NSE to disseminate value of three indices online

The National Stock Exchange (NSE) will begin disseminating the value of three indices — Nifty Private Bank, Nifty Quality 30 and Nifty Midcap Liquid 15 — online on its terminal from next week, it said in a circular. The value of these indices will be available in NSE's futures and options and capital market segments on its trading terminal. Nifty Private Bank tracks 10 largest private sector banks listed on NSE while Nifty Quality 30 index reflects performance of stocks of top 30 quality companies chosen from a pool of 100 large and liquid companies listed on the bourse. The selection of stocks for Nifty Midcap Liquid 15 index will be made from Nifty Midcap 50 index. The NSE introduced these indices under its Nifty basket as part of its effort to align with global best practices.
