. The industry has progressed from a transportation and storage-focused activity to a specialised function that now encompasses end-to-end product planning and management, value-added services for last-mile delivery, predictive planning, and analytics, among other things. One of the key drivers of this expansion is projected to be the rise of India's logistics industry, which employs 22 million people and serves as the backbone for various businesses. The logistics sector in India was valued at US\$ 250 billion in 2021, with the market predicted to increase to an astounding US\$ 380 billion by 2025, at a healthy 10%-12% year-on-year growth rate. Moreover, the government is planning to reduce the logistics and supply chain cost in India from 13-14% to 10% of the GDP as per industry standards.

The industry is crucial for the efficient movement of products and services across the nation and in the global markets. The logistics business is highly fragmented and has over 1,000 active participants, including major local players, worldwide industry leaders, the

express division of the government postal service, and rising start-ups that focus on e-commerce delivery. The industry includes transportation, warehousing, and value-added services like packaging, labelling, and inventory management. With the advent of technology-driven solutions such as transportation management systems (TMS) and warehouse management systems, India's logistics industry has witnessed tremendous development in recent years (WMS). These solutions have assisted logistics firms in increasing operational efficiency, lowering costs, and improving customer service.

Air Cargo Overview

India's Air Freight Market is estimated to be USD 13.08 Bn in 2023 and is expected to reach USD 17.22 Bn by 2028, growing at a CAGR of 5.65%.

According to the Trade and Transport Group's recently published report 'India Air Cargo Outlook 2023,' India generated 2.2 million tonnes of traffic in 2018, with a projected increase to 2.5 million tonnes in 2023. In terms of relative size, our air cargo traffic was one-fifth the size of China's and one-tenth the size of the US air cargo market, with roughly 30% of traffic generated domestically and the remainder internationally.

With economic and trade growth expected to outperform in the near term, there are opportunities for growth, driven by intermediate and manufactured goods imports and exports, as well as e-commerce traffic. India could benefit from a shift away from China by the United States and Europe, but this is dependent on how manufacturing capacity develops, particularly in the consumer goods and high-tech sectors.

We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage, working conditions, employee insurance, and other such employee benefits and any changes to existing labour legislations, including upward revision of wages required by such state governments to be paid to such contract labourers, limitations on the number of hours of work or provision of improved facilities. Further, there can be no assurance that disruptions in our business will not be experienced if there are strikes, work stoppages, disputes or other problems with sub-contractors or contract labourers deployed at our projects. This may adversely affect our business and cash flows and results of operations.

- 5. *Any failure to maintain quality control systems for our services could have a material adverse effect on our business, reputation, results of operations and financial condition.***

The quality and timely delivery of the services we provided is critical to our success. Maintaining consistent service quality and timely delivery depends significantly on the effectiveness of the quality control systems, policies and guidelines that our suppliers have in place, which in turn depends on a number of factors, including the design of the quality control systems and employee implementation and compliance with those quality control systems. There can be no assurance that the quality control systems that our suppliers have in place will prove to be effective. Further, we do not have any long-term or exclusive arrangements with dealers or distributors for selling our services.

We are primarily dependent on IATA Agents for our business. We have over the years developed a network of IATA Agents across India. We intend to grow our business by adding new IATA Agents both in existing as well as in new markets.

Due to the nature of our business, we have not entered into any agreement for the sale of our services. There is no assurance that we will be able to maintain the same levels of business from our existing IATA Agents or that we will be able to replace our IATA Agents base in a timely manner or at all in the event our existing IATA Agents do not continue to purchase the service of our Company. The loss of or interruption of work by, a significant number of IATA Agents may have an adverse effect on our revenues and operations.

While we believe that our relationship with these parties has been satisfactory, there are no arrangements that we have entered into with our IATA Agents, and there is no assurance that they will not place orders with other players in the market. In addition, our IATA Agents could change their business practices and their payment terms. In an event our IATA Agents experience delays in placing orders with us or if they do not effectively market our services or market the services of our competitors instead, there could be a material adverse effect on our business forecast, business growth and prospects, financial condition and results of operations.

In addition, our IATA Agents could change their business practices, such as inventory levels or line of businesses. The inability of our IATA Agents to meet our payment schedules or other practices by our IATA Agents could negatively impact our business, operating cash flows and financial condition. Our inability to maintain our existing distribution network of IATA Agents or to expand it proportionately with the proposed increase in our service capacities, could have a material adverse effect on our sales, business growth and prospects, results of operation and financial condition

7. *The fall in cargo volumes and the increase in transport capacity caused freight rates to drop, which may adversely affect our business operation and financial condition.*

This is impacted by the slow recovery of air cargo belly capacity in East Asia, labor shortages, rerouted European flights due to the war in Ukraine, elevated jet fuel prices, and high inflation.

During an air market downturn, freight rate validities are expected to be shorter as freight buyers are reluctant to fix rates on a falling freight rate market. There is increasing interest in vertical integration, and so carriers are taking more business within traditional air cargo and freight forwarder territory. This reduction in load factor naturally generated pressure on prices. There was a general reduction in January 2023 from one month to the next.

8. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market in which our Company is doing business is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their services at highly competitive prices which may not be matched by us and consequently affect our volume of revenue and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

9. *We do not own registered office and the corporate office which are currently in use by our Company.*

Our registered office is rented, vide lease deed dated November 1, 2019 for the period of 5 years.

Further, the premises used by us as office in Mumbai is being used in terms of Rent Agreement dated March 10, 2022 granted to our Company to use the said office premises, as our Branch Office for the period of 22 months.

In the event, the permission to use and/or Rent Agreement under which we occupy the aforementioned premises or certain terms and conditions that are unfavorable to us are imposed on us in relation to the afore referred to premises, or if we are otherwise unable to occupy such premises, we may suffer a disruption in our operations, which could have an adverse effect on our business and financial results.

10. *Our Company has delayed in complying with certain statutory provisions under various laws. Such delayed compliance /lapses may attract certain penalties.*

Our Company is required to make filings under various rules and regulations as applicable under the applicable provisions of the Companies Act, 2013 which is usually done within the prescribed time period by the Company. However in some instances delay has occurred in filing RoC filings like MGT-14 and PAS-3 with respect to allotment of Sweat Equity Shares, allotment of equity shares pursuant to conversion of loan and allotment of Bonus Equity Shares, DPT-3 with respect to return of deposits and SH-7 with respect to increase in Authorised Share Capital.

Due to delays in filings pursuant to non-functionality of MCA, our Company had, on some occasions, paid the requisite late fees. No show cause notice in respect of the above has been received by the Company till date, however any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent. Any delay / non-compliance in the past or future may render us liable to statutory penalties / actions.

11. *We have a limited number of airlines. Any kind of refusal from them can hinder our services resulting into loss of our clients.*

There are a very few airlines from which we have entered agreements for our cargo logistic and they may allocate their resources to service other clients ahead of us. While we believe that we could find additional airlines, any failure of our agreed airlines to provide services result, we may lose customers which could have a material adverse effect on our business, financial condition and results of operations.

12. *We plan to expand into new geographies within India and outside India and that may be exposed to significant liability and could loose some or major investment in such region as a result of which our business financial condition and result of our operation could be adversely affected.*

Expansion in India

We planned to expand into new geographies in the future within India and outside India. The risk involved in entering new geographies in India and expanding operation in these areas will be less than the risk involved in expansion which are being made outside India. By expanding into new geographical reasons in India, we will be targeting the particular IATA agents located into specific sectors and the cities we are targeting is Chennai, Bangalore, Ahmedabad and Hyderabad. Therein we may be exposed to significant liability and could lose some of our investment in those regions. As a result of which our business financial condition and result of operations could be adversely affected. As we will be targeting the IATA agents located in that particular city & in that particular area with the more focused sales approach.

Further the Indian subsidiary “ANSP Global Services Private Limited” will be targeting any of the new airline cargo company as a cargo partner; as per the then market scenario, this subsidiary company will take license, for those airlines, who want to do the business through different brand names under Zeal Group. Therein we may be exposed to significant liability and could lose some of our investment made and could have an adverse affecte in result of operations and financial condition of the company. For mitigating the risk, company will start business with research and sales analysis and after studying existing sales pattern of proposed cargo airlines in India.

Expansion outside India

We are planning to expand globally in different countries worldwide and currently targeting Vietnam, UAE, Thailand and Azerbaijan. The investment will be made in these countries through subsidiaries companies and our offices in starting phase will be concentrated in major city of that particular country. We will be targeting GSSA business, of customers of that country, doing business with existing and new airlines; then Zeal will be taking and representing GSSA business, of existing and new airlines, in those countries. Then company will be exposed to a significant liability and could loose some or all investments made in those regions as a result of which our business and financial conditions may get affected. TO mitigate the risk, all these investments will be made in a phased manner and on a timeline basis from a one country to another country then expanding to another country.

13. *We are dependent on our Promoters, management team, a number of Key Managerial Personnel and persons with technical expertise and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.*

We are dependent on our Promoters, Directors, senior management and other Key Managerial Personnel as well as persons with technical expertise for setting our strategic business direction and managing our business. Experienced Promoters and senior management team with significant experience in the industry lead us. We believe that the inputs and experience of our Promoters are valuable for the development of our business and operations and the strategic directions taken by our Company. We are also dependent on our Key Managerial Personnel including our business heads for the day to day management of our business operations. We cannot assure that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and train experienced, talented and skilled professionals. Competition for individuals with specialized knowledge and experience is intense in our industry. The loss of the services of any key personnel or our inability to recruit or train a sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects. Further, as we expect to continue to expand our operations, we will need to continue to attract and retain experienced management personnel. If we are unable to attract and retain qualified personnel, our results of

operations may be adversely affected.

14. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Our business is highly dependent on economic and market conditions in India. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our services may decline.

15. *The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or lead manager or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.*

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 66 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or lead manager or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business strategies, development and other plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and result of operations. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control.

16. *Our Company hires third party vendors, in India as well as globally, for requisite services, as and when required. These third-party vendors provide the requisite services on the timely basis. We have not entered into any long-term agreement with these third-party vendors. This lack of contractual arrangements exposes us to certain risks that could adversely affect our business, financial condition, and overall performance.*

We have not entered into any long term or definitive agreements with third party vendors, and instead rely on their availability, for the sales of our services because these third party vendors are rendering their services as per standard trade practices being followed by them. Our ability to control the manner in which services are provided by third party vendors is limited and we may be liable legally or suffer reputational damage on account of any deficiency of services on part of such vendors. We cannot assure you that we will be successful in continuing to receive uninterrupted and quality services from our third-party vendors. Any disruption or inefficiency in the services provided by our third-party vendors could interrupt our business operations. Also, in the absence of any contract, they may discontinue their service on a short notice and our services may be stalled or hindered due to this.

Additionally, our customers have high and exacting standards for service quality as well as delivery of our services. Any failure to meet our customers’ expectations could result in reduction in business with our Company. There are also a number of factors other than our performance that are beyond our control and that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, any of which may have an adverse effect on our business, results of operations and financial condition.

Given these circumstances, it is important for us to proactively address these risks and establish stronger relationships with our third-party vendors. Developing long-term agreements, enhancing service quality and delivery capabilities, and maintaining competitive pricing can help mitigate the potential adverse effects associated with our dependence on third party vendors.

17. *In the past Company had delayed in the EPF payments and GST returns. This may adversely affect the financial performance and regulatory compliance of the company.*

The Company's past delays in EPF payments and GST returns indicate a failure to meet regulatory compliance obligations. Such non-compliance can have serious consequences, including penalties, fines, legal actions, and reputational damage. The delays in EPF payments can result in interest liabilities, penal charges, and strained relationships with employees, impacting their morale and motivation. Dissatisfaction among employees can further lead to decreased productivity, increased attrition rates, and

potential legal disputes. Additionally, late filing of GST returns may attract penalties and disrupt the Company's cash flow, hindering its ability to meet financial obligations and impacting liquidity.

The impact of past delays extends beyond financial implications. Regulatory authorities may increase scrutiny on the Company's operations due to non-compliance with EPF and GST requirements, leading to audits, investigations, and potential legal actions. This can divert management's attention from core business activities and cause operational disruptions. Moreover, the Company's reputation among stakeholders, including employees, investors, suppliers, and customers, may be compromised due to persistent delays in EPF payments and GST returns. Negative publicity and loss of trust can have long-term consequences, affecting business relationships and the Company's growth prospects.

It is important for prospective investors to consider the potential risks and consequences associated with the delay in EPF payments and GST returns while evaluating the investment opportunity. The company shall implement robust systems, processes, and internal controls to ensure timely compliance with EPF and GST obligations to mitigate these risks effectively.

18. CARO Qualifications/Remarks in Annual Report for FY 2022

Investors should be aware that the Company's annual reports for the FY 2022 have included qualifications/remarks in the Companies Auditor's Report Order (CARO) Report. These qualifications/remarks indicate concerns raised by the auditor regarding certain aspects of the Company's financial statements, internal controls, or compliance with applicable laws and regulations. The presence of such qualifications/remarks poses potential risks, which should be carefully considered.

The remarks pertain to a demand of Rs 2,26,56,465 under section 156 of the Income Tax Act, 1961. The present status of the matter is that the company has filed an appeal with the Commissioner of Income Tax (Appeals) on 4th January 2020. However, no further communication has been received till as on date i.e. 11th July' 2023. However, the communication window with CIT(A) is currently enabled, allowing for further correspondence regarding the appeal. However, the company is waiting for the hearing notice so that the proper reply according to the questionnaire can be filed and submitted to the department. Further, the company has already deposited a sum of Rs. 45.32 lakhs on February 11, 2020, as 20% of the tax amount, as per appeal procedure, so that demand can be kept in abeyance till the disposal of appeal.

It is important for potential investors to carefully evaluate the implications of CARO qualifications/remarks in the Company's annual reports for FY 2022. They should review the specific nature and extent of the qualifications/remarks and consider their potential impact on the Company's financial performance, reputation, and overall operations. Investors may seek further information or clarification from the Company or its representatives to better understand the nature of the qualifications/remarks and assess the Company's plans for addressing them.

The Company shall take appropriate measures to address the concerns raised in the CARO qualifications/remarks and work towards strengthening its financial reporting, internal control systems, and compliance practices. However, investors should remain cautious and recognize that the presence of CARO qualifications/remarks in the annual reports for FY 2022 represents a potential risk factor that could materially impact the Company's financial performance.

Our Company and Directors are currently involved in certain tax proceedings in India which are pending at different levels of adjudication before the concerned authority/ forum. We cannot assure you that these tax proceedings will be decided in favour of our Company and Directors, as the case may be. Any adverse decision in such proceedings may render us liable to penalties and may have a material adverse effect on our reputation, business, financial condition and results of operations. Additionally, during the course of our business we are subject to risk of litigation in relation to contractual obligations, employment and labour law related, personal injury and property damage, etc.

20. Our business is concentrated in one state only. Our growth strategy to expand into new geographic areas poses risks. We may not be able to successfully manage some or all of such risks, which may have a material adverse effect on our revenues, profits and financial condition.

Our operations have been geographically concentrated in New Delhi and also has office in Mumbai. Our business is therefore significantly dependent on the general economic condition and activity in the State in which we operate along with the Central, State and Local Government policies relating to Air Logistics industry. However, Customers are located all over India. Further, we are also trying to expand in the cities like Chennai, Bangalore, Ahmedabad and Hyderabad for targeting more customers and its is possible that we may not gain acceptance or be able to take advantage of any expansion opportunities. This may place us at a competitive disadvantage and limit our growth opportunities. We may face additional risks if we undertake operations in other geographic areas in which we do not possess the same level of familiarity as competitors. If we undertake operations in different geographical locations than those currently is; we may be affected by various factors, including but not limited to:

- Adjusting our services to the new geographic area;
- Obtaining necessary Government and other approvals in time or at all;
- Failure to realize expected synergies and cost savings;
- Attracting potential customers in a market in which we do not have significant experience; and
- Cost of hiring new employees and absorbing increased costs.

21. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

We have in the course of our business entered into, and will continue to enter into, several transactions with our related parties. For further information, see “Financial Statements – Annexure 31 “Related Party Transactions” on page 118. We cannot assure you that we will receive similar terms in our related party transactions in the future. While we believe that all such related party transactions that we have entered into in last three fiscals and ten months ended January 31, 2023 are legitimate business transactions conducted on an arms’ length basis, in compliance with the requirements stipulated in Companies Act, 2013, and relevant Accounting Standards and other statutory compliances, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Any further transactions with our related parties could involve conflicts of interest.

While we have not had any conflict of interest in relation to our equity shareholders in the past, we cannot assure you that such conflicts will not arise in the future. Further, we cannot assure you that such transactions, individually or in the aggregate, will not have any adverse effect on our business and financial results, including because of potential conflicts of interest or otherwise. In Fiscal 2020, 2021, 2022 and for the ten months ended January 31, 2023, the aggregate amount of such related party transactions was ₹ 926.83 lakhs, ₹ 1,594.85 lakhs, ₹ 1,704.61 lakhs, and ₹ 3,114.47 lakhs, respectively. The percentage of the aggregate value of such related party transactions to our revenue from operations in the same periods was 12.12%, 26.32%, 14.08% and 32.80%, respectively. For further information on our related party transactions, see “Financial Statement – Annexure- 31. Related Party Transactions” on page 118.

Our business requires a significant amount of working capital. In our business, working capital is often required for security deposit with the company and for that Company is required to have a backup office maintained for this the fixed asset will be required and for selling the cargo spaces to various customers, there will be requirement of sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such requirement of the same, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our services.

Any delay in processing our payments by our clients may increase our working capital requirement. Further, if a client defaults in making payments on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults.

All of these factors, including increase in business activities, may widen the absolute gap between trade receivables and trade payables putting strain on our Company's financial resources and may result in increase in the amount of short-term borrowings/ working capital loans. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

25. Our funding requirements and the proposed deployment of Net Proceeds are not appraised by any bank financial institution, or independent agency, which may affect our business and results of operations. Any variation in the utilisation of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.

We intend to use the Net Proceeds for the purposes described in "Objects of the Issue" on page 160. As on the date of this Prospectus, our funding requirements are based on management estimates and our current business plans and is subject to changes in external circumstances, costs, business initiatives, other financial conditions or business strategies and has not been appraised by any bank, financial institution or independent agency. The deployment of the Net Proceeds will be at the discretion of our Board. However, the deployment of the Net Proceeds will be monitored by a monitoring agency appointed pursuant to the SEBI ICDR Regulations. We may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost, and other financial and operational factors. Accordingly, prospective investors in the Offer will need to rely upon our management's judgment with respect to the use of

proceeds. If we are unable to deploy the Net Proceeds in a timely or an efficient manner, it may affect our business and results of operations.

26. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks.*

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. There can be no assurance that additional deficiencies in our internal controls will not arise in the future, or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls. However, internal control system has been made strong and regular audits are being done to find out if there is any major fraud or lapses in internal control or system.

27. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

Any shortfall in raising / meeting the same could adversely affect our growth plans, operations, and financial performance. As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Offer. We meet our capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer Proceeds may delay the implementation schedule and could adversely affect our growth plans. However, the Company will alternatively arrange fund from Banks or financial institutions through loans, and increased credit terms from Creditors will support the Business.

28. *Our Company dependent on Both Passenger and Cargo Airline Industries. Lack of diversification in industries may have an adverse effect on our results of operations.*

Our Company was previously heavily reliant on the cargo industry of various airlines. To mitigate the inherent risks associated with this dependency, we have recently introduced a new segment involving passenger airlines. While this addition aims to diversify our operations and reduce reliance on a single industry, it is important to acknowledge that dependence on both the passenger and cargo airline industries could potentially have adverse effects on our business.

Additionally, maintaining our presence in the cargo airline industry does not eliminate the risks associated with this sector. The cargo industry is subject to its own set of challenges, including global trade fluctuations, regulatory changes, fuel price volatility, and technological advancements. A decline in global trade or a shift in cargo transportation preferences could adversely affect the demand for our cargo services, thereby impacting our financial performance.

29. *Major fraud, lapses of internal control or system failures could adversely impact the Company’s business.*

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company’s operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

30. *We face intense competition in our businesses, which may limit our growth and prospects. Our Company faces significant competition from other companies.*

We compete on the basis of a number of factors, including execution, depth of service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than in certain of our businesses;
- Greater brand recognition among consumers;
- More diversified operations which allow profits from certain operations to support others with lower profitability. These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

31. *The LM has relied on declarations, undertakings and affidavits for some of the Directors, Promoter and KMPs to include their details in this Draft Prospectus .*

Some of our Directors, Promoter and KMPs have been unable to trace copies of documents pertaining to their educational qualifications and/or prior professional experiences and have not provided documents of their directorships in other entities. Accordingly, reliance has been placed on signed resume, declarations, undertakings and affidavits furnished by these Directors, Promoters, and KMPs to the Lead Manager to disclose details of their educational qualifications and/or professional experience in this Draft Prospectus. Accordingly, the Lead Manager has been unable to independently verify these details prior to inclusion in this Draft Prospectus. Further, there can be no assurances that our Directors, Promoters, and KMPs will be able to trace the relevant documents or provide accurate and complete details pertaining to the above information in the future, or at all.

32. *Industry information included in this Draft Prospectus has been derived from publicly available industry reports and/or websites. There can be no assurance that such third-party statistical financial and other industry information is either complete or accurate.*

We have relied on the information from various publicly available industry reports and/or websites for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere.

33. *Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.*

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation.

In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our services;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;
- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems. You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

34. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

35. *Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.*

In the event, our client's default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

36. *The continuing impact of the COVID-19 pandemic on our business and operations is uncertain and it may be significant and continue to have an adverse effect on our business, operations and our future financial performance.*

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the onslaught of the third wave of the virus and the likelihood of a fourth wave, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

Further, if in case due to any fourth or consequent wave of Corona virus or surge in new and deadly variants of the Virus, if another lockdown is imposed in the country and further restrictions are imposed by the government, we may face huge losses and our business operations could be severely impacted. Any such restrictions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

37. *We are subject to restrictive covenants under our financing agreements that could limit the flexibility we have to manage our business.*

There are restrictive covenants in the financing agreements that we have entered into, including, but not limited to, requirements that we obtain the prior approval of, or provide notice to, our lenders in connection with certain activities.

Our financing arrangements are secured by our current assets. Many of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities and entering into certain transactions.

Any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of one or more of our credit facilities, acceleration of amounts due under such facilities and cross-defaults under certain of our other financing agreements, any of which may adversely affect our ability to conduct our business and have an adverse effect on our financial condition and results of operations.

38. *Our inability to collect receivables and default in payment from our customers could result in the reduction of our profits and affect our cash flows.*

Our operations involve extending credit for extended periods of time to our customers and agents in respect of our services, and consequently, we face the risk of non-receipt of these outstanding amounts in a timely manner or at all, particularly in the absence of long-term arrangements with customers and agents. Our credit terms vary from 30 days to 60 days for our customers and agents. While our customers typically provide us with their commitments, we cannot guarantee that our customers and agents will not default on their payments. Our inability to collect receivables from our customers and agents in a timely manner or at all in future, could adversely affect our working capital cycle and cash flows

Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our customers and agents, and as a result could cause customers and agents to delay payments to us, request modifications to their payment arrangements, that could increase our receivables or affect our working capital requirements, or default on their payment obligations to us. An increase in bad debts or in defaults by our customers and agents may compel us to utilize greater amounts of our operating working capital and result in increased interest costs, thereby adversely affecting our results of operations and cash flows.

39. *Our inability to identify and understand evolving industry trends and consumer preferences, and to provide new services to meet our customers' demands may adversely affect our business.*

Changes in consumer preferences and industry requirements may render certain of our services less attractive. Our ability to anticipate to successfully develop and introduce new and enhanced services to create new or address yet unidentified needs among our current and potential customers in a timely manner, is a significant factor in our ability to remain competitive. However, there can be no assurance that we will be able to secure the necessary knowledge, through our own research and development or through technical assistance, that will allow us to continue to develop our service portfolio or that we will be able to respond to industry trends by developing and offering services. We may also be required to make investments in research and development, which may strain our resources and may not provide results that can be monetized. If we are unable to obtain such knowledge in a timely manner, or at all, we may be unable to effectively implement our strategies, and our business and results of operations may be adversely affected.

To compete successfully, we may need to increase the diversity and sophistication of our service portfolio, which may require substantial capital expenditure. In developing such services, we may need to make investments in our research and analysis team. If we exceed our budgeted capital expenditure and cannot meet the additional capital requirements through operating cash flows

and planned financing, we may have to delay our projects which could make us less competitive and lead to customer loss.

If we do not continue to distinguish our products through distinctive features and design, and to continue to build and strengthen our brand recognition, we could lose market share and our revenues and earnings could decline.

40. *After the completion of the Issue, our Promoters along with the Promoter Group will continue to collectively hold substantial shareholding in our Company.*

As on the date of this Draft Prospectus, our Promoters and members of the Promoter Group held 100 % of the share capital of our Company, for details of their shareholding pre and post Issue, see the chapter titled “**Capital Structure**” beginning on page 52 of this Draft Prospectus. After the completion of the Issue, our Promoters along with the Promoter Group will continue to collectively hold substantial shareholding in our Company. Upon listing of the Equity Shares on recognized stock exchanges, our Promoters shall continue to exercise significant influence over our business policies and affairs and all matters requiring Shareholders’ approval, including the composition of our Board, the adoption of amendments to our certificate of incorporation, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these stockholders. The interests of the Promoters as our controlling shareholder could conflict with our interests or the interests of its other shareholders. We cannot assure that the Promoters will act to resolve any conflicts of interest in our favour and any such conflict may adversely affect our ability to execute our business strategy or to operate our business. For further details in relation to the interests of our Promoters in the Company, please see the section titled “**Our Promoters and Promoter Group**”, “**Our Management**” and “**Restated Financial Statements**” beginning on pages 123, 109 and 130 respectively.

41. *Certain Promoters and Directors are interested in our Company’s performance in addition to their remuneration and reimbursement of expenses.*

Certain of our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses and such interests are to the extent of their shareholding in our Company, their rights to nominate directors on our Board pursuant to such shareholding and interest received against a loan extended to us, amongst others. We cannot assure that our Promoters and Directors will exercise their rights to the benefit and best interest of our Company. As shareholders of our Company, our Promoters or Directors may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For further information on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see the chapter titled “**Our Management**”, “**Our Promoters and Promoter Group**” and “**Restated Financial Statements**” beginning on pages 109, 123 and 130 respectively.

42. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management’s time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

B. Issue Related

43. *There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholders’ ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

44. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed [●] as Designated Market maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance Industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

45. *Our Company's management will have flexibility in utilizing the Net Proceeds from the Issue. The deployment of the Net Proceeds from the Issue is not subject to any monitoring by any independent agency.*

Our Company intends to primarily use the Net Proceeds towards working capital requirement, general corporate purposes and for issue expenses as described in the section titled ***"Objects of the Issue"*** on page 66 of this Draft Prospectus. In terms of SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹100 crores. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change.

The fund requirement mentioned as a part of the objects of the Issue is based on internal management estimates and has not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, other financial condition or business strategies. Our actual deployment of funds may be higher than our management estimates and may cause an additional burden on our finance plans, as a result of which, our business, financial condition, results of operations and cash flows could be materially and adversely impacted.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue, our business and financial results may suffer.

46. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares is ₹ [●]. This price is being based on numerous factors. For further information, please refer to the section titled ***"Basis of the Issue Price"*** beginning on page 73 of this Draft Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following;

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

47. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the objects of the Issue as has been stated in the section ***"Objects of the Issue"*** beginning on page 66 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay

in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

EXTERNAL RISK FACTORS

48. Political, economic or other factors that are beyond our control may have an adverse effect on the Industry and on our business and results of operations.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of the industry. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

49. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “*Key Industry Regulations and Policies*” beginning on page 95 of this Draft Prospectus. We are also subject to corporate, taxation and other laws in effect in India, which require continued monitoring and compliance. These laws and regulations and the way in which they are implemented and enforced may change. There can be no assurance that future legislative or regulatory changes will not have any adverse effect on our business, results of operations and financial condition.

50. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

51. Changes in technology may render our current technologies obsolete or require us to make substantial capital investment.

Our ability to remain competitive may be adversely affected by emerging technologies and our ability to adapt to such changes. Our technology and key infrastructure may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may not have the competitive edge. Although we strive to keep our technology, equipments and infrastructures in line with the latest technological standards, we may be required to implement new technology or upgrade the equipments employed by us. Further, to mitigate the risk company has taken third party software for maintaining all the technology in the company and that third-party software are regularly being checked for the best of available in the market and latest technology can be updated. The costs in upgrading our technology and modernizing the equipments are significant which could substantially affect our finances and operations.

52. Malpractices by some players in the industry affect overall performance of emerging Companies.

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers’ attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

53. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

54. *Significant portion of our revenue is derived from business in India and a decrease in economic growth in India could cause our business to suffer.*

We derive significant portion of our revenue from operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

55. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows

56. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

57. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the EMERGE Platform of NSE in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the EMERGE Platform of NSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

58. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

59. *Our Promoter will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest and will potentially allow them to determine the outcome of matters submitted to shareholders.*

As of the date of this Draft Prospectus, our Promoter Directors, holds 100.00% of the issued, subscribed and paid-up Equity Share capital of our Company. Following completion of this Issue, our Promoter Directors, shall hold a significant percentage of our Equity Share capital. Our Promoter Directors will therefore have the ability to influence our operations including the ability to approve significant actions at Board and at shareholders' meetings such as issuing Equity Shares, paying dividends, and determining business plans and mergers and acquisitions strategies. The trading price of our Equity Shares could be adversely affected if potential new investors are disinclined to invest in us because they perceive disadvantages to a large shareholding being concentrated in our Promoter. For details of our Equity Shares held by our Promoter, please refer the section titled "**Capital Structure**" beginning on page 52 of this Draft Prospectus.

60. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

We have not declared dividends on our Equity Shares since FY 2022. We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deem relevant, including among others, our results of operations, financial condition, cash requirements, business

prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder's investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, please refer the section titled '*Dividend Policy*' beginning on page 129 of this Draft Prospectus.

61. *If there is any change in laws or regulations, including taxation laws, or their interpretation, such changes may significantly affect our financial statements.*

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Act, 2019 prescribes certain changes to the income tax rate applicable to companies in India. According to this Act, companies can henceforth voluntarily opt in favor of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies from 34.94% to approximately 25.17%. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Due to COVID -19 pandemic, the Government of India also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, amongst others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. Further, the Government of India has announced the union budget for Fiscal 2021, pursuant to which the Finance Act, 2020 ("Finance Act"), has introduced various amendments. As such, there is no certainty on the impact that the Finance Act, 2020 may have on our business and operations or on the industry in which we operate. The Government of India has recently announced the union budget for Fiscal 2022, pursuant to which the Finance Act may undergo various amendments. Our Company cannot predict whether any tax laws or other regulations impacting it will be enacted or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on the Company's business, financial condition and results of operations. In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

We cannot predict whether any new tax laws or regulations impacting our services will be enacted, what the nature and impact of the specific terms of any such laws or regulations will be or whether, if at all, any laws or regulations would have an adverse effect on our business.

62. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months may be subject to long term capital gains tax in India at the specified rates depending on certain factors, such as STT is paid, the quantum of gains and any available treaty exemptions. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the sellers resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

The Government of India has recently announced the union budget for Fiscal 2023, pursuant to which the Finance Act may undergo various amendments. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have an adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has in a decision clarified the components of basic wages which need to be considered by companies while making provident fund payments, which resulted in an increase in the provident fund payments to

be made by companies. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

Our Company cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our Company's business, financial condition, results of operations and cash flows.

63. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

64. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting the Application.

Pursuant to the SEBI (ICDR) Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting the Application. Retail Individual Investors can revise their Applications during the Issue Period and withdraw their Application until Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within six Working Days from the Issue Closing Date, events affecting the Applicant's decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, cash flows, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Applicants' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

65. Foreign investors are subject to foreign investment restrictions under Indian laws that may limit our ability to attract foreign investors, which may have a material adverse impact on the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. For further details, please refer to the section titled '*Restrictions on Foreign Ownership of Indian Securities*' beginning on page 240 of this Draft Prospectus. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

66. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could impact our business, our future financial performance and the prices of the Equity Shares.

Any change in such factors may require the Company to reschedule/ revise the planned expenditure by increasing/ decreasing the allocation for a particular purpose from the planned expenditure.

Our management, in response to the competitive and dynamic nature of the industry, will have the discretion to revise its business plan from time to time, and consequently, our funding requirement and deployment of funds may also change. In accordance with the policies of our Board, our management will have flexibility in utilizing the proceeds earmarked for general corporate purposes.

Proposed Schedule of Implementation and Deployment of Funds

The fund deployment indicated above is based on current circumstances of our business and we may have to revise our estimates from time to time on account of various factors, such as financial and market conditions, competition, interest rate fluctuations and other external factors, which may not be within the control of our management. This may entail rescheduling the proposed utilisation of the Net Proceeds and changing the allocation of funds from its planned allocation at the discretion of our management, subject to compliance with applicable laws. For further details, see “*Object of the Issue*” on page 66 of this Draft Prospectus, and “*Risk Factors*” on page 22 of this Draft Prospectus.

If the actual utilisation towards any of the Objects, as set out above, is lower than the proposed deployment, such balance will be used towards any other Object including general corporate purposes, provided that the total amount to be utilised towards general corporate purposes will not exceed 25% of the Gross Proceeds, in accordance with the ICDR Regulations. In case of a shortfall in raising requisite capital from the Net Proceeds towards meeting the Objects, we may explore a range of options including utilising our internal accruals, any additional equity or debt arrangements or both. We believe that such alternate arrangements would be available to fund any such shortfalls.

In FY 20, during Pre Covid, we used to get credit from Airlines and we were offering limited credit to our vendors / customers instead we were offering incentive schemes to pay-in early. This had resulted in a situation wherein we had negative working capital cycle.

From March 2020, with the country-wide lockdown, the freight industry was the first to feel the effects of the Pandemic. On typical flights, most passenger planes usually ferry a relatively small percentage of cargo in their under-carriers. However, with all aircraft grounded and most flights cancelled, the market has had to deal with supply shortages.

With low consumer spend, Logistics companies are facing severe payment delays from cash-strapped customers as well as higher costs due to increase in fuel prices, shortage of workers, and sanitization costs. Facing this double whammy, resulted in enhanced working capital in FY 21, FY22 and FY23. However, the impact of the pandemic is getting reduced year on year but yet to come back to pre-covid levels, the same can be seen from the reduction in Receivable Days from 56 in FY 21 to 39 for the period ended January 31, 2023.

Overall working capital is enhanced considering the above scenario, increased credit period to sustain relationship with existing customers, to add new customers and paying vendors early to get better pricing terms from them.

BASIS OF ESTIMATION

The incremental working capital requirements are based on the business plan approved by the board of directors in the board meeting held on May 29, 2023. Accordingly, we have estimated increase in Margin Money, Trade Receivables, Loans and advances including security deposits and decrease in trade payables and other current liabilities.

Assumption for future working capital requirements:

Particulars	(No. of Days)					
	As on March 31, 2020 (Restated)	As on March 31, 2021 (Restated)	As on March 31, 2022 (Restated)	As on January 31, 2023 (Restated)	As on March 31, 2023 (Estimated)	As on March 31, 2024 (Estimated)
Trade Receivables	17	56	39	38	34	45
Trade Payables	77	72	56	69	55	23

Justification for “Holding Period” levels:

The justifications for the holding levels mentioned in the table above are provided below:

Trade Receivables	Our Company gives credit facility to its customers in the normal course of business. Our outstanding Trade Receivables (calculated as closing trade receivables divided by Net sales from operations over no. of days in reporting period i.e. 365 days) were 17 days for Fiscal 2020, 56 days for Fiscal 2021, 39 days for Fiscal 2022, 38 days for the period ended January 31, 2023. Going forward, as the business cycle will improve and to build a long-term sustainable business relationship with customers and to add new customers we are envisaging to support them with credit terms of ~34 days in the Fiscal 2023 and ~45 days in the Fiscal 2024.
Trade Payables	Our Company receive the credit from Suppliers / Vendors in the normal course of business. Trade Payable days as derived from the Restated Financial Statements (calculated as Closing Trade Payables divided by cost of goods sold over no. of days in reporting period i.e. 365 days) were ~77 days for Fiscal 2020, ~72 days for Fiscal 2021, ~56 days for Fiscal 2022, ~69 days for the period ended January 31, 2023. Going forward, the Company is planning to make the vendor payment at a reduced credit period to ~ 55 days in the Fiscal 2023 and ~23 days in the Fiscal 2024 this would help us obtain better pricing from Suppliers / Vendors and aid in overall margin improvement for the Company.

The Board at its meeting held on May 29, 2023, approved the plan of utilization of Issue Proceeds as stated hereinabove. This amount is based on our management’s current estimates of the amounts to be utilized towards the respective objects. However, the actual deployment of funds will depend on a number of factors affecting our results of operation, financial condition and access to capital. Further, in the event that there is a surplus under any head, such amount shall be utilized towards general corporate purpose.

b) Investments in Subsidiaries for Business Expansion :

We are required to expand team, and capabilities by entering into new market segments and/or entering new geographies, in order to improve our efficiency, acquire new customers, leverage our existing customers and expand our offerings.

GLOBAL ECONOMIC

Global economic activity is decelerating sharply as a result of synchronized monetary policy tightening to contain very high inflation, less favorable financial conditions, and disruptions from the Russian Federation's invasion of Ukraine. According to the latest Global Economic Prospects report, global growth will slow from 2.9 percent in 2022 to 1.7 percent in 2023. The outlook has several downside risks, including the possibility of higher inflation, even tighter monetary policy, financial stress, and rising geopolitical tensions. To mitigate the impacts of recent negative shocks and promote a strong and inclusive recovery, policymakers need to prioritize reforms that support long-term growth prospects and bolster the resilience of vulnerable groups.

1 The global economy is perilously close to falling into recession

This year, the world economy is set to grow at the third weakest pace in nearly three decades, overshadowed only by the recessions caused by the pandemic and the global financial crisis. Growth has slowed to the extent that the global economy is perilously close to falling into recession defined as a contraction in annual global per capita income. Major economies are undergoing a period of pronounced weakness, and the resulting spill overs are exacerbating other headwinds faced by emerging market and developing economies (EMDEs).

2 EMDEs are projected to experience subdued growth in 2023, with activity set to remain well below its pre-pandemic trend

In EMDEs (Emerging Market and Developing Economies), growth prospects have worsened materially, with the forecast for 2023 downgraded 0.8 percentage point to a subdued 3.4 percent. The downward revision results in large part from weaker external demand and tighter financing conditions. Downgrades to growth projections mean that EMDE activity is now expected to fall even further below its pre-pandemic trend over the forecast horizon. Moreover, per capita income growth is expected to be slowest where poverty is highest.

3 **Headline inflation has started to abate but high core inflation in any countries has been unexpectedly persistent**

Global inflation has been pushed higher by demand pressures, including from earlier policy support, and supply shocks, including disruptions to both global supply chains and the availability of key commodities. Inflationary pressures have begun to abate, reflecting softening demand and easing commodity prices, and inflation is rising in fewer countries. Although inflation is likely to gradually moderate through the year, high core inflation in many countries has been unexpectedly persistent.

4 **Risks to the global outlook are tilted to the downside**

The Global Economic Prospects report features model simulations to assess two downside scenarios for the global economy. In the first scenario, central banks tighten monetary policy more than expected in response to rising inflation expectations, resulting in global GDP growth falling to 1.3 percent in 2023. In the second scenario, major central banks' policy rates are even more restrictive, and markedly tighter financial conditions lead to significant financing difficulties across EMDEs, leaving the world in recession.

5 **Global cooperation and decisive national policies are needed to bolster investment and growth prospects**

The overlapping negative shocks of the past three years have weighed on investment which is set to experience a feeble recovery and long-term growth prospects in EMDEs. Prioritizing structural reforms to stimulate investment, promote food security, and foster gender equality can help to reverse the impact of these negative shocks and buttress resilience of vulnerable populations. Global cooperation is also needed to mitigate the risk of global recession, debt distress in EMDEs, safeguard the global commodity trading system, and accelerate the clean energy transition.

Forces Shaping the Outlook

The global fight against inflation, Russia's war in Ukraine, and a resurgence of COVID-19 in China weighed on global economic activity in 2022, and the first two factors will continue to do so in 2023.

In the fourth quarter of 2022, however, this uptick is estimated to have faded in most though not all major economies. US growth remains stronger than expected, with consumers continuing to spend from their stock of savings (the personal saving rate is at its lowest in more than 60 years, except for July 2005), unemployment near historic lows, and plentiful job opportunities. But elsewhere, high-frequency activity indicators (such as business and consumer sentiment, purchasing manager surveys, and mobility indicators) generally point to a slowdown.

COVID-19 deepens China's slowdown.

Economic activity in China slowed in the fourth quarter amid multiple large COVID-19 outbreaks in Beijing and other densely populated localities. Renewed lockdowns accompanied the outbreaks until the relaxation of COVID-19 restrictions in November and December, which paved the way for a full reopening. Real estate investment continued to contract, and developer restructuring is proceeding slowly, amid the lingering property market crisis. Developers have yet to deliver on a large backlog of presold housing, and downward pressure is building on house prices (so far limited by home price floors). The authorities have responded with additional monetary and fiscal policy easing, new vaccination targets for the elderly, and steps to support the completion of unfinished

real estate projects. However, consumer and business sentiment remained subdued in late 2022. China's slowdown has reduced global trade growth and international commodity prices.

Monetary policy starts to bite.

Signs are apparent that monetary policy tightening is starting to cool demand and inflation, but the full impact is unlikely to be realized before 2024. Global headline inflation appears to have peaked in the third quarter of 2022 (Figure 1). Prices of fuel and nonfuel commodities have declined, lowering headline inflation, notably in the United States, the euro area, and Latin America. But underlying (core) inflation has not yet peaked in most economies and remains well above pre-pandemic levels. It has persisted amid second-round effects from earlier cost shocks and tight labor markets with robust wage growth as consumer demand has remained resilient. Medium-term inflation expectations generally remain anchored, but some gauges are up. These developments have caused central banks to raise rates faster than expected, especially in the United States and the euro area, and to signal that rates will stay elevated for longer. Core inflation is declining in some economies that have completed their tightening cycle—such as Brazil. Financial markets are displaying high sensitivity to inflation news, with equity markets rising following recent releases of lower inflation data in anticipation of interest rate cuts (Box 1), despite central banks' communicating their resolve to tighten policy further. With the peak in US headline inflation and an acceleration in rate hikes by several non-US central banks, the dollar has weakened since September but remains significantly stronger than a year ago.

Note: The figure shows the developments in headline and core inflation across 18 advanced economies and 17 emerging market and developing economies. Core inflation is the change in prices for goods and services, but excluding those for food and energy (or the closest available measure). For the euro area (and other European countries for which the data are available), energy, food, alcohol, and tobacco are excluded. The gray bands depict the 10th to 90th percentiles of inflation across economies.

THE FORECAST BY IMF

Global growth, estimated at 3.4 percent in 2022, is projected to fall to 2.9 percent in 2023 before rising to 3.1 percent in 2024 (Table 1). Compared with the October forecast, the estimate for 2022 and the forecast for 2023 are both higher by about 0.2 percentage point, reflecting positive surprises and greater-than-expected resilience in numerous economies. Negative growth in global GDP or global GDP per capita which often happens when there is a global recession is not expected. Nevertheless, global growth projected for 2023 and 2024 is below the historical (2000–19) annual average of 3.8 percent. The forecast of low growth in 2023 reflects the rise in central bank rates to fight inflation especially in advanced economies as well as the war in Ukraine. The decline in growth in 2023 from 2022 is driven by advanced economies; in emerging market and developing economies, growth is estimated to have bottomed out in 2022. Growth is expected to pick up in China with the full reopening in 2023. The expected pickup in 2024 in both groups of economies reflects gradual recovery from the effects of the war in Ukraine and subsiding inflation. Following the path of global demand, world trade growth is expected to decline in 2023 to 2.4 percent, despite an easing of supply bottlenecks, before rising to 3.4 percent in 2024. These forecasts are based on a number of assumptions, including on fuel and nonfuel commodity prices, which have generally been revised down since October, and on interest rates, which have been revised up. In 2023, oil prices are projected to fall by about 16 percent, while nonfuel commodity prices are expected to fall by, on average, 6.3 percent. Global interest rate assumptions are revised up, reflecting intensified actual and signaled policy tightening by major central banks since October. For advanced economies, growth is projected to decline sharply from 2.7 percent in 2022 to 1.2 percent in 2023 before rising to 1.4 percent in 2024, with a downward revision of 0.2 percentage point for 2024. About 90 percent of advanced economies are projected to see a decline in growth in 2023.

- In the United States, growth is projected to fall from 2.0 percent in 2022 to 1.4 percent in 2023 and 1.0 percent in 2024. With growth rebounding in the second half of 2024, growth in 2024 will be faster than in 2023 on a fourth-quarter-over-fourthquarter basis, as in most advanced economies. There is a 0.4 percentage point upward revision for annual growth in 2023, reflecting carryover effects from domestic demand resilience in 2022, but a 0.2 percentage point downward revision of growth in 2024 due to the steeper path of Federal Reserve rate hikes, to a peak of about 5.1 percent in 2023.

- Growth in the euro area is projected to bottom out at 0.7 percent in 2023 before rising to 1.6 percent in 2024. The 0.2 percentage point upward revision to the forecast for 2023 reflects the effects of faster rate hikes by the European Central Bank and eroding real incomes, offset by the carryover from the 2022 outturn, lower wholesale energy prices, and additional announcements of fiscal purchasing power support in the form of energy price controls and cash transfers.
- Growth in the United Kingdom is projected to be –0.6 percent in 2023, a 0.9 percentage point downward revision from October, reflecting tighter fiscal and monetary policies and financial conditions and still-high energy retail prices weighing on household budgets.
- Growth in Japan is projected to rise to 1.8 percent in 2023, with continued monetary and fiscal policy support. High corporate profits from a depreciated yen and earlier delays in implementing previous projects will support business investment. In 2024, growth is expected to decline to 0.9 percent as the effects of past stimulus dissipate.
For emerging market and developing economies, growth is projected to rise modestly, from 3.9 percent in 2022 to 4.0 percent in 2023 and 4.2 percent in 2024, with an upward revision of 0.3 percentage point for 2023 and a downward revision of 0.1 percentage point for 2024. About half of emerging market and developing economies have lower growth in 2023 than in 2022.
- Growth in emerging and developing Asia is expected to rise in 2023 and 2024 to 5.3 percent and 5.2 percent, respectively, after the deeper-than-expected slowdown in 2022 to 4.3 percent attributable to China's economy. China's real GDP slowdown in the fourth quarter of 2022 implies a 0.2 percentage point downgrade for 2022 growth to 3.0 percent the first time in more than 40 years with China's growth below the global average. Growth in China is projected to rise to 5.2 percent in 2023, reflecting rapidly improving mobility, and to fall to 4.5 percent in 2024 before settling at below 4 percent over the medium term amid declining business dynamism and slow progress on structural reforms. Growth in India is set to decline from 6.8 percent in 2022 to 6.1 percent in 2023 before picking up to 6.8 percent in 2024, with resilient domestic demand despite external headwinds. Growth in the ASEAN-5 countries (Indonesia, Malaysia, Philippines, Singapore, Thailand) is similarly projected to slow to 4.3 percent in 2023 and then pick up to 4.7 percent in 2024.
- Growth in emerging and developing Europe is projected to have bottomed out in 2022 at 0.7 percent and, since the October forecast, has been revised up for 2023 by 0.9 percentage point to 1.5 percent. This reflects a smaller economic contraction in Russia in 2022 (estimated at 2.2 percent compared with a predicted –3.4 percent) followed by modestly positive growth in 2023. At the current oil price cap level of the Group of Seven, Russian crude oil export volumes are not expected to be significantly affected, with Russian trade continuing to be redirected from sanctioning to non-sanctioning countries.
- In Latin America and the Caribbean, growth is projected to decline from 3.9 percent in 2022 to 1.8 percent in 2023, with an upward revision for 2023 of 0.1 percentage point since October. The forecast revision reflects upgrades of 0.2 percentage point for Brazil and 0.5 percentage point for Mexico due to unexpected domestic demand resilience, higher-than-expected growth in major trading partner economies, and in Brazil, greater-than-expected fiscal support. Growth in the region is projected to rise to 2.1 percent in 2024, although with a downward revision of 0.3 percentage point, reflecting tighter financial conditions, lower prices of exported commodities, and downward revisions to trading partner growth.
- Growth in the Middle East and Central Asia is projected to decline from 5.3 percent in 2022 to 3.2 percent in 2023, with a downward revision of 0.4 percentage point since October, mainly attributable to a steeper-than-expected growth slowdown in Saudi Arabia, from 8.7 percent in 2022 (which was stronger than expected by 1.1 percentage points) to 2.6 percent in 2023, with a negative revision of 1.1 percentage points. The downgrade for 2023 reflects mainly lower oil production in line with an agreement through OPEC+ (Organization of the Petroleum Exporting Countries, including Russia and other non-OPEC oil exporters), while non-oil growth is expected to remain robust.
- In sub-Saharan Africa, growth is projected to remain moderate at 3.8 percent in 2023 amid prolonged fallout from the COVID-19 pandemic, although with a modest upward revision since October, before picking up to 4.1 percent in 2024. The small upward revision for 2023 (0.1 percentage point) reflects Nigeria's rising growth in 2023 due to measures to address insecurity issues in the oil sector. In South Africa, by contrast, after a COVID-19 reopening rebound in 2022, projected growth more than halves in 2023, to 1.2 percent, reflecting weaker external demand, power shortages, and structural constraints.

INDIAN ECONOMY

India is set to be the second-fastest growing economy in the G20 in FY 23, despite decelerating global demand and the tightening of monetary policy to manage inflationary pressures. GDP growth will slow to 5.7% in FY 2023-24, as exports and domestic demand growth moderate. Inflation will crimp private consumption but moderate at the end of the projection period, helping, along with improved global conditions, to boost growth to 6.9% in FY 2024-25, in line with the 20-year average (excluding the COVID-19 recession). After a spike in 2022, the current account deficit will narrow as import price pressures abate. High medium-term global uncertainty reinforces the importance of continued efforts to raise potential output growth and resilience. Macroeconomic stability

should be pursued through monetary policy geared towards anchoring inflation expectations and fiscal policy oriented towards debt control and targeting of current and capital spending. Improvements in the business climate, when combined with financial deepening and skills development, can boost investment and infrastructure and create more and better jobs.

The strong recovery has slowed

Economic growth has lost momentum over the summer, due to a combination of erratic rainfall, which impacted sowing activities, and falling purchasing power. Concerns over demand conditions are considerable in services and infrastructure sectors, while consumers have become cautious regarding non-essential spending due to higher prices for food and energy. Tighter financial market conditions are weighing on the demand for capital goods, a leading indicator for aggregate investment. Export growth remains well-oriented, especially for services, and the progressive entry into force of comprehensive trade agreements with major partners is helping to improve prospects. Nonetheless, the monthly energy and food import bill keeps rising and the current account deficit widened in the July-September quarter to 2.9% of GDP. Headline inflation remains above 6% (the central bank's upper bound of the tolerance band), mostly due to the trend increase in the price of food (which in India accounts for a larger share of the consumer basket than in any other G20 country). Unemployment estimates suggest improving labour market conditions in both urban and rural areas, but there are few signs of a wage-inflation spiral.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022-23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDIAN LOGISTICS INDUSTRY

India is world's fifth largest economy by nominal GDP and is one of the fastest-growing economies globally. Efficient logistics is the bed rock for a growing economy like India. The reduction in logistics cost could be a key enabler in enhancing the competitiveness of all sectors of the economy. Improving supply chain efficiencies and reducing logistics costs are fundamental to India capitalizing

on this strategic shift and meeting the well-defined aspiration to become a USD 5 trillion economy as set by the Hon'ble Prime Minister.

Improvement in Logistics is the cornerstone of the Government's push towards achieving Aatma Nirbhar Bharat. Various initiatives are being taken by the Central and State/UT governments to improve logistics ecosystem across the country. Infrastructure development initiatives like Sagarmala, Bharatmala, Dedicated Freight Corridors (DFCs) amongst others are under different stages of implementation. Besides, regulatory and process related reforms like paperless EXIM trade process through E-Sanchit, faceless assessment through Turant Customs and introduction of mandatory electronic toll collection system (FASTag) have contributed to increasing the efficiency of the logistics sector.

The Indian logistics industry is growing, due to a flourishing e-commerce market and technological advancement. The logistics sector in India is predicted to account for 14.4% of the GDP. The industry has progressed from a transportation and storage-focused activity to a specialised function that now encompasses end-to-end product planning and management, value-added services for last-mile delivery, predictive planning, and analytics, among other things. One of the key drivers of this expansion is projected to be the rise of India's logistics industry, which employs 22 million people and serves as the backbone for various businesses. The logistics sector in India was valued at US\$ 250 billion in 2021, with the market predicted to increase to an astounding US\$ 380 billion by 2025, at a healthy 10%-12% year-on-year growth rate. Moreover, the government is planning to reduce the logistics and supply chain cost in India from 13-14% to 10% of the GDP as per industry standards.

The industry is crucial for the efficient movement of products and services across the nation and in the global markets. The logistics business is highly fragmented and has over 1,000 active participants, including major local players, worldwide industry leaders, the express division of the government postal service, and rising start-ups that focus on e-commerce delivery. The industry includes transportation, warehousing, and value-added services like packaging, labelling, and inventory management. With the advent of technology-driven solutions such as transportation management systems (TMS) and warehouse management systems, India's logistics industry has witnessed tremendous development in recent years (WMS). These solutions have assisted logistics firms in increasing operational efficiency, lowering costs, and improving customer service.

Air Cargo Overview

India's Air Freight Market is estimated to be USD 13.08 Bn in 2023 and is expected to reach USD 17.22 Bn by 2028, growing at a CAGR of 5.65%.

According to the Trade and Transport Group's recently published report 'India Air Cargo Outlook 2023,' India generated 2.2 million tonnes of traffic in 2018, with a projected increase to 2.5 million tonnes in 2023. In terms of relative size, our air cargo traffic was one-fifth the size of China's and one-tenth the size of the US air cargo market, with roughly 30% of traffic generated domestically and the remainder internationally.

With economic and trade growth expected to outperform in the near term, there are opportunities for growth, driven by intermediate and manufactured goods imports and exports, as well as e-commerce traffic. India could benefit from a shift away from China by the United States and Europe, but this is dependent on how manufacturing capacity develops, particularly in the consumer goods and high-tech sectors.

Government's Role Towards the Development of the Logistics Sector

The government has initiated various steps to boost the logistics sector, such as follows:

National Logistics Policy: The government has planned to release the National Logistics Policy. The planning of the strategy involved detailed conversations on the supply and demand sides with all central ministries and takes a broad view of the sectors defining precise action points. The proposed policy's objective is to boost the nation's economy and corporate competitiveness by establishing an integrated, seamless, effective, dependable, green, sustainable and cost-efficient logistics network that makes use of best-in-class tools, procedures and qualified personnel. The policy aims to reduce the logistics cost, which stands at 14% of GDP to 9-10%. The strategy will establish a single-window e-logistics market and emphasize developing skills, competitiveness and employment for MSMEs.

National Logistics Law: A national logistics law has been drafted and is under consultation. Through a unified legal framework for the paradigm of One Nation, One Contract, it would support the One Nation, One Market objective and provide a flexible regulatory environment (single bill of lading across modes). The law's provisions will make it possible to assign a distinct logistics account number in place of cumbersome registration processes.

Logistics Master Plan: This initiative is in the works which takes a geographical strategy as opposed to an industry approach. Several projects and activities will be integrated into the plan to expand the mix of intermodal and/or multimodal transportation. Coordinated construction of relevant infrastructure (gas and utility pipelines, optical fibre cable networks) is planned to prevent problems in the future. An Inter-Ministerial Committee will be used to supervise the master plan's execution. The state and local logistics strategies will be created in coordination and cooperation with the federal plans.

National Multimodal Facilities and Warehousing: In order to promote intermodal and Multimodal Logistics Parks (MMLPs) as a separate class of infrastructure and to encourage efforts with a national registry of multimodal facilities to enable price discovery, ensure optimal utilisation, and support planned development, the National Grid of Logistics Parks and Terminals is being planned. Furthermore, the government has begun to devise certain standards and guidelines that will be implemented for the development of warehousing. The government plans to optimise procedures for obtaining clearances that make the procedure of establishing warehouses more efficient, along with setting up a system for rating and certifying those warehouses for excellence.

The Logistics division has designed a digitisation initiative to provide an integrated IT foundation that would boost productivity, reduce wasteful travel and provide a slick user experience. The standards for the National Logistics Platform (iLOG) are currently being finalised in conjunction with the Ministry of [Electronics and Information Technology](#) (MEiTY). The iLOG will work to integrate a single platform for the various IT solutions that have been developed by various stakeholders, including logistics service providers, purchasers, and central and state government agencies such as customs, Directorate General of Foreign Trade (DGFT), railways, ports, airports, inland waterways and coastal shipping.

National Logistics Workforce Strategy: For the integrated skill development of professionals in the logistics sector, the government is developing a national logistics workforce strategy. Building on the framework of skill development centres already in place, which are currently based on modes of transportation, it is planned to enable cross-sectoral exchange of ideas and best practices as well as create a workforce of professionals who will be the primary force behind the development of logistics in the nation. The approaches include a coordinated effort to analyse and address present and future skill needs, mainstreaming logistics education and training in regular formal education from school through post-graduate level, and introduction of a Certified Logistics Professional (CLP) scheme, and to incentivise the engagement of such professionals. The Driver Employment and Empowerment Programme is one of the strategies, and it aims to lower logistics costs by making truck driving a desired career due to the severe scarcity of truck drivers.

Road Ahead

The initiatives taken by the government will lead to the progress of the logistics sector. The integration in the form of a multi modal network of transport and warehousing will lead to increased efficiency in the transportation and storage of goods throughout the country. By focusing on the digital aspect, the government's aim is to upgrade the existing system that will lead to faster, better communication with fewer errors that will benefit the sector significantly. The plan has a strong monitor system with periodic audits in order to check the implementation of policies and application of required corrective measures. With the aforementioned initiatives, India intends to raise its ranking in the Logistics Performance Index to 25 and cut bring down the logistics cost from 13% to 8% of GDP, leading to a reduction of approximately 40%, within the next five years. These goals were set by the National Logistics Policy. This would guarantee the logistics industry acts as a growth engine and a major factor in upgrading India to a US\$ 5 trillion economy.

Our Business Model:

Our business comprises of dealing with Airlines for Cargo and Passengers and on other hand with Shippers for their Cargo.

Airlines represented by us are on mark-up model, we have buying rates from respective airlines, after adding our margins depending on the Market situation, we offer different rates to customers according to their potential and basic commitment.

There are two types of models followed in the industry i.e., Mark up and commissionable, we are following markup model only.

- **Mark-up Model:**

In this model, company charge over and above the cost and charges its margin upfront from their customers. This mark-up model is decided on the basis of competition in the market and the sales price is derived from the daily market rates.

- **Commissionable Model:**

In this model, company agrees according to the pre-decided rate with us, and commission is being provided according to the targets achieved by us and the price remains the same irrespective of the period unless there are exceptional circumstances and we confirm that there is no commissionable model of the Company as of now.

Further we have two modes of distribution:

1. Offline Distribution
2. Online Distribution

- **Offline Distribution:**

Airlines which are not bringing their own Aircrafts to India and connect through some other airlines (Vistara, Air India, Indigo etc) out of India falls under offline distribution example – COPA, Air Europa etc.

- **Online Distribution:**

Airlines which are operating directly from India falls under online distribution For example– Azerbaijan Airlines which operates direct flight between Delhi and Baku.

We provide two types of services - Passenger carrier services and cargo carrier services

Passenger services are provided through Azerbaijan Airlines and Cargo services provided by COPA, Air Europa, Miat Mongolian, Bringer Air Cargo, Azerbaijan Airlines, FITS aviation, Astral Aviation.

General Sales and Service Agents (GSSA):

- Offline airlines (airlines not having offices and relations like GSSA or through any other mode in India for its overseas regional operations) views outsourcing of cargo as a sensible option in terms of cost saving and incremental revenue. They are looking for a strong partner who is reputable, financially sound and can add real value in terms of revenue (like Bringer Airlines providing a customer base from India who are looking for Latin America Cargo Movements), network coverage and experienced personnel who understands the needs of an Airline and its potential clients, without having any physical offices in India.

- As the General Sales and Services Agent, all the vendors are being selected by the airlines along with the timings and co-operations. We guide them as per the market conditions in India. These are the nitty-gritties which needs to be taken care of as we are representing particular airlines in India. So, if any changes are required, we make sure that they are taken into consideration by the respective airlines which leads to business growth.

OUR STRENGTHS

Scalable Business Model

Our business model is customer centric. We have attracted various airlines in India, such as Copa Airlines, Bringer Air cargo, Miat Mongolian Airlines, and Air Europa. Through Plug and Play business model, we are having customers on board with us who were sending cargo and managing the cargo of their customers through various world-wide cargo airlines through other GSSA or directly, in case we add-on any new cargo or passenger airline in our business all these existing customers are currently being associated with that particular airline through directly or indirectly will route all the business from us. So, as soon as we are getting the proceeds and having the funds, we can on-board the new airlines and this will help us in increasing sales because all those customers are directly routed through us.

Further, the Company has also ventured into the travel GSSA and the successful product is launched in terms of air travel from Delhi to Baku which is now one of the hot Destination for people who are travelling from all over the world to Baku, so from India also the product is now getting established.

These legislations empower various authorities, including the Ministry of Civil Aviation (“**MoCA**”) and Directorate General of Civil Aviation (“**DGCA**”), to regulate aircraft operations in India. In addition, the following are some of the important laws applicable to entities, like us, which provide scheduled and non-scheduled air transport services in India:

Further, the definition of “consumer” has been expanded under the CPA to include persons engaged in online and offline transactions through electronic means or by tele-shopping, or direct-selling or multi-level marketing.

- (iii) The consolidated financial statements include the share of profit / loss of the associate entities which have been accounted for using equity method as per AS 23 Accounting for Investments in Associates in Consolidated Financial Statements. Accordingly, the share of profit/ loss of each of the associate entity (the loss being restricted to the cost of investment) has been added to / deducted from the cost of investments.
- (iv) The excess of cost to the Group of its investments in the subsidiary entities over its share of equity of the subsidiary entity , at the dates on which the investments in the subsidiary entities were made, is recognised as 'Goodwill' being an asset in the consolidated financial statements and is tested for impairment on annual basis. On the other hand, where the share of equity in the subsidiary entity as on the date of investment is in excess of cost of investments of the Group, it is recognised as 'Capital Reserve' and shown under the head 'Reserves & Surplus', in the consolidated financial statements. The 'Goodwill' / 'Capital Reserve' is determined separately for each subsidiary entity and such amounts are not set off among different entities.
- (v) Minority Interest in the net assets of the consolidated subsidiaries consist of the amount of equity attributable to the minority shareholders at the date on which investments in the subsidiary companies were made and further movements in their share in the equity, subsequent to the dates of investments. Net profit / loss for the year of the

subsidiaries attributable to minority interest is identified and adjusted against the profit after tax of the Group in order to arrive at the income attributable to shareholders of the Company.

- (vi) The difference between the cost of investment in the associate and the share of net assets at the time of acquisition of shares in the associate is identified in the consolidated financial statements as Goodwill or Capital reserve as the case may be.
- (vii) The consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances and are presented to the extent possible, in the same manner as the Company's separate financial statements.
- (viii) Goodwill arising on consolidation is not amortised but tested for impairment.

2.3 Summary of significant accounting policies

(a) Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

(b) Property, Plant and Equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met, directly attributable cost of bringing the asset to its working condition for the intended use and initial estimate of decommissioning, restoring and similar liabilities. Any trade discounts and rebates are deducted in arriving at the purchase price. Such cost includes the cost of replacing part of the plant and equipment. When significant parts of property, plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Gains or losses arising from derecognition of property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

The Group identifies and determines cost of each component/ part of the asset separately, if the component/ part has a cost which is significant to the total cost of the asset and has useful life that is materially different from that of the remaining asset.

(a) Depreciation on property, plant and equipment

Depreciation on property, plant and equipment is calculated on a written down value basis using the rates arrived at, based on the useful lives estimated by the management. The identified components are depreciated separately over their useful lives; the remaining components are depreciated over the life of the principal asset. The Group has used the rates prescribed under Schedule II to the Companies Act, 2013, which interalia are

based on the estimated useful life of the assets. The Group has used the following rates to provide depreciation on its property, plant and equipment

Useful lives estimated by the management (years) as per Schedule II of Companies Act, 2013

Office Equipment	5 years
Vehicle	8 years
Furniture and Fixture	10 years
Computer	3 years

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

(b) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

Intangible assets are amortized on a straight line basis over the useful life of the as under-

Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

(c) Leases

Where the Group is a lessee:

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the statement of profit and loss on a straight-line basis over the lease term, if the lease agreement contains a specific lock-in-period otherwise expense is recognised as per lease terms.

(d) Impairment of fixed assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

Impairment losses, including impairment on inventories, are recognized in the statement of profit and loss. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or cash-generating unit's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit and loss.

(e) Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Income from services

The Group exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Group considers indicators such as how customer consumes benefits as services are rendered, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

Interest income

Revenue is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

(f) Retirement and other employee Benefits

"Retirement benefit in the form of provident fund is a defined contribution scheme. The contributions to the provident fund are charged to the statement of profit and loss for the year when the contributions are due.

The Group operates a defined benefit plans for its employees, viz., gratuity. The costs of providing benefits under this plan is determined on the basis of actuarial valuation at each year-end. Actuarial valuation is carried out for plan using the projected unit credit method. Actuarial gains and losses for defined benefit plan is recognized in full in the period in which they occur in the statement of profit and loss.

(g) Foreign currency translation**Initial recognition**

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Conversion

Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency, are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rate at the date when such value was determined.

Exchange differences

The Group accounts for exchange differences arising on translation/ settlement of foreign currency monetary items as income or as expenses in the period in which they arise.

(h) Income taxes

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Group has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

The carrying amount of deferred tax assets are reviewed at each reporting date. The Group writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

(i) **Earnings Per Share**

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes (if any)) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

(j) **Provisions & Contingencies**

A provision is recognized when the Group has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

(k) **Contingent liabilities**

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Group does not recognize a contingent liability but discloses its existence in the financial statements.

(l) **Cash and cash equivalents**

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank and in hand and short-term investments with an original maturity of three months or less.

(m) **Current and non current classification**

Group presents assets and liabilities in the balance sheet based on current/non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
 - Held primarily for the purpose of trading
 - Expected to be realised within twelve months after the reporting period, or
 - Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period
- All other assets are classified as non-current

A liability is treated as current when it is:

- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The companies have identified twelve months as their operating cycle for classification of their current assets and liabilities.

Annexure –32 Employee Benefits

The group participates in defined contribution and benefit schemes, the assets of which are held (where funded) in separately administered funds.

For defined contribution schemes the amount charged to the statement of profit or loss is the total of contributions payable in the year.

A. Defined contribution plan

The group makes contributions towards provident fund and employee state insurance scheme to a defined contribution retirement benefit plan for qualifying employees. The group's contribution to the Employees Provident Fund and Employees State Insurance scheme is deposited with the Regional Provident Fund Commissioner. Under the scheme, the group is required to contribute a specified percentage of payroll cost to the retirement benefit scheme to fund the benefits.

During the year, the group has recognised INR 2.82 Lacs, INR 3.22 Lacs, INR 3.39 Lacs and INR 4.26 Lacs for Employer's contributions to the Provident Fund and INR 0.13 Lacs, INR 0.31 Lacs, INR 0.73 Lacs and INR 1.15 Lacs for Employee State Insurance Scheme contribution in the Statement of Profit and Loss for the year ended January 31, 2023, March 31, 2022, March 31, 2021 and March 31, 2020 respectively. The contribution payable to the plan by the group is at the rate specified in rules to the scheme.

B. Defined benefit plan - Gratuity plan

The gratuity liability arises on retirement, withdrawal, resignation and death of an employee. The aforesaid liability is calculated on the basis of fifteen days salary (i.e. last drawn basic salary) for each completed year of service subject to completion of five years service.

Risks associated with Plan Provisions

Risks associated with the plan provisions are actuarial risks. These risks are:- (i) interest risk (discount rate risk), (ii) mortality risk and (iii) salary risk.

Interest risk (discount rate risk)	A decrease in the bond interest rate (discount rate) will increase the plan liability.
Mortality risk	The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants. For this report we have used Indian Assured Lives Mortality (2012-14) ultimate table. A change in mortality rate will have a bearing on the plan's liability.
Salary risk	The present value of the defined benefit plan liability is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.

In respect of the plan in India, the most recent actuarial valuation of the plan assets and the present value of the defined benefit obligation were carried out as at 31 March, 2022 by Charan Gupta Consultants Private Limited. The present value of defined benefit obligation, and the related current service cost and past service cost, were measured using the projected unit credit method.

The following tables summarise the components of net benefit expense recognized in the statement of profit and loss and amounts recognized in the balance sheet for the gratuity plan.

Comparative between FY 22 and For the period ended January 31, 2023

The PAT of our company for FY 22 was Rs. 524.30 Lakhs against Rs. 826.65 Lakh PAT for FY 21. An increase of 57.67% in PAT due to the following reasons:

- The Company has added high value vertical of temperature-controlled pharma shipments which has given us better outcome and we have added few more interline partners like Swiss Airline and Lufthansa Airlines which have enabled the Company to deliver well and has given better outcome.
- Profit was increased despite of decreased revenue because Cost of services rendered have been reduced by 7% i.e., from 86% in FY 22 to 79% in Stub period.
- The Capital employed, as can be verified from the chart above, had been increased, due to which the Company is able to provide more business to the airlines, which are on board; and they were giving a better rate due to economies of scale and in post-covid scenario it works in a very positive way for our Company and according to which the business had grown in the leaps and bounds as well.
- Company had also diversified in the new field in the operations of passenger airlines and this added business has also resulted into economies of scale because the added airlines is also having cargo facilities available to us at a competitive rate because this added Azerbaijan airlines, also having cargo facilities available with them, and now we are providing the same also at a very competitive rate in the market resulting in good results for the company.
- Further, post-covid scenario, the market is into the recovery mode and new verticals like temperature control pharma and other cargo shipment made available to various sectors and smaller player which were working on a low scale operations/ basis with the airline were not able to provide the competitive rate, because post covid-scenario economies of scale have enabled Zeal to provide better competitive rate.

- Zeal is getting better rates and pricing from these regular on-boarded airlines, due to the economies of scale.

The total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category x number of Shares applied for).

For applications where the proportionate allotment works out to less than [●] equity shares the allotment will be made as follows:

Each successful applicant shall be allotted [●] equity shares; and

The successful applicants out of the total applicants for that category shall be determined by the draw of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.

If the proportionate allotment to an applicant works out to a number that is not a multiple of [●] equity shares, the applicant would be allotted Shares by rounding off to the lower nearest multiple of [●] equity shares subject to a minimum allotment of [●] equity shares.

If the Shares allocated on a proportionate basis to any category is more than the Shares allotted to the applicants in that category, the balance available Shares for allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising of applicants applying for the minimum number of Shares.

Since present issue is a fixed price issue, the allocation in the net issue to the public category in terms of Regulation 253 of the SEBI (ICDR) Regulations shall be made as follows:

Minimum of 50% of the net issue of shares to the Public (i.e. [●] Equity Shares) shall be made available for allotment to retail individual investors; and

The balance net issue of shares to the public (i.e. [●] Equity Shares) shall be made available for allotment to Non-Institutional Investors, including Qualified Institution Buyers, Corporate Bodies/ Institutions.

The unsubscribed portion in either of the categories specified in (a) or (b) above may be allocated to the applicants in the other category.

Explanation: If the retails individual investor category is entitled to more than allocated portion on proportionate basis, the retails individual investors shall be allocated that higher percentage.

Our Company shall ensure that out of total allocated shares to the Category “Non-Institutional Investors, including Qualified Institution Buyers, Corporate Bodies/ Institutions”, at least 15% of net issue of shares to the public shall be allocated to Non- Institutional Bidders will be made at the Issue Price.

The Net Issue size less Allotment to Retail Investors shall be available for Allotment to Non- Institutional Bidders who have Bid in the Issue at a price that is equal to or greater than the Issue Price. If the aggregate demand in this category is less than or equal to [●] Equity Shares at or above the Issue Price, full Allotment shall be made to Non- Institutional Bidders to the extent of their demand.

In case the aggregate demand in this category is greater than [●] Equity Shares at or above the Issue Price, Allotment shall be made on a proportionate basis up to a minimum of [●] Equity Shares and in multiples of [●] Equity Shares thereafter. For the method of proportionate Basis of Allotment refer below.
